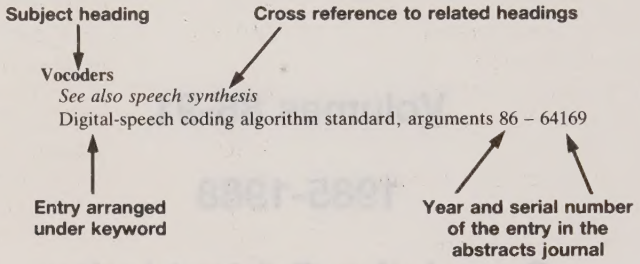
CUMULATIVE SUBJECT INDEX 1985—1988

Coverage

The present index provides a subject key to all papers abstracted in *Electrical and Electronics Abstracts* for the years 1985—1988. It therefore comprises all relevant entries included in the six monthly subject indexes for the same period.

Subject Headings

In the course of the four years covered by this index the list of subject headings has been revised and new headings have been added. The present index uses the latest (i.e. 1988) version of the list. Entries for articles abstracted in the 1985, 1986 and 1987 volumes have been examined and, where appropriate, re-indexed under the new headings.



Arrangement

The subject headings are arranged in alphabetical order. The entries under each are prepared so that the most significant or 'key' words appear first and thus determine the position and grouping of entries in the alphabetical sequence under each heading.

Where the specific inorganic substances are significant under a given heading, the entries relating to them are found as a second alphabetical listing arranged by the chemical formulae of the particular elements or compounds.

Form of entry

The information contained in the subject index may be illustrated by an example.

How to use the index

The Subject index provides an alphabetical subject key to the articles included in the abstracts journal. Some general guidance on its use is given below:

1. Look in the index for the name of the specific subject in which you are interested. In most cases this name will be a heading in the index and you will find relevant articles listed under it. The majority of the subject headings fall into the following categories: property, phenomena, substance or named objects, instrument, device, theory, method, process, application, event.

2. Occasionally you will be directed from the subject heading chosen to a different heading under which the relevant or additional articles are listed.

3. If you do not find the subject heading you first chose, try a more general heading.

4. Each entry under the heading relates to an article appearing in the abstracts journal and gives the serial number of that article in the journal preceded by the last two digits of the current year, e.g. 85—12345; i.e. abstract number 12345 in the abstracts journal for 1985.

   The language of the article, if it is not in English, is also indicated, e.g. microphone using glass fibre transducers *(German)* 86 – 70543.

   Each entry starts with a Keyword or Keyphrase considered to be most relevant to the heading. On sorting these Keywords, the qualifying prefixes are usually ignored (e.g. n-Ge is sorted under Ge).

   There are three main keyword lists; arabic numerals, alphabetical A-Z, and chemical symbols (organic substances are written and not given as chemical formula). More than one Keyword list may be present under each subject heading.

   For document on, say, 'photoemission of germanium' at least two access points 'photoemission' and 'germanium' are provided. Under the heading 'photoemission' the Keyword will be 'Ge' and under 'germanium' the Keyword will be 'photoemission'.

   In a case like this, it is advisable and quicker to use the heading 'photoemission' and go straight to the chemical symbol list for 'Ge'.

   Intermetallic compounds are indexed under the appropriate alloy headings. The chemical formula is used as Keyword. However, it is important to realise in searching the chemical symbol list that, at present, alloys and intermetallic compounds are sorted separately. For example FeCo is sorted at the end of the Fe- list e.g. Fe-Al,... Fe-Co,... Fe-Si,... Fe-Si-B,... FeCo,... FeSi and so on in this order.

Printed in Great Britain by BPCC Wheatons Ltd, Exeter

Abbreviations and Acronyms

Abbreviations and acronyms are used in the modifiers in all INSPEC Cumulative Subject Indexes. Individual terms should be readily understood in the context of the subject headings. **Inorganic substances** are usually given by their chemical formulae. Iron and aluminium garnets appear in the formulae lists as MIG and MAG (where M is metal element, e.g. YIG and YAG); $(Pb,La)(Zr,Ti)O_3$ and $Pb(Zr,Ti)O_3$ appear as PLZT and PZT. **Organic substances** including **liquid crystals** are not given as formulae but common abbreviations are used.

1D	one-dimensional
2D	two-dimensional
3D	three-dimensional
A/D	analogue-to-digital
ABS resin	acrylonitrile-butadiene-styrene resin
AC	alternating current
ACD	automatic call distribution
ACEL	AC electroluminescent
ACRT	accelerated crucible rotation technique
ACSR	aluminium conductor steel reinforced
ACV	air cushion vehicle
ADC	analogue-to-digital conversion
ADM	adaptive delta modulation
ADP	administrative data processing
ADPCM	adaptive differential pulse code modulation
ADS	automatic depressurisation system
AE	acoustic emission
AES	Auger electron spectra(oscopy)
AF	audio frequency
AFBC	atmospheric fluidised bed combustion
AFC	automatic frequency control
AFL	abstract family of languages
AFMR	antiferromagnetic resonance
AFR	away from reactor (spent fuel storage)
AGB	asymptotic giant branch
AGC	automatic gain control
AGR	advanced gas-cooled reactor
AGS	alternating gradient synchrotron
AGV	automatic guided vehicle
AI	artificial intelligence
AKR	auroral kilometric radiation
ALARA	as low as reasonably achievable
ALE	atomic layer epitaxy
ALU	arithmetic logic unit
ALV	autonomous land vehicle
ALWR	advanced light water reactor
AM	amplitude modulation or air mass number
ANOVA	analysis of variance
ANS	Advanced Neutron Source
ANSI	American National Standards Institute
AOI	automatic optical inspection
APACHE	Accelerator for Physics and Chemistry of Heavy Elements
APC	adaptive predictive coding
APCM	adaptive pulse code modulation
APCVD	atmospheric pressure chemical vapour deposition
APD	avalanche photodiode
APFIM	atom probe field ion microscopy
APK	amplitude phase keying
APR	acoustic paramagnetic resonance
APRFR	Army Pulsed Radiation Facility Reactor
APS	appearance potential spectra(oscopy)
APW	augmented plane wave
APWR	advanced pressurised water reactor
ARMA	autoregressive moving average
ARMAX	autoregressive moving average exogenous
ARPA	Advanced Research Projects Agency
ARPES	angle resolved photoemission spectra (oscopy)
ARQ	automatic repeat request
ARUPS	angular resolved ultraviolet photoelectron spectra(oscopy)
ASCII	American standard code for information interchange
ASIC	application specific integrated circuit
ASK	amplitude shift keying
ATC	air traffic control
ATE	automatic test equipment
ATF	Advanced Toroidal Facility
ATM	automatic teller machine or Axilrod-Teller-Moto
AT&T	American Telephone & Telegraph
ATR	attenuated total reflection or automatic target recognition
ATWS	anticipated transients without scram
AVC	automatic volume control
AWGN	additive white Gaussian noise
BAER	brainstem auditory evoked response
BARITT	barrier injection transit time
BAW	bulk acoustic wave
BBC	British Broadcasting Corporation or Brown Boveri Corporation
BBD	bucket-brigade device
BBGKY	Bogoliubov-Born-Green-Kirkwood-Yvon
BCC	body centred cubic
BCD	binary-coded decimal
BCDMOS	bipolar-CMOS-DMOS
BCH	Bose-Chadhuri-Hocquenghem
BCS	Bardeen-Cooper-Schrieffer
BCT	body centred tetragonal
BEBC	Big European Bubble Chamber
BEDT-TTF	bis(ethylenedithio)-tetrathiafulvalene (-inium)
BEM	boundary element method
BEPC	Beijing Electron Positron Collider
BER	bit error rate
BFL	buffered FET logic
BFO	beat-frequency oscillator
BGO	bismuth germanate
BH	buried heterostructure
BIBO	bounded input bounded output
BICMOS	bipolar-CMOS

BIL	buried injection logic
BIMOS	bipolar/metal-oxide-semiconductor
BIS	bremsstrahlung isochromat spectroscopy
BIST	built in self test
BIT	built in test
BOD	bistable optical device
BPSG	borophosphosilicate glass
BPSK	binary phase shift keying
BRD	W Germany
BRET	Breeder Reprocessing Engineering Test
BSG	borosilicate glass
BTSC	Broadcast Television Systems Committee
Btx	Bildschirmtext
BVP	boundary value problem
BWIP	Basalt Waste Isolation Project
BWO	backward wave oscillator
BWR	boiling water reactor
BWT	backward wave tube
C-V	capacitance-voltage
C^2	command and control
C^3	command control communications or cleaved coupled cavity
C^3I	command control communications and intelligence
C^3L	complementary constant current logic
CAAB/AM	companded single sideband amplitude modulation
CAD	computer aided design
CADAT	computer aided design and testing
CADD	computer aided draughting and design
CAE	computer aided engineering
CAI	computer assisted instruction
CAL	computer aided learning
CAM	computer aided manufacturing or content addressable memory
CANDU	Canadian deuterium uranium
CAR	computer aided retrieval
CARS	coherent antiStokes Raman scattering (spectra)
CASE	computer aided software engineering
CAT	computer assisted tomography or computerised axial tomography
CATT	controlled avalanche transit transistor
CATV	community antenna television or cable television
CB	citizens' band
CBE	chemical beam epitaxy
CBED	convergent beam electron diffraction
CBI	computer based instruction
CBOOA	cyanobenzylidene octyloxyaniline
CBT	computer based training
CCBA	coupled channel Born approximation
CCCS	current controlled current source
CCFL	counter current flow limiting (LOCA phenomenon)
CCD	charge-coupled device
CCIR	International Radio Consultative Committee
CCITT	International Telephone & Telegraph Consultative Committee
CCL	capacitor-coupled logic
CCTF	Cylindrical Core Test Facility
CCTR	Culham Conceptual Tokamak Reactor
CCTV	closed circuit television
CCVS	current controlled voltage source
CD	compact disc or critical dimension
CD-ROM	compact disc ROM
CDFR	Commercial Demonstration Fast Reactor
CDI	collector diffusion isolation
CDLC	cellular data link control
CDM	code division multiplexing
CDMA	code division multiple access
CDW	charge-density wave
CECL	cascode-emitter coupled logic
CEGB	Central Electricity Generating Board
CELP	code excited linear prediction
CEM	channel electron multiplier
CEPA	coupled electron pair approximation
CEPT	Conference of European Postal and Telecommunications
CERN	European Council for Nuclear Research
CESAR	CERN Electron Storage and Accumulation Ring
CESR	conduction electron spin resonance
CFAR	constant false alarm rate
CFG	context free grammar
CFL	context free language
CFSK	coherent frequency shift keying
CGH	computer-generated holography (-gram)
CGTO	contracted Gaussian-type orbital
CHF	coupled Hartree-Fock
CHO	Chinese hamster ovary
CHP	combined heat and power
CI	configuration interaction
CID	charge injection device
CIDEP	chemically induced dynamical electron polarisation
CIDNP	chemically induced dynamical nuclear polarisation
CIEH	charge iterated extended Huckel
CIM	computer integrated manufacturing or constituent interchange model
CISC	complex instruction set computer
CIT	Compact Ignition Tokamak
CMI	computer managed instruction
CML	current-mode logic
CMOS	complementary metal oxide semiconductor
CNC	computerised numerical control
CNDO	complete neglect of differential overlap
CNR	carrier to noise ratio
COG	chip-on-glass
COM	computer output to microform (fiche or film)
COMFET	conductivity-modulated field effect transistor
COVA	computer code validation

CP	charge, parity
CPA	coherent potential approximation or critical path analysis
CPC	compound parabolic concentrator
CPFSK	continuous phase frequency shift keying
CPM	continuous phase modulation or critical path method
CPSK	coherent phase shift keying
CPT	charge, parity, time
CPU	central processing unit
CPW	coplanar waveguide
CRBR	Clinch River Breeder Reactor project
CRC	cyclic redundancy check
CRDA	control rod drop accident
CRNL	Chalk River Nuclear Laboratories
CRO	cathode ray oscilloscope
CRSR	coherent resonant Stokes rotation
CRT	cathode ray tube
CS	coupled states
CSI	current source invertor
CSM	continuous slowing down models
CSMA	carrier sense multiple access
CSMA/CD	carrier sense multiple access with collision detection
CSP	channel substrate planar
CSRS	coherent Stokes-Raman spectra(oscopy)
CSSB/AM	companded single sideband amplitude modulation
CT	computerised tomography or current transformer
CTD	charge transfer device
CTL	complementary-transistor logic
CTR	controlled thermonuclear reactor
CVD	chemical vapour deposition
CVSDM	continuously variable slope delta modulation
CW	continuous wave
CZ	Czochralski
D/A	digital-to-analogue
DAC	digital-to-analogue conversion
DAD	digital audio disc
DAMA	demand assigned multiple access
DASD	direct access storage device
DAT	digital audio tape
DATAC	digital autonomous terminal access communication
DAW	dry active waste
DBMS	database management system
DBR	distributed Bragg reflector
DBS	direct broadcasting by satellite
DC	direct current
DCEL	DC electroluminescent
DCFL	direct-coupled FET logic
DCG	dichromated gelatin
DCLC	drift cyclotron loss cone (instability)
DCT	discrete cosine transform
DCTL	direct-coupled transistor logic
DDC	direct digital control
DDL	diode-diode logic
DDR	E Germany
DECENT	distribution of exact classical energy transfer
DES	data encryption standard
DESY	Deutsches Electron Synchrotron
DF	Dirac-Fock
DFB	distributed feedback
DFE	decision feedback equaliser
DFT	discrete Fourier transform
DH	double heterostructure
DHF	Dirac-Hartree-Fock
DHT	discrete Hartley transform
DIL	dual-in-line
DIP	dual in-line package
DITE	Divertor in Torus Experiment
DLTS	deep level transient spectra(oscopy)
DM	delta modulation
DMA	direct memory access
DMM	digital multimeter
DMOS	double-diffused metal-oxide-semiconductor
DMSO	dimethylsulphoxide
DNA	digital network architecture or deoxyribonucleic acid
DNMR	double nuclear magnetic resonance
DNTS	digital data exchange network testing system
DOBAMBC	p-decyloxybenzylidene p'-amino 2-methyl butyl cinnamate
DoD	Department of Defense (USA)
DOF	degree of freedom
DOPSK	differential offset phase shift keying
DORIS	Doppel-Ring-Speicher
DOS	disc operating system
DOVETT	double velocity transit time
DP	data processing
DPCM	differential pulse code modulation
DPDA	deterministic pushdown automaton
DPPC	dipalmitoyl phosphatidyl chloride
DPPH	diphenylpicrylhydrazyl
DPSK	differential phase shift keying
DQPSK	differential quadrature phase shift keying
DRAM	dynamic random access memory
DRO	dielectric resonator oscillator
DS-SSMA	direct sequence-spread spectrum multiple access
DSA	digital subtraction angiography
DSAM	Doppler shift attenuation method
DSB	double sideband
DSC	differential scanning calorimetry
DSI	digital speech interpolation
DSO	digital storage oscilloscope
DSP	digital signal processor
DSS	decision support system
DTA	differential thermal analysis
DTL	diode transistor logic
DTMF	dual tone multi-frequency
DTPP	Demonstration Tokamak Power Plant
DTU	dual topological unitarisation
DV-Xα	discrete variational Xα method
DVM	digital voltmeter
DWBA	distorted wave Born approximation
DWIA	distorted wave impulse approximation
DWPF	Defence Waste Processing Facility

E1,E2	electric dipole, quadrupole
E^2PROM	electrically erasable programmable read-only-memory
EAROM	electrically alterable read-only-memory
EAS	extensive air shower
EAX	electronic automatic exchange
EB	exponential Born
EBBA	4-ethoxybenzylidene-4'n-butylaniline
EBIC	electron beam induced current(s)
EBR	experimental breeder reactor
EBT	Elmo Bumpy Torus
EBU	European Broadcasting Union
ECC	emergency core cooling or error correction code
ECCM	electronic counter-counter measures
ECCS	emergency core cooling system
ECELR	Epithermal Critical Experiment Laboratory Reactor
ECG	electrocardiography (-gram)
ECL	emitter coupled logic
ECM	electronic countermeasures
ECoG	electrocortiography (-gram)
ECRH	electron cyclotron resonance heating
EDA	ethylene diamine
EDAX	energy dispersive X-ray analysis
EDF	Electricite de France
EDI	electronic data interchange
EDIF	electronic data interchange format
EDP	electronic data processing
EDTA	ethylene diamine tetra-acetic acid
EDTV	extended definition television
EDW	electron density wave
EDX	energy dispersive X-ray
EEG	electroencephalography (-gram)
EELS	electron energy loss spectra(oscopy)
EEPLD	electrically erasable programmable logic device
EEPROM	electrically erasable programmable read-only-memory
EFG	edge-defined film fed growth
EFL	emitter-follower logic or emitter-function logic
EFM	extended Flygare method
EFT	electronic funds transfer
EGG	electrogastrography (-gram)
EHD	electrohydrodynamics
EHDTV	enhanced high definition television
EHF	extremely high frequency
EHP	electron-hole potential method
EHT	extra high tension or extended Huckel theory
EHV	extra high voltage
EIRP	equivalent isotropically radiated power
EKG	electrokymography (-gram)
ELDOR	electron electron double resonance
ELF	extremely low frequency
EM	electromagnetic
EMC	electromagnetic compatibility or European Muon Collaboration
EMF	electromotive force
EMG	electromyography (-gram)
EMI	electromagnetic interference
EMP	electromagnetic pulse
EMS	energy management system
EMTP	electromagnetic transients program
ENDOR	electron nuclear double resonance
ENEL	Ente Nazionale per l'Energia Elettrica (Italian National Electric Energy Agency)
ENG	electronic newsgathering
EOF	end of file
EOG	electrooculography (-gram)
EOQ	economic order quantity
EPA	Environmental Protection Agency (USA)
EPMA	electron probe microanalysis
EPR	Einstein Podolsky Rosen or electron paramagnetic resonance or ethylene propylene rubber
EPRI	Electric Power Research Institute
EPROM	erasable programmable read-only-memory
ERG	electroretinography (-gram)
ESA	European Space Agency
ESCA	electron spectroscopy for chemical analysis
ESCAR	Experimental Superconducting Accelerating Ring
ESD	electrostatic discharge or electron stimulated desorption
ESF	engineering safety features
ESOC	European Space Operations Centre
ESP	electrostatic precipitators
ESPI	electronic speckle pattern interferometry
ESPRIT	estimation of signal parameters by rotational invariance techniques or European Strategic Programme for Research in Information Technology
ESS	electronic switching system
EUV	extreme ultraviolet
EW	electronic warfare
EX-OR	exclusive-OR (logic)
EXAFS	extended X-ray absorption fine structure
FAMOS	floating gate avalanche metal-oxide-semiconductor
FBC	fluidised bed combustion
FBR	fast breeder reactor
FCC	face centred cubic
FCI	fuel-cladding interaction
FCT	field controlled thyristor
FDDI	fibre distributed data interface
FDM	frequency division multiplex(ing)
FDMA	frequency division multiple access
FDNC	frequency dependent negative conductance
FDNR	frequency dependent negative resistance
FEA	finite element analysis
FECL	feedback ECL
FED	Fusion Engineering Device (USA)
FEDC	Fusion Engineering Device Centre
FEL	free electron laser

FEM	field emission microscopy or finite element method
FER	Fusion Experimental Reactor (Japan)
FET	field effect transistor
FFHR	fusion-fission hybrid reactor
FFT	fast Fourier transform
FFTF	Fast Flux Test Facility
FGD	flue gas desulphurisation
FHNC	Fermi hypernetted chain
FIB	focused ion beam
FIFO	first in first out
FIM	field ion microscopy
FIMOS	floating gate ionisation injection metal-oxide-semiconductor
FIR	far infrared or finite impulse response
FLIR	forward looking infra-red
FLOPS	floating point operation per second
FM	frequency modulation
FMIT	Fusion Materials Irradiation Test Facility
FMR	ferromagnetic resonance
FMS	flexible manufacturing system or flight management system
FMSR	Fast Mixed Spectrum Reactor
FPC	fusion power core
FPLA	field programmable logic array
FPT	finite perturbation theory
FRED-FET	fast recovery epitaxial diode field effect transistor
FRMR	field reversed mirror reactor
FSDE	fission suppressed direct enrichment (breeder blanket)
FSGO	floating spherical Gaussian orbitals
FSK	frequency-shift keying
FTIR	Fourier transform infrared
FTR	Fast Test Reactor
FWHM	full width half maximum
GAMBIT	gate modulated bipolar transistor
GANIL	Grand Accelerateur National a Ions Lourds
GCC	gasification combined cycle
GCFR	gas-cooled fast breeder reactor
GCHWR	gas cooled heavy water moderated reactor
GCM	generator coordinate method
GDR	giant dipole resonance
GETR	General Electric Test Reactor
GHF-NO-CI	generalised Hartree-Fock/natural orbital/configuration interactions
GIAO	gauge-invariant atomic orbitals
GIS	gas insulated substation or gas insulated switchgear (or system)
GITL	gas insulated transmission line
GKS	Graphical Kernel System
GMDH	group method of data handling
GMR	giant monopole resonance
GMSK	Gaussian filtered minimum shift keying
GO	Gaussian orbitals
GP	Guinier-Preston
GPED	gas phase electron diffraction
GPIB	general purpose interface bus
GPM	ground potential model
GPS	Global Positioning System
GQR	giant quadrupole resonance
GRIN	graded (gradient) refractive index
GSM	Group Special Mobiles
GSPC	gas scintillation proportional chamber (or counter)
GTHTGR	gas turbine HTGR
GTO	gate turn-off or Gaussian-type orbitals
GUT	grand unified theory
GVB	generalised valence bond
HAM	hydrogenic atoms in molecules
HBT	heterojunction bipolar transistor or N-(p-hexyloxybenzylidene)-p-toluidene
HCDA	hypothetical core disruptive accident
HCMOS	high speed complementary metal oxide semiconductor
HCP	hexagonal close packed
HDLC	high level data link control
HDPE	high density polyethylene
HDTV	high definition television
HEED	high energy electron diffraction
HeLa	Henrietta Lacks
HEMP	high altitude electromagnetic pulse
HEMT	high electron mobility transistor
HET	hot electron transistor
HEU	highly enriched uranium (93% U235)
HEU/Th	highly enriched U/Th fuel
HEXFET	hexagonal MOSFET
HF	high frequency or Hartree-Fock
HFB	Hartree-Fock-Bogoliubov
HFEF	Hot Fuel Examination Facility
HFET	heterojunction field effect transistor
HFIR	high flux isotope reactor
HFITR	High Field Ignition Test Reactor
HFO	Hartree-Fock-Overhauser
HFS	Hartree-Fock-Slater or hyperfine structure
HGMS	high gradient magnetic separation
HIFET	heterointerface field effect transistor
HIXE	heavy ion induced X-ray emission
HJBT	heterojunction bipolar transistor
HJFET	heterojunction field effect transistor
HLL	high level language
HLLW	high level liquid waste
HLW	high level waste
HMO	Huckel molecular orbitals
HMOS	high-performance metal-oxide-semiconductor
HMTSeF	hexamethylenetetraselenafulvalene (-inium)
HMTTF	hexamethyltetrathiofulvalene (-inium)
HOAB	heptyloxyazoxybenzene
HOMO	highest occupied molecular orbitals
HPCI	high pressure coolant injection
HPCS	high-pressure core sprays
HREELS	high resolution electron energy loss spectra(oscopy)
HREM	high resolution electron microscopy
HSLA	high strength low alloy (steel)
HT	high tension
HTGR	high temperature gas-cooled reactor
HTGR SC/C	HTGR steam cycle cogeneration

HV	high voltage
HVAC	heating, ventilation and air conditioning or high voltage alternating current
HVDC	high voltage direct current
HVEM	high voltage electron microscopy
HVIC	high voltage integrated circuit
HWLWR	heavy water moderated light water cooled reactor
HWR	heavy water reactor
HZP	Hot Zero Power
I^2L	integrated injection logic
I^3L	isoplanar I^2L
I/O	input/output
I-V	current-voltage
IAEA	International Atomic Energy Agency
IAR	isobaric analogue resonance
IAS	isobaric analogue state
IBA	interacting boson approximation
IBFA	interacting boson-fermion approximation
IBM	interacting boson model
IBPBAC	isobutyl-4-(4′-phenylbenzylidene-amino) cinnamate
IC	integrated circuit
ICDF	intermediate coupling Dirac-Fock
ICF	inertial confinement fusion
ICP	inductively coupled plasma
ICPP	Idaho Chemical Processing Plant
ICRF	ion cyclotron range of frequencies
ICRH	ion cyclotron resonance heating
IDFL	integral diode FET logic
IDT	interdigital transducer
IEC	International Electrotechnical Commission
IEPA	independent electron pair approximation
IETS	inelastic electron tunnelling spectra-(oscopy)
IF	intermediate frequency
IFA	ionisation front accelerator
IFE	intelligent front end
IGBT	insulated gate bipolar transistor
IGCC	integrated gasification combined cycle
IGES	initial graphics exchange specification
IGFET	insulated gate field effect transistor
IGT	insulated gate transistor
IHEP	Institute of High Energy Physics
i.i.d.	independently identically distributed
IIR	infinite impulse response
IKBS	intelligent knowledge-based system
IKO	Institute v. Kernph Ouder Amsterdam
ILS	instrument landing system
ILW	intermediate level (radioactive) waste
IMD	intermodulation distortion
IMPATT	impact avalanche transit time
INDO	intermediate neglect of differential overlap
INDOR	internuclear double resonance
INEPT	insensitive nuclei enhanced by polarisation transfer
ING	intense neutron generator
INO	iterative natural orbital
INS	Information Network System or inertial navigation system
INTELSAT	international telecommunications satellite consortium
INTOR	International Tokamak Reactor
IOC-ω	inclusion of the overlap charges in the omega
IPSE	integrated programming support environment or project support environment
IPSS	international PSS
IR	infrared
IRBIC	infrared beam induced current(s) (or contrast)
IRDO	intermediate retention of differential overlap
IREB	intense relativistic electron beam
IRED	infrared emitting diode
IRS	information retrieval system
ISABELLE	intersecting storage and acceleration
ISDSN	integrated services digital satellite network
ISFET	ion-sensitive field effect transistor
ISI	intersymbol interference
ISL	integrated Schottky logic
ISO	International Standards Organization
ISR	intersecting storage ring
ISS	ion scattering spectroscopy
ISX	impurity study experiment
IT	information technology
ITC	ionic themocurrents
ITEP	Institute of Theoretical and Experimental Physics
ITO	indium tin oxide
ITR	Ignition Test Reactor
ITU	International Telecommunication Union
IU	Indiana University
IVO	improved virtual orbitals
IVP	initial value problem
J^π	spin/parity (nuclear levels)
JAERI	Japan Atomic Energy Research Institute
JCL	job control language
JET	Joint European Torus
JFET	junction field effect transistor
JINR	Joint Institute for Nuclear Research
JIT	just-in-time
JT-60	Japanese Tokamak-60
JTIDS	joint tactical information distribution system
KBS	knowledge based system
KdV	Korteweg-de Vries
KEK	Japan National Laboratory for High Energy Physics
KKR	Korringa-Kohn-Rostoker
LAMPF	Los Alamos Meson Physics Facility
LAN	local area network
LBIC	light beam induced current(s)

LBLOCA	large break LOCA
LC	inductance-capacitance
LCAO	linear combination of atomic orbitals
LCBO	linear combinations of (semi-localised) band orbitals
L(C)CC	leadless (ceramic) chip carrier
LCD	liquid crystal display/device
LCGO	linear combination of Gaussian orbitals
LCP	Large Coil Program
LCRO	linear combination of Rydberg orbitals
LCTF	Large Coil Test Facility
LD	laser diode
LDA	laser Doppler anemometry (-meter)
LDD	lightly doped drain
LDPE	low density polyethylene
LDV	laser Doppler velocimetry (-meter)
LEAR	Low Energy Antiproton Ring
LEC	liquid encapsulated Czochralski
LED	light emitting diode
LEED	low energy electron diffraction
LEFD	Large Experimental Fusion Device
LEMP	lightning electromagnetic pulse
LEP	Large Electron Positron (CERN)
LET	linear energy transfer
LEU	low enrichment uranium (10% U235)
LEU/Th	low enrichment U/Th fuel
LF	low frequency
LHPG	laser heated pedestal growth
LHRH	lower hybrid resonance heating
LIF	laser induced fluorescence
LIFO	last in first out
LIM	linear induction motor
LIME	laser induced magnetically enhanced
LLTR	Large Leak Test Rig
LLW	low level (radioactive) waste
LMC	Large Magellanic Cloud
LME	liquid metal embrittlement
LMFBR	liquid metal fast breeder reactor
LMIS	liquid metal ion source
LMR	liquid metal reactor
LMS	least mean square
LMTO	linear combination of muffin tin orbitals
LNA	low noise amplifier
LNG	liquified natural gas
LO	local oscillator or longitudinal optical
LOCA	loss of coolant accident
LOCE	loss of coolant experiment
LOCOS	local oxidation of silicon
LOF	loss of flow
LOFT	Loss of Flow Test Facility
LOFW	loss of feed water
LOG	linear quadratic Gaussian
LONA	low noise amplifier
LOOSP	loss of onsite power
LOS	line of sight
LP	linear programming
LPC	linear predictive coding
LPCS	low pressure core spray
LPCVD	low pressure chemical vapour deposition
LPE	liquid phase epitaxy
LPFL	low pinchoff-voltage FET logic
LPI	low probability of intercept
LQG	linear quadratic Gaussian
LSA	least squares approximation or limited space charge accumulation
LSD	local spin density or loop shut-down
LSI	large-scale integration
LSPB	Large Scale Prototype Breeder
LSSD	level sensitive scan design
LSTF	Large Scale Test Facility
LTE	local thermodynamic equilibrium
LTR	loop transfer recovery
LUMO	lowest unoccupied molecular orbitals
LV	low voltage
LWBR	light water breeder reactor
LWHCR	light water high convertor reactor
LWR	light water reactor
M1,M2	magnetic dipole, quadrupole
MAC	multiplexed analogue component
MADO	Mulliken approximation for differential overlap
MAGFET	magnetic field sensitive field effect transistor
MAN	metropolitan area network
MAP	manufacturing automation protocol
MARS	Mirror Advanced Reactor Study
MAS	magic angle spinning
MATE	modular automatic test equipment
MBBA	4-methoxybenzylidene-4'-n-butylaniline
MBE	molecular beam epitaxy
MBPT	many body perturbation theory
MCCB	moulded-case circuit breakers
MCCI	molten core—concrete interaction
MCD	magnetic circular dichroism
MCFR	magnetic confinement fusion reactor
MCP	microchannel plate
MCPESCF	multiconfiguration paired excitation SCF
MCSCF	multiconfiguration self-consistent field
MCVD	modified chemical vapour deposition
MCXα	multiconfiguration Xα
MCZDO	multi-centre zero differential overlap
MEC	molecular electron correlation(s)
MEDO	multipole expansion of diatomic overlap
MEG	magnetoencephalography (-gram)
MESFET	metal-semiconductor field effect transistor
MEU	Medium Enrichment Uranium (20% U235)
MEU/Th	Medium Enrichment U/Th fuel
MF	medium frequency
MFP	mean free path
MFR	mirror fusion reactor
MFSK	multiple frequency shift keying
MFTF	Mirror Fusion Test Facility
MHD	magnetohydrodynamics
MHS	message handling system
MIC	microwave integrated circuit
MID	magnetically insulated diode
MIDI	musical instruments digital interface

MIDP	microwave induced delayed phosphorescence
MIEHM	modified iterative extended Huckel method
MIL-STD	Military Standard
MIM	metal-insulator-metal
MIMD	multiple input multiple data
MIMIC	millimetre-wave monolithic integrated circuit
MIMO	multiple input multiple output
MIND	mass impregnated non-draining
MINDO	modified incomplete neglect of differential overlap
MIPS	million instructions per second
MIS	metal-insulator-semiconductor or management information system
MISO	multiple input single output
MISFET	metal-insulator-semiconductor field effect transistor
MIT	Massachusetts Institute of Technology
MITATT	mixed tunnelling avalanche transit time
MLB	multilayer board
MLC	multilayer ceramic
MLE	maximum likelihood estimation
MLS	microwave landing system
MLTF	multilayer thick film
MLW	medium level (radioactive) waste
MM	millimetre
MMF	magnetomotive force
MMI	man machine interface
MMIC	monolithic microwave integrated circuit
MMU	memory management units
MNDO	modified neglect of differential overlap
MNOS	metal-nitride-oxide-semiconductor
MO	molecular orbitals
MOCIC	molecular orbital constraint of interaction coordinates
MOCVD	metal-organic chemical vapour deposition
MODFET	modulation doped field effect transistor
MODPOT	modulator potential
MOMBE	metal-organic molecular beam epitaxy
MOS	metal-oxide-semiconductor
MOSFET	metal-oxide-semiconductor field effect transistor
MOST	metal-oxide-semiconductor transistor
MOV	metal oxide varistor
MOVPE	metal-organic vapour phase epitaxy
MOX	mixed oxide fuel
MPH	moving plasmoid heater
MPSK	multiple phase shift keying
MPU	microprocessing unit
MQORC	modified quadrature overlapped raised cosine
MQW	multiple quantum well
MRAC	model reference adaptive control
MRD	multiple-reference double excitation
MRI	magnetic resonance imaging
MRINDO	modified Rydberg INDO
MRP	manufacturing resources planning or materials requirements planning
MRP II	manufacturing resources planning
MRS	monitored retrievable storage (radioactive waste)
MS	management science
MSE	mean square error
MSI	medium scale integration
MSK	minimum shift keying
MSR	molten salt reactor
MSSW	magnetostatic surface wave
MSU	Michigan State University
MSW	magnetostatic waves
MSXα	multiple scattering X alpha
MTBF	mean-time between failures
MTF	modulation transfer function
MTI	moving target indicator
MTL	merged-transistor logic
MTTF	mean time to failure
MTXα	muffin-tin Xα
μCF	muon catalysed fusion
MUF	material unaccounted for or maximum usable frequency
MUSE	multiple sub-Nyquist sampling encoding
MUSIC	MUltiple SIgnal Characterisation
MWPC	multiwire proportional chamber
NAA	neutron activation analysis
NAL	National Accelerator Laboratory
NAND	not-and(logic)
NAPLPS	North American Presentation Level Protocol Syntax
NBETF	Neutral Beam Engineering Test Facility
NBFM	narrowband frequency modulation
NBI	neutral beam injection
NBPS	neutral beam power systems
NBS	National Bureau of Standards
NC	numerical control
NCBR	nitrine cooled breeder reactor
NCMET	non-closed shell many electron theory
NDDO	neglect of diatomic differential overlap
NDE	nondestructive evaluation
NDRO	nondestructive readout
NDT	nondestructive testing
NEA	negative electron affinity
NEMO	non-empirical molecular orbitals
NET	Next European Tokamak
NEVE	non-empirical valence-electron
NEXAFS	near-edge X-ray absorption fine structure
NGS	nuclear generating station
NHS	National Health Service
NIC	negative impedance convertor
NLP	natural language processing
NMOS	N-channel metal-oxide-semiconductor
NMR	nuclear magnetic resonance
NMR-ON	NMR on oriented nuclei

NNNDO	neglect of non-neighbour differential overlap
NOR	not-or(logic)
NPL	National Physical Laboratory
NPP	nuclear power plant
NQR	nuclear quadrupole resonance
NRC	Nuclear Regulatory Committee
NRD	nonradiative dielectric
NRM	natural remanent magnetisation
NRZ	non-return to zero
NSLS	National Synchrotron Light Source
NSRR	Nuclear Safety Research Reactor
NSSS	nuclear steam supply system
NTD	neutron transmutation doping
NTL	nonthreshold logic
NTO	natural transition orbitals
NTSC	National TV Standards Committee
NVRAM	nonvolatile random access memory
NWPA	Nuclear Waste Policy Act
OA	office automation
OBIC	optical beam induced current(s)
OCR	optical character recognition
ODA	office document architecture
ODE	ordinary differential equation
ODMR	optical detection of magnetic resonance
OEIC	optoelectronic integrated circuit
OEM	original equipment manufacture
OER	oxygen enhancement ratio
OH	ohmic heating
OHTE	Ohmically Heated Toroidal Experiment
OMCVD	organometallic chemical vapour deposition
OMVPE	organometallic vapour phase epitaxy
ONA	open network architecture
OPHF	orbital polarised Hartree-Fock
OPW	orthogonal plane wave
OQPSK	offset quadrature phase shift keying
OR	operations research
ORELA	Oak Ridge Electron Linear Accelerator
ORNL	Oak Ridge National Laboratory
OS	operating system
OSI	open systems interconnection
OTA	operational transconductance amplifier
OTDR	optical time domain reflectometry
OTEC	ocean thermal energy conversion
OTF	optical transfer function
OTS	Orbital Test Satellite
OTSG	once-through steam generator
OZI	Okubo-Zweig-Iizuha (quark model)
PAA	paraazoxyanisole
PABX	private automatic branch exchange
PAC	perturbed angular correlation
PACS	picture archiving and communication systems
PAHR	post accident heat removal
PAL	phase alternate line or programmable array logic
PAM	pulse amplitude modulation
PAP	paraazoxyphenetole
PARS	private advanced radio service
PBF	power bursts facility
PBFA	Particle Beam Fusion Accelerator
PBL	planetary boundary layer
PBR	pebble bed reactor
PBT	permeable base transistor
PBX	private branch exchange
PC	personal computer or polycarbonate or printed circuit or programmable controller
PCAC	partially conserved axial currents
PCB	polychlorinated biphenyl or printed circuit boards
PCES	phase change energy storage
PCI	pellet-cladding interaction
PCILOCC	perturbative configuration interaction using localised orbitals for crystal calculation
PCM	phase change material or pulse code modulation
PCRV	prestressed concrete reactor vessel
PCV	primary containment vessel
PCX	plasma confinement experiment
PD	partial discharge
PDE	partial differential equation
PDF	probability density function
PDX	Poloidal Divertor Experiment
PEC	photoelectrochemical cell
PEEK	polyaryletheretherketone or polyetheretherketone
PEEL	programmable electrically erasable logic
PEM	photoelectromagnetic
PEP	Positron Electron Photon (Stanford)
PES	photoelectron spectra (spectroscopy)
PET	polyethylene terephthalate or positron emission tomography
PETRA	Positron Electron Tandem Ringbeschleuniger Anlage
PF	poloidal field or power factor
PFBC	pressurised fluidised bed combustion
PFM	pulse frequency modulation
PFR	Prototype Fast Reactor
PGA	pin grid array
PHWR	pressurised heavy water reactor
PID(PI,PD)	proportional+integral+differential (derivative)
PIPECO	photoion photoelectron coincidence
PIUS	process inherent ultimately safe
PIXE	photon induced X-ray emission
PLA	phase locked arrays or programmable logic array
PLBR	Prototype Large Breeder Reactor
PLC	programmable logic control
PLCC	plastic leadless chip carrier
PLD	programmable logic device
PLL	phase locked loops
PLT	Princeton Large Torus
PM	pulse modulation or phase modulation
PMMA	polymethylmethacrylate
PMDR	phosphorescence microwave double resonance

PMOS	P-channel metal-oxide-semiconductor
PMR	proton magnetic resonance
PMS	pre-main-sequence
PN	planetary nebula(e)
PNDO	partial neglect of differential overlap
PNO-CI	pair natural orbital configuration interaction
PNS	Pulsed Neutron Source
POL	pair orthogonalised Lowdin
POPAE	protons on protons and electrons
POPOP	phenyl-oxazolyl-phenyl-oxazolyl-phenyl
PORV	power operated relief valve
POS	point of sale
PPB	parts per billion
PPDP/S	Pariser-Parr-Del Bene-Pople/Segal calculations
PPI	plan position indicator
PPM	pulse position modulation or parts per million
PPP	Pariser-Parr-Pople
PRA	probabilistic risk assessment
PRDDO	partial retention of diatomic differential overlap
PREPP	Process Experimental Pilot Plant
PRF	pulse recurrence (repetition) frequency
PROM	programmable read-only-memory or Pockels readout optical modulator
PS	polystyrene or proton synchrotron (CERN)
PSD	power shut-down or power spectral density
PSDN	packet switched data network
PSG	phosphosilicate glass
PSK	phase shift keying
PSS	packet switching service or Packet SwitchStream
PSTN	public switched telephone network
PSU	power supply unit
PTF	polymer thick film
PTFE	polytetrafluoroethylene
PTH	plated through hole
PTM	pulse time modulation
PV	photovoltaic
PVC	polyvinyl chloride
PVD	physical vapour deposition
PVDF	polyvinylidene fluoride
PVER	pattern visual evoked response
PVF	polyvinylidene fluoride
PWA	partial wave analysis
PWB	printed wiring board
PWBA	plane wave Born approximation
PWIA	plane wave impulse approximation
PWM	pulse width modulation
PWR	pressurised water reactor
QA	quality assurance
QAM	quadrature amplitude modulation
QASK	quadrature amplitude shift keying
QC	quality control
QCD	quantum chromodynamics
QDMBPT	quasi-degenerate many-body perturbation theory
QED	quantum electrodynamics
QFSK	quadrature frequency shift keying
QORC	quadrature overlapped raised cosine
QOSRC	quadrature overlapped squared raised cosine
QPM	quark-parton model
QPR	quadrature partial response
QPRS	quadrature partial response signalling
QPSK	quaternary phase shift keying
R & D	research and development
RAD	ribbon-against-drop
RAM	random access memory or reliability, availability and maintainability
RBE	relative biological effectiveness
RBMK	light water cooled, graphite moderated reactor
RBS	Rutherford backscattering
RC	resistance-capacitance
RCCB	residual current circuit breaker
RCD	residual current device
RCIC	reactor core isolation cooling
RCS	radar cross-section or rapid cycling synchrotron or reactor coolant systems
RCTL	resistor-capacitor-transistor logic
RDBMS	relational database management system
RDS	radio data systems
REA	rod ejection accident
RF	radio frequency
RFI	radio frequency interference
RFPR	reversed field pinch reactor
RFX	Reversed Field (Pinch) Experiment
RG	renormalisation group
RGB	red green blue
RHEED	reflection high energy electron diffraction
RHET	resonant hot electron transistor
RHF	restricted Hartree-Fock
RIA	reactivity initiated accident
RIBE	reactive ion beam etching
RIE	reactive ion etching
RINDO	Rydberg INDO
RISC	reduced instruction set computer
RKKY	Rudermann-Kittel-Kasuya-Yosida
RLC	resistance-inductance-capacitance
RMS	root-mean-square
RNA	ribonucleic acid
RNS	residue number system
ROM	read-only memory
RPA	random phase approximation
RPAE	random phase approximation with exchange
RPM	relaxation potential model or revolutions per minute
RPV	reactor pressure vessel or remote piloted vehicle
RSACE	Research and Advanced Communications for Europe
RTA	rapid thermal annealing
RTD	resonant tunnelling diode

RTG	radioisotope thermoelectric generators
RTL	resistor-transistor logic
RTP	rapid thermal processing
RTTY	radio teletypewriter
RVB	resonating valence bond
S/H	sample and hold
S/N	signal-to-noise
SACCI	symmetry adapted cluster configuration interaction
SAG	self aligned gate
SAINT	self-aligned implantation for N^+-layer technology
SAM	scanning acoustic microscopy or scanning Auger microscopy or serial access memory
SAMO	simulated ab initio molecular orbitals
SAMOS	stacked gate avalanche injection metal-oxide-semiconductor
SAN	small area network
SANS	small-angle neutron scattering
SAR	synthetic aperture radar
SARSAT	search and rescue satellite aided tracking
SAW	surface acoustic waves
SAXS	small-angle X-ray scattering
SBLOCA	small break LOCA
SBS	stimulated Brillouin scattering
SC	switched capacitor
SCADA	supervisory control and data acquisition
SCC	stress corrosion cracking
SCF	self-consistent field
SCFL	source-coupled FET logic
SCH	separate confinement heterostructure
SCL	space charge limited
SCPC	single channel per carrier
SCPT	self-consistent perturbation theory
SCR	silicon controlled rectifier
SCSI	small computer system interface
SCTF	Slab Core Test Facility
SDFL	Schottky-diode FET logic
SDI	selective dissemination of information or Strategic Defense Initiative
SDLC	synchronous data link control
SDM	space division multiplexing
SDMA	space division multiple access
SDO	shielded diatomic orbitals
SEAM	scanning electron acoustic microscopy
SED	stochastic electrodynamics
SEHF	spin extended Hartree-Fock
SEM	scanning electron microscopy
SEP	somatosensory evoked potential
SERS	surface enhanced Raman scattering
SEU	single event upset
SEXAFS	surface extended X-ray absorption fine structure
SFE	solar-flare effect
SFL	substrate fed logic
SGEMP	system generated electromagnetic pulse
SGHWR	steam generating heavy water reactor
SGMP	sol gel microsphere pelletisation
SHF	superhigh frequency
SHG	second harmonic generation
SI	semi-insulating
SICOS	sidewall base contact structure
SIL	single-in-line
SIMD	single instruction multiple data
SIMOS	stacked-gate injection metal-oxide-semiconductor
SIMOX	separation by implantation of oxygen
SIMS	secondary ion mass spectra(oscopy)
SIN	Swiss Institute of Nuclear Research
SINDO	scaled INDO
SIPOS	semi-insulating polycrystalline silicon
SIS	semiconductor-insulator-semiconductor or superconductor-insulator-superconductor
SISAM	spectrometer with interference selective amplitude modulation
SISFET	semiconductor-insulator-semiconductor field effect transistor
SISO	single input single output
SIT	static induction transistor
SLAM	scanning laser acoustic microscopy
SLC	Stanford Linear Collider
SLIC	subscriber line interface circuit
SLSF	Sodium Loop Safety Facility
SMA	surface mount(ed) assembly
SMATV	satellite master antenna television
SMC	Small Magellanic Cloud or surface mount(ed) component
SMD	surface mount(ed) device
SMES	superconductive magnetic energy storage
SMIF	standard mechanical interface
SMPS	switched mode power supply
SMOBC	solder mask over bare copper
SMQORC	staggered modified quadrature overlapped raised cosine
SMT	surface mount(ed) technology
SN	supernova(e)
SNA	Systems Network Architecture
SNM	special nuclear material
SNR	signal to noise ratio or supernova remnant
SNS	superconducting normal superconducting or Spallation Neutron Source
SOA	safe operating area
SOG	spin-on-glass or strongly orthogonal geminal
SOI	silicon on insulator
SOIC	small outline integrated circuit
SOR	successive over-relaxation
SOS	silicon on sapphire
SOT	small outline transistor
SPA	separated pair approximation
SPC	statistical process control or stored program control
SPCP	single parity check product (code)
SPE	solid phase epitaxy
SPEAR	Stanford Positron Electron Asymmetric Ring

SPECT	single photon emission computerised tomography
SPHF	spin polarised Hartree-Fock
SPLEED	spin polarised low energy electron diffraction
SPS	Super Proton Synchrotron (CERN)
SQAM	superposed quadrature amplitude modulation
SQC	statistical quality control
SQL	standard query language
SQPR	staggered quadrature partial response
SQPSK	staggered quadrature phase shift keying
SQUID	superconducting quantum interference device
SQW	single quantum well
SRAM	static random access memory
SREMP	source region electromagnetic pulse
SRMCASE	symmetry-restricted-multiconfiguration annihilation of single excitations
SRS	stimulated Raman scattering
SRV	safety release valve
SS-TDMA	satellite switched time division multiple access
SSB	single sideband
SSBW	surface skimming bulk wave
SSC	sudden storm commencement or Superconducting Super Collider
SSCR	spectrum shift controlled reactor
SSFL	Schottky-barrier coupled Schottky-barrier gate FET logic
SSI	small scale integration
SSMA	spread spectrum multiple access
SST	sea surface temperature or supersonic transport
STD	salinity-temperature-depth or subscriber trunk dialling
STEC	solar thermal energy conversion
STEM	scanning transmission electron microscopy
STI	scientific and technical information
STL	Schottky transistor logic
STM	scanning tunnelling microscopy
STO	Slater-type orbitals
STOL	short take-off and landing
STP	Slater-transfer Preuss
SURMAC	surface magnetic confinement
SUSY GUT	supersymmetric grand unified theory
SVC	static VAr compensator
SW	short wave
SWEPP	Stored Waste Examination Pilot Plant
SWR	sodium water reactor or standing wave ratio
SXAPS	soft X-ray appearance potential spectra(oscopy)
TAB	tape automated bonding
TASI	time assignment speech interpolation
TAT	transatlantic telephone cable
TBBA	terephthal-butylaniline
TCAS	traffic alert and collision avoidance system
TCNE	tetracyanoethylene
TCNQ	tetracyanoquinodimethane
TCR	temperature coefficient of resistance
TCXO	temperature compensated crystal oscillator
TDDB	time dependent dielectric breakdown
TDF	Technology Demonstration Facility or transborder data flow
TDHF	time-dependent Hartree-Fock
TDM	time division multiplex(ing)
TDMA	time division multiple access
TDMF	time dependent mean field theory
TDPAC	time differential perturbed angular correlation
TDS	thermal desorption spectra(oscopy)
TE	transverse electric
TEA	transversely excited atmosphere
TED	transferred electron device
TEGFET	two-dimensional electron gas field effect transistor
TEM	transverse electromagnetic or transmission electron microscopy
TEXT	Texas Experimental Tokamak
TF	toroidal field
TFCX	Toroidal Fusion Core Experiment
TFEL	thin film electroluminescent
TFT	thin film transistor
TFTR	Tokamak Fusion Test Reactor
TGA	thermogravimetric analysis
TGFB	triglycine fluoroberyllate
TGS	triglycine sulphate
TGSe	triglycine selenate
THF	tremendously high frequency
THORP	Thermal Oxide Reprocessing Plant
THORS	Thermal-Hydraulic Out-of-Reactor Safety Facility
THTF	Thermal Hydraulic Test Facility
TIL	two interdigitation level
TJS	transverse junction stripe
TLD	thermoluminescent dosimeter(-ry)
TM	transverse magnetic
TMC	Test Module Coil
TMHR	tandem mirror hybrid reactor
TMI	Three Mile Island
TMMC	tetramethylammonium manganese chloride
TMR	tandem mirror reactor
TMTSF	tetramethyltetraselenafulvalene (-inium)
TMTST	tetramethyltetraselenafulvalene (-inium)
TMTTF	tetramethyltetrathiafulvalene(-inium)
TMX-U	Tandem Mirror Experiment-Upgrade
TNS	The Next Step
TOF	time-of-flight
TOP	technical office protocol or transient overpower accident
TPAD	time differential perturbed angular distribution
TPC	time projection chamber
TPD	temperature programmed desorption
TPTF	Two Phase Flow Test Facility
TRAPATT	trapped plasma avalanche triggered transit

TREAT	Transient Reactor Test Facility
TRM	thermoremanent magnetisation
TRRR(TR_3)	time resolved resonant Raman (spectra (-oscopy))
TRU	transuranic (waste)
TSC	thermally stimulated currents
TSD	thermally stimulated desorption
TSEE	thermally stimulated exo-electron emission
TSeF	tetraselenafulvalene(-inium)
TSeT	tetraselenatetracene
TSIC	thermally stimulated ionic currents
TSTA	Tritium Systems Test Facility
TTF	tetrathiafulvalene(-inium)
TTL	transistor transistor logic
TTMP	transit time magnetic pumping
TTT	temperature-time-transformation or tetrathiatetracene
TTY	teletype terminal
TUCA	transient undercooling accident
TUCOP	transient undercooled overpower accident
TV	television
TVRO	TV receive only
TW	travelling wave
TWA	travelling wave amplifier
TWT	travelling wave tube
UART	universal asynchronous receiver transmitter
UCHF	uncoupled Hartree-Fock
UCN	ultra cold neutrons
UHF	ultra high frequency or unrestricted Hartree-Fock
UHPS	underground hydroelectric pumped storage
UHV	ultra high voltage
UIMS	user interface management system
UJT	unijunction transistor
UKAEA	United Kingdom Atomic Energy Authority
ULA	uncommitted logic array
ULF	ultra low frequency
ULSI	ultra-large scale integration
UMD	unitised microwave devices
UPS	ultraviolet photoelectron spectra(oscopy) or uninterruptible power supply
US	ultrasonic
USART	universal synchronous/asynchronous receiver transmitter
UUT	unit under test
UV	ultraviolet
VAD	vapour phase axial deposition
VAN(S)	value added network (services)
VB	valence bond
VCCS	voltage controlled current source
VCO	voltage controlled oscillator
VCR	video cassette recorder
VCVS	voltage controlled voltage source
VCXO	voltage controlled crystal oscillator
VDM	vector dominance model
VDT	visual display terminal
VDU	visual display unit
VDW	van der Waals
VER	visual evoked response
VFD	vacuum fluorescent display
VFO	variable frequency oscillator
VHF	very high frequency
VHPIC	very high performance integrated circuit
VHSIC	very high speed integrated circuit
VHV	very high voltage
VJFET	vertical junction field effect transistor
VLBI	very long base line interferometry
VLF	very low frequency
VLSI	very large scale integration
VM	virtual machine
VMOS	vertical channel metal-oxide-semiconductor
VOR	VHF omnidirectional range
VPE	vapour phase epitaxy
VRAM	video random access memory
VRC	visual record computer
VS	virtual storage
VSAT	very small aperture terminals
VSB	vestigial sideband
VSEPR	valence shell electron pair repulsion
VSI	voltage source invertor
VSWR	voltage standing wave ratio
VTOL	vertical take-off and landing
VTR	voltage transformation ratio or video tape recorder
VUV	vacuum ultraviolet
VVER	water moderated water cooled reactors
VVVF	variable voltage variable frequency
WAN	wide area network
WARC	World Administrative Radio Conference
WAXS	wide-angle X-ray scattering
WDF	wave digital filter
WDM	wavelength division multiplex(ing)
WECS	wind energy conversion system
WIMP	weakly interacting massive particle
WIPP	Waste Isolation Pilot Plant
WKB	Wentzel-Kramers-Brillouin
WORM	write once read many times
WP	word processing
WR	Wolf-Rayet
WSI	wafer scale integration
WWER	water moderated water cooled reactors
XANES	X-ray absorption near edge structure
XLPE	cross-linked polyethylene
XOR	exclusive-OR
XPD	cross-polarisation discrimination
XPS	X-ray photoelectron spectra
XUV	X-ray-ultraviolet
YTO	YIG tuned oscillator
ZEBRA	Zero Energy Breeder Reactor Assembly
ZGS	zero gradient synchrotron
ZPPR	zero power plutonium reactor
ZTP	Z toroidal pinch

magnetic recording continued
Fe-Ni evaporated films for a back layer of perpendicular mag. recording media, origin of high coercivity 87−18483
Fe-Si-Ru multilayered films, probe-type thin-film head for perpendicular recording 85−45992
Fe-Si-Ru/Ni-Fe thin film head, perpendicular recording charact. 86−63558
Fe-Tb-Gd, amorphous, perpendicular recording media, perpendicular anisotropy and hysteresis from torque meas. 85−18553
$Fe_{80}B_{20}$-$Co_{80}B_{20}$ amorphous ultrafine particle film perp. mag. recording media 88−51209
FeN thin films with high coercivity and good corrosion resist. 88−51232
Fe_4N acicular particle prep. and appl. to VCR tape *(Japanese)* 88−26663
Fe_4N, particulate recording materials, props. 87−25758
Fe_xN thin films, RF sputtered, struct. and mag. props. 88−51233
FeN-CoN thin films, mag. props 88−51231
$Fe_{14}Nd_2(Cd)_2Y_2B$, submicron particle prep. for mag. recording appls. 86−15344
$Fe_{14}Nd(Y)(Ce)_2B$ fine particles prep. by hydriding, mag. props., recording appls. 87−25762
Fe_2O_3, Co modified, mag. materials recording, overview 85−45980
γ-Fe_2O_3 directly RF sputtered thin films, struct. and mag. props., recording appls. 85−24085
γ-Fe_2O_3 film sputtered in Ar-O_2-H_2O atmosphere, microstruct. 88−51224
γ-Fe_2O_3 from synthesis of acicular α-Fe_2O_3, improved mag. media, lower noise 88−57969
γ-Fe_2O_3 high-coercivity sputter-deposited thin-film disc 88−1867
γ-Fe_2O_3 mag. tapes, particle orientation distrib. meas. 88−51212
γ-Fe_2O_3, magnetic recording medium, write process, computer simulation 86−9411
γ-Fe_2O_3 particles, low temp. synthesis, mag. props., particle size and morphology, appl. for mag. recording media 88−57919
Fe_2O_3 particles, mag. tape, recording charact., improvement by organic titanate adsorption 88−71932
γ-Fe_2O_3 particles, microstructure, relaxation and print-through 85−45982
γ-Fe_2O_3 particles, perpendicular orientation, mag. props. 86−15377
γ-Fe_2O_3, particulate recording materials, props. 87−25758
γ-Fe_2O_3 powders for mag. recording, surface props. 87−46338
γ-Fe_2O_3 recording media, rotational mag. meas. 86−28675
γ-Fe_2O_3 recording particles, high-field magnetism 87−46334
Fe_2O_3 silica coated particle dispersions, magnetic recording appls. 87−25806
γFe_2O_3, sputtered thin film recording media, signal output loss, temp. depend. study 85−62196
γ-Fe_2O_3 thin film discs on Ni-P substrates, mag. recording props. 85−56096
γ-Fe_2O_3 thin film discs, wear resist. and S/N ratio 86−35998
γ-Fe_2O_3 thin films, thickness dependence of mag. props. and read-write charact. 85−46011
Fe_3O_4 films on 8″ disk at 70°C by spray-spin-coating method and oxidation to Fe_2O_3 films 88−51263
Fe_3O_4 films with large perp. mag. anisotropy, demagnetisation by stress 88−51246
Fe_3O_4, magnetic pigment, prep. and particle props. investig. 86−15375
Fe_3O_4 particle dispersed polymer film, precip. prep., mag. recording appl. 87−67765
Fe_3O_4 thin films, thickness dependence of mag. props. and read-write charact. 85−46011
γ-Fe_2O_3:Co, particulate mag. media, magnetisation time decay, temp. depend. 88−71933
γ-Fe_2O_3:Os films, effects of deposition and oxidation processes on mag. and structural props. 88−51225
γ-Fe_2O_3:Os sputtered films for mag. recording appl., grain growth, impurity effects 87−60812
γFe_2O_3:Os sputtered thin-film media for perpendicular mag. recording 87−53882
γ-Fe_2O_3:Os thin film media for perpendicular recording *(Japanese)* 86−21992
Fe_3O_4:Co thin films with large perp. mag. anisotropy, reactive sputtering prep. 86−28629
γ-Fe_2O_3-Fe_3O_4 system, highly coercive material, prep. by pyrolysis 86−15376
Fe_2O_3-Fe_3O_4 thin film assisted CVD technique deposition, high density mag. recording 88−64958
γ-Fe_2O_3-Fe_3O_4 thin films, prep. for mag. recording media 86−62237
Fe_2O_3-$NiFe_2O_4$-$ZnFe_2O_4$ thin films, assisted CVD technique deposition, high density mag. recording 88−64958
Fe_3O_4-γ-Fe_2O_3, particulate recording materials, props. 87−25758
Fe_xO_{1-x}-based perpendicular thin films, mag. recording appls. 87−67710
FeOOH recording particles, silica treated, sintering inhibition mechanism 86−35977
$Fe_{14}R_2B$-type materials (R=rare earth), mag. recording appls. 86−21964
Gd-Tb-Co magnetooptical recording film, distrib. of axes of easy magnetisation 86−63527
Gd-Tb-Co-Fe magnetooptical recording film, distrib. of axes of easy magnetisation 86−63527
GdCo sputtered films, temp. depend. mag. transitions, magneto-optic data storage 86−15336
a-GdFe alloy thin films, perpendicular recording props. and magnetisation process study 88−64957
GdFe amorphous thin films for perp. recording, magnetooptic study 87−46302
GdFe/TbFe amorphous double layered films, mag. recording charact. 86−42119
GdTbCo amorphous films, magneto-optical storage appls. 86−15335
GdTbFeGe based disks, readout charact. and coercive force 86−42381
GdTbFeGe films, mag. recorded bits, colloid SEM study 86−42380
Mn-Al-Cu sputtered film disc characteristics 88−57947
Mn-Zn ferrite sputtered disks, recording charact. 88−51262
Mn-Zn hot-press ferrites, mag. recording head appls. 85−12483
Ni-Fe film mag. readout head using induced RF permeability variation 87−67744
Ni-Fe sputtered film growth charact. of perpendicular mag. recording underlayer 85−16971
Ni-Fe, sputtered films, cryst. texture and microstructure, effect of N 85−44781
Ni-Fe thin film readout head using induced RF permeability variation 88−26676
Ni-Fe thin film recording head, magnetisation processes 85−45989
Ni-Fe thin film recording head, yoke length optimisation 86−28700
magnetic recording continued
Ni-P underlayer for mag. recording, M-H curve slope-intercept anal., heat treatment effects 87−60813
Ni-Zn hot-press ferrites, mag. recording head appls. 85−12483
Si substrate disc containing ICs and mag. media 86−35990
SiO_2-Fe, granular metal films, characterisation, appl. as mag. recording media 88−33534
Sm-Co films for mag. rotary encoder, recording and playback charact. 88−51337
SmCo film props. for magnetic rotary encoder 88−58006
$SrFe_{12}O_{19}$ hexagonal ferrite particles for perp. recording, precursor method prep. 87−46331
Tb-Co amorphous thin film magneto-optic disk, improved oxidation and crack resist. 86−42382
Tb-Fe-Co amorphous films, magnetic and magneto-optical props. 87−60782
Tb-Fe-based thin films, magneto-optical recording, video appls. 85−29440
TbCo sputtered films, stability of magnetic and magneto-optical properties 87−60803
a-TbFe alloy thin films, perpendicular recording props. and magnetisation process study 88−64957
TbFe amorphous thin films for perp. recording, magnetooptic study 87−46302
TbFe, magneto-optical recording medium improvement by alloying *(Japanese)* 85−46226
TbFeCo magneto-optical disks, recorded domain charact. study 88−71935
TbFeCo, magneto-optical recording media, mag. field modulation method 87−46384
TbFeCo thin films, microstruct., mag. props., effect of deposition conditions, appl. as recording materials 88−58270
TbFeCoTi films, high corrosion-resistant magneto-optical recording media 87−60871
Zn ferrites, isometric pigments, spinel struct., prep. by wet processes 86−13853

magnetic relaxation
see also ferromagnetic relaxation; magnetic resonance; spin-lattice relaxation; spin-spin relaxation
autocorrelation NMR, Fourier transformed signal, free induction decay 88−3020
measurement method using operational amplifier *(Spanish)* 86−38524
UHF susceptometer, computer controlled broadband, magnetisation dynamics obs. 85−37735
α-Fe-C, AC initial suscept. meas., temp. depend., automated techniques 86−24716
γ-Fe_2O_3 particles, microstructure, relaxation and print-through 85−45982
Ni ferrites, linear relation between initial permeability and grain size, influence of diffusion relax. 85−12484
YIG, Fe deficient, linear relation between initial permeability and grain size, influence of diffusion relax. 85−12484
YIG, effective linewidth, isochronal recovery behaviour 85−29433

magnetic resonance
see also ferrimagnetic resonance; ferromagnetic resonance; laser magnetic resonance; magnetic double resonance; magnetic relaxation; nuclear magnetic resonance; paramagnetic resonance
6-10 kV mains, ferroresonance phenomena *(Russian)* 85−21192
blood vessel projections reconstructed from planar magnetic resonance images 88−48135
image reconstruction from samples on linear and expanding spiral scans 88−73266
resettable vacuum switch for padmounted switchgear, solving ferroresonance problem 85−27568
Schumann resonances, magnetic elliptical polarisation 87−68752
spiral sampling, reconstruction, magnetic resonance imaging appl. 88−41045
superconducting magnets for magnetic resonance imaging applications, cryostat/recondensers design considerations 87−74627
Wien bridge oscillator transient behaviour, lab. expt. for undergraduate students 85−10352
He optical pumping and magnetic resonance signal recording 87−68426

magnetic resonance imaging *see biomedical NMR*

magnetic resonance spectrometers
atomic resonance magnetometers for geomagnetic meas. 86−44769
DC magnetic field stabiliser based on NMR *(Slovak)* 87−12682
EPR spectrometer, quality of microwave resonators used as measuring probes *(Polish)* 85−55120
EPR spectrometer with Gunn oscillators 87−65913
EPR spectrometers with AFC, power supply of klystron oscillator 87−65833
ESR spectrometer, microwave preamplifier appl. 86−18089
Hall-generator magnetic field stabilizer and a digital sweeper as a combined set for magnetic resonance spectrometers *(Polish)* 87−7511
HV power supply to EPR spectrometer electromagnets *(Polish)* 85−39109
low field imaging, signal-to-noise levels, imaging pulse sequence optimisation 88−29994
low-temperature pulsed NMR expts., use of very-low-noise amplifier 86−786
LU-2 GeV linear electron accelerator, computerised detection system using multiwire proportional chambers 88−36365
MNR imaging system using minispectrometer and microcomputers *(French)* 88−61280
NMR pulse spectrometer analyser, using multistep exponential extrapolation 86−18260
NMR spectrometer, Hall generator stabiliser of permanent mag. field *(Polish)* 85−37787
NMR spectrometer, large superconducting magnet 86−50551
NMR spectrometer, microcomputer-based data acquisition system 86−5133
NMR superconducting magnet at Orsay, performance 86−50552
pulse transmitters, wideband, for NMR spectrometers 87−36989
resonators used in electron spin resonance spectrometers, electrodynamic design 86−29524
shimming and Hall probe calibration 88−68007
streamer chambers, HV supply, control and stabilisation 85−20846
superheterodyne channel of microwave EPR spectrometer 87−65945
Varian E-109 EPR spectrometer sensitivity improvement, using FET microwave preamplifier 88−50385
GaAs cryogenic MESFET magnetic resonance spectrometer for 500 MHz to 3 GHz range 88−10111

magnetic resonance spectroscopy
see also nuclear magnetic resonance spectroscopy
Anderson generalised coils for magnetic resonance imaging 88−64003
biomedical imaging, RF power amplifier design 86−70388

magnetic resonance spectroscopy continued
cavity resonator for in vivo ESR spectroscopy 86−14465
computerised image processing, using fuzzy clustering method 88−74826
eddy current probe, microwave FMR, and signal processing methods 85−17041
EPR, Q-band loop-gap resonator 86−53029
EPR, X-band bridged loop-gap resonator 88−50318
ESR spectrometer sensitivity enhancement, using dielectric resonator 87−6028
HF and UHF meas. based on magnetic resonance, use of $CuCl_2 \cdot 2H_2O$ and $CuSO_4 \cdot 5H_2O$ 88−4593
high resolution multipulse generator, computer-controlled 85−22717
image noise reduction and resolution enhancement using parametric techniques 88−21289
imaging supercond. magnet, initial field decay in persistent current mode 88−65063
microwave field strength in ESR, pulsed modulation technique meas. 86−24725
microwave helix as surface coil antenna for EPR 85−57126
microwave spectroscopy with axial compression of specimens, resonator with magnetic field concentrator 86−67467
polymeric compounds, qualitative estimation by NMR spectroscopy 85−1791
rectangular coils, magnetic field calc. 85−61492
stationary magnetic field source using electromagnetic coil rotative-symmetric arrangement *(Czech)* 87−68731
superconducting magnets appl., 1987 status and developments 88−45014
superconducting MRI system from Mitsubishi, image processing *(Japanese)* 88−74819
surface mounted components, underside gaseous cleaning, EPR study 85−23263
^{4}He resonance magnetometers, optically pumped 87−56819
YIG, small thin-film samples, magnetic resonances anal. 87−25759

magnetic screening *see magnetic shielding*

magnetic semiconductor materials *see magnetic semiconductors*

magnetic semiconductors
see also semimagnetic semiconductors
bidirectional characteristics and applications of temperature-sensitive magnetic semiconductor *(Japanese)* 88−19910
ferrite, magnetic semiconductor, temperature-sensitive, nonlinear negative resistance 88−51268
ferrite magnetic semiconductor, temp. sensitive, nonlinear negative resistance, characts. exam. 88−25894
gyromagnetic semicond. transmission lines, microwave propag. 87−73598
junction magnetic control semiconductor devices 86−63240
magnetic ferrite semiconductor *(Japanese)* 88−67766
magnetostatic waves interaction with conduction electrons, deformation mechanism 85−1266
ordered-alloy semiconductors 88−50611
$Cd_{0.98}Ag_{0.02}Cr_2Se_4$, ferromag. chalcogenide spinels, mag. ordering, influence on p- and n-type conduction 85−28985
$CdCr_2S_4$, negative differential resist. and switching effects 85−45412
p-$CdCr_2Se_4$ ferromag. semicond., photocond. relax. time tempt. depend. meas. 87−26168
$CdCr_2Se_4$, magnetic semiconductor, conductivity and photoconductivity 85−11973
p-$CdCr_2Se_4$, photoelectrochemical behaviour studies 87−60121
p-$CdCr_2Se_4$, photoelectrochemical props. in redox solns. 86−8910
$CdCr_2Se_4$ ferromag. semicond., carrier relax. via mag. interactions, photogenerated carrier recomb. time 87−60123
$CdCr_2Se_4$-Ga, lightly doped, ferromag., photoconductivity, band struct. 87−2014
$CdCr_2Se_4(S_4)$ mag. semicond., negative differential resist. and switching effects 85−18117
$Cd_{0.95}Mn_{0.05}Se$ dilute magnetic semiconductor for photoelectrochemical cells 88−24117
$Cd_{1-x}Mn_xTe$ diluted magnetic semiconductor superlattices, props. 86−8842
$Cd_{1-x}Mn_xTe$ films growth by atomic layer epitaxy 85−368
$Co_{1-x}Zn_xFe_2O_4$ mixed ferrite, elec. cond. behaviour near Curie point 88−1384
EuO_{1-x} thin films, elec. resist. meas., O vacancy conc. effects 86−21168
EuS, refrigerant capacity and use in mag. cooling 87−32835
FeN_x films, ferromag. semicond., struct elec. and mag. props. 85−23492
γ-Fe_2O_3 superfine powder, prep. and gas sensitive props. *(Chinese)* 87−31593
n-α-Fe_2O_3/aqueous electrolyte junction, electrochem. characterisation *(French)* 86−53490
Fe_2O_3/o-toluidine photoelectrochemical imaging system *(Japanese)* 87−20910
$Fe_2V_4Mo_xO_{13}$ antiferromag. semicond. solid solns., transport phenomena 86−35375
$HgCr_2Se_4$, ferromag. chalcogenide spinels, mag. ordering, influence on p- and n-type conduction 85−28985
$HgCr_2Se_4$ ferromagnetic semiconductor, magnetoresistance anisotropy 88−39087
$HgCr_2Se_4$ mag. semicond., elec. cond. in strong elec. fields 85−34547
$HgCr_2Se_4$ mag. semicond., negative differential resist. and switching effects 85−18117
$HgCr_2Se_4$ magnetic semicond., resist. change under FMR conditions, energy transfer mechanisms study 86−58280
$HgCr_2Se_4$, magnetic semiconductor, elec. cond. in high elec. fields 86−58281
$HgCr_2Se_4$, magnetoelectrical resonance 88−39086
p-$HgCr_2Se_4$, photoelectrochemical props. in redox solns. 86−8910
$HgCr_2Se_4$ spinel magnetic semicond., electronic struct., elec. props., defects and ferromag. anisotropy 87−17749
$LaFe_4P_{12}$ type cpds., struct., elec., mag. and Mossbauer spectra props. 85−23479
$(Li_{0.5}Fe_{0.5})_{1-x}Ni_xFe_2O_4$, mixed ferrites, thermoelec. power 86−21150
$Li_xNi_{1-2x}Fe_{2+x}O_4$ mixed ferrite, elec. cond. behaviour near Curie point 88−1384
Mg ferrite, elec. cond., thermoelec. power 85−6716
$MnGa_2Te_4$, Schottky diodes, interband^2 transitions, photosensitivity spectra 88−13308
$MnIn_2Te$, Schottky diodes, interband transitions, photosensitivity spectra 88−13308
$Mn_{1-x}Mg_xFe_2O_4$, charge transport, thermoelec. and Seebeck coeff. 88−1385

magnetic semiconductors continued
$Mn_{1-x}Mg_xFe_2O_4$ mixed ferrite, elec. cond. behaviour near Curie point 88−1384
MnSe-ZnSe 2D mag. semiconductor superlattice, RHEED oscills. for MBE growth 87−36730
MnTe, resistivity critical behaviour around Neel temp. 88−12964
$Mn_{1-x}Zn_xFe_2O_4$ ferrite, polycrystalline, nonstoichiometric, elec. props. 85−55474
$Ni_xNz_{1-x}Fe_2O_4$, elec. cond., thermoelec. power meas. 86−8806
$Ni_{1-x}Zn_xFe_2O_4$ mixed ferrite, elec. cond. behaviour near Curie point 88−1384
$Sn_xFe_{3-x}O_4$, Sn doped magnetite, photoconductivity 85−18793
UFe_4P_{12}, ferromag. semicond., low temp. sp. ht. and magnetoresist. meas. 86−27959
YIG:Ca thermistor bolometer in planar and continuous bridge config. 85−3992
$Zn_{1-x}Mn_xSe$ diluted magnetic semiconductor superlattices, props. 86−8842

magnetic separation
AC-powered high-gradient mag. separator 87−75342
BWR condensate water purification using diffusion bonded matrix of HGMF 85−27243
coal, lignite, S and ash contamination removal by supercond. open-gradient mag. separation 85−51389
coal, magnetic separation of pyrite after microwave heating 87−26727
coal HGMS desulphurisation expts. 85−59862
coal powder beneficiation by dry HGMS process−American coal 88−14363
cold rolling coolant for steel HGMS treatment 88−52169
colloids, ultra-fine, high gradient mag. filtration, particle diffusion effects 86−36679
computer simulations of physical systems with optimal parameters 88−52175
conference, Hamburg, Germany (April 1984) 85−22057
continuous flow mag. separator, appl. of mag. flocculation 85−24770
continuous selective HGMs in the repulsive force mode 85−24776
coupled pole-type mag. separator, separation mechanism anal. 86−29323
design and construction of static magnetic separation unit *(Russian)* 85−13058
design optimisation and magnetic forces of magnetic separator with resistive or superconducting winding *(Slovak)* 85−62738
dynamic method utilizing mag. susceptibility distrib. 85−24775
electromagnetic separators, pulley-type, traction forces determ. 86−54273
EM devices for separation of steel sheets, calc. of mag. fields and forces 87−33400
EM separation of magnetically-weak materials *(Russian)* 86−29324
extraction magnet in form of flat table, numerical optimisation 85−30020
ferrofluids, mag. filtration 87−33403
ferromagnetic body-EM separator interaction force and volumetric density calc. *(Russian)* 88−40500
filtration of ultra-fine particles 85−24768
flames and gas flow 88−52165
flow through beds of magnetisable particles, mag. structural effects 88−66007
force of heterogeneous magnetic field acting on a particle of small susceptibility in a high-gradient magnetic separator *(Polish)* 87−12687
gas-particle mixtures, mag. filtration, computational studies 86−29326
heat and power plant at Kachkanar, electromagnetic iron separator with water cooling 85−32346
helical flow supercond. mag. ore separator, theory 88−52167
HGMS, collection of micron-sized particles at high vel. 85−24772
HGMS, continuous heavy medium recovery 85−24774
HGMS, filtration of submicron particles by spheres 87−26728
HGMS, magnetic traction force on paramagnetic particles 88−66018
HGMS, optimisation of matrix design 86−22635
HGMS, parallel stream type, for recovery of ferromag. particles, filter performance 87−2281
HGMS, particle trajectories in ordered array of wires 88−66017
HGMS, real oriented matrix, mag. and hydraulic forces analysis 85−30018
HGMS, removal of particles from matrix 85−35979
HGMS, single wire, paramag. particle removal 85−24773
HGMS, transverse configuration, particle accumulation on single wire 87−33402
HGMS app.. to preconcentration of complex ore 85−24778
HGMS appl. to recovery and recycling of CRT glass grinding sludge 85−24777
HGMS filters with strictly ordered wire matrix, performance in axial and transverse configs. 85−24771
HGMS using amorphous mag. ribbon 86−48547
HGMS using superconducting magnet 87−67931
high gradient, removal of heavy metals from water 86−29329
high gradient mag. filter, diffusion bonded matrix for water treatment 85−56981
high T_c ceramic superconductors, appl. in flux tubes for mag. separation 88−65024
high T_c superconductor materials, separation device 88−13693
INTERMAG 87, conf., Tokyo, Japan (April 1987) 88−43546
iron ore separation in steady/AC mag. fields 87−75341
isotope separation large solenoid optimisation by sequential quadratic programming 88−66012
isotope separation magnet design 88−65035
linear high-gradient mag. separator development 88−66005
magnetic filtration studies using a permanently magnetised matrix 88−52166
magnetic flocs build up on a single magnetic wire 87−2280
magnetic materials, props. and appls., conf., Salford, UK (Sept. 1987) 88−55774
magnetic separators using superconductive magnet 86−22637
magnetics conference, Phoenix, AZ, USA (April 1986) 87−16235
magnetocentrifugal separation of particulates, theory 87−2283
open gradient mag. separation, superconducting magnet design 87−7054
open gradient mag. separators, selectivity and productivity 88−58815
open gradient magnetic separation with linear periodic current arrays 88−66008
open-gradient mag. separation, periodic permanent mag. system 87−26652
open-gradient supercond. magnets, performance limits 88−52168
optimal OGMS systems, changes in characts., current coils with ferromag. cores 88−58814
ordered HGMS filters, flow conditions, Navier-Stokes eqn. anal. 88−2498
overhead electromagnetic iron separators, technical-economic indices 87−7509

magnetic separation continued
particle capture by an infinite array of ferromagnetic wires, laminar flow model 85−51386
particle diffusion under mag. force, appl. of nonequilib. conc. profiles 87−61346
particle removal from a matrix in HGMS 85−30019
particle separation, collision limited OGMS process, Monte Carlo simulation 88−58813
particles motion in magnetic field of the high-gradient magnetic separator *(Polish)* 87−12686
permanent magnet disc separators, sticking force characts. 85−24779
plankton, buildup of magnetic flocs containing plankton on a single wire 88−52170
pulverised coal beneficiation by fluidized-bed HGMS process using slotted steel plates 88−55174
PWR, secondary-loop water purification by mesh-type HGMS 85−27244
PWR corrosion products, mag. filtration of aq. suspensions 85−27245
selective continuous magnetic separation of two-component particulate suspensions 87−26653
selective magnetic separation of V and Au 87−54505
selective magnetic separator for fine-grained minerals 88−66009
separators, with superconducting electromagnets *(Polish)* 85−7605
solenoid magnetic filter for Fe-containing impurities removal from vapours *(Russian)* 86−36675
steel sheet separation, 3D magnetic field analysis 87−26729
submicron particle separation, influence of interparticle forces 85−24769
superconducting drum separator 85−13057
superconducting helical flow mag. ore separator 85−24780
superconducting HGMS for U extraction from seawater 88−66010
superconducting HGMS with current carrying wire matrix 86−29328
superconducting high-gradient magnetic separator for clay processing 88−45657
superconducting mag. separator 88−66004
superconducting magnet based systems 85−51388
superconducting separator, with cylindrical coils, magnetic field calc. *(Czech)* 85−19106
superconducting separator with magnetically balanced matrix 88−66006
superconducting solenoid type mag. separator, appl. in mineral processing 85−24781
superconducting split-coil open gradient mag. separator, design and anal. 86−29327
superconductive magnet 86−22637
technology, conf., Boston, MA, USA (Sept. 1987) 88−62848
volatile dust separator, gap force field anal. 85−7600
volume-gradient magnetic separator, selectivity 86−42809
waste water treatment, HGMS filter performance for recovery of magnetic flocs 88−18275
weakly magnetic materials, deflection by supercond. OGMS 88−58812
weakly magnetic ores, plane volume-gradient magnetic separator model 88−66011
wet open gradient mag. separation, analysis 86−59018
Cu mineral recovery by high gradient magnetic separation of ore, tailings and concentrate 86−29330
Fe-Cr-P-C amorphous ribbons, electromagnetic filtration characteristics for purification of water contaminated with iron rusts 87−47129
α-Fe_2O_3 hematite submicron particles, mag. filtration 88−72520
α-Fe_2O_3 submicron particles in solution, mag. filtration through a packed bed of spheres 85−51385
O_2 enrichment of air using superconducting high-intensity mag. field, expt. *(Japanese)* 85−30016
Sm-Co quadrupole magnet spin separation of metal clusters 87−46394

magnetic shielding
300 MVA superconducting generator multilayer damper shield fabrication by explosive bonding 87−35904
active magnetic screening of coil, NMR imaging appl. 86−64016
advanced cable shield termination process for broad-band EMI suppression 87−26826
aircraft, problems and solutions 85−30060
alloy performance in cryogenic environment 87−18470
amorphous alloy ribbons as mag. shielding materials 85−35294
amorphous metallic ribbons in electronic devices *(Polish)* 85−1826
amorphous soft magnetic alloys, practical appls. 87−46327
anisotropic magnetic shielding, optimisation 88−8495
antennas, non-anechoic screened enclosures operation 87−47325
ASTM EM-shielding effectiveness standard 85−13160
ASTM shielding effectiveness standard 86−29498
ASTM testing for EMI/RFI shielding 85−46594
ATE, EMI suppression, grounding and shielding 88−14407
avionics systems EMC modelling 87−77786
axisymmetric coil systems, effects of Fe study by surface integral approach 85−24766
building EM screening effectiveness calcs. 87−61405
business machines, FCC directives for EMI shielding 85−19161
cable connector shields, test system for performance evaluation and shield designs 85−14729
cable shield tester for in-situ hardness surveillance 88−16434
cable shielding, telco's view 86−15908
cables with screening effects, nonlinear integrodifferential equation, numerical resolution *(French)* 85−17910
circuit component EMI shielding with Ni-coated mica 88−2601
closed superconducting shield, homogeneous mag. field generation 87−68713
coating of plastics for EMI/RFI shielding 88−58887
coaxial cable, shielding and aging effects 86−30548
coaxial cables, braided, leakage props., tolerance effects 85−30065
colour TV camera, terrestrial magnetism influence on misregistration and one countermeasure 87−8423
communication cable shields, multilayer, calc. of electromagnetic fields 85−41668
computer suites, high level RFI protection 85−2608
computers/ATE cables and wires selection guide 85−57918
conducting composite plastic plate, cavity and flange junction, radio absorption props. 86−3581
conducting EM flat shield, freq. anal. of axial symmetry eddy currents field *(Polish)* 87−54617
conducting hollow cylinder, transient states *(Polish)* 85−51362
conducting materials shielding effectiveness meas. method using spherical cell *(Japanese)* 87−77343

magnetic shielding continued
conducting tube shielding effect, determ. using transmission line theory 85−7678
conductive EMI/RFI shielding materials answer challenge posed by FCC regulations 85−24860
conductors in shields, EM forces calc. 87−35629
conf., London, England (Nov. 1983) 85−27960
crosstalk in coaxial transmission systems 88−15307

EMI shielding of racks and enclosures 88−56019
EMI suppression by screening *(German)* 87−12731
EMI/RFI, plastics appl. 85−46593
emission measurements in screened rooms in the frequency range 10 kHz to 200 MHz 85−30063
EMP, systems interaction, EM topology concepts, introduction 87−12745
EMP induced currents and voltages, simulation and testing and coupling to cables, shielding 87−12749
EMP interaction with avionics systems. conf., Ankara, Turkey, (May, 1986) 87−10043
EMP protection 87−54590
EMP shielding of C^3 facilities 87−12750
EMP- and lightning-protection of HF transmission lines 85−2613
Faraday shield, mag. shielding 85−30056
ferrite and resistive lossy EM shielding materials, investigation 86−3580
ferromagnetic amorphous ribbons, mag. shielding characts. in DC-low freq. region 87−2316
field attenuation of enclosures, expt. and theoretical anal. 88−72587
field homogenisation by diamagnetic shields 87−25877
field penetration through protective metal screens 88−14409
field strengths meas., open area site and absorber-lined chamber, statistical correlation 86−31560
flake-filled plastics, moulding conditions and their effect on shielding characts. 85−13161
flat grid screens, equivalent cct. determ. using Schelkunoff impedance concept *(German)* 85−36039
forced-commutation circuit inductor and transformer specification and design 87−31722
four-port technique for measuring shielding effectiveness 88−14415
Fujitsu 700 connector series for reliability and shielding 85−55234
fusion reactors, magnetic shielding design analysis 85−2594
gasket material selection 85−19163
HEMP shielding effectiveness measurements on tactical shelters 88−14422
HF absorbing materials *(German)* 88−52242
high-power generating equipment and current conductors, shielding coefficient *(Russian)* 88−68987
HV pulse power through self-magnetically insulated transmission line 86−50998
inductive shielding solenoidal SMES 88−69718
industrial computer systems with highnoise-immunity, EM shielding techniques 85−62825
industrial data acquisition systems, grounding and shielding techniques, review 86−17868
insertion loss meas. 86−10115
insertion loss meas. of shielding materials 86−29447
interference control, shielding role 88−72583
interference-type noise exclusion, shielding and guarding 85−24868
interior decomposition model, development and appl. 87−37612
IR camera, using microwave opaque conductive mesh structure 88−47527
laboratory magnetometer bench, with shield and regulator 87−21213
ladder network theory for transmission line and magnetic shielding problems 87−26822
LF EM shielding, two coaxial cylindrical shells anal. 85−19156
LF magnetic shielding effectiveness of steel, reinforced concrete platforms 86−15957
lighthouse electrical systems, lightning protection 85−4685
lightning stroke interference fields, casing shielding effectiveness *(German)* 85−51461
low frequency shielding of moving sheet conductor 87−68796
low-frequency low-impedance electromagnetic shielding 88−72573
magnetic vapor shielding mechanism for protection of components subjected to high heat flux 88−40602
magnetoresistance heads with asymm. shields, readback signal *(Japanese)* 86−15401
mathematical models for radiated electric field amplitudes estimation from closed-field meas. 88−14428
metallic screens for electromagnetic shielding, effectiveness calculation *(Russian)* 85−41648
MFTF-B neutral beamlines, mag. shielding tests 85−2595
microstrips, shielded, finite element soln. of steady-state skin effect problems 87−26824
microwave backscatter from metallic cylinder, concealing dielectric plate effect 86−29337
molded-in-place cover gaskets for environment seals and EMI/EMP shields 87−68807
multifilar shielded lines, differential mode voltages induction 85−63496
multigrounded cable shields inductively and conductively coupled to neutral power lines, anal. 87−62808
multilayer chip inductor features innovative design 87−45328
multilayer cylindrical magnetic screens, particle beam expts. appl. 86−29430
multilayer ferromagnetic screens, shielding effectiveness anal. *(Russian)* 88−66102
multipin connectors, with mismatched loads, shielding effectiveness meas. errors 85−11676
multiple mu-metal shield, shielding factor formula, derivation 86−36759
multishielded coaxial cables, transfer impedance modelling *(French)* 87−8143
near-field shielding effectiveness measurements, comparison 88−40590
NMR imaging, passive screening of switched magnetic field gradients 87−14856
NMR imaging in hospitals, superconducting magnet technology development 88−48147
noise-carrying EM field on nonuniform multiwire screen, anal. 86−15904
nuclear spin tomography, EM shielding requirements 85−20905
optimisation of magnets with iron using computer program 88−52150
optocouplers for radiation protection 86−68393
panel enclosure performance assessment 85−30062
parasitic overvoltage transients, origins and protection methods *(Spanish)* 87−47239
partial longitudinal conducting screens, optimum math. model for EM field anal. 88−34339
PBX protection from nuclear explosion effects 85−62809
permanent magnet for Mossbauer spectrometer 87−63698
permissible damage to EM shielding systems 87−26823
planar shielding material, transmission loss meas. using square coaxial-line cell *(Japanese)* 88−10096

magnetic shielding continued
plane cond. strip, transient shielding effectiveness study 88−2645
plane wave shielding theory and practice 88−72572
plastic composites, EMI shielding effectiveness meas., using dual chamber facility 85−44804
plastic packaging, EMI techniques 85−19162
polycarbonate/ABS blends for EMI shielding 85−13164
polyethylene matrix composites, C or metal fibre filled, EMI shielding effectiveness, thermal stability 88−27527
polypyrrole, conducting polymer, radiation shielding appl. 86−22718
post mold EMI shielding techniques for plastics 85−13162
power cable interference prevention, specifications *(German)* 87−21943
power electronics reactors and inductors EM field reduction using EM shields and magnetic shunts 87−17416
power supply flux interference elimination using embossed Cu foil tape 85−5136
power transformer conductive or magnetic screen field distrib. and loss calc. and meas. 87−36002
power transformer screening and fieldS distrib., dedicated network program for interactive design 87−64672
power transformers, local loss reduction by magnetic field screening and eddy current compensation *(Russian)* 86−66138
power transformers, performance parameters, anal., using 3D magnetic field calcs. 85−9965
protection of equipment against radiation *(French)* 85−7672
quasi-free neutron oscillation expt., magnetic shielding of a large volume 87−29467
quasi-static electric and magnetic-field penetration of spherical shield through circular aperture 85−41548
quasi-stationary magnetic shielding properties ofthick spherical shells with equatorial seams 86−29452
recording head shield for interference reduction 86−35989
resonant degaussing for TV and high definition color monitors 87−20674
resonant frequencies of disk dielectric resonators 86−20806
review of convectional magnetic shielding 87−75467
RF cables, screening meas. using transmission type wire injection principle 88−41493
RF leakage detection on shielding enclosures, King-type probe appl. 87−14327
RFI aspects of EMC and screening 87−68820
RFI meas. screened room techniques for RFI meas. 87−12756
RFI/EMC shielding in cable connector assemblies 88−14398
RFX experiment, electrical grounding, shielding and isolation system 88−58892
room-sized cubic coil systems for off-centre use 86−15901
saddle deflection yoke with ferromag. shield, field parameters *(Chinese)* 88−27461
satellite-borne SQUID magnetometer, LF ambient magnetic fields effect 85−4396
screened dielectric resonators, physical phenomena and design 86−20805
screened helical delay system, coupling resistance anal. *(Russian)* 85−61176
screened magnetic system, rating by numerically asymptotic method 87−54481
screened slotted line, natural modes calc., Schwinger's transformations appl. 86−49428
screened transformer external magnetic field calc. *(Russian)* 85−60232
screening effect of a spherical screen for a variable magnetic field *(Russian)* 87−7553
screening field of dipole source with layer of semiconducting material *(Russian)* 87−39296
screening meas. in time domain, frequency domain conversion 85−41643
screening measurements in the time domain and their conversion into the frequency domain 85−4091
screening of plastic electronic housings by metal spraying 85−2587
screening properties of coaxial cables and connectors 85−30064
screenroom measurements of antenna factors 86−18050
screens used in induction heating, ferromagnetic conductor simulation 87−5086
self-shielding superconducting solenoid systems 88−65096
sensor for EMP type fields inside line-replaceable-units meas. 87−14329
shield cables, transfer parameters meas. above 100 MHz 86−17176
shield enclosure seams, integrity monitor 88−72580
shield room, laboratory facility for aerospace, geophysical and general studies 86−12137
shield topology, EM interaction with large systems 87−7544
shield-ground adapter, model development 88−14411
shielded cable transfer impedance meas. using FFT techniques *(French)* 87−12739
shielded coaxial cables and shielding discontinuities, transfer parameters *(French)* 85−17912
shielded strip line, abrupt open end, electrodynamic anal., 2D integral equation solution 86−58029
shielding against lightning induced currents and voltages 87−12747
shielding characteristics of honeycomb filters 87−26847
shielding effect of wave absorber, microwave oven gap leakage 86−3585
shielding effectiveness before and after the effects of environmental stress on metalized plastics 88−72586
shielding effectiveness calc., circuit approach update 88−72574
shielding effectiveness for far field, prediction, theoretical expressions 86−3583
shielding effectiveness meas. of cable and shielding configurations, mode-stirred techniques 88−72575
shielding effectiveness meas. using mode-stirred chambers, comparison 88−72576
shielding effectiveness of 'pigtail' connections 88−12696
single phase conductor metal shielding, hysteresis and eddy current losses calc. *(German)* 87−78118
site attenuation 86−31577
soft magnetic amorphous material applics., review 88−20243
soft magnetic crystalline and amorphous metals, characts. and selection criteria *(German)* 88−20238
solenoid shielding, zero-first order boundary element method 86−36666
space vehicles, shielding effectiveness, theory 87−26825
spherical magnetic shield, field nonuniformity reduction 86−15959
SQUID pick-up coil, superconducting screening of magnetic flux 88−58033
SQUID-based systems operating in low fields, superconducting mag. shielding 85−56191
steel sheets, BEM calc. 86−42861

magnetic shielding continued
superconducting alternators, three-dimensional electromagnetic field determination 86−12783
superconducting bending magnet for synchrotron radiation source 88−47905
superconducting generator magnetic leakage flux distrib., hybrid finite and boundary element analysis 87−42820
superconducting generator multishield screening system analysis and expt. 87−42819
superconducting generator with multishield screening system, EM fields, 3D anal. 86−33286
superconducting generators, damping and shielding system comparison 86−39664
superconducting mag. reson. imager, ferromag. screening 87−14853
superconducting magnetic energy storage, solenoid-type shield coil system 87−38711
superconducting magnetic shield for use with microelectronic ccts., mag. flux expulsion study 87−74644
superconducting magnetic shielding network with superconducting wires 87−67814
superconducting materials appl. 86−48622
superconducting small synchronous generator rotor damping factor tests 87−42918
superconducting synchronous generator, with electromagnetic shield coil control, charact. 85−9850
superconducting synchronous generator EM shield coil control characteristics 87−42915
superconducting tube, shielding currents distrib. 85−59036
superconducting tubes, flux annihilation, mag. shielding appl. 86−15438
superconducting turbogenerator rotor screening system in LF magnetic field *(Polish)* 86−33298
superconducting unipolar machine, inductor and screening coil optimisation using gradient method 86−39817
superconducting-rotor synchronous generators with magnetic steel rotor screen, 3-D quasistatic magnetic field 86−39737
superconductor screens as components of AC electric powerunits 86−48624
surface current and penetration calculations in aircraft structures 85−30059
surface magnetic field reduction meas. of shielded windows and wire mesh 86−3584
synchronous generator, with nonmagnetic rotor, operator reactances and synchronous rocking *(Russian)* 85−53681
telecommunication buildings, shielding efficiency, experimental study *(French)* 85−19148
telecommunication cables, longitudinal shielding against LF magnetically induced interference 86−10951
telecommunication cables with slotted screen, voltage and current determ. in core 87−55926
telecommunication transmission line theory for shielded pair balanced circuits with flattened shield *(Polish)* 85−30067
TEM cell, apertured, reverberation chamber, shielding effectiveness meas. 87−26841
TEM cell, dual and split, shielding effectiveness meas. 87−26840
TEMPEST project, transient EM pulse emanation standard, electronic eavesdropping 88−34338
termination transfer impedance Z_{TT} 88−14413
theory and practices of shielding 88−20945
theory equivalent sources calculation 86−15958
thin-walled high permeability enclosures, simplified magnetostatic modelling for shielding effectiveness eval. 87−26619
thin-walled mag. shell screening analysis and meas. *(Russian)* 87−33453
time domain calculation of electric field penetration through metallic shields 88−72585
total shielding effectiveness of conductive barrier using transmission line concepts 86−3548
transfer, impedance technique, equivalent circuit model and network analyser measurements 88−14408
transfer impedance, shielding effectiveness anal. 85−13144
transformers, single phase low power, leakage flux studies 85−11614
transient shielding of conducting screens 86−29449
turbogenerators, magnetic field shielding in stator core end zone 85−43932
two-pole squirrel cage motor radial vibrations, damping and EM phenomena 87−42998
uncommon shield techniques 86−29450
underwater explosion transducers, electrical isolation 88−4362
voltage divider shielded door seal, theory and appl. 86−29488
whole-body, NMR imaging supercond. magnets, secondary shielding design 88−68361
windows and wire mesh, surface mag. field attenuation 85−24861
wood panels, Cu-sprayed, magnetic field reduction meas. 86−29448
zero-quanta superconducting mag. shield for monopole detectors 85−31733
C fibre composite cylinder 85−2619
C fibre reinforced plastics, RF props., aircraft structures appl. 85−57070
$(Co_{0.94}Fe_{0.06})_{73}(Si_{0.63}B_{0.37})_{27}$ alloy amorphous metal flake compound sheet , mag. shielding props. 88−72593
CoMnFeMoSiB soft mag. amorphous alloy material props., electronic appls. 87−46329
Fe shield for superconducting magnet for whole-body NMR imaging 87−71094
Fe shield shape optimisation for superconducting solenoid magnets 87−67934
$Fe_{40}Ni_{38}Mo_4B_{18}$ metallic glass, mag. shield for cathode ray tubes 85−45956
$(FeNi)_{78}Mo_4B_{17}Si$ metallic glass, mag. shielding props., composition depend. 87−12035
H masers, stability aspects, comment 86−15594
MnZn ferrite power, molten salt synthesis, EM shielding appls. 87−39397
Nb-Ti multiple layers supercond. mag. shields for neutral beam injectors 85−2596
Nb_3Sn multilayer supercond. shields 85−62272
Nb_3Sn superconducting materials for magnetic shielding of superconducting windings 86−10117
NbTi film for mag. shield, thickness depend. of screened mag. fields 87−38712
NbTi multifilamentary superconducting wire magnetic shielding expts. 88−66101
NbTi, superconducting films, mag. shielding effects *(Japanese)* 88−33560
NbTi thin films for mag. field shielding 86−48623
Ni-Fe-Mo alloys, mag. props. and ferromag. shielding at cryogenic temps. 85−45964
Pb glass, phototube, mag. shielding effects 86−15912

magnetic shielding continued
Y-Ba-Cu-O, high T_c supercond., mag. ripple shielding for sp. ht. meas. 88−64982
Y-Ba-Cu-O superconductor, EM shielding props. 88−33554
YBaCuO high temp. supercond., magnetic shielding 88−58047
$YBa_2Cu_3O_7$, glass bonded composites, levitation and mag. shielding 88−52241

metal video tape, durability against mech. stress, effects of mag. layer surface config. 86−35999
metal video tape, graphite fluoride containing, recording performance and wear resist. 86−35997
metal-evaporated media for longitudinal magnetisation recording *(Russian)* 87−18524
metal-evaporated video tape *(Japanese)* 86−36041
metallic amorphous tape appls. in convertors of non-electric quantities *(Polish)* 85−1841
metallic glass tapes, magnetic losses meas. *(Polish)* 85−41032
metallic thin film tapes, diagonally evap., foil sublayer influence *(German)* 87−12049
metallic thin-film recording media, appl. of diamond-like C films 88−57943
modulation noise, depth profiling 87−46361
modulation noise in mag. recording tape *(Japanese)* 85−41035
motion picture equipment, increasing magnetisation level of perforated sound tracks *(Russian)* 85−18573
one-sided flux in mag. recording tape, exptl. demonstration 87−67749
ORWO audio magnetic cassette tape, operational charact. adjustment *(German)* 88−60499
ORWO reel magnetic tapes, selection *(German)* 86−21990
oscillations, LF modulation *(Polish)* 85−18578
oscillations modulation by low frequencies *(Polish)* 85−18577
packing factor and coercivity, Monte Carlo treatment 86−42110
particle anisotropy and orientation distribs. determ. using torque magnetometry 87−49896
particulate, calendering, roughness and deform. aspects 87−46356
particulate magnetic recording media, magnetisation time-depend. decay 85−18563
particulate magnetic recording tapes, hysteretic props. ang. depend. studies 87−25807
particulate media, magnetisation time decay, temp. depend. 86−28680
particulate recording media, magneto-optic Kerr effect hysteresis loop meas. 87−29258
particulate tapes, roughness and recording props. 86−28659
path development for digital audio recorder *(Japanese)* 85−58444
perpendicular magnetic recording *(Japanese)* 86−42128
perpendicular magnetic recording and its application to digital recording 87−18525
PET film, mag. ink coated, creep in compression meas. 86−7863
pilot tracking tones, embedded in binary coded signals, signal-to-noise ratio 88−64927
polyester films for mag. recording media 87−46353
pore area and vol. meas. using Hg porosimeter 85−29450
powders for magnetic tapes *(Russian)* 88−20237
prerecorded R-DAT tape format, high speed duplication results 87−14035
production by electron beam evaporation coating of polymer films 87−32873
pure Fe cassettes, comparative tests *(German)* 86−28698
R-DAT transport mechanism without capstan, performance *(Russian)* 88−41926
randomly oriented fields representation 88−44972
real area of contact, elec. resist. and optical interferometry 85−50833
recording materials, characts. and development 86−9395
recording media, conf., Parma, Italy (Sept. 1986) 87−43737
recording tape, mag. layer design considerations for high durability *(Japanese)* 85−7158
recording tape, magnetisation obs. by SEM using mag. colloid *(Japanese)* 88−57923
recording tapes, bulk erased noise, mag. dipoles correlation 87−25839
recording tapes, particle orientation study using Mossbauer techniques 85−45983
recovery and rerecording of data from Space Shuttle Challenger 87−67748
review of mag. disc stores and tapes *(French)* 86−28696
rotary head digital audio tape, R-DAT, magnetic tape and cartridge 87−14036
self-excited vibrations, distortion effect 86−36037
shielded magnetoresistive head, biasing method 85−45998
signal format specification for 4:2:2 component digital VTR 88−29131
signal statistics and drop-out behaviour for high density recording 85−18566
simple magnetometer for planar geometries, appl. to recording tape 86−31599
slack curing for JVC HR7300/Ferguson 3V30 range 85−3750
SMPTE type D-1 cassette design considerations 87−13975
speed meas. using magnetoresistive transducers 85−20595
storage life limitation factors *(Japanese)* 86−28701
stress-induced demagnetisation process, self-consistent calc. 85−45984
subsurface particles, localisation and charactn. 87−46351
Super VHS tapes, improvements by smooth surfaces *(German)* 88−29116
surface characterisation, head wear as a function of isolated asperities on the surface of magnetic tape 85−24155
surface contact visual media test 85−7150
surface quality anal. using schlieren devices 86−53895
surface roughness meas. using interferometry 86−36043
surface topography meas. by Mirau interferometric profiling microscope 85−48083
temperature measurement of microscopic areas in simulated head-tape interface using IR radiometry 86−63565
tensile testing using microcomputer 87−46350
tension gradient measurement of magnetic tape 85−24156
thermomagnetic duplication of video programme material, copy tape parameters 88−53458
thin film recording media, organic lubricant evaporation method, lubricating surface treatment 85−24133
thin-film magnetic head, tape magnetisation features 85−7157
transversal recording on orientated mag. tape 87−1893

magnetic tapes continued
transversal video recording, abrasivity of magnetic tapes *(Russian)* 85−63872
transverse mag. field stability of mag. pigments 86−28681
tribological and magnetic performances prediction using three-dimens. non-contact digital opt. profiler 86−65120
tribology rel. to failure, accelerated testing 87−46352
universal measuring system for the study of metal glass magnetic tape properties *(Polish)* 87−63498
vacuum web coaters for coating video tape, video design 85−16988
VHS video tape, high performance *(Japanese)* 86−36042
video, manufacture by high vacuum evaporation 86−2600
video cassettes, care and handling for fault prevention *(Spanish)* 85−20377
video cassettes, market survey *(German)* 86−31034
video heads, construction *(German)* 85−37310
video recorder operation, cassettes and basic principles *(German)* 85−58375
video recording on tape 85−3755
video tape, metal-evaporated, columnar struct. and recording characts. 85−24131
video tape lifetime study, head abrasion tests *(German)* 85−7149
video tape noise meas. system 88−9785
video tape surface roughness rel. to mag. performance 86−28660
video tapes, long term storage problems *(German)* 87−53883
video tapes, market review 88−74151
video tapes, professional, large growth within markets 85−18570
video tapes, quality assessment criteria *(German)* 87−70281
video tapes, recording stability meas. *(Russian)* 88−71941
VTR drum, torsional vibration *(Japanese)* 85−47716
VTR metal tape for broadcasting use *(Japanese)* 88−9786
VTR tape transport system, tape path anal. system appl. 86−11302
VTRs standards *(Japanese)* 86−24160
worn against irradiated ferrite head, autoradiography 86−62307
yellow-iron-oxide tapes, electroacoustic properties *(German)* 85−12487
Ba ferrite particulate media appl. to audio and video recorders 86−44040
Ba ferrite particulate perp. mag. tapes, coercivity rel. to recording performance 86−28679
Ba ferrite tape appl. to high-definition VTRs 86−44039
$BaFe_{12}O_{19}$ particle additions to VHS tapes 87−46347
Co ferromagnetic thin metal film video tapes by vacuum deposition *(Japanese)* 87−67742
Co-Cr films with perp. magnetisation, prep. by compressed mag.-field magnetron sputtering 87−67704
Co-Cr perpendicular mag. recording tape, vacuum deposition and mag. props. 85−24118
Co-Cr-Nb tapes for high density perp. mag. recording 86−28654
Co-FeO pigments for mag. recording, reversible coercivity vs. temp. losses 87−46335
Co-Ni films mag. props. depend. on O_2 gas flow rate 88−13681
Co-Ni-O magnetic recording layers, plasma polymerised anticorrosion film 88−57936
Co-P, electroless plated mag. recording tape, coercivity, mech. and corrosion characts. *(Japanese)* 86−36035
CoNi evaporated tapes with narrow-gap ferrite heads, high-density recording characts. 87−46378
CoNi metal evaporated tape, micromagnetic structure of recorded tracks 88−51234
$Co_{80}Ni_{20}$ film, magnetron sputtered, growth and characts. 86−15370
$CoO-Fe_2O_3$ particle series, mag. and struct. props., effect of annealing in N_2 87−46333
CrO_2 flexible mag. recording tape, chem. and mech. performance 86−47961
CrO_2 magnetic tapes, friction, mech. and surface prop. effects, deform, props. 88−6533
CrO_2 particles, LIPS tape prep. and characts. 87−25808
CrO_2 particulate mag. media, magnetisation time decay, temp. depend. 88−71933
CrO_2 recording media, rotational mag. meas. 86−28675
CrO_2 tape, electron-beam thermomagnetic writing 87−32851
CrO_2 video tape headwear regulation 87−46348
α-Fe particles, cryst. grain network struct. and mag. props., rel. to tape performance 86−28601
Fe particulate medium oriented longitudinally inside and perpendicularly at surface 88−51306
Fe_4N acicular particle prep. and appl. to VCR tape *(Japanese)* 88−26663
Fe_xN thin films with high corrosion resistance, mag. props. 88−13664
Fe_2O_3, Co modified, mag. materials recording, overview 85−45980
γ-Fe_2O_3 fine particles prep., one-step process involving thermal decomp. 86−26931
Fe_2O_3 homogeneity, photoacoustic anal. 88−20246
γ-Fe_2O_3 mag. tapes, particle orientation distrib. meas. 88−51212
γ-Fe_2O_3 magnetic tape, static and dynamic switching field distributions 87−18513
γ-Fe_2O_3 particles, gyroremanent magnetisations 88−51241
Fe_2O_3 particles, mag. tape, recording characts., improvement by organic titanate adsorption 88−71932
γ-Fe_2O_3 particles, microstructure, relaxation and print-through 85−45982
γ-Fe_2O_3 recording media, rotational mag. meas. 86−28675
γ-Fe_2O_3 single domain particles belonging to mag. tapes, texture function 86−15394
γ-Fe_2O_3 tape, torque curves, reptation effect 85−24170
γ-Fe_2O_3 tapes, remanence loss, rel. to reptation, viscosity and print-through 86−63548
γ-Fe_2O_3:Co, particulate mag. media, magnetisation time decay, temp. depend. 88−71933
$SrFe_{12}O_{19}$ particles, prep. by glass-ceramic method, mag. props. 85−10835
TbFe amorphous alloys on Kapton for magneto-optical tape 88−58258

Fe-Al-Si film cores for narrow track heads, lamination effects 86−58661
Fe-Al-Si thin film MIG head performance 88−64932
Fe-Ni soft magnetic film single-pole readout head, induced RF permeability variation 87−25800
Fe-Si-Al sputtered film ultra-narrow track width video head, wide-band read/write characts. 88−51294
Fe-Si-Al sputtered film video head, read/write characts. 88−26675
Fe-Si-Ru multilayered films, probe-type thin-film head for perpendicular recording 85−45992
Fe-Si-Ru/Ni-Fe thin film head, perpendicular recording characts. 86−63558
γ-Fe_2O_3 high-coercivity sputter-deposited thin-film disc 88−1867
γ-Fe_2O_3 thin film discs, wear resist. and S/N ratio 86−35998
γ-Fe_2O_3 thin film sputtered discs for high-density mag. recording, fabrication and characts. 86−21993
GdFe amorphous Hall element with high sensitivity to in-phase field, reading of mag. recorded bits 86−60223
GdTbFe four-layer magneto-optical disc, recording characts. 86−68352
In-methane-O_2-N_2 reactively sputtered film for single layer bubble mode optical memory 88−45235
InSb Hall effect playback head *(Polish)* 85−1840
Nd-Dy-Fe-Co amorphous film, magneto-optical disc appls. 88−45232
Ni plasma-sprayed magnetostrictive layer, torque sensor appls. 88−53637
Ni-Co film based magnetoresistive sensors with auxiliary pole of Ni-Fe films 88−42039
Ni-Co/Permalloy thin film composite magnetoresistive sensors 87−60838
Ni-Fe film mag. readout head using induced RF permeability variation 87−67744
Ni-Fe thin film head reproducing performance, permeability depend. 88−51309
Ni-Fe thin film magnetoresistive elements, mag. props. after mag. field annealing 88−39793
Ni-Fe thin film magnetoresistors, E-beam lithography 85−23275
Ni-Fe thin film readout head using induced RF permeability variation 88−26676
Ni-Fe thin film recording head, magnetisation processes 85−45989
Ni-Fe-Mo supermalloy film core, hysteresis loss 87−60821
NiFe thin magnetoresistive sensor effects of annealing and geometry optimisation 88−35960
Sm-Co films for mag. rotary encoder, recording and playback characts. 88−51337
SmCo film props. for magnetic rotary encoder 88−58006
$Sm_{1-x}Co_x$ radially anisotropic discs for transversal mag. recording 86−28655
Tb-Fe thin film magneto-optical recording media, erasing characts. 86−68353
Tb-Fe-Co magneto-optical memory discs, reliability 88−2071

magnetic thin film devices continued
TbCo films for erasable optical disk memory 86−42156
TbFe amorphous thin films, high-density information storage by means of mag. holography 88−34140
TbFe amorphous thin films, high-density information storage by means of mag. holography 88−34141
TbFe:In amorphous film stability for magneto-optical memory protection 88−58264
TbFe-based magneto-optical discs, lifetime improvement using alloying additions 88−2072
TbFeCo based magneto-optic recording system 86−28921
TbFeCo recording media for magneto-optical disk, development *(Japanese)* 87−1890
$(Tm,Bi)_3(Fe,Ga)_5O_{12}$ garnet epitaxial film, magneto-optical laser beam convertor appl. *(Czech)* 87−68221

Co-Cr film perpendicular magnetic recordings, colloid-SEM obs. 88−57928
Co-Cr films, compressed mag. field magnetron sputtering deposition *(Japanese)* 86−40783
Co-Cr films, continuous fabrication by sputtering, substrate degassing effects 87−16665
Co-Cr films deposited by targets facing type of sputtering, additional element (Fe, Zr, Ta) effect 85−49594
Co-Cr films, film growth and magnetisation reversal mechanism 87−18479
Co-Cr films for perpendicular mag. recording media, deposition in facing targets sputtering system 87−31570
Co-Cr films for perpendicular recording, domain wall motion and using atomic layer model 85−24078
Co-Cr films, high rate deposition on continuous tape substrates using target-facing type sputtering 85−44773
Co-Cr films, loop profiling by vibr. sample magnetometer, layer mag. props. 85−20703
Co-Cr films, magnetisation decay 88−71888
Co-Cr films, magneto-structural props., perpendicular recording appl. 88−71884
Co-Cr films, magnetron sputtering 86−9381
Co-Cr films, perpendicular mag. anisotropy, torque anal. 88−71886
Co-Cr films, perpendicular mag. recording, colloid-SEM studies 87−7011
Co-Cr films, perpendicular mag. recording, grain boundary segregation and coercivity 87−74509
Co-Cr films, perpendicular mag. recording media, compositional microstructure 86−58657
Co-Cr films, roll magnetron sputtering prep., inclining columnar struct. 88−43926
Co-Cr films, sputter deposited, effects of additive gases on mag. props. 87−18478
Co-Cr films, sputter deposition and characterisation 87−16666
Co-Cr films sputtered on low temp. substrates, mag. props. and flux reversal 88−64892
Co-Cr films with large perp. anisotropy by roll-coater sputtering system 88−43928
Co-Cr films with oxidised surface layer, friction and wear props. 87−25825
Co-Cr films with perp. magnetisation, prep. by compressed mag.-field magnetron sputtering 87−67704
Co-Cr films with perpendicular mag. anisotropy, stress and heat induced demagnetisation 85−18551
Co-Cr high-rate evaporated films on Ti underlay 88−51238
Co-Cr ion beam sputtered film on Ta isolation layers, growth charcts., mag. props., recording 85−18547
Co-Cr ion-beam-sputtered thin films,. mag. props. 86−9380
Co-Cr layer on Mo Permalloy, double layer perpendicular mag. recording media, mag. props. 86−36016
Co-Cr layer prep. mag. recording media, prep. by DC magnetron sputter roll-coating 88−51239
Co-Cr layers, struct., mag. and recording props. 88−57917
Co-Cr mag. recording media on continuous film substrates, high rate preparation 87−32831
Co-Cr magnetic recording media, continuously sputtered, recording charcts. 85−29458
Co-Cr magnetic thin films, facing targets sputter deposition, microstruct. model 87−10476
Co-Cr magnetron sputtered thin films, mag. and struct. props. rel. to recording appls. 86−28594
Co-Cr media for perp. recording, magnetisation reversal mechanism 88−51185
Co-Cr multilayered film sputtered with nonmagnetic intermediate layers 88−57902
Co-Cr on Permalloy film double-layer recording media, DC magnetron sputtering growth 86−28674
Co-Cr oriented sputtered film, perpendicular anisotropy constants and anisotropy energy 85−18552
Co-Cr perpendicular anisotropy film deposited by evaporation with ion bombardment 88−64891
Co-Cr perpendicular mag. film magnetisation, Potter-Beardsley model 87−46318
Co-Cr perpendicular mag. films, compressed mag. field magnetron sputtering *(Japanese)* 86−40784
Co-Cr, perpendicular mag. recording media, magnetisation, Bitter and electron holography studies 87−67725
Co-Cr perpendicular mag. recording tape, vacuum deposition and mag. props. 85−24118
Co-Cr perpendicular magnetic recording medium improvements 88−57944
Co-Cr perpendicular media, mag. and recording props. 87−46311
Co-Cr perpendicular recording films by compressed mag. field magnetron sputtering 88−44955
Co-Cr perpendicular recording media, corrosion resist. study 88−71879
Co-Cr perpendicular recording media, direct obs. of magnetically distinct regions using FMR 85−45997
Co-Cr perpendicular recording media, magnetisation reversal mechanism, hysteresis loss meas. 87−46316
Co-Cr perpendicular recording media, noise charcts. 85−46007
Co-Cr perpendicular recording media, props., effect of impurity gases 87−32827
Co-Cr perpendicular recording media, sputtered, chem. stability and microstruct. 86−28672
Co-Cr self epitaxial media for roll coater sputtering system 88−51206
Co-Cr single-layer film switching mechanism with Ge underlayer 88−57898
Co-Cr single-layer medium, recorded magnetisation intensity meas. by electron holography 88−44974
Co-Cr single-layer perp. recording media, noise 88−44980
Co-Cr sputtered film, compositional microstructure 86−9379
Co-Cr sputtered film, mag. props., oxidation and annealing effects 85−18549
Co-Cr sputtered films, c-axis orientation, incident angle effects 88−43925
Co-Cr sputtered films, coercive force control 87−46306
Co-Cr sputtered films, easy axis dispersion, Hall hysteresis loops 86−28596
Co-Cr sputtered films for perpendicular magneticrecording 86−42134

magnetic thin films continued
Co-Cr sputtered films, hysteresis loops and coercive field 86−28598
Co-Cr sputtered films, internal stresses 86−9384
Co-Cr sputtered films, mag. and struct. props., effect of O incorporation 86−28595
Co-Cr sputtered films, mag. anisotropy, substrate temp. depend. 88−44947
Co-Cr sputtered films, mag. props., effect of C additions 88−44951
Co-Cr sputtered films, mag. props., substrate bias voltage effect 86−9378
Co-Cr sputtered films, magnetostriction and Young's modulus 86−9383
Co-Cr sputtered films, microstructural inhomogeneity, mag. props. 87−25770
Co-Cr sputtered films on polyimide substrates, magnetisation props. 88−44957
Co-Cr sputtered films, perp. mag. props. 88−44958
Co-Cr sputtered films, scanning and transmission electron microscopy domains, microstruct. 85−18550
Co-Cr sputtered films, shearing of perp. loop 88−44949
Co-Cr sputtered films, surface and vol. mag. hysteresis 87−46314
Co-Cr sputtered films with perp. anisotropy, domain struct. 88−44950
Co-Cr sputtered thin film, initial layer magnetic anisotropy 88−57901
Co-Cr thick targets, magnetron sputtering deposition 87−44375
Co-Cr thin film, mag. props., under layer effects 86−9382
Co-Cr thin film microstratification and ferromag. resonance responses 88−57900
Co-Cr thin film multilayers, sputter deposited, coercivity 88−71885
Co-Cr thin film perpendicular recording medium, survey of research 88−71913
Co-Cr thin films, DC magnetron sputtered, mag. props., effect of substrate and deposition rate 87−32829
Co-Cr thin films, effect of Ti underlayer on mag. props. 88−51207
Co-Cr thin films for mag. recording, by facing targets sputtering, C-axis orientation 87−31558
Co-Cr thin films for perpendicular recording, substrate effects, coercivity, mag. orientation 85−18548
Co-Cr thin films, mag. props. depend. on sputtering parameters 87−46309
Co-Cr thin films on Ge layers, c-axis dispersion and mag. props. *(Japanese)* 86−42098
Co-Cr thin films on Ge layers, microstruct. and mag. recording props. 86−28593
Co-Cr thin films prepared by high rate magnetron sputtering, props. for mag. recording 85−18545
Co-Cr thin films, sputter deposition on rotating disc substrates 87−52182
Co-Cr thin films, vacuum evaporated, mag. recording props., O contamination effects 88−71918
Co-Cr vacuum evaporated films, coercivity, deposition rate depend. 88−44948
Co-Cr vacuum-deposited film, perpendicular magnetic recording performance 88−57945
Co-Cr/Fe-Ni evaporated double-layer film for mag. recording, Ti interlayer effect 88−26680
Co-Cr/Ni-Fe double layer medium, high bit density recording with single-pole perp. head 88−44973
Co-Cr/Ni-Fe perpendicular recording media, noise charcts. 85−46007
Co-Cr/Permalloy double layer mag. recording media, noise anal. 86−36017
Co-Cr/Permalloy perpendicular mag. recording, rigid disks, recording charcts. 86−36021
Co-Cr/Permalloy perpendicular recording media, recording charcts. 86−36022
Co-Cr-M (M=Fe,Ta,Zr) alloy films for mag. recording, magnetostriction 87−53878
Co-Cr-Pr films, vertically magnetised, mag. props. and microstructure 88−71889
Co-Cr-Ta ion beam sputtered films, mag. props., recording appls. 88−44956
Co-Cr-Ta(W) sputtered films, mag. and recording props. for high-density appls. 87−46310
Co-Cr-W-C alloy thin film perp. mag. recording media 88−51237
Co-Cr(Pt) alloy films for mag. recording, magnetostriction 87−53878
Co-Cu artificial superlattices, fabrication and structure 88−70344
Co-Fe-Si-B microcrystalline alloys prep. by sputtering, soft mag. and struct. props. 88−64908
Co-Gd amorphous Rf-sputtered films, DC bias voltage effect on composition 86−2588
Co-Gd amorphous films, electroplating prep. and mag. props. 88−64912
Co-Gd-Tb-based thin films, properties and stability for magneto-optic recording 87−25767
Co-Hf-Pd (Pt) amorphous alloy, mag. props. for thin-film heads 88−57952
Co-Mn films, electron beam evaporated, struct. and mag. props. 86−9385
Co-Nb-Zr amorphous thin films, permeability, 1 MHz to 1 GHz 88−33520
Co-Ni evaporated recording media, improvement of mag. props. and corrosion resistance by Pr additions 87−18492
Co-Ni films for rigid discs., prep. and mag. props. 86−40767
Co-Ni films mag. props. depend. on O_2 gas flow rate 88−13681
Co-Ni films, vac. evaporated, effect of deposition rate on props. *(Japanese)* 88−31846
Co-Ni sputtered films, cryst. texture effect on mag. props. 86−28600
Co-Ni thin film sputtered in N_2 atm, microstruct. and mag. props. 88−51223
Co-Ni/Cr films for longit. recording mag. props. and corrosion resist. 88−51222
Co-Ni-Cr film, microstruct. and mag. struct. development, appl. for longitudinal recording media 88−71923
Co-Ni-Cr(W) sputtered films, mag. and recording props. for high-density appls. 87−46310
Co-Ni-Fe underlayer for double-layer perpendicular media, vacuum deposition and mag. props. 87−18482
Co-Ni-O magnetic recording layers, plasma polymerised anticorrosion film 88−57936
Co-Ni-P electroless plated thin films, microstructure, mag. props., mag. recording appl. 87−12033
Co-Ni-P thin film plated disks, mag. props., read/write charcts., media noise 88−71936
Co-Ni-P, thin films, mag. props. and microstruct., longitudinal recording 86−35973
Co-Ni-Pt(Zr)(Cr)(Mo)/Cr films for longit. recording mag. props. and corrosion resist. 88−51222
Co-Ni-Re-Mn-P electroless films, with and without Mn, struct., mag. props., perpendicular mag. recording media appl. 86−63535
Co-Ni-Re-Mn-P perpendicular mag. anisotropy films, electroless plating prep. and recording charcts. 85−7137

magnetic thin films continued
Co-Ni-Re-P alloy films, electroless plated, for perp. mag. recording, cryst. growth 88−51208
Co-Ni-Re-P electroless alloy film for perpendicular mag. recording 86−9404
Co-Ni-Re-P electroless thin films for mag. recording appls., perp. coercivity, thickness depend. 87−60783
Co-Ni-Re-P films for perpendicular mag. recording media, electroless deposition and mag. props. 87−18484
Co-Ni-Re-P(-Mn) electroless plating films, mag. props. and mag. recording 86−63542
Co-O perpendicular magnetic films, evaporation conditions and mag. props., mag. recording 85−18567
Co-P electroless plated thin films, microstructure, mag. props., mag. recording appl. 87−12033
Co-P film, plated, recording medium, nucleation, growth, struct. and magnetics 85−45950
Co-P, thin films, mag. props. and microstruct., longitudinal recording 86−35973
Co-Pd-Zr(Hf) amorphous films, mag. props., recording appls. 88−64898
Co-Pt permanent magnet biasing film for magnetoresistive thin-film sensor 86−2605
Co-Pt-M (M=Cs,Mo,W,V,Nb,Ta,Ti,Zr,Ge), thin film media for high density recording *(Japanese)* 87−7008
Co-Re film, sputtered, recording medium, nucleation, growth, struct. and magnetics 85−45950
Co-Re flexible sputtered films, demagnetisation-free longitudinal recording 85−56097
Co-Zn-P films, electroless plated, elec. and mag. props. rel. to comp and thickness *(Japanese)* 88−44961
Co-Zr-Mo-Ni multilayer amorphous films, local anisotropy fluctuation effect on permeability 88−64895
Co-based alloy 87−53878
Co-based alloy sputtered films for mag. recording, magnetostriction *(Japanese)* 86−2586
CoCr 88−51235
CoCr RF sputtered film on glass substrate for perpendicular magnetic recording 88−57982
CoCr RF sputtered films, particle-like mag. behaviour 85−49593
CoCr, RF sputtered films, transition layer effects on mag. and structural props. 85−44782
CoCr alloys, RF sputtered, perpendicular mag. recording appls. 86−15349
CoCr double-layer films for perpendicular mag. recording discs, struct. and props. 87−18480
CoCr films, magnetic aftereffect 88−71887
CoCr films, magnetisation reversal mechanisms 87−32830
CoCr films, sputter deposition, mag. characteristics of initial deposition layer 87−18477
CoCr films, vacuum evaporation, thickness depend. of mag. props. 87−18481
CoCr, mag. recording thin films, ang. variation of coercivity 85−46001
CoCr magnetic thin films, magnetron co-sputtered, microstructure 87−16658
CoCr recording media, magnetisation reversal process 85−24081
CoCr single-layer media, vac. deposited, perpendicular read/write performance of ferrite heads 87−32860
CoCr sputtered films, mag. props. and microstruct., perpendicular recording appls. 88−33535
CoCr sputtered films, mag. props. investig., perpendicular recording appls. 86−15348
CoCr sputtered films, magneto-optical props. investig. 86−15343
CoCr sputtered films, struct. and mag. props., role of atomic mobility during film growth 87−18471
CoCr sputtered perp. media, corrosion rate activation energy 88−51236
CoCr, sputtered thin films, mag. props., deposition conditions influence 85−44785
CoCr thin film, c-axis orientation, perpendicular and longitudinal mag. props. 87−67708
CoCr thin film recording media, mag. anisotropy and struct. 87−67707
CoCr thin films, DC magnetron sputtering 87−67709
CoCr thin films, crystallographic and mag. anisotropy correl. 86−15347
CoCr thin films for recording media, perpendicular anisotropy 87−18510
CoCr thin films, for use as mag. media, oxidation studies 85−56079
CoCr thin films, sputtered, microstructure 85−60995
$Co_{85}Cr_{15}$, low noise medium for high density longitudinal recording 88−71921
CoCr/FeNi two-layer perp. mag. recording, reproduction process 87−67743
CoCr/NiFe(CoZrNb) double-layered media, magnetic, structural and recording props. 88−71916
CoCr-NiFe double layers, FMR and mag. props. 87−46312
$Co_{0.2}Cr_{0.8}$-SiO_2 multilayered medium for vertical recording 86−35976
$CoCr_xFe_{2-x}O_4$ ferrite thin films for magneto-optic memory, role of Cr^{3+} on perp. mag. anisotropy 88−33524
CoCrGd, sputtered films with Gd additions, corrosion improvement, mag. props., appl. for mag. recording 88−57976
CoCrTa multilayer films for perpendicular recording media, mag. props. 87−18490
CoCrTa single layer films, recording performance of thin film heads 86−35974
CoFe thin film electrodeposition, recording head appl. 88−51301
CoFeBMo amorphous films, RF sputtering, mag. props. 85−60976
$CoFe_{0-x}(Mn,Al,Cr)_xO_4$ sputter-deposited spinel ferrite films, mag. and magneto-optic props. 86−9635
CoFeNiNbSiB amorphous soft mag. films, prep. 88−51240
$CoFe_2O_4$ amorphous ferrite films with high perpendicular anisotropy *(Japanese)* 88−20242
$CoFe_2O_4$ films by evap. in O_2 plasma, mag. props. 88−31834
$CoFe_2O_4$ films by thermal decomp. method, mag. and magneto-optical characts. 88−44964
$CoFe_2O_4$ sputtered films, cryst. orientation and magneto-optical props. 88−44965
$CoFe_2O_4$ three layer thin film struct. for magneto-optical recording 85−29431
CoGdTb thin films for thermomagnetic/magneto-optic recording, mag. props. 86−42089
$Co_{80}M_{20}$ (M=Cr,Sm) sputtered thin film recording media, micromag. and struct. studies 87−18511
$Co_{90}M_{10}$ (M=Pt,Re) sputtered thin film recording media, micromag. and struct. studies 87−18511
CoN_x reactively sputtered thin films, perp. mag. anisotropy 88−51204

magnetic thin films continued
$Co_{83}(NbTa)_{13}Zr_4$, amorphous films, high saturation magnetisation, thermal stability of soft mag. props. 88−51280
a-CoNbTi/SiO_2 layered films, soft mag. props. 88−33511
CoNi (Cr), magnetic recording layers, impact of process parameters and coating source on props. 86−36039
CoNi films obliquely evaporated with longit. and vertical mag. components 88−51210
CoNi metal evaporated tape, micromagnetic structure of recorded tracks 88−51234
CoNi oblique incidence thin films, microstruct., appl. for mag. recording 88−71925
CoNi thin films for mag. recording, corrosion resist. improvement by surface passivation 87−60811
CoNi thin films, oblique-deposited, mag. props., O impunity effects 87−18474
$Co_{80}Ni_{20}$, magnetron sputtered, growth and characts. 86−15370
$Co_{80}Ni_{20}$ obliquely deposited films, strong stripe domains, continuous mag. media 88−57966
CoNi-Cr sputtered discs, modulation and crystallographic orientation for longitudinal recording 88−51211
$Co_xNi_yCr_z$ longitudinal recording media from high rare static magnetron sputtering system 87−18491
CoNiCr/Cr sputtered films for high-density longitudinal mag. recording, substrate heating effects 88−442
CoNiCr/Cr sputtered hard disc, sputtering target 88−443
CoNiCr-Cr sputtered hard discs, surface protective films 88−13680
CoNiReP alloy films for perpendicular mag. recording, thickness depend. of perpendicular coercivity 87−32857
$Co_{80}Pt_{20}$-Cr(W), effect of Cr(W) nucleation layers on mag. props., appl. for mag. recording 88−71922
CoPtTi thin films, magnetic and microstructural props. 87−18475
$Co_{88}Ta_8Hf_4$, amorphous films, high saturation magnetisation, thermal stability of soft mag. props. 88−51280
CoZr and CoZrRe RF sputtered thin films for mag. recording heads. effect of deposition parameters 87−60810
$Co_{92}Zr_8$ bias-sputtered films, mag. props. and microstruct. 88−64896
CoZr-NiFe multilayer films, mag. props. and domain struct. 86−68154
CoZr-based amorphous thin films, uniaxial and local anisotropies, appl. as mag. heads 88−51199
$Co_{79}Zr_{10}Mo_9Ni_2$-SiO_2, amorphous multilayered films, initial mag. permeability 88−51156
CoZrRe amorphous film, domain struct. anal., appl. for mag. heads 88−51284
Cr-Co perpendicular recording media, perpendicular anisotropy and hysteresis from torque meas. 85−18553
Dy-Fe films, halftone optical images, thermomag. writing 85−24082
DyFe alloys, amorphous thin films, thermomag. recording, magnetisation reversal, coercivity 87−32869
DyFe films, analog data thermomagnetic storage 86−15339
DyFeCo magneto-optical disks, dynamic read/write characteristics 85−29441
DyIG:Ga,Bi, RF sputtered films for magneto-optical memory, mag. props. 87−38652
$Er_2Fe_{14}B$ permanent magnets, DC sputter deposition, mag. props. 87−67728
$(Fe,Co)_2P$ reactively evaporated films, mag. props. rel. to recording appls. 88−64890
Fe electrodeposited alumite films, mag. props. 88−51182
Fe films, sputter deposition utilizing Ar gas flow, hard mag. props. 88−51200
Fe, polycrystalline sputtered coatings, microstructure 86−62256
Fe, soft mag. props. rel. to dual ion beam sputtering conditions 88−33510
Fe sputtered film for soft mag. layer in perp. recording media 87−46313
Fe, thin films, dual ion beam sputtered, mag. and struct. props. 88−51181
Fe thin films with soft mag. props. dual beam ion sputtering prep. 86−35971
Fe-Al_2O_3 perpendicular mag. recording medium, coercive force and Mossbauer spectra 86−35975
Fe-Al-Si sputtered films, mag. props. 87−60786
Fe-B-C, cosputtered films, high-resistive soft magnetic amorphous materials 88−64901
Fe-Bi evaporated films, struct. and perp. mag. props. 88−44954
Fe-C multilayered thin films, prep. by dual ion sputtering, mag. props. 88−51202
Fe-Co films, partially oxidised, mag. props. rel. to perp. recording appls. 88−44953
Fe-Co multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Co-Al high mag. moment sputtered films, mag. props. 87−67722
Fe-Co-B amorphous magnetostrictive film, magneto-SAWs, local detection by light probing 88−51221
Fe-Co-B sputtered films, propag. of surface magnetoelastic waves 86−58670
Fe-Co-Cr alloy thin film disk recording tracks, micromagnetics 85−24164
Fe-Co(-Cr) thin film recording media, oblique electron beam evaporation prep., mag. props. 85−24064
Fe-CoFe multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Cr sputter deposited films with perp. anisotropy 86−28599
Fe-Cr sputtered films, perp. mag. props. 88−44958
Fe-Cr sputtered films, phase separation and perp. anisotropy 88−51183
Fe-Cr sputtered films. perpendicular anisotropy 86−9386
Fe-Mn-Bi alloy, microscopic structure and mag. props. 88−13663
Fe-Ni evaporated films for a back layer of perpendicular mag. recording media, prep. 87−16667
Fe-Ni evaporated films for a back layer of perpendicular mag. recording media, origin of high coercivity 87−18483
Fe-Ni films electroplated on nonmagnetic wire, mag. props. 87−67706
Fe-Si,sputtered films, mag. props. 87−60785
Fe-Si-Al, Sendust films, DC opposite sputtered, mag. and crystallographic characteristics 87−6998
Fe-Si-Al, Sendust films, DC opposite sputtering, mag. props. 86−35979
Fe-Si-Al Sendust films for high temperature processing 86−35970
Fe-Si-Al sputtered films, mag. props. 88−39794
Fe-Si-Al sputtered films, mag. props. 88−64897
Fe-Si-Ru sputtered films, mag. props. 86−58665
Fe-Tb films, halftone optical images, thermomag. writing 85−24082
Fe-Tb multilayers, magnetic properties and structural charactn. 87−60878
Fe-Tb-Gd, amorphous, perpendicular recording media, perpendicular anisotropy and hysteresis from torque meas. 85−18553
Fe-based sputtered films, mag. props., corrosion resistance, appl. for mag. heads 88−51203
FeAl soft mag. thin film, props. rel. to thin film head appls. 86−68155

magnetic thin films continued
- $Fe_{100-x}B_x$ amorphous alloy strip, borate and phosphate coatings and annealing temp. effects obs. *(Slovak)* 85−41015
- $Fe_{80}B_{20}$-$Co_{80}B_{20}$ amorphous ultrafine particle film perp. mag. recording media 88−51209
- $Fe_{80}C_{20}$/Si, compositionally modulated amorphous alloys, mag. props. 85−24065
- (FeCo)NdB sputtered film, struct. and permanent mag. props. study 87−67720
- $Fe_xCo_yO_{100-x-y}$ RF sputtered perp. mag. films 88−51157
- FeCr sputtered films, perpendicular mag. anisotropy, corrosion resistance 86−58658
- FeMn-NiFe exchange coupled thin films, magnetisation calc., appl. for mag. recording heads 88−51282
- FeN thin films with high coercivity and good corrosion resist. 88−51232
- $Fe_{3-2}N$, hexagonal, prep. by plasma reaction, mag. characts. 87−6997
- Fe_4N thin films, ferromagnetic, arc-discharge-type ion-plating 85−22517
- Fe_xN thin films, RF sputtered, struct. and mag. props. 88−51233
- Fe_xN thin films, synthesis by double ion beam sputtering, mag. props. 88−64903
- Fe_xN thin films with high corrosion resistance, mag. props. 88−13664
- Fe_xN thin films with perpendicular magnetic anisotropy 85−41014
- FeN_x films, ferromag. semicond., struct elec. and mag. props. 85−23492
- FeN_x films, ion beam deposition, cryst. struct. and mag. props. 85−24071
- FeN-CoN thin films, mag. props 88−51231
- $Fe_{2.70}Ni_{0.14}Zn_{0.14}O_4$ ferrite-dextran multilayer film spray-spin-coating for microwave monolithic IC appls. 88−57922

magnetic tape development 86−47957
magnetic thin films, magnetic parameters determ., torque meas. 88−68011
magnetics conference, Phoenix, AZ, USA (April 1986) 87−16235
magnetisation, induced and remanent 85−14765
magnetisation, using magnetometers with superconducting flux transformer, induced current error elimination 88−9965
magnetisation and susceptibility meas., Nb_3Sn-NbTi hybrid superconducting magnet, Meissner magnetic image effect 87−1914

magnetic variables measurement continued
magnetisation meas., development of an automated vibrating sample magnetometer 87−63496
magnetisation meas. at 4.2K of stainless steel 85−8941
magneto-optical apparatus for studying magnetisation in films, interference, drift and noise suppression 86−31303
magneto-optical domain obs. by digital image processing enhancement 86−31601
magneto-optical ellipsometer, using polarisation modulation 85−52883
magnetometer, simple, for planar geometries 86−31599
magnetometer flux transformers, image field elimination 88−22754
magnetometers, resonant-type, with amorphous core, driven by operational amplifier 85−26304
magnetooptical apparatus with rotary polaroid 86−18085
magnetoresistive elements, Barkhausen noise meas., magnetoresistive suscept. method 87−29261
magnetoresistive transducer characts. *(Russian)* 85−20592
magnetostatic waves, transmission lines, parameters meas. of useful signal and pickup 86−42149
magnetostriction displacement meas. methods for magnetically soft alloys 88−53833
magnetostriction displacement meas. methods for magnetically soft alloys 88−53833
magnetostriction in ribbon samples, using fibre-optic dilatometer 87−56818
magnetostriction meas. of thin films, using optical displacement meter 88−53834
manganin, electric resistance, magnetic resistance and magnetisation meas. at low temp. 86−44403
measurement of magnetic susceptibility of low-magnetic substances *(Russian)* 85−48069
measurement techniques for transient electromagnetics 87−14401
metrological certification of measuring equipment for magnetically soft materials 88−53831
microcomputer-based system for control of applied uniaxial stress and magnetic field 85−20707
microprocessor controlled high-field instrument for intrinsic magnetisation meas. 86−38526
microvibration sample magnetometer, force-type meas. 85−37733
monopole detector, with sensitivity to extremely small magnetic charge 87−14299
Mossbauer analysis of magnetic storage media 88−51286
multiloop SQUID for magnetic induction measurement 87−67896
mutual inductance bridge for the measurement of superconducting transition temperatures and magnetic susceptibility 87−77439
mutual inductance variations in high-temp. superconductor, SQUID magnetometer with null input current 88−68068
noise, ferromagnets inspection by pattern recognition method 86−62292
noise meas. generated by eddy current shielded room, biomagnetic expts. appl. 86−44649
nonmagnetic laboratory facility, for precise magnetic variables measurement 85−16839
numerical meter for hysteresis and eddy current losses, reversible counter control system *(Polish)* 87−77322
oil-pipe material NDT, mag. flux distrib. prediction 85−49658
optimized emitter-injection modulation magnetotransistor 85−14748
optimized parallel-field magnetotransistor sensor 88−47499
parametric resonance of magnetostatic transducers 88−4369
particulate recording media, magneto-optic Kerr effect hysteresis loop meas. 87−29258
permanent magnet electromechanical transducer for dynamic magnetostriction meas. 86−31355
permanent magnet parameters determ., magnetic meas. device design principles anal. *(Russian)* 88−60890
permeability and permittivity simultaneous meas. at mm-region, frequency-domain technique 85−20711
pneumatic sphere grinder for vibrating sample magnetometer spheres preparation 88−16450
power transformers, 50kA/2400V, single phase, sinusoidal iron losses estimation, from distorted voltage waveform measurements 85−16084
properties of magnetic materials in varying magnetic fields of high freq., meas. *(Polish)* 88−68013
proton gyromagnetic ratio expt. at ETL 87−14067
proton gyromagnetic ratio in H_2O determ., by low field method 87−14066
pulsed field magnetometer for hard magnetic material characterisation 88−68008
quantum magnetometer for meas. magnetic susceptibility 86−60329
rare earth magnet passive bearing systems, force meas. 86−26008
rare earth metal plus Co permanent magnet testing, calibr. of magnetic meas. system *(Russian)* 87−18540
relaxation measurement method using operational amplifier *(Spanish)* 86−38524
REMAG 2 instrument for NDT of ferromagnetic coatings *(Czech)* 86−50059
resonant system for the measurement of magneticdisaccommodation of ferrite core coils, automatic 86−24717
review, progress and trends in magnetism *(Rumanian)* 85−41013
ribbon superconductors, magnetic flux discontinuities meas apparatus 87−77381
rock magnetic susceptibility measurement at low-temperature, computerised instrumentation 86−38944
rolled stock austenite transformation in thermomech. treatment, universal automatic equipment using magnetometric method 88−41984
rotary magnetic scales, error correction recording method *(Japanese)* 88−16449
rotation frequency sensing units, white longitudinal mag. flux pulsations *(Russian)* 87−8604
saturation magnetisation meas., using magnetic balance 86−65260
saturation magnetisation of ferrimagnetic substrates, testing method 85−26457
saturation magnetostriction, ballistic galvanometer meas. in metallic glasses *(Chinese)* 85−4085
saturation magnetostriction constants in amorphous alloys, meas. by tension-magnetisation method *(Chinese)* 85−64253
screening measurements in the time domain and their conversion into the frequency domain 85−4091
self-balanced bridge for automatic measurements ofmagnetic susceptibilities 85−58858
semi-dynamic observations of small magnetic domains 88−10108
sensitive temperature modulation technique forstudies in magnetism 86−31602

magnetic variables measurement continued
sensor, zero flux type, detection performance, effects of core characts. 88−53632
separation ferromagnetic wave, magnetic props. meas. using superconducting coil *(Czech)* 88−47663
sheet metals, quantative anisotropy characterisation using anisometer *(German)* 86−24709
shield room, laboratory facility for aerospace, geophysical and general studies 86−12137
shunt reactor and power transformer magnetisation characteristic meas. with DC excitation 87−35996
soft ferromagnetic materials, power losses props. 88−51172
soft magnetic materials, AC hysteresis loops computer-aided measurement by MAGNETOCOMP system 85−27464
soft magnetic materials, meas. and anal. techniques *(German)* 87−41592
soft magnetic materials, specific magnetic loss meas. at remagnetisation freq. 50 Hz to 200 kHz 87−8715
soft magnetic materials characts. investigation using magnetising devices 87−53875
specific magnetic losses meas. in thin sheets, application to inspection *(Polish)* 85−8942
SQUID based self-balancing susceptibility bridge 88−4545
SQUID based wideband device for meas. of mag. props. of materials 85−56205
squirrel cage motor condition monitoring techniques 87−15776
standard samples certification under pulsed conditions 88−53832
steady-state high magnetic field generation and meas. *(Japanese)* 88−42254
steel, isotropic cold-rolled elec., mag. props. meas. by anisometric method 85−64254
steel, meas. standardisation of magnetic properties *(Czech)* 87−21210
steel, Mn, pipeline, pneumatic stressing mechanism for magnetomechanical studies 88−53835
steel props. meas., magnetic meas. equipment improvement 86−24718
steel sheet, loss meas. by first harmonic method *(Polish)* 88−4597
steel sheets props. meas., using microprocessor-controlled assembly 88−16446
strict environmental conditions, magnetic sensors for magnetic phenomenon meas. *(Japanese)* 87−77257
superconducting alternating field coils for alternating field loss meas. *(German)* 86−36106
superconducting magnet system for magnetoresistance meas. 85−64257
superconducting magnetic calibration bench power supply, control and protection 88−51406
superconducting magnetic levitation system for magnetic flux quantum determ. 87−14498
superconducting magnets, magnetisation hysteresis meas. method 85−43081
superconducting materials, magnetic susceptibility meas. method *(Chinese)* 85−37731
superconducting quantum magnetometer for the range 1-200K 86−31603
Superconducting Super Collider model dipole and quadrupole magnet meas. hardware and software 88−68153
superconducting tapes in magnetic field, AC loss meas. techniques comparison *(Czech)* 88−58046
superconducting wires, high current, AC loss meas. system in Twente test facility 88−68009
superconductor, high-resolution stroboscopic magneto-opt. flux detection 85−58856
superparamagnetic material, Gouy magnetometer use for mag. meas. 86−70202
suppressed sidewall injection magneto-transistor, analytical model 88−42074
surface EM losses meas. in superconductors, using calorimeter 87−77356
surface flux density meas. in mag. particle inspection, using digital fluxmeter 88−481
susceptibility, measurement technique using quantum magnetometer 85−20708
susceptibility, using oscillator with low dissipation 87−49980
susceptibility and anisotropy of rock, using MOLSPIN instrument 88−74952
susceptibility meas. at high temp., using automatic pendulum balance 88−42256
susceptibility measurement by Faraday method, laboratory automation *(Japanese)* 85−8943
susceptometer, SQUID-based high pressure 87−29263
susceptometer for thin films and surfaces 87−21035
tactile sensing system utilizing noncontact measuringtechniques 86−5291
tape particle anisotropy and orientation distribs. determ. using torque magnetometry 87−49896
tension gradient measurement of magnetic tape 85−24156
test equipment for electrical steels and alloys 88−53830
testing magnetic materials, by continuous stepwise variation of magnetising fields 88−36190
thin film growth in UHV environment in situ magnetisation loop tracer design 88−49876
thin films, hysteresis measurements at high fields 86−18082
torque magnetometer for meas. magnetic thin films 86−17954
torque sensors using wire explosion magnetostrictive alloy layers 87−18542
transducers with adjustable domain boundary *(Russian)* 87−63369
transformer core loss meas., on load and open ccts. 85−39073
transformer core material testing using microprocessor based measuring instrument 87−30719
transformer plate magnetic props., influence of tensile stress *(Polish)* 88−17696
transient error meas. of measurement current transformers *(Russian)* 86−41366
transient recording method, mag. props. of Si steel strip *(Korean)* 87−77099
transistor inverter-fed induction motor driven with vector control system 87−42955
twisted optical fibre, Faraday rotation meas. using rotating polarisation and analogue phase detect. 87−18682
UHF susceptometer, computer controlled broadband, magnetisation dynamics obs. 85−37735
universal measuring system for the study of metal glass magnetic tape properties *(Polish)* 87−63498
vibrating magnetometer for magnetic moments of magnetic materials meas., temp. dependences 87−21138
vibrating sample magnetometer for hysteresis loop meas. of mag. thin films 85−20703
vibrating-reed magnetometer, data processing and control using Elektronika D3-28 microcomputer 88−29604

magnetic variables measurement continued
vibrational meter for the magnetic susceptibility of solutions 85−48070
weak-signal integrator 87−63340
wires magnetic characts. and core loss meas. 87−70773
YIG single-crystal ferrites, relation between biassing magnetic field and linewidth 87−6999
AlNiCuCo and rare-earth metal-Co permanent magnets, parameters meas. using digital automatic devices *(Russian)* 88−71948
$BaFe_{12}O_{19}$ fine powder for particulate perp. mag. recording media, coercivity meas. method 87−32843
Co ferrite, ferrofluid, complex susceptibility meas. 86−44402
Co, magnetic torque curve meas. in very low mag. fields 88−57899
Co single cryst., AC initial suscept. meas., temp. depend., automated techniques 86−24716
Co-Cr Winchester disc perpendicular magnetisation meas. by transverse/polar Kerr system 88−57960
Co-Cr single-layer medium, recorded magnetisation intensity meas. by electron holography 88−44974
CoCr discs, lateral homogeneity test using Kerr magnetooptical effect 87−46355
α-Fe-C, AC initial suscept. meas., temp. depend., automated techniques 86−24716
Fe-Si electrical steels, magnetising device for magnetostriction meas. 87−5539
Fe-Si sheet steel, electrical, magnetic props. automatic determining device 85−26458
Fe-Si sheet steel, electrical, rotational magnetisation process determining method 85−26442
Fe-Si sheet steel, electrical, under deep saturation, precise magnetic props. meas. 85−26459
Fe-Si sheets, rotational power loss meas. using wattmeter method 86−38525
Fe_3O_4 ferrimag. and superparamagnetic on Fe particles surface, Mossbauer study 88−51247
GdFe amorphous Hall element with high sensitivity to in-phase field, reading of mag. recorded bits 86−60223
Ni-Co film based magnetoresistive sensors with auxiliary pole of Ni-Fe films 88−42039
Si magnetic induction transducer based on magnetic concentration effect 88−9945
Y-Ba-Cu-O ceramic supercond. mag. sensor 88−42075

magnetic wells *see magnetic traps*

Co sputtered films, mag. and struct. props., effect of O incorporation 86−28595
Co-Au amorphous thin film, mag. props, and domain struct. 86−15345
Co-CoO films with perpendicular magnetisation, microstructure and exchange anisotropy 85−45951
Co-CoO sputtered film, perpendicular magnetisation, mag. recording appl. 86−9388
Co-CoO sputtered film perpendicular magnetisation, mag. recording appl. 86−9389
Co-Cr co-evaporated films, magnetisation and FMR studies 86−15346
Co-Cr continuously vac. deposited media, recording performance rel. to mag. props. 88−71914
Co-Cr film, magnetisation models for computer simulation of perp. mag. recording 87−46315
Co-Cr films, magnetisation decay 88−71888
Co-Cr films sputtered on low temp. substrates, mag. props. and flux reversal 88−64892
Co-Cr oriented sputtered film, perpendicular anisotropy constants and anisotropy energy 85−18552
Co-Cr perpendicular anisotropy film deposited by evaporation with ion bombardment 88−64891
Co-Cr perpendicular mag. film magnetisation, Potter-Beardsley model 87−46318
Co-Cr, perpendicular mag. recording media, magnetisation, Bitter and electron holography studies 87−67725
Co-Cr perpendicular recording media, direct obs. of magnetically distinct regions using FMR 85−45997
Co-Cr perpendicular recording media, noise charact. 85−46007
Co-Cr perpendicular recording medium, exchange-coupling magnetisation simulation model 86−42117
Co-Cr perpendicular recording medium, magnetisation, simulation model 85−29438
Co-Cr single-layer media with ring head for perp. mag. recording 87−46375
Co-Cr sputtered film, mag. props., oxidation and annealing effects 85−18549
Co-Cr sputtered films, mag. and struct. props., effect of O incorporation 86−28595
Co-Cr sputtered films, mag. props., effect of C additions 88−44951
Co-Cr sputtered films, mag. props., substrate bias voltage effect 86−9378
Co-Cr sputtered films, microstructural inhomogeneity, mag. props. 87−25770
Co-Cr sputtered films, perp. mag. props. 88−44958
Co-Cr/Fe-Ni evaporated double-layer film for mag. recording, Ti interlayer effect 88−26680
Co-Cr/Ni-Fe perpendicular recording media, noise charact. 85−46007
Co-Cr-Pr films, vertically magnetised, mag. props. and microstructure 88−71889
Co-Fe_2O_3 coated particles prep. by photochem. reaction 88−51217
Co-Fe-Si-B amorphous wound cores, HF mag. props. 87−67774
Co-Fe-Si-B microcrystalline alloys prep. by sputtering, soft mag. and struct. props. 88−64908
Co-Mn films, electron beam evaporated, struct. and mag. props. 86−9385
Co-Ni-Mn-Re-P electroless plated discs for perpendicular mag. recording 85−18569
Co-Ni-P thin film plated disks, mag. props., read/write charact., media noise 88−71936
Co-Ni-Re-P films for a perpendicular recording medium, electroless deposition, mag. props. 86−58660
Co-Pd-Zr(Hf) amorphous films, mag. props., recording appls. 88−64898
Co-Zr based amorphous thin film perp. recording head 86−68165
CoCr corrosion-resistant alloy films, mag. props. and longitudinal recording performance 87−18494
CoCr evaporated films, mag. props. 87−18472
CoCr films, sputter deposition, mag. characteristics of initial deposition layer 87−18477
CoCr films, texture formation, appl. for perpendicular mag. recording 87−25844
CoCr layers, domain obs. with digitally enhanced Kerr-microscope 87−25774
CoCr sputtered films, mag. props. investig., perpendicular recording appls. 86−15348
CoCrTa corrosion-resistant alloy films, mag. props. and longitudinal recording performance 87−18494
CoCrTa multilayer films for perpendicular recording media, mag. props. 87−18490
CoFeBMo amorphous films, RF sputtering, mag. props. 85−60976
$CoFe_{0-x}(Mn,Al,Cr)_xO_4$ sputter-deposited spinel ferrite films, mag. and magneto-optic props. 86−9635
$CoFe_2O_4$ films by thermal decomp. method, mag. and magneto-optical charact. 88−44964
CoFeSiB amorphous mag. material, induced anisotropy 88−51178
$Co_{75-x}Fe_xSi_{15}B_{10}$ amorphous ribbons, Co-rich to Fe-rich transition, mag. permeability aftereffect 88−51179
CoNbZr amorphous mag. material, induced anisotropy 88−51178
Co_5Sm samples, magnetisation creep investigation 85−24186
CoZr and CoZrRe RF sputtered thin films for mag. recording heads, effect of deposition parameters 87−60810
Cr-Co perpendicular recording media, perpendicular anisotropy and hysteresis from torque meas. 85−18553

magnetisation continued
CrO_2 particles, LIPS tape prep. and charact. 87−25808

$Er_2Fe_{14}B$ permanent magnets, DC sputter deposition, mag. props. 87−67728
$(Eu, Lu, Bi)_3(Fe, Ga, Al)_5O_{12}$ films, domain wall vel. determ. 85−35300
$(Fe,Co)_2P$ reactively evaporated films, mag. props. rel. to recording appls. 88−64890
Fe core assembly, pole configuration determ., for impulsive magnetisation *(Russian)* 85−56122
Fe effects on coil systems with cylindrical geometry, GFUN approach 85−1838
Fe films, soft mag. props. rel. to dual ion beam sputtering conditions 88−33510
α-Fe particles, cryst. grain network struct. and mag. props., rel. to tape performance 86−28601
Fe particles, rice-shaped, for perp. recording media, mag. and surface props. 86−28682
Fe soft mag. materials, mag. props. and electron optics appls. 85−24782
Fe sputtered film for soft mag. layer in perp. recording media 87−46313
Fe, thin films, dual ion beam sputtered, mag. and struct. props. 88−51181
Fe-B-C, cosputtered films, high-resistive soft magnetic amorphous materials 88−64901
Fe-B-Si amorphous alloy, ferro- to paramag. transition, mag. susceptibility and magnetisation meas. 88−64906
Fe-B-Si-Cr(Mo) metallic glasses, high permeability, for line freq. appl. 85−50825
Fe-Bi evaporated films, struct. and perp. mag. props. 88−44954
Fe-Ci nonoriented electrical steels, iron losses under distorted flux conditions 88−57908
Fe-Co films, partially oxidised, mag. props. rel. to perp. recording appls. 88−44953
Fe-Co multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Co partially oxidized medium with perp. anisotropy 88−51184
Fe-Co-Al high mag. moment sputtered films, mag. props. 87−67722
Fe-CoFe multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Cr sputter deposited films with perp. anisotropy 86−28599
Fe-Cr sputtered films, phase separation and perp. anisotropy 88−51183
Fe-Cr sputtered films. perpendicular anisotropy 86−9386
Fe-Cr-Co, permanent magnet alloys, review of contemporary developments 85−29426
Fe-Cr-Co permanent magnets, low Co, mag. rotational hysteresis energy 87−74503
Fe-Cr-Co-Mo(Si), magnetically hard, phase struct., magnetisation and mech. hardness 85−12480
Fe-GaAs, hybrid semicond.-mag. memories, Fe film props. 88−71896
Fe-Mn-Bi alloy, microscopic structure and mag. props. 88−13663
Fe-Nd-B permanent magnets, coercivity and magnetisation, temp. and field depend. 86−15358
Fe-Nd-B-based permanent magnets, low field mag. props., thermomag. meas. 86−15357
Fe-Ni evaporated films for a back layer of perpendicular mag. recording media, origin of high coercivity 87−18483
Fe-Ni-B amorphous alloy, ferro- to paramag. transition, mag. susceptibility and magnetisation meas. 88−64906
Fe-Pt (36 at.%), cryst. struct., permanent mag. props. *(Japanese)* 87−25772
Fe-Si (3%), grain-oriented and non-oriented, power losses, magnetisation dependence 88−51230
Fe-Si crystals inclined slightly from perfect orientation, domain wall eddy current loss in stripe domain struct. 85−12479
Fe-Si electrical steels, anisotropic cold-rolled, magnetisation charact. 87−6993
Fe-Si electrical steels, three phase transformer cores, effect of distorted flux density 87−18530
Fe-Si sheet steel, electrical, magnetic props. automatic determining device 85−26458
Fe-Si sheet steel, electrical, rotational magnetisation process determining method 85−26442
Fe-Si-C, unoriented grain transformer sheet production low C steel *(German)* 86−19334
Fe-Tb-Gd, amorphous, perpendicular recording media, perpendicular anisotropy and hysteresis from torque meas. 85−18553
Fe-based sputtered films, mag. props., corrosion resistance, appl. for mag. heads 88−51203
FeAl soft mag. thin film, props. rel. to thin film head appls. 86−68155
FeAlC permanent magnet alloy system, microstructure and mag. props. 85−18585
$Fe_{100-x}B_x$ amorphous alloy strip, borate and phosphate coatings and annealing temp. effects obs. *(Slovak)* 85−41015
$Fe_{78}B_{13}Si_9$, Metglas 2605S-s ribbon, domain refinement by scribing 86−63540
$Fe_{78}B_{13}Si_9$ amorphous ribbons, mag. behaviour 85−35291
$Fe_{78}B_{13}Si_9$ glassy metal powder cores, mag. props. 87−46325
$Fe_{80}B_{14}Si_6$ amorphous ribbons, anisotropy of losses 87−25775
FeBSi-based metallic glasses, mag. props. study, ground fault interrupter appl. 86−15353
$Fe_{80}C_{20}/Si$, compositionally modulated amorphous alloys, mag. props. 85−24065
$(Fe_{40}Co_{40}Mn_{20})_{98.6-x}C_xSi_{1.4}$, hard mag. alloy, mag. props. 85−56088
(FeCo)NdB sputtered film, struct. and permanent mag. props. study 87−67720
FeCr sputtered films, perpendicular mag. anisotropy, corrosion resistance 86−58658
$(Fe_{100-x}Mn_x)_{75}P_{15}C_{10}$ amorphous cpd., mag. field sensor, cryogenic appls., Hall signal probe 87−49656
$Fe_{3-2}N$ film, hexagonal, prep. by plasma reaction, mag. charact. 87−6997
Fe_4N acicular particle characteristics, coercive force and saturation magnetisation *(Japanese)* 88−33507
Fe_xN thin films, synthesis by double ion beam sputtering, mag. props. 88−64903
Fe_xN thin films with high corrosion resistance, mag. props. 88−13664
FeN_x films, ferromag. semicond., struct elec. and mag. props. 85−23492
FeN_x films, ion beam deposition, cryst. struct. and mag. props. 85−24071
FeN-CoN thin films, mag. props 88−51231
$Fe_{2.70}Ni_{0.14}Zn_{0.14}O_4$ ferrite-dextran multilayer film spray-spin-coating for microwave monolithic IC appls. 88−57922

TbCo amorphous sputtered film, mag. props., substrate bias voltage effect 86−63531
TbCo film, optical disc memory struct., mag. props., underlayer film treatment effect 87−25757
TbCo-based alloy targets for sputter deposition, mag. and optical props. 88−6505
a-TbFe alloy thin films, perpendicular recording props. and magnetisation process study 88−64957
TbFe amorphous films for mag. printing, laser writing 86−63556
TbFeCo films, prep., mag. and magnetooptical props. 86−63530
TbFeCo magneto-optical discs, domain obs. and write-read characts. 87−25823
$(TbY)_3(FeAl)_5O_{12}$ bubble garnet, implantation boundaries, magnetisation distrib. 86−15380
Ti-transition metal superconducting alloys, metallurgy and phys. props., book 87−58519
$(Y, Gd, Yb, Bi)_3(Fe, Al)_5O_{12}$ epitaxial films, controlled growth from soln., mag. props. 86−2589
Y-Fe-B, magnetisation and anisotropy fields, 77 to 550K 86−21958
$(Y_{0.9}Er_{0.1}(Tb))_2Fe_{14}B$ single cryst., magnetisation and anisotropy 86−28616
$Y_6(Fe_{1-x}Al_x)_{23}$, magnetic struct. and atomic ordering, neutron diffr. study 86−28613
YGaIG single crystals, mag. props. and microwave loss 88−51255
YIG, ferrimagnetic garnets characterisation for MSW optical diffr. 87−7003
YIG film, unusual RF behaviour study 87−60796
YIG, mag. and struct. studies, neutron beam effects, comparison with $Gd_3Fe_5O_{12}$ 85−7146
YIG thin films, MSW anal. by optical and induction probes 85−50849
YIG thin-film waveguide magneto-optic isolator 85−41222
$Y_{2.15}Lu_{0.35}Bi_{0.5}Fe_{3.8}Ga_{1.2}O_{12}$ bubble films, Bloch line memory, stripe domain confinement by laser annealing 88−51362
$Y_{1.92}Sm_{0.1}Ca_{0.98}Fe_{4.02}Ge_{0.98}O_{12}$ garnet films, mag. bubble generation by microwave excitation 88−57921
$(YSmLuCa)_3(GeFe)_5O_{12}$ ion-implanted bubble layers, magnetisation, plasma exposure effects 87−60791
$(YSmLuGa)_3(FeGe)_5O_{12}$ ferrite-garnet epitaxial films, ion implanted, pulsed remagnetisation 85−45969
$Zn_{1-x}Mn_xSe$, DC- and FIR-magnetotransport meas. 88−44550

magnetisation reversal
amorphous thin tape cores, flux resetting characts., up to MHz region 88−57986
$BaFe_{12}O_{19}$ perpendicular media, coercivity, ang. depend. 88−44963
cellular structures, for magnetooptical transparencies, magnetisation reversal dynamics 88−65398
conductive ferromagnetic sheet magnetisation dynamic reversal calc. *(Russian)* 86−2581
ferromagnet hysteresis loop in unidirectional field, mathematical model *(Russian)* 86−21946
ferromagnetic core, ferroresonance 86−63567
high energy magnets, coercivity anal. 85−1854
magnetic films perpendicular mag. recording conditions, wall-displacement model anal. 87−53889
magnetically soft materials, loss tangent relationship with freq. props. *(Russian)* 88−64877
magnetics conference, Phoenix, AZ, USA (April 1986) 87−16235
magneto-optical recording, magnetisation reversal dynamics 88−65391
metallic thin films, micromagnetic studies, appl. for recording media 88−71919
permanent magnets, nucleation fields 88−51155
rare earth alloys, R-Fe-B, permanent magnets, magnetic anisotropy and magnetisation 88−13669
rare earth-Fe-B magnets, $R_2Fe_{14}B$, mag. props., effect of Co or Ni substitution 86−21969
rare earth-transition metal alloy thin films, amorphous, coercive force, thermomagnetic recording, magnetisation reversal model 87−67699
rare earth-transition metal amorphous alloys for erasable optical storage, mag. props. 85−50822
recording tape, randomly oriented fields representation 88−44972
soft magnetic composite material, laminated mag. core prod. and characteris 86−36052
stress-induced demagnetisation process, self-consistent calc. 85−45984
testing magnetic materials, by continuous stepwise variation of magnetising fields 88−36190
thin film head response, freq. domain anal. 87−25811
transparent magnetic materials transitions meas., using magnetooptical apparatus 87−18775
vertical recording films, magnetisation reversal 88−39808
Wiegand wire inductive signal generator *(German)* 87−33375
Ba ferrite particulate media, magnetisation reversal, appl. for mag. recording 88−71901
$BaFe_{12}O_{19}$ particular media, magnetisation reversal 88−51303
Co-Cr films, film growth and magnetisation reversal mechanism 87−18479
Co-Cr high-rate evaporated films on Ti underlay 88−51238
Co-Cr magnetron sputtered thin films, mag. and struct. props. rel. to recording appls. 86−28594
Co-Cr media for perp. recording, magnetisation reversal mechanism 88−51185
Co-Cr perpendicular magnetic recording medium improvements 88−57944
Co-Cr perpendicular recording media, magnetisation reversal mechanism, hysteresis loss meas. 87−46316
Co-Cr single-layer film switching mechanism with Ge underlayer 88−57898
Co-Cr sputtered film perpendicular recording media, magnetisation reversal mechanisms 87−53886
Co-V-Fe/Ni-Fe short composite wire, pulse generation, fast remagnetisation and domain stability studies 86−28602
CoCr RF sputtered films, particle-like mag. behaviour 85−49593
CoCr films, magnetisation reversal mechanisms 87−32830
CoCr recording media, magnetisation reversal process 85−24081
CoCr sputtered perpendicular recording media, with columnar microstruct., reversal mech. 87−1883
CoCr thin films for recording media, perpendicular anisotropy 87−18510
CrO_2:Ir, mag. anisotropy and remanence coercivity 85−24063
DyFe alloys, amorphous thin films, thermomag. recording, magnetisation reversal, coercivity 87−32869
Fe-Si, Preisach distrib. meas. 88−1855
γ-Fe_2O_3 particles, microstructure, X-ray diffr., magnetisation props. 87−25788

magnetisation reversal continued
GdCo and GdTbFeCo alloys, amorphous thin films, thermomag. recording, magnetisation reversal, coercivity 87−32869
GdCo sputtered films, temp. depend. mag. transitions, magneto-optic data storage 86−15336
GdFe/TbFe amorphous double layered films, mag. recording characts. 86−42119
GdTbFe magneto-optical films, switching behaviour, Kerr effect 88−64899
Mn-Al-based permanent magnets, magnetisation reversal processes 88−64884
Nd-Fe-B magnets, cast and sintered, microstruct. and coercivity 86−22019
Nd-Fe-B magnets, hot-pressed, microstructure, domain walls and magnetisation reversal 86−42093
Nd-Fe-B permanent magnet, magnetisation reversal by use of Hall-effect microprobe 87−74526
$Nd_{15}Fe_{77}B_8$ permanent magnet, mag. anisotropy and rotational hysteresis energy 87−74504
$Nd_{15}Fe_{77}B_8$ sintered permanent magnets, mag. and struct. props., analytical electron microscopy study 86−28604
$Nd_2Fe_{14}B$ sintered permanent magnets, magnetisation reversal temp. depend. study 86−15361
Sm-Co based sintered magnets, domain behaviour during thermally induced magnetisation changes 86−21970
Sm(Co, Cu, Fe, Zr)-magnets, thermal stability and magnetisation 85−29470
$SmCo_5$, single crystals and sintered permanent magnets, coercive field at high temps. 85−29425
Tb-Fe-Co amorphous films, pulsed laser beam heating induced magnetisation reversal 88−33495
Tb-Fe-Co films, pulsed laser beam heating induced magnetisation reversal 88−33502
TbFe and GdTbFeCo alloys, amorphous thin films, thermomag. recording, magnetisation reversal, coercivity 87−32869
TbFeCo/NiFe double-layer magneto-optical film recording characts. 88−58267
Y-Co permanent magnet particles, magnetisation reversal observation by vibrating reed magnetometer 85−18580

digitised imaging, optical recording impact 88−20334
direct overwrite using resonant bias coil 88−51277
disc, high-density pit-edge recording 88−45243
disc, signal quality rel. to groove shape 88−33793
disc, signal quality rel. to groove shape 88−33794
disc design, normal incidence performance of multilayer structures 88−8003
disc drive, high speed accessing 88−65134
disc drive, prototype 88−65138
disc drive with high speed track accessibility 88−45241
disc for coded data storage 85−51008
disc memories, double storage layer, readout charact. 87−26102
disc memory, magnetic erasable, with two optical heads 87−26099
disc memory system, 3.5-inch, using readout technique from transmitted light and NdDyFe-based recording material 88−45240
disc noise measurement and modelling 87−38882
disc storage, antireflection thin films 87−61009
disc storage, rapid access system, design, construction and performance 87−26101
disc storage, S/N ratio anal. using polarisation simulator 87−54137
disc storage, techniques and materials *(German)* 85−7191
disc storage head, compact design for magneto-optical drives 87−60993
disc storage of real-time video signals 87−56406
disc storage technology *(German)* 85−24346
disc storage technology, more capacity for less space *(French)* 85−18559
disc storage using polycarbonate substrates 87−60992
disc system, S/N ratio anal. using polarisation simulator *(Japanese)* 88−45244
disc systems, astigmatic focusing and push-pull tracking error signals, anal. 88−2070
disc systems, focus servo method 88−45242
disc technology *(Japanese)* 87−38878
discs, erasable technology 87−38880
discs, groove shape rel. to signal quality 88−33789
discs, high speed overwriting 88−45238
discs, video recording, high quality 88−22329
discs, write-read recording charact. 88−33791
discs with SiO protective layers, structs. and material charact. 88−33790
disk, rotating, recorded domain shapes, numerical simulation 88−64936
disk, structures and dynamic charact. 86−63554
disk for coded data storage, compact 86−36271
disk memory, high density and rewriting capability 85−56378
disk memory, trends 86−42386
disk substrate using vinylester 88−45234
disk with media sandwiched between protective layers 86−42388
disks with polycarbonate substrates, influence of birefringence on signal quality 88−65386
domain-modulation-type optical reproduction head 86−68348
DuraSTORE, ruggedised 14 inch erasable optical disk drive 88−65133
ellipsometer, using polarisation modulation 85−52883
erasable digital audio disc system 86−44067
erasable digital optical data memories, magneto-optical media appls. *(German)* 87−74890
erasable disc memory with two optical heads 86−42385
erasable high density magnet optical storage 85−62414
erasable magneto-optical recording 86−2596
erasable magneto-optical recording, high density channel, properties and optimisation *(German)* 86−9397
erasable magneto-optical recording for computer digital storage, review 87−26103
erasable magneto-optics technology for mass storage systems, media performance charact. and stability 87−60996
erasable magnetooptic film data disc storage media, large-scale production technology 88−33600
erasable optical disc prospects 88−39862
erasable optical discs, recording technology and struct. 85−35557
erasable optical recording, problems and opportunities 86−58802
erasable optical tape feasibility study 88−65397
error control coding for optical disk buffer 88−65146
FACOM 6443 magneto-optic disk drive subsystem from Fujitsu *(Japanese)* 88−72167
Faraday effect light modulator, with closed magnetic cct. 88−65393
Faraday effect light modulator for digital/optical computing 88−8020
Faraday isolator, simple compact high performance permanent magnet 87−18774
Faraday isolator for optical NOR gate using diode laser sources 86−68615
Faraday optical gate, periodic action 86−2876
Faraday optical isolator, design and limiting factors 87−46602
Faraday rotation current and mag. field sensor, calibrated optical fibre 87−18681
Faraday rotation measurements, high accuracy, for electric current sensors 88−67853
Faraday rotator materials for laser systems 88−72170
Faraday rotators designed as optical isolators for high power glass laser system *(Japanese)* 85−18761
ferrimagnetic film, optical mode conversion with magnetostatic forward volume wave 88−51597
ferrimagnetic film containing magnetostatic wave, waveguide propag. of light 86−15472
ferromagnetic garnets, magneto-optical effects and appls. *(French)* 87−33020
ferromagnetic mirror, reflection matrix, use in ring laser 85−29871
fibre, polarisation non-conserving single mode with controlled birefringence, Faraday rotation, appl. to magnetic field meas. 85−7211
fibre magnetometer using stabilised semicond. laser source 85−62347
fibre optic current sensor, vibration-insensitive 87−68051
fibre optic current sensor for magneto-optical meas. system using SF-4 flint glass *(Korean)* 86−2715
fibre optic current transducer 87−68059
fibre optic electric and magnetic field sensors for HV elec. system 85−62349
fibre optic Faraday rotation sensor, pseudo-reciprocal, current meas. and data communication appls. 86−68270
fibre optic Faraday rotator for heterodyne optical communication *(Japanese)* 88−13953
fibre optic magnetic sensor, optimisation of fibre/metallic glass bond 86−2728
fibre optic magnetometer, closed loop DC field 85−62348
fibre optic magnetometer, effects of nonlinear magnetostrictive props. 85−62350
magneto-optical devices continued
fibre optic magnetometer, single-mode with DC bias field stabilisation 86−2732
fibre optic voltage and current meas. instrument *(Japanese)* 88−53713
fibre optical magnetic field measurement, YIG sensor design 86−2782
fibre optics, Faraday effect for closed-, open-loop magnetometers and non-invasive data rings 86−48189
fibre optics current sensor, vibration insensitive 87−38819
all-fibre single mode isolator at 1.3 μm using Faraday rotator fibre 86−48201
fibre-optic current sensor using Faraday effect 86−63642
fibre-optic isolator, YIG spherical lens and PANDA-fibre polarisers 85−18681
fibre-optic magnetometer, closed loop, AC current measurement using Faraday effect 87−41482
fibre-optic magnetometer with magnetic feedback, anal. 88−26900
flexible disc signal reproduction by domain-modulation-type optical readout head 87−53888
garnet, thin films, zero linear birefringence, appl. for magneto-optic waveguide devices 88−72168
garnet buried magneto-optic channel waveguides, LPE growth 87−73078
garnet film, waveguide magneto-optic isolator, laser annealing fabrication 88−65387
garnet film magneto-optic readout for floppy discs *(Japanese)* 85−24174
garnet film magnetooptic transfer readout head with periodical groove arrangement 88−33795
garnet films, thin, as light signal convertors 86−28925
garnet magneto-optic film non-reciprocal waveguides, isolator appls., 87−54133
garnet magneto-optical discs, sputtered, read/write charact. 88−51599
garnet magnetooptical readout head, effect of high permeability film 88−33796
garnet multilayered films for high density magneto-optics recording 88−51270
garnet sputtered films, laser diode recording charact. 88−51600
garnet sputtered films, magneto-optical recording using laser diode 88−51593
garnet thin films, device appls. review, mag. props. discussion 86−15412
garnets, magneto-optical devices, review of research in Japan 88−51594
GdTbFeCo, magneto-optical discs, field modulation recording, domain shapes 88−64943
glass:Tb_4O_7 Faraday rotator low loss single mode fibres, MCVD fabrication 87−18694
glass substrate, reactive ion etching for magneto-optical memory appl. *(Japanese)* 85−41223
grating for light switches, spatial filter techniques 87−74889
gray scale operation of a multichannel optical convolver using the Semetex magnetooptic spatial light modulator 88−58303
gyroscope, non-reciprocal optical effect 85−29876
head for magneto-optical disk evaluation 86−42389
head with built-in generator for bias magnetic field 88−33787
heterodyne receiver, polarisation control scheme using Faraday rotators 86−43861
high-density digital recording channel, properties and optimisation *(German)* 86−21978
high-speed recording technology for optical disc *(Japanese)* 88−20331
hysteresis-plotter based on Kerr effect, using microcomputer *(Slovak)* 87−63224
imaging method of magnetisation time evolution in mag. thin films 88−51589
information storage technology 85−18595
integrated and guided-wave optics, conf., Kissimmee, FL, USA 85−26
integrated optical signal processing devices employing magnetostatic waves 85−2102
intersatellite communications, stripe domain light deflection 88−53227
isolator, acoustooptic and Faraday effect based 87−68223
isolator, compact optical, design 88−65400
isolator for single mode fibre, high performance polariser 88−65243
isolator using garnet single crystal as Faraday rotator *(Japanese)* 86−49596
isolator with monomode fibre pigtails, compact bulk isolator with monomode fibre pigtails, design for 1.3 μm use 87−7187
isolators, magneto-optical Faraday rotation, personal computer controlled meas. system 86−24314
isolators, materials and devices, overview 88−72169
joint transform correlator, real-time, using programmable magneto-optic spatial light modulator with liquid crystal light valve 85−57448
laser magneto-optic microscope for optical imaging of magnetic domain dynamics 87−60989
laser-feedback noise in magneto-optical recording 88−65394
light modulators appl. to advanced avionic displays 86−12107
line pattern generator for optical printing 86−2879
linear motor for magnetooptic disc drive *(Japanese)* 86−45463
Litton magnetooptic spatial light modulator, edge enhancement of coherent images 86−43285
logic gate based on magneto-optical spatial light modulator 87−74886
low noise signal detection systems 86−58804
low-temperature cell design for magneto-optical studies with laser excitation 88−72365
magnetic heads, magneto-optical recording with mag. field modulation, head design and performance 88−64938
magnetic heads, magneto-optical visualisation of mag. field distrib. 87−35176
magnetic mirror operating charact. on basis of polar Kerr effect at 0.63 μm 86−36273
magnetic storage, current techniques review *(German)* 85−35301
magnetic-field sensor with polarization-maintaining optical fiber 88−67854
magnetisation in thin films obs., interference, drift and noise suppression 86−31303
magneto-optic light switching array, design and appl. to optical print head 87−74885
magneto-optic readout head using a high permeability flux carrier for floppy discs 88−51293
magneto-optic readout of magnetically recorded signals using magnetic garnet film 87−54132
magneto-optical mass storage system with 130 mm write-once disk compatibility 87−60995
magnetography by optical writing, recording and developing charact. *(Japanese)* 87−12273
magnetooptic disc drive for digital file use, high performance 85−12670

biomedical superconducting magnetometer system for detecting lung contaminants 87−77633
carrier domain magnetometer, introduction and history 87−14497
carrier domain magnetometer, using Si bipolar transistor technology 86−5269
chest wall motion meas. during high freq. oscillation, automated noninvasive method 85−64604
coil constant determ. in γ'_p expt. at PTB, flux profile meas. 88−16443
compact magnetometer data acquisition system withaccurate chronometer 86−65503
component quantum magnetometers, mag. field anomalies effect on Hanleigh signal *(Russian)* 86−18496
component system based on three modulated quantum magnetometers *(Russian)* 86−18572
data recorders without redundancy for aeromagnetometers and magneto-variation stations *(Russian)* 86−38925
DC SQUID, integrated magnetometer 87−63383
DC SQUID, large-β, with damping resist., performance characts. 88−20292
DC SQUID magnetometer, asymmetric, voltage-flux characts. *(Japanese)* 87−53923
DC SQUID magnetometer, low noise, seven channel, for brain research 88−16706
DC SQUID magnetometer for brain research 88−23065
DC SQUIDs with short weak links, perfect modulation of critical currents, expt. study and appls. 87−67882
developments since 1970s, geology and geophysics appls. *(Rumanian)* 86−60278
digital magnetometer for surface flux density meas. in mag. particle inspection 88−481
digital teslameter, battery powered 87−41593
eddy-current DC magnetometer as an ELF antenna 88−2752
eddy-current sensor noise reduction, DC and LF magnetic fields meas. appls. 86−70125
electrochemical corrosion, SQUID magnetometry 87−74569
electronic, cct., uses AD630 modem, Siemens SBV 566 Hall probe *(German)* 86−38324
exponentially decreasing error model, measured magnetic field approx. 88−68012
Faraday, auxiliary coils for generating magnetic field gradients 87−49898
Faraday effect magnetometry, optoelectronic processing and remote meas. appl. 88−67782
Faraday effect magnetometry using high Verdet constant glass 88−9931
fiber optic DC magnetometer, single mode, for multiple-point meas. 88−42124
fiber-optic, using metallic glass ribbons, stability 86−65170
fibre nonlinear sensor using synchronous sampling 88−42148
fibre optic, magnetooptic effect in multilayer samples with domain structure 88−40011
fibre optic DC magnetometer, metallic glass based, performance limit 86−18081
fibre optic magnetic field sensors, ultra sensitive 87−68172
fibre optic magnetic sensor, optimisation of fibre/metallic glass bond 86−2728
fibre optic magnetic sensor configurations with magnetostrictive metallic glass sensing element 88−16150
fibre optic magnetic sensor development, review 88−16145
fibre optic magnetometer, closed loop DC field 85−62348
fibre optic magnetometer, effects of nonlinear magnetostrictive props. 85−62350
fibre optic magnetometer, mag. materials characterisation 85−52847
fibre optic magnetometer, polarimetric DC using composite metallic glass resonator 87−14281
fibre optic magnetometer, single-mode with DC bias field stabilisation 86−2732
fibre optic magnetometer, using Mach-Zehnder interferometer 88−36068
fibre optic magnetometer appl., metallic glass magnetostrictive props. study bonding agent effects 87−60828
fibre optic magnetometer design 85−24288
fibre optic magnetometer with magnetic feedback compensation 87−29071
fibre optic magnetometer/gradiometer, closed loop design with digital signal processing 88−42125
fibre optic magnetometers, limit to sensitivity due to shape anisotropy 86−53945
fibre optic magnetometers using planar and cylindrical magnetostrictive transducers 88−16151
fibre optic sensors, nonlinear, synchronous sampling demodulation scheme 87−18669
fibre optic using Mach-Zehnder interferometer 87−14264
fibre optics mag. field sensor, using magnetostrictive effect *(Japanese)* 87−3591
fibre optics polarimetry techniques and appls. 87−38820
fibre sensors, magnetic field sensitivity anal. of design with metallic glass strips 88−42112
fibre-optic magnetometer, closed loop, AC current measurement using Faraday effect 87−41482
fibre-optic magnetometer with magnetic feedback, anal. 88−26900
field uniformity in extensive spatial regions *(Russian)* 86−3439
field-annealed magnetoelastic amorphous metal magnetometers, directional characts. 87−63371
flux transformers, image field elimination 88−22754
flux-gate sensors and magnetometers, metrological props. *(Polish)* 87−63398
fluxgate magnetometer for rock mag. studies, ring-core design 85−31978
fluxgate magnetometer sensor development, equiv. cct. model, design and automobile compass appl. *(Japanese)* 88−16451
fluxgate magnetometer sensor using amorphousalloys *(Chinese)* 85−58652
fluxgate magnetometer with a metallic glass core 86−70201
fluxgate ring core magnetometers, noise performance, Fe, Co, Si and B amorphous alloys 86−31340
fluxgate sensor theory: sensitivity and phase plane analysis 88−10499
fluxgate sensor theory, gating function stability study 87−42213
galvanomagnetic instruments for operation in cryogenic electrical-engineering installations 87−35175
galvanomagnetic sensor based, magnetic field strength meas., Uragan-3 stellator appl. 88−53660
geomagnetic field measurement, cryogenic magnetometers on satellites 85−59433
geophysical borehole magnetometer, for Au bearing magnetite deposit prospecting 87−71272
geophysical exploration magnetometer, compensation display device *(Russian)* 87−21127
Giotto magnetometer expt. 87−77379
Gouy, superparamag. effect on mag. meas. 86−70202
gradiometer, 7-channel DC-SQUID, for brain research, design 87−50225
gradiometer, integrated, all-thin-film SQUID for ambient field operation 85−58669
gradiometers, integrated thin film DC SQUIDs, design 86−17931
Hall effect magnetic induction meter for 0.5 to 15 T pulsed fields 88−22752
Hall magnetometer with high noise resistance 88−42055
Hall magnetometer with increased resolving power 85−8940
Hall sensing magnetometer for measuringmagnetization, anisotropy, rotational loss andtime effects 86−31598
helicopter navigation systems, strapdown, automatic, for combat and military transport 88−16842
high field nuclear magnetometer 87−49714

magnetocardiographic data using SQUID magnetometer and its movie display by means of spline function 85−31857
magnetocoupler based on linear bipolar IC technology using carrier-domain magnetometer 86−50092
magnetoelastic amorphous metal fluxgate magnetometer 86−50038
magnetoelastic torque magnetometer, improved design of mechanical suspension system 85−37732
magnetoelastic torque magnetometer using the inverse Wiedemann effect 85−3963
magnetometer bias determination and spin-axis attitude estimation for the AMPTE mission 85−4408
magnetometer with a permalloy magnetoresistive sensor *(Polish)* 87−14294
magnetospheric micropulsation magnetometer, built at Oulu University, Finland *(Finnish)* 86−38962
magnetospheric satellite, mag. field expt. of AMPTE-CEE satellite 85−53164
magnetospheric satellite fluxgate magnetometers, on AMPTE-IRM satellite 85−53166
magnetostrictive amorphous metal ribbon, low freq. mag. field detection 87−77187
magnetostrictive magnetic field gradiometer using metallic glass ribbon sensor, config. and characts. 88−67741
magnetostrictive primary sensing and piezoelec. signal recovery 86−60219
magnetotelluric systems verification, mini-EMSLAB expt. results 88−61608
materials, magnetic anal. *(Spanish)* 87−3645
MBM-series magnetometers, data processing and anal. *(Russian)* 86−16289
mechanocardiograph due to amorphous wire-coremultivibrator magnetometer 86−65401
metallic glass magnetostrictive transducers, prep. and props., fibre optic magnetic sensors appl. 87−60829
metallic glass particulate composite magnetostrictors for interferometric magnetometry 88−64969
metallic glasses, soft magnetic materials, electronics industry appls. 86−28685
micro-Tesla-meter, wide-range autocompensating type, radio equipment testing appl. *(Russian)* 85−8896
microcomputer controlled magnetometer survey system 86−17760
microcomputer-based magnetic heading sensor development for general aviation aircraft 88−30114
microcomputer-controlled inclinometer/magnetometer system for oil- and gas-well logging appls. 85−9358
microteslameter, digital, design, calibration and operation 86−31604
microvibration sample magnetometer, force-type meas. 85−37733
mineral exploration, magnetic sensors *(Japanese)* 85−21006
missiles guidance using magnetometer, based on Earth's magnetic field model 88−68712
Mo-permalloy sheet core-type, for sintering process temperature distribution meas. 85−26496
motor driven vibrating sample magnetometer for magnetization meas. in high mag. fields 87−56651
NMR magnetometer method, super-highly precise meas. of strong mag. field 85−52848
NMR magnetometer with low-noise limited oscillator 87−52436
noise measuring device for geoelectrical equipment tuning *(Russian)* 87−21128
noncontact current sensor using an amorphous-core multivibrator 88−16448
noncontact displacement sensor for mechanocardiography 86−32227
nonzero torque magnetometers, computer-aided calibration 86−55529
nuclear precession magnetometer, transducer windings interaction *(Russian)* 86−18495
nuclear precession magnetometer for aerogeophysical work, SKAT-77/B *(Russian)* 85−4427
nuclear precession magnetometers, sensor EM system anal. *(Russian)* 87−42206
ocean bottom SQUID magnetometer 85−53150
ocean-bottom magnetometer 85−31979
optical all fibre magnetometer with mag. feedback compensation 87−18690
optical fibre magnetometer using a stabilisedsemiconductor laser source 85−62347
optical fibres, Faraday effect for closed-, open-loop magnetometers and noninvasive data rings 86−48189
optically pumped, sensitivity 88−35942
optimized loop configuration for detection oflocalized magnetic field sources and/or monopoles 86−38326
orthogonal thin film magnetometer using the anisotropic magnetoresistance effect 85−26299
permalloy thin film sensor magnetoresistive magnetometers, circuit principles anal. 85−26303
photomagnetometer, PEM effect in semiconductors 87−68255
polarised waveforms analysing instrument 85−31427
proton and self-calibrating Rb magnetometers for tectonomagnetic studies 86−38941
proton magnetic gradiometer for marine surveys *(Chinese)* 87−4103
proton magnetometer, DPM-1 instrument from USSR for marine surveys 87−21771
proton magnetometer, intra-cycle build-up to increase accuracy *(Russian)* 87−21761
proton magnetometer, measuring transducer for geophysical magnetometer *(Russian)* 85−4426
proton precision and optical magnetometers, gaussmeters, nuclear resonance and Hall probes, field meas. *(German)* 87−49895
pulsed field magnetometer *(German)* 86−5257
pulsed field magnetometer for hard magnetic material characterisation 88−68008
pulsed high field apparatus and magnetometer for hard mag. material meas. 85−14771
quantum magnetometer for meas. magnetic susceptibility 86−60329
quantum magnetometer plateaus, phase signal coding 88−42253
quick response magnetometers using amorphous wire cores, appl. to mechanocardiographs 87−49737
recording media, conf., Parma, Italy (Sept. 1986) 87−43737
resonant-type, with amorphous core, driven by operational amplifier 85−26304
RF SQUID, impedance matching to standard transmission line 85−56199
RF SQUID in autodyne regime 86−28750
RF SQUID magnetometer Read, matching technique for high spatial resolution 85−31458
rock magnetism, equipment for rapid determ. of rotational remanent magnetization 87−71273
rock magnetism, MOLSPIN instrument for susceptibility and anisotropy 88−74952
rock magnetism laboratory equipment, flux-gate spinner magnetometer interfacing to microcomputer 87−57322
rock magnetisms magnetometer vibrating-sample type and Preisach diagram 87−57331
ROCOMA (rotating coil magnetometer) for multicomponent rock magnetization analysis 88−5118
rotating coil magnetometer, errors due to eccentricity, vibration 88−29603
satellite attitude determination using geomagnetic sensor *(Japanese)* 85−26863
satellite-borne SQUID magnetometer, LF ambient magnetic fields effect 85−4396
second order gradiometer and DC SQUID integrated on a planar substrate 85−35334
sensing coils with extreme signal-to-interference discrimination 85−47968
shear wave magnetometry using amorphous magnetic materials 88−68010
shear-wave magnetometry using metallic glass ribbon 87−35174
simple magnetometer for planar geometries 86−31599
single-chip SQUID magnetometer 88−47506
small sample magnetometers for simultaneous magnetic and resistive meas. at low temp. high magnetic field 87−29264
SQUID, biomed. applic. advances 85−43324
SQUID, DC, NbN layers, fabrication of nanobridges by burn-in technique 87−38698
SQUID, DC, very short variable-thickness bridge development 87−38700
SQUID, edge junction DC device, signal and white noise, magnetic flux detection appl. 88−45004
SQUID, for thermal magnetic noise meas., biomagnetic meas. appl. 86−44649
SQUID, large β, integrated gradiometer 87−74573
SQUID, low-pass filter in flux transformer ccts. 88−58042
SQUID, macroscopic quantum mechanical circuits inelectromagnetic measurements 86−31555
SQUID, operating principles, appls. as picovoltmeter and magnetometer *(Hungarian)* 85−1866
SQUID, RF, for biomag. field detection, digital control unit 87−41458
SQUID, RF, highly sensitive, using short variable-thickness bridge and Nb film 87−38699
SQUID, use for thermally fluctuating mag. field meas. of normal metals at low temp. 87−41594
SQUID, use with uniaxial stress device 85−31578
SQUID and biomagnetics *(Japanese)* 88−42032
SQUID based magnetometers 88−42023
SQUID fluxmeters development for ultralow magnetic field meas. *(Japanese)* 88−39821
SQUID galvanometer for quantum Hall resistance meas. 87−63384
SQUID gradiometer circuit Johnson noise from normal metal 87−74571
SQUID gradiometer using planar coupling 87−14275
SQUID gradiometers, digital filter design approach 88−65013
SQUID gradiometers evaluation, using spatial Fourier transform 87−67905
SQUID instrumentation in the measurement ofbiomagnetic fields 86−50548
SQUID magnetometer, 4-channel, for brain research 85−38076
SQUID magnetometer, flux band dynamics 86−42171
SQUID magnetometer, four-channel, for human brain research 85−48218
SQUID magnetometer, fully automated, for low-field meas. on magnetic thin films 86−11684
SQUID magnetometer, miniature integrated planar thin film device, design and appls. 85−58657
SQUID magnetometer, scanning three-axis, for sub-microgauss mag. field meas. 85−48075
SQUID magnetometer for biomagnetic field meas. 88−48195
SQUID magnetometer for Earth's mag. field anomalies meas. from moving platform, design 88−13754
SQUID magnetometer for rock sample studies *(Chinese)* 88−10492
SQUID magnetometer with null input current, for transition temp. meas. of high-temp. superconductors 88−68068
SQUID magnetometer with open-ended horizontal room-temp. access 85−14765
SQUID magnetometers, cryostat cooled 85−7173
SQUID magnetometers, multichannel, flux-transformer crosstalk elimination 87−21021
SQUID magnetometers, thermal coefficients and excess noise 85−46066
SQUID magnetometers, uses in medicine 87−50215
SQUID magnetometers and instrumentation 87−49715
SQUID magnetometers for magnetocardiographic data measurement and its movie display *(Japanese)* 87−8890
SQUID magnetometers for medical and geophysical use *(Swedish)* 87−8592

magnetometers continued
SQUID magnetometric apparatus for dynamic mapping of heart 87−50205
SQUID magnetometry, review 87−67902
SQUID pick-up coil, superconducting screening of magnetic flux 88−58033
SQUID sensors, appl. in medicine and physiology 85−31804
SQUID sensors, DC, integrated thin film, design and appl. 87−67892
SQUID-based acoustomagnetic spectrometer 86−38345
sQUID-based magnetometer, statistical dynamics *(Russian)* 85−64117
SQUID-based planar gradiometer for non-destructive testing of ferromagnetic plates 87−73179
SQUID-based rock magnetometer with open-ended horizontal room-temperature access 87−74574
SQUID-based sensor, clinical appls. of neuromagnetism, instrumentation developments 88−48194
SQUID-magnetoencephalography system, mech. performance of GFRP dewar with spherical bottom 87−41965
Stanford octagonal magnetic monopole detector 87−77203
superconducting flux transformers, magnetometer systems, figure of merit and spatial resolution 85−1869
superconducting gradiometer, coarse balancing at room temp. 85−1945
superconducting gradiometer arrays for localisation of biological sources 86−32228
superconducting gradiometer for magnetic fluctuations measurement from seismic waves 87−77832
superconducting magnetometer for measuring magneticsusceptibility 86−60325
superconducting planar gradiometers with shaped asymmetric near-source response, design 87−74582
superconducting quantum magnetometer for the range 1-200K 86−31603
superconducting quantum magnetometer with parametrically regenerated network 87−53921
superconducting second-gradient spinner magnetometer 86−32523
susceptometer for thin films and surfaces 87−21035
tape particle anisotropy and orientation distribs. determ. using torque magnetometry 87−49896
thin-film, for electronic compass *(Dutch)* 87−38672
thin-film DC SQUIDs for superconducting magnetometer devices 85−46062
three-component superconductor magnetometer 86−44278
toroidal ferromagnetic probes, theory and expt. *(Czech)* 87−56652
torque magnetometer for meas. magnetic thin films 86−17954
torque magnetometer using high field superconducting magnets for anisotropy meas. 87−56632
torque magnetometer using supercond. magnet, mag. anisotropy meas. 87−35036
torsional magnetometer, appl. to two-dimensional electron systems 85−37554
trolley position measurement system for computerised magnetic test range 87−21215
variable magnetic field meas. under cryogenic conditions 87−29262
vector magnetometer, magnetisation vector measurement in ferromagnets 88−74355
vibrating and rotating sample modelling, AC multipolar sources 88−67750
vibrating magnetometer for magnetic moments of magnetic materials meas., temp. dependences 87−21138
vibrating sample magnetometer, detection coil system, optimum design 87−35051
vibrating sample magnetometer, high-sensitivity, design, performance 88−9948
vibrating sample magnetometer, improved He cryostat 88−10106
vibrating sample magnetometer for hysteresis loop meas. of mag. thin films 85−20703
vibrating sample magnetometers, design 88−9947
vibrating sample magnetometers, detection coil system, optimum design *(Japanese)* 87−35067
vibrating sample magnetometers, magnetic images obs. 88−53650
vibrating sample magnetometry, appl. of digital signal processing 87−56817
vibrating-reed magnetometer, data processing and control using Elektronika D3-28 microcomputer 88−29604
vibrating-sample magnetometer for measuring magnetically weak materials 85−47961
Cs vapour magnetometer, light source charact. *(Russian)* 86−18494
^{4}He resonance magnetometers, optically pumped 87−56819
Nb DC SQUID using thin-film point contacts 88−13764
Nb and Nb alloy wires for SQUID magnetometer and gradiometer circuit 87−38702
Nb-NbO_x-PbIn thin film supercond. magnetometers, plasma processing prep. 87−67906
Nb-Ti eight-loop supercond. mag. monopole detector 88−22915
Nb_3Ge planar DC-SQUIDs with integrated Nb_3Ge input coupling coil 88−13728
NbN DC-SQUID magnetometer operating above 10 K 88−13729
NiFeCo thin film magnetoresistive magnetometers, temp.-induced sensitivity changes 87−29048
Si carrier-domain magnetometer with temp. compensation 86−55691
Si integrated magnetic-field sensors, review 87−41491
Y-Co permanent magnet particles, magnetisation reversal observation by vibrating reed magnetometer 85−18580
YBaCuO ceramic DC SQUID magnetometric sensor device *(French)* 88−29596
$Y_{1.2}Ba_{0.8}CuO_4$, ceramic high-temp. superconductor, RF SQUID construction 87−53918
$YBa_2Cu_3O_7$ high T_c ceramic weak link interference superconductor magnetometer 88−51393
$YBa_2Cu_3O_y$, high T_c supercond. RF SQUID, spectral density of noise flux *(Russian)* 88−58029
$YBa_2Cu_3O_y$, high T_c supercond., novel magnetometer 88−74562
$YBa_2Cu_3O_y$, quantum interference effects, SQUID magnetometer 88−26726

PbTe films, disordered, electron localisation and negative magnetoresistance 85−23483
PbTe films, γ-irrad., elec. props., dose depend. 87−60117
PbTe oxidised disordered films, magnetoresist. quantum oscills. obs. 87−32276
p-PbTe, single crystal grown under weightless conditions, low temp. transport phenomena 85−5972
PbTe:In films, weak-field magnetoresistance 85−28981
$PbTe/Pb_{1-x}Sn_xTe$ superlattices, electronic structure studies 85−6738
PbTe-Bi superlattices, two-dimensional charge transport, annealing effect 85−61766
PbTe-EuTe short period superlattices, props., appl. to laser diodes 87−26422
Pt-Co dilute alloys, resistance thermometers with low magnetoresistive effects 85−3942
Rh-Fe resistors, low-temp. thermometry in high magnetic fields 88−53666
RuO_2 thick film resistors as low temp. thermometers in high mag. fields 86−31342
Si (100), MOSFET, relaxation rates, temp. dependence 88−19971
Si (100) with periodic MOS microstructures, dynamic magnetoconductivity of inversion electrons 87−17819
Si MIS structure, activated magnetocond. in region of fractional quantum Hall effect 85−61782
Si MOS inversion layer, negative magnetoresist. and inelastic scatt. time 85−6758
Si MOS inversion layer, transport props. in high field at low temp. 87−1314
Si MOS inversion layers, anomalous magnetoresistance in field parallel to interface 86−28059
Si MOSFET, 2D electron gas, nonlinear magnetoconductance, phase reversal, hot electron effects study 86−53411
Si MOSFET, Na-doped, two-dimensional impurity band, hopping magnetoresist. 86−41613
Si MOSFET inversion layer, localisation in 2D systems 86−63088
Si MOSFET, mesoscopic, rectifying behaviour, conductance fluctuations, quantum interference 88−33234
Si MOSFETs, 1D electron localisation 86−47628
Si MOSFETs, 2-D electron layer, fractional quantisation of Hall resist. 85−45474
Si MOSFETs, high mobility, magnetoconductance quantisation, freq. depend. 85−50301
Si MOSFETs, sub-100-nm channel, Shubnikov-de Haas effect in characterization 86−47620
Si MOSFETs, weak localisation in isotropic and anisotropic 2D electron gases 87−32358
Si MOSFETs, weak localisation magnetoresist. in almost quantising mag. fields 87−11485
n-Si, S-type current density-mag. induction characts. 85−18059
n−Si, chaotic cond. oscill. induced by impact ionisation in freezeout temp. range 88−39048
n-Si, hopping cond. and magnetoresist. calcs. 86−67658
n-Si, inversion layer, magnetoconductance, weak to strong localisation transition 85−50320
Si inversion layer, scatt. mechanisms, weak localisation expts. 87−53299
Si inversion layers, magnetoconductance due to parallel mag. fields 87−37997
p-Si, inversion layers, magnetotransport props., many body effects 88−19765
Si inversion layers on sapphire, anomalous magnetoresistance 85−1416
n-Si, magnetoresistive electromotive force in strong elec. microwave fields 87−53162
Si narrow accumulation layers, low field magnetoconductance, aperiodic struct. obs. 86−58237
Si, narrow inversion layers, aperiodic magnetoresistance oscillations, MIS structs. 86−21278
n-Si, neutron irrad., physical and geometrical magnetoresist. studies 85−34472
Si pinched accumulation layers, magnetoconductance meas. 86−35455
n-Si plates, size magnetoresist. anisotropy, energy and intervalley relax. time determ. 86−14837
Si surface, electronic inversion layer, positive magnetoresist. obs. 87−17689
n-Si thin film, negative magnetoresist., spectrum anisotropy effects 87−37868
Si uniaxially stress (100) inversion layers, negative magnetoresistance study 88−71362
Si, weak field magnetoresistance of holes, k.p perturbational calcs. 85−1277
Si:As, barely insulating samples, hopping cond., mag. field depend. 86−53328
Si:As, metal-insulator transition, magnetic tuning 86−35294
Si:Au $n-n^+$ isotype junction, enhanced magnetosensitivity 87−1265
Si:H, high freq. dislocation conduction, annealing and hydrogenation effects 85−28936
a-Si:H p-i-n devices, forward biased, magnetoresistance studies 88−25935
a-Si-H films, magnetoconductance, freq. depend. loss meas. 86−27909
Si-SiO_2 MIS system, surface magnetoresistive and effective hole mobilities of Si 85−40525
$Si_{1-x}Ge_x$:Ga, neutron-transmutation doped, galvanomag. props., inhomogeneities 87−53213
Si_3N_4 MNOS structures, electrophysical props. at low temp. 87−53293
$TaSi_2$ thin films, electronic transport props. 85−50457
Te, weak localisation and quantum magnetoresist. 85−23450
Te_xSe_{1-x} amorphous films, magnetoresist. meas. 85−28975
UFe_4P_{12}, ferromag. semicond., low temp. sp. ht. and magnetoresist. meas. 86−27959
ZnSe, heavily doped, hopping cond. and electron localisation 85−6710

magnetoresistance, thermal *see thermal magnetoresistance*

magnetoresistors *see magnetoresistance; resistors*

magnetospheric electromagnetic wave propagation
1.91 MHz echoes from mag. conjugate point after propag. through magneto-ionic duct 87−33430
24 kHz MSK Doppler receiver at Faraday, Antarctica 86−64007
boundary value problems for propagation in moving inhomogeneous plasma *(Chinese)* 85−36005
daytime whistlers, absolute intensity meas. by direction finding, latit. var. obs. *(Japanese)* 86−29388
downgoing whistler wave excited from duct, EM field distrib. on ground *(Japanese)* 85−24834
equatorial radio wave scintillations, geomag. disturbance effect 86−59041
long-delayed radio echoes, mechanisms and observations 85−36017
low-latitude whistler-mode ray tracing, effect of geomag. field models *(Chinese)* 86−15870
magnetoactive plasma, LF antennas, review 86−29413
magnetospheric VLF radio waves spectral estimation, one-bit correlation method 87−2533
narrow band VLF emission for ground to satellite 85−51427
plasma maser, effective saturation of absorption 88−34300
plasma wave observations by DE-1 satellite *(Japanese)* 88−34337
radiowave induced magnetic field and plasma density fluctuations 85−57035
radiowave propagation, oblique extraordinary mode 85−13118
radiowave propagation theory, book 86−13279
radiowaves *(Japanese)* 85−57043
rectified magnetospheric signal detection, arising at modulation freq. of transmitter 86−36735
VLF propagation on trans-polar paths 86−59044
VLF radiowave phenomena from DE-1 and ISIS satellites, comparative study 88−45688
VLF radiowave propag., whistler-mode signals detection, intensity charact. study *(Japanese)* 88−20910
VLF signal propagation 85−30032
VLF signals from Siple transmitter and assoc. sidebands, DE 1 obs. 85−51428
whistler at low latitudes, automatic obs. of polarisation, meas. and tracking equipment *(Japanese)* 87−21784
whistler ducted propagation 86−3513
whistler exit points, freq. depend., field-analysis direction finding method *(Japanese)* 88−72548
whistler mode waves, three-dimens. ray tracing in non-dipolar magnetosphere 86−29377
whistler propagation in axisymmetric magnetic tubes 87−61392
whistler waves and ion-cyclotron waves interaction 87−33446
whistler-triggered emissions, obs. by DE-1 and ISIS satellites *(Japanese)* 88−34311
whistlers, amplitude oscill. and freq. modulation in magnetospheric cavity 85−24812
whistlers, energy propagation direction 86−68744
whistlers, low-latitude, absolute intensities using direction-finding meas. 85−62784
whistlers, self-focusing and 2D collapse 85−51405
whistlers, VLF noises observed in topside ionosphere 88−45687
whistlers in axisymmetric ducts, azimuth-dependent modes 86−36732
whistlers in non-dipolar magnetosphere, 3-D ray tracing calcs. 86−68758
Z mode EM waves, by 3D ray tracing 87−68788

magnetostatic fields *see magnetic fields*

magnetostatic wave devices
analog signal processing with microwave magnetics 88−32446
cascade amplifiers using relativistic electron beams with magnetostatic converter 86−67633
chip resonator and tunable integrated oscillator 88−51357
collinearly excited edge coupled resonators 86−9423
coupled magnetostatic waves in layered film structures 85−62207
delay line, attenuation layer for MSW end refl. suppression 85−22476
delay line, low loss 86−63573
delay line based oscillator, Q-factor 86−22031
delay lines, dispersion charact., second order term effect 88−71952
delay lines, dispersion control 86−22027
delay lines, surface-wave propag. in ferrite thin films 85−50848
delay lines using MSW in waveguide, anal. using integral eqn. method 88−71954
delay lines with microstrip transducer, insertion loss study 88−26687
delay lines with stepped ground planes 85−18591
direct observation of surface wave excitations inmagnetostatic wave devices 86−36061
directional coupler, magnetostatic forward volume wave type with slotline struct., design and charact. 88−71951
discriminators using MSW delay lines, automatic phase noise meas. 87−7036
equivalent cct. calcs. 88−51359
EW, compressive receiver, magnetostatic wave device appls. 86−23953
EW systems, magnetostatic wave technology appl. 86−23954
ferrimagnetic film, optical mode conversion with magnetostatic forward volume wave 88−51597
ferrite film, metallised, refl. of surface magnetostatic waves from metallic boundary 88−33529
ferrite film, normally magnetised, wave excitation and reception by microstrip transducer 88−71953
ferrite films for microwave and MM-wave devices 88−33531
ferrite plate, displacement waves of domain boundaries 86−22606
ferrite thin film, wave control using spatially nonuniform bias fields 86−22023
ferrite thin-film resonators, waves of coupled oscillations 88−20255
ferrite-ferrite structure, two-layer, waves dispersion 85−18588
ferromagnetic films, propag. characteristics 85−50852
filter, microwave cct. model 88−71955
filterbanks for microwave channelised receivers, config., fabrication and charact. 88−33544
forward vol. wave convolver theory 85−24200
forward vol. wave delay lines passband ripple 87−25863
forward vol. wave nondispersive delay line at microwave freq. 87−7027
forward volume wave delay lines, dispersive characteristics 87−67799
forward volume wave transducers, microstrip type, equiv. cct. model 88−57999
garnet multiple layer films, magnetostatic surface wave delay lines, dispersion charact. 85−46017
garnet thin films, device appls. review, mag. props. discussion 86−15412
inhomogeneous field magnetostatic forward volume wave-optical interaction 88−7958

magnetostatic wave devices continued
integrated optical signal processing devices employing magnetostatic waves 85−2102
losses of magnetostatic waves in layered structures 87−53900
magneto-optical devices for optical signal processing at microwave freqs. 86−22192
magnetostatic surface wave device with sinusoidal surface corrugation, microwave filter fabrication 87−67796
magnetostatic wave propag. and excitations, Brillouin light scatt. studies 87−67795
magnetostatic-surface-wave band-pass filter, tunable transversal type, design and charact. 87−7032
metal fingers grating-YIG film delay line, magnetostatic forward volume wave scatt. *(Japanese)* 87−60831
metal-finger reflector scattering charact. 86−2610
microstrip surface magnetostatic wave transducers, charact., excitation 88−33547
microstrip transducer, focusing surface 88−1883
microstrip transducer, magnetostatic wave excitation and reception 86−63574
microstrip transmission line, surface magnetostatic wave excitation 86−68175
microwave conf., Baltimore, MD, USA (June 1986) 87−5130
microwave devices, transfer function 88−12582
microwave dispersive delay at gigahertz frequencies usingmagnetostatic waves 86−22026
microwave magnetostatic wave convolvers 86−22032
microwave magnetostatic wave device, excitations detection by Brillouin light scatt. 86−9420
microwave oscillator using magnetostatic surface wave delay lines *(Japanese)* 87−12058
microwave signal delay by magnetostatic devices 85−35323
microwave signal processing, using magnetostatic wave devices 85−35324
microwave signal processing appl. *(Italian)* 85−29478
microwave signal processing in telecom., radar and EW systems 88−14931
microwave signal processing system applications of magnetostatic wave devices 86−22034
microwave signal processing using magnetostatic wavedevices 86−2606
microwave tunable magnetostatic surface wave straight-edge resonators 86−22029
multi-element magnetostatic wave transducers, equiv. ccts. 86−24475
narrow-band filtering of microwave filters, YIG films magnetostatic waves excitation 86−62667
nondispersive magnetostatic wave delay line with electronic tunability, CAD 85−6244
optical Bragg cell devices 86−36274
optical elements for integrated microwave magnetostatic wave devices 87−25865
optical integrated switch and modulator usingmode conversion induced by magnetostatic surfacewaves in three-dimensional waveguides 86−2609
optical mode conversion by magnetostatic surface waves in 3-dimensional optical waveguides 85−18532
optical mode conversion device using magnetostatic surface wave 88−13955
optical-magnetostatic wave interaction for spectrum analysis 85−13584
oscillations, amplitudes computation in small ferrite samples, approx. method 88−7803
oscillators, magnetostatic-wave delay-line based, phenomenological theory 85−50850
passband filtering of magnetic volume waves intwo-port planar garnet devices 86−36059
passive pulse compression loop 85−18590
phase noise charact. meas. 87−7035
phased array beam steering, microwave acoustic and microwave magnetic components 87−68895
programmable Barker encoder/decoder, design and operation 87−7033
recent research trends, review *(Japanese)* 85−50851
reflective array filter status 86−22028
resonators, effect of width modes 86−2607
ring resonator with single resonance 87−67797
S-band 13-channel magnetostatic wave filterbank , construction and performance 88−71956
signal processing devices, principles and charact., review *(German)* 86−58614
signature meas. and analysis of ferrous objects 85−20704
slot-line MSW signal-to-noise enhancer 86−36060
solitons at microwave frequencies, props. and appls. 88−26688
sputtered thin film permanent magnet requirements for magnetic devices 87−67805
strip antenna, linear inductance calcs. for surface magnetostatic waves, approx. soln. 87−39463
surface magnetostatic waves spectrum in planar structure with ferromagnetic components with dielectric layers 87−67800
surface wave delay line, optimum design 87−67798
surface wave delay lines, narrowband, tunable microwave oscillator appl. 86−22030
surface wave energy flux calcs. 87−53901
thin-film layered structure with periodic corrugation, high Q filter characteristics 88−50363
three-dimensional waveguides, optical mode conversion induced by magnetostatic surface waves 85−12675
time delay appls. in phased array antennas 86−22821
transmission lines, parameters meas. of useful signal and pickup 86−42149
tunable bandpass filter 87−7034
tunable magnetostatic wave oscillators using pure and doped YIG films 85−23130
tunable magnetostatic wave resonators and oscillators 86−20790
tunable microwave resonators and oscillators using magnetostatic waves 88−58000
variable delay line consisting of metal-dielectric YIG-GGG metal 85−1860
variable time delays for phase array systems 86−53901
volume MSW transducer, focusing 88−64970
waveband noncollinear guided-wave magnetoopticinteraction with magnetostatic surface waves inYIG/GGG waveguides 86−2608
waveguide with stepped-inhomogeneous magnetisation, natural waves spectrum 85−18589
waveguides, multi-layer, for integrated optical magnetostatic-wave signal processing devices 88−40013
wideband channelizers for freq. sorting, appl. of acousto-optic, bulk acoustic wave, SAW and MSW technology *(Japanese)* 87−60755
$BaFe_{12}O_{19}$, magnetostatic waves excitation at 20 to 80 GHz 87−60798

magnetostatic wave devices continued
$(BiLu)_3Fe_5O_{12}$ film, TM-TE optical mode conversion induced by magnetostatic waves 88−72171
$Gd_3Ga_5O_{12}$-YIG-Al-ZnO magnetostatic wave rejection filter, amplitude-freq. characts., electrical control 87−25864

multimedia Poisson problems, anal. by boundary element methods *(Japanese)* 86−3435
multiple multipole method *(German)* 86−63892
multiply connected regions, props. of curl operator 88−34233
multivalued mag. scalar pot. calc. in exterior regions 87−75303
nonlinear integral eqns. for rapid iterative convergence 85−56947
nonlinear magnetostatic problems, hybrid boundary-volume Galerkin method 85−46522
nonlinear magnetostatic problems, iteration strategy in MB formulation 88−27432
optimisation methods, comparative anal. 88−52084
oscillations, amplitudes computation in small ferrite samples, approx. method 88−7803
particle interaction phenomena in mag. recording 87−18508
permanent magnet motors, numerical computation of torques 88−55283
permanent magnets, multipole, mag. fields calc. 87−18535
problem treatment by TRIFOU computer code *(French)* 86−68675
rare earth permanent magnet synchronous generators, 3D magnetostatic soln. 87−22305
residual magnetic phenomena, numerical modelling 86−42735
salient pole synchronous machine, integral equation approach to the computation of nonlinear fields in electrical machines 88−75589
scalar potential formulation of nonlinear magnetostatic field problem 85−22442
SCIN synchrotron, superconducting magnets, magnetostatic field calcs., algorithms *(Russian)* 87−63602
spectral properties for the magnetization integral operator 85−24718
spin wave antenna is unlimited medium, radiation resistance 88−2674
subregion method, theoretical study and appls. 88−52076
superconductor, ideal, mag. field, rel. to magnetostatic model of magnetisation of ferromag. *(Russian)* 88−20263
switching contacts, magnetostatic current fields calc. 87−78826
synchronous generators, 3D magnetostatics computations 86−45376
synthesis of the magneto and electrostatic fields 88−8410
thin-film recording heads, coeff. of field eqns. improvement 88−52091
thin-walled high permeability enclosures, simplified magnetostatic modelling for shielding effectiveness eval. 87−26619
three dimensional magnetostatic field computation withintegral equation method *(German)* 86−63914
three dimensional problems, boundary element solns. 85−56949
three-dimensional magnetostatic fields, vector variables, boundary elements 88−27428
three-dimensional magnetostatic fields from point-matched integral equations with linearly varying scalar sources 85−24715
three-dimensional problems, boundary element and finite element solns. 85−29984
toroidal conductor, scalar and vector pot., mag. field solns. 85−7577
toroidal conductor, vector pot. and mag. field components, series expansions 85−24716
two- and three-dimensional magnetostatic fields, finite element force computation 85−46524
two-dimensional semi-infinite plates, external mag. field 85−13055
variational inequalities technique *(Russian)* 88−40483
vector potential visualization 87−54500
vector variables, 3D BEM 88−52073
VLSI package, rectangular and cylindrical stubs, inductance matrices 88−50970
waves in magnetised ferrite structure with impedance boundaries 86−54259
YIG plates and films, EM wave packets propagation 88−27577

magnetostriction
1D model, external load depend., FEM anal. 88−39791
amorphous metal fibre optic magnetometer response, dipole rotation model 86−38344
amorphous ribbons, applied tensile stress, influence on mag. props. *(French)* 86−9377
attenuator for magnetostrictive machine noise reduction, deaf bend design *(Czech)* 87−35863
Barkhausen shocks obs., by sound radiation meas. 85−14988
bubble memory devices, hybrid, cell size reduction 85−46019
disc media characterisation, magnetostriction meas. technique and test fixture 85−8939
EM transducer based on magnetostriction of materials 88−22801
ferrites, characteristics and selection for particular appl. *(Italian)* 87−74510
ferromagnetic amorphous alloys, ribbon-shaped 85−14989
fibre-optic dilatometer for measuring magnetostriction in ribbon samples 87−56818
garnet films, (100) and (110), H_2^+ implanted, mag. anisotropy 87−60790
garnet films, Bloch line memory, stripe domain confinement 85−46022
heavy rare earth-transition metal amorphous films, mag. props. and appls. 85−24070
laser freq. stabilization, magnetostriction effect appl. to laser-cavity length compensation 88−8246
linear magnetostriction displacement meas. methods for magnetically soft alloys 88−53833
measurement, dilatometer for wide temp. range appl. 86−24493

magnetostriction continued
measurement, integrated on-line instrumentation, microcomputer controlled 88−67667
metallic glass, magnetostrictive props., fibre optic magnetometer appl., bonding agent effects 87−60828
metallic glass magnetostrictive transducers, prep. and props., fibre optic magnetic sensors appl. 87−60829
metallic glass particulate composite magnetostrictors for interferometric magnetometry 88−64969
metallic glasses, saturation magnetostriction const., ballistic galvanometer meas. *(Chinese)* 85−4085
Ni-Fe-Mo Permalloy films sputtered on moving PET webs 88−57903
Permalloy, film for composite perpendicular mag. recording medium, mag. props. 86−36020
Permalloy film evaporated on different substrates, magnetic anisotropy energy obs. *(Japanese)* 86−2583
Permalloy thin films heads, RF sputtered, mag. props. 87−18476
permanent magnet electromechanical transducer for dynamic magnetostriction meas. 86−31355
piezomagnetic properties of the magnetostrictive metallic glasses *(Polish)* 85−1827
saturation magnetostriction constants in amorphous alloys, meas. by tension-magnetisation method *(Chinese)* 85−64253
steel, C, inverse magnetostrictive effect and electromagnetic non-destructive testing methods 87−5553
steel, Mn, pipeline, pneumatic stressing mechanism for magnetomechanical studies 88−53835
Terfenol, props., sensor appls. 88−20256
thin films meas., using optical displacement meter 88−53834
yoke type magnetoresistive heads, inverse effect 88−57956
yoke-type magnetoresistive heads, Barkhausen noise, inverse effect of magnetostriction 88−26669
$Be_xDy_{3-x}Fe_5O_{12}$ thin films for magnetooptic recording, chem. deposition prep. 88−33526
$Bi_xDy_{3-x}Fe_5O_{12}$ thin film prep. by thermal decomp., magnetooptical recording appls. 88−33525
Co-Cr sputtered films, magnetostriction and Young's modulus 86−9383
Co-Cr-M (M=Fe,Ta,Zr) alloy films for mag. recording, magnetostriction 87−53878
Co-Cr(Pt) alloy films for mag. recording, magnetostriction 87−53878
Co-Fe-V-Si-B amorphous alloys with a high remanence ratio and a low loss 85−29436
Co-FeO pigments for mag. recording, reversible coercivity vs. temp. losses 87−46335
Co-Ni-Fe-Si-B amorphous alloys with a high remanence ratio and a low loss 85−29436
Co-Pd-Zr(Hf) amorphous films, mag. props., recording appls. 88−64898
Co-Zr based amorphous thin film perp. recording head 86−68165
Co-based alloy 87−53878
Co-based alloy sputtered films for mag. recording, magnetostriction *(Japanese)* 86−2586
$Co_{0.2}Cr_{0.8}$-SiO_2 multilayered medium for vertical recording 86−35976
CoFe amorphous alloy, tailored props. for magnetic amplifier core appls. 86−15352
CoFeBMo amorphous films, RF sputtering, mag. props. 85−60976
$CoFe_2O_4$, surface and near-surface chem. anal., mag. props., XPS study 85−24083
CoFeSiB amorphous mag. material, induced anisotropy 88−51178
$Co_{75-x}Fe_xSi_{15}B_{10}$ amorphous ribbons, Co-rich to Fe-rich transition, mag. permeability aftereffect 88−51179
CoMn amorphous alloy, tailored props. for magnetic amplifier core appls. 86−15352
CoNbZr amorphous mag. material, induced anisotropy 88−51178
$Co_{58}Ni_{10}Fe_5Si_{11}B_{16}$ alloys, excess eddy current loss of amorphous ribbons 85−29435
$Co_{92}Zr_8$ bias-sputtered films, mag. props. and microstruct. 88−64896
CoZr-based amorphous thin films, uniaxial and local anisotropies, appl. as mag. heads 88−51199
CoZrRe amorphous film, domain struct. anal., appl. for mag. heads 88−51284
Fe, thin films, dual ion beam sputtered, mag. and struct. props. 88−51181
(110) [001] Fe-3% Si transformer laminations *(Dutch)* 87−72182
Fe-Al-Si sputtered films, mag. props. 87−60786
Fe-Al(Si) cold-rolled nonbrittle powder strip prep., texture and mag. props. 87−25776
Fe-B-Si-Cr(Mo) metallic glasses, high permeability, for line freq. appl. 85−50825
Fe-C multilayered thin films, prep. by dual ion sputtering, mag. props. 88−51202
Fe-Co multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Co-B amorphous magnetostrictive film, magneto-SAWs, local detection by light probing 88−51221
Fe-CoFe multilayer films, ion-beam-sputtered, magnetic props. 88−33506
Fe-Ni evaporated films for a back layer of perpendicular mag. recording media, prep. 87−16667
Fe-Si ($3^1/_4$ wt.%), mag. props., effects of alternating stress 85−7140
Fe-Si electrical sheet steel, magnetostriction variations meas., ponderomotive force influence 87−6994
Fe-Si electrical steels, magnetising device for magnetostriction meas. 87−5539
Fe-Si sputtered films, mag. props. 87−60785
Fe-Si-Al, magnetocryst. anisotropy const. and magnetostriction consts., temp. depend. 88−33518
Fe-Si-Al sputtered films, mag. props. 88−39794
Fe-Si-Al sputtered films, mag. props. 88−64897
Fe-based amorphous alloy, stress sensitive prop. 88−33513
Fe-based magnetostrictive amorphous ribbons for digitizer 86−63541
Fe-based sputtered films, mag. props., corrosion resistance, appl. for mag. heads 88−51203
$Fe_{78}B_{13}Si_9$, $Fe_{40}Ni_{38}Mo_4B_{18}$ and $Co_{72.2}Fe_{5.8}Mo_2B_{15}Si_5$ glassy metal powder cores, consolidated, mag. props. 85−50843
$Fe_{81}B_{13.5}Si_{13.5}C_2$ alloys, excess eddy current loss of amorphous ribbons 85−29435
FeCo-SiB amorphous alloy annealed in rotating mag. field, mag. props. 88−64907
$Fe_{14}Nd_2B$ magnets, high-field magnetostriction 87−25763
$(Fe_{0.82}Ni_{0.10}Nb_{0.08})_{83}Si_5B_{12}$, amorphous alloys, magnetostriction and mag. core loss 85−50844
$(FeNiNb)_{83}Si_5B_{12}$ amorphous alloy, mag. core loss, surface state effects 86−28705
magnetostriction continued
Fe_3O_4 films by opposed-target sputtering, cryst. orientation and mag. props. 88−1860
Fe_3O_4 films with large perp. mag. anisotropy, demagnetisation by stress 88−51246
Gd-Co amorphous films, mag. props., thermomag. memory appls. 85−29420
Gd-Fe amorphous films, forced magnetostriction, comp. depend. 88−33500
Gd-Fe-Co amorphous films, magnetostriction, contrib. to perp. anisotropy 88−33499
$(GdYBi)(FeMnbGa)_5O_{12}$ films with orthorhombic anisotropy, mag. props. 85−24215
$(LaLuSmGd)_3(FeGa)_5O_{12}$, mag. garnet films, effective anisotropy field change induced by ion implantation 85−24086
Mn-Zn single cryst. ferrite heads, rubbing noise 86−36034
$NdCo_5$, uniaxial permanent magnet 87−74507
$Nd_2Fe_{14}B$ permanent magnets, magnetoelastic and magnetostriction consts., magnetic anisotropy calcs. 86−15356
Ni layer deposited by plasma jet spraying, noncontact torque sensors using mag. heads, magnetostrictive layer 87−21029
Ni-Fe, mag. props. and magnetostriction, fibre optic magnetometer meas. 85−52847
Ni-Fe-Nb-Ta system, mag. permeability, elec. resist., hardness *(Japanese)* 86−21948
$Ni_{0.65}Bi_{0.35}Fe_2O_4$-$Mn^{3+}$ ferrite, stress-intensive square hysteresis loop, suitability for microwave applications 86−58671
NiFe films, current density depend. of magnetoresistive effect 86−58667
$Ni_{0.65}Zn_{0.35}Fe_{2-x}Mn_xO_4$, spinel ferrite, mag. and dielec. props. 87−67731
Si-Fe, highly oriented sheet, mag. props., orientation angle and sheet thickness depend. 86−58663
Tb-Dy-Fe, Terfenol-D, magnetostrictive performance, device appls. 88−64878
Tb-Fe-Co amorphous sputtered films, intrinsic mag. props., influence of N 88−51161
$Tb_{0.27}Dy_{0.73}Fe_2$, rare earth iron compounds, magnetoelastic props. and microstructure 86−56284
$Tb_{0.27}Dy_{0.73}Fe_2$, rare earth/iron compounds 86−56283
$Tb_xDy_{1-x}Fe_2$ sputtered films, magnetic and crystallographic props., device appls. 88−64883
YIG, Ca-Ge substituted epitaxial crysts., coercivity origin 85−24090
YIG, mag. garnet films, effective anisotropy field change induced by ion implantation 85−24086
YIG:D, annealing behaviour study 85−24087
YIG-$Gd_3Ga_5O_{12}$, Damon-Eshbach surface magnetostatic wave transmission coeff. 86−21974
$(YLuBi)_3(FeGa)_5O_{12}$, stripe domain stabilisation for Bloch line memory appl. 86−15384
$(YSmLuCa)_3(GeFe)_5O_{12}$ ion-implanted bubble films, plasma exposure effect on mag. props. 87−60792
$(YSmLuGd)_3(FeGa)_5O_{12}$ garnet film struct. and mag. props., mag. bubble memory appls. *(Japanese)* 87−1902

magnetostrictive devices
amorphous magnetostrictive delayline cordless digitizer 88−64968
amorphous magnetostrictive ribbon bond to bending member for strain gauge 88−22564
amorphous metal DC magnetometer, magnetoelastic, stress-relieved 87−41591
amorphous metal ribbon, low freq. mag. field detection 87−77187
amorphous ribbon based torque sensor for induction motors 88−53639
amorphous torque sensor, dynamic range widening 88−53630
bending stress meas. by contactless magnetic anisotropy sensor 88−60928
cavitation erosion testing appls. *(Chinese)* 85−18587
contact type amorphous torque sensor with wide dynamic range 88−53640
displacement noncontact transducer, using magnetostriction and ultrasonics 86−5279
displacement transducer, secondary data conversion methods 87−63333
dual-mode reciprocal phase shifter, magnetostriction insensitive config., design and characts *(Japanese)* 85−61467
electromechanical magnetostrictive convertors with nonstationary load, computer modelling of processes 85−12498
fibre optic current and magnetic field sensor 88−60747
fibre optic magnetic field sensor performance and appls. 88−33546
fibre optic magnetic field sensor using magnetostrictive perturbation 88−22616
fibre optic magnetic sensor, optimisation of fibre/metallic glass bond 86−2728
fibre optic magnetic sensor configurations with magnetostrictive metallic glass sensing element 88−16150
fibre optic magnetic sensor development, review 88−16145
fibre optic magnetometer, closed loop DC field 85−62348
fibre optic magnetometer, effects of nonlinear magnetostrictive props. 85−62350
fibre optic magnetometer, mag. materials characterisation 85−52847
fibre optic magnetometer, polarimetric DC using composite metallic glass resonator 87−14281
fibre optic magnetometer, single-mode with DC bias field stabilisation 86−2732
fibre optic magnetometer appl., metallic glass magnetostrictive props. study bonding agent effects 87−60828
fibre optic magnetometers using planar and cylindrical magnetostrictive transducers 88−16151
fibre optic sensor coatings 88−10024
films heads, heads, mag. domains 87−25840
force-sensing device combining magnetostrictive and Hall effects 85−8966
giant, appls. for moment excitation 87−74529
HF thyristor invertor for US magnetostrictive transducer power supply *(Russian)* 85−16114
imaging tactile sensor with magnetostrictive transduction 85−47851
magnetic field gradiometer using metallic glass ribbon sensor, config. and characts. 88−67741
magnetic field sensor utilizing fibre optics and magnetostrictive effect *(Japanese)* 87−3591
magnetoelastic force convertors, magnetosensitivity study of some high-precision alloys 85−20581
magnetometer, magnetostrictive primary sensing and piezoelec. signal recovery 86−60219
metallic glass magnetostrictive transducers, prep. and props., fibre optic magnetic sensors appl. 87−60829
metallic glass particulate composite magnetostrictors for interferometric magnetometry 88−64969

magnetostrictive devices continued

motor, linear, stepping 88−69428
noncontact torque sensor using magnetic heads 88−53629
ponderomotive force influence in magnetostriction meas. 87−6994
pulsed current sensor appl. 88−60753
SAW phase modulator using magnetostrictive thin films 85−56065
sensors, measurement and storage engineering appl. *(German)* 85−56129
strain gauge, highly sensitive, of annealed amorphous magnetostrictive ribbon 87−70568
strain gauge, using viscous liquid for magnetostrictive ribbon bonding 87−56678
surface magnetoelastic wave excitation by meander-line transducer 87−35515
Terfenol, magnetostriction, props., sensor appls. 88−20256
torque sensor, circumferential excitation type, operating characts. 88−53638
torque sensor using amorphous star-shaped core mag. field sensor 88−53636
torque sensor using contact magnetostrictive amorphous ribbon with wide dynamic range and quick response 88−53626
torque sensors for induction motors using amorphous microcore field sensors 88−53641
torque sensors using amorphous magnetostrictive ribbons with slits 85−3970
torque sensors using wire explosion magnetostrictive alloy layers 87−18542
transducer for force meas. in tower cranes 86−11585
transducers, limit freq. *(Polish)* 87−74530
tunable SAW devices using magnetostrictive thin films, design methodology *(Japanese)* 87−60771
ultrasonic transducer bodies and matching stubs construction *(Rumanian)* 87−15094
ultrasonics principles and applications *(Korean)* 85−4519
US magnetostrictive transducer output stage *(Russian)* 87−64003
US tissue fragmentation devices, mode-of-action model and probe expt. 87−4026
AlCoFe, core material of high power ultrasonic transducers 86−15409
AlFe magnetostrictive alloys for ultrasonic applications 86−15410
Fe and Ni magnetostrictive layers on shaft as torque sensors, prep. by wire explosion spraying 88−33543
Fe-Ni ferritic mag. sensor wires, plastically twisted, voltage-generating characts. 85−52727
$Fe_{81}B_{14}Si_4C_1$, amorphous wire, pulse generator elements, Barkhausen effect and Matteucci effect 86−28707
$Fe_{77.5}Si_{7.5}B_{15}$, amorphous wire, pulse generator elements, Barkhausen effect and Matteucci effect 86−28707
Ni plasma-sprayed magnetostrictive layer, torque sensor appls. 88−53637
$Ni_{0.98-x-y}Mn_{0.02}Co_xCu_yFe_2O_4$, piezomagnetic ferrites for ultrasonic and radioelectronic applications 86−15388
$Tb_{0.27}Dy_{0.73}Fe_2$, rare earth iron compounds, magnetoelastic props. and microstructure 86−56284
$Tb_{0.27}Dy_{0.73}Fe_2$, rare earth/iron compounds 86−56283

magnetrons
3 GHz magnetron output meas. using electro-optical technique 86−60301
20 MeV linac, duplex cavity freq. stabilization system control 88−54061
100 MW magnetron injection gun for 10 GHz gyroklystron 87−17646
500 kV magnetron injection electron gun for 30 MW gyroklystron, design and fabrication 88−38999
amplifier with distributed emission and closed electron flow, cylindrical model 85−6654
amplifiers, multiwave processes numerical modelling 88−64212
automatic control elements and construction solutions ensuring protection *(Romanian)* 88−19590
balanced states of electron streams in a magnetron gun 87−66832
cathode characts. to ensure high efficiency 87−1134
cavity, 1940s research by Boot and Randall 88−44516
charge transport mechanism 88−1320
coaxial, interf. mode anal. and suppression *(Chinese)* 87−37813
coherent and high duty operation, miniature magnetrons 88−19609
cold modelling, symmetrized transmission-line matrix method 88−50576
cross-field amplifier, multiperiod numeric model 87−66825
curved electron beams in crossed electric andmagnetic fields, injection guns *(Chinese)* 86−14776
CW magnetron 500 kW class *(Japanese)* 88−64199
cylindrical, polyharmonic mode anal. *(Russian)* 87−17616
cylindrical high-power type, dispersion relation of the diocotron instability 88−50583
cylindrical hydrodynamic multifrequency model, optimisation techniques *(Russian)* 86−41481
cylindrical magnetron, 3D Poisson equation solution 88−25784
development and appls. *(French)* 87−45511
development at General Electric during World War II 85−11843
developments for improved power and efficiency levels 87−37820
diocotron and magnetron resonances, full second-order cold-fluid theory, multiple-scales perturbation theory 88−64202
E×B type devices, discharge phenomena *(Japanese)* 87−24663
E cross B devices, discharge phenomena 87−53111
electron beam velocity modulation, water bag model anal. 87−60050
electron beams, production in magnetron diode with multitip explosive-emission cathode 88−16621
electron distrib. function, anal. and scaling 88−71275
electron gun for ultrasoft X-rays generation 87−21510
electronic tuning of magnetron oscillators using PINdiodes 85−61629
extraband oscillations, excitation and modulation *(Ukrainian)* 86−1627
fourth harmonic gyromagnetron development for MM-wave production, expt. study 85−50159
frequency-agile coaxial magnetron with linear-motor-driven tuning element 85−55391
frequency-agile radar magnetron performance improvement by tuning-fork design 87−3228
gas-breakdown transmit-receive tube turn-on times 86−41474
gas-magnetron electron source 88−36343
magnetrons continued
gyromagnetron, operating characts. anal. *(Chinese)* 87−45505
gyromagnetron dispersion relations *(Japanese)* 88−44517
Hertz resonator explains modern oscillators 86−34605
high peak power X-band gyroklystron, development, linear supercollider appl. 88−19608
high power microwave simulator development for military appls. 88−25782
high voltage capacitors for microwave ovens *(German)* 86−33577
high-power magnetrons and vircators, progress 87−17644
historical account of EM radiation, roles of H.R. Hertz and J.T. Randall 86−29331
history of development at Westinghouse and RCA, 1929 to 1938 85−11841
hollow-cathode magnetron discharge 88−12887
HV magnetron diode, static operating regime theory 85−55392
hybrid model of magnetron 88−38986
induced drift currents in circular planar magnetrons 87−32204
injection guns, scaling laws 88−57257
injection locked magnetron, phase noise meas., Doppler weather radar system appl. 87−17621
injection locked magnetrons for coherent radar transmitters, characts. and performance aspects 85−18020
injection sources, electrode design developments 88−19598
injection-locked magnetron-reflection amplifier, noise performance study 87−73965
inverted relativistic magnetron, 3D numerical simulation using finite difference code 87−17620
inverted relativistic magnetron, generation of microsecond range microwaves pulses 88−32721
linac, pulsed magnetron power source, freq. adjustment for freq. stab. system with duplex cavity 86−31802
M-type amplifier, output characts., effect of magnetic field profile 86−41477
M-type devices, effect of magnetic field on electronic efficiency 87−73960
M-type distributed cathode amplifiers, multifrequency regime anal. and modelling 86−27794
M-type flat amp., energy transfer anal., locally uniform space-charge density model 86−21046
maximum currents with secondary-emission cathodes *(Russian)* 87−37824
microwave generator manufacturing reliability *(Romanian)* 88−7257
microwave magnetron and crossed-field devices, history of development, World War II to present 85−11842
microwave magnetrons: a brief history of researchand development 85−61623
microwave ovens, magnetron reliability 87−22904
microwave ovens and magnetrons, fifth harmonic EM interference reduction 87−51655
microwave plasma source, low-cost 86−27798
microwave power tube design, power and efficiency improvements 87−1145
microwave radiation from low-energy rotating electron beam in multiresonator magnetron cavity 87−37819
miniature magnetrons for coherent high-duty operation 88−57261
miniature RF field probe in magnetrons, performance 87−11294
MIT-A6 magnetron with washer cathode, operating characts. 87−60051
model 2M172A, from Toshiba, design, for domestic microwave ovens 85−34431
modulation using MOSFET pulse amplifier 85−61631
multicavity accelerating structure, dynamic matching with oscillator 88−25785
multimagnetron industrial microwave drier 87−22900
multipactor-tuned magnetron for airborne radar systems 85−61630
noise, wideband, generation and suppression 87−53113
nonuniform magnetic field effect on output parameters *(Russian)* 88−19616
oscillations generation in crossed fields, residual atm. effect *(Russian)* 86−21051
oscillator, residual gas effect on noise *(Russian)* 87−17618
oscillators, analytical estimate of limiting parameters 86−41478
oscillators, multiple-freq. mode, radar. appl. *(Russian)* 87−17617
oven with heating power control, magnetron inverter *(Japanese)* 85−65623
phase correlator reduces MM-wave radar cost 86−55367
phase locked magnetrons as accelerator RF sources 88−50592
planar magnetron sputtering cathodes, design, performance 87−73964
planar magnetron sputtering source 87−65560
planar magnetron sputtering system, poles DC discharge and sputtering characts. 85−39791
planar magnetron sputtering system, poles exposing type, DC discharge, characts. *(Japanese)* 85−437
power control *(German)* 85−34429
radar, Netherlands' pre-war developments 85−58224
reentrant planar magnetrons, simulation and anal. 88−38992
regulated inductive-capacitive converter based power source with phase control for atomisation system 86−45515
relativistic, microwave pulse generation, pulse parameters 88−71276
relativistic, phase locking 88−12890
relativistic, π-mode oscill. obs. 88−57254
relativistic, testing 88−25827
relativistic Hartree condition, theory 85−61625
relativistic laminar flow mag. insulation, stability parametric scaling 86−1636
relativistic magnetism, S-band var. investig. 86−21039
relativistic magnetron, high-current long pulse operation, expt. study 88−50581
relativistic magnetron, microwave emission study 88−12882
relativistic magnetron, operation with pulse train 88−32722
relativistic magnetron infection gun, high peak power 87−24696
relativistic magnetrons, phase locking expt. 88−50582
relativistic rising sun and A6 magnetrons, operating modes 88−57255
resonant, appl. in airborne radar, historical account, book 87−65059
return-wave amp. with distributed emission, two-frequency operating mode anal. *(Russian)* 88−19615
rippled field, self-consistent theory 85−23321
rippled field magnetrons, theory and simulation 85−23338
rippled-field magnetron, cross-field FEL, millimetre wave emission investig. 86−21031
S-band, inverted, intense single-pulse microwave sources diagnostics 87−8725
solar power satellites, microwave transmission design using magnetron directional amplifier 88−61516
sputter equipment of small scale, Al alloy components, design and construction *(Japanese)* 86−13804
sputtering and DC ion etching system 86−66859
start-up investigation, with cold secondary emission cathode 85−23323

magnetrons continued
stepping-motor-tuned magnetron, design 85−61628
transistor pulse modulator with magnetron load, transients study *(Russian)* 86−40976
vacuum microwave switch in waveguide resonant system, investig. 87−17609
valve principles and appls. 87−66830
Varian-NCSU relativistic magnetron, initial test results 87−17622
vircator amplifier 88−25818
Vlasov-Poisson equations in planar magnetron, 2nd-order stability anal. 88−32719
X-band dupletron, magnetron oscillator/duplexer/solid-state receiver package, marine radar appls. 86−20813
YJ1600 magnetron for microwave heating up to 6 kW 87−11290
H^- Fermilab magnetron source operation 87−77499

magnets
see also electromagnets; permanent magnets; superconducting magnets
calibrating magnets, manufacture and use for magnetic meas. *(German)* 87−77377
cyclotron magnet parameter determination using CYCLOTRON software package 88−53957
deflector system for intrapulse phase shift of linac electron beam 88−61035
eddy current brakes, with cylindrical magnets and arbitrary shaped plate conductors, braking forces and damping coefficient calc. 85−16309
extraction magnet in form of flat table, numerical optimisation 85−30020
fine magnet wire, US industry update 86−62872
fixed field alternating gradient synchrotron magnet, 3D calcs. 86−44487
force between two cuboidal magnets, 3-D analytical calc. 85−24714
homogeneous field magnet, optimal design, boundary element method and optimisation 87−68730
Intermag 85, conf., St. Paul, MN, USA (April-May 1985) 86−26470
internal magnetic target of proton synchrotron 88−61059
LEP status report, concrete magnets and storage cavities, beam handling 88−61022
microundulator, fabrication, magnetic struct. 85−24740
NBS-Los Alamos racetrack microtron, injection chicane, magnets, power supplies 88−54279
NMR spectrometer magnets, shim coil design for harmonic suppression 88−50445
pulse generator for short-circuited delay line magnet excitation 87−22632
rare earth magnet magnetising techniques 88−64881
raster scanning magnets for relativistic heavy ions, biomedical appls. 88−61233
temperature sensing actuator, ferrite and rare-earth magnet based *(Japanese)* 85−20608
transient eddy currents induced in conducting sheet under moving magnet, computation 88−52119
TRANSRAPID 06 magnetic train, propulsion system 87−5050
windings transient analysis, calc. of series capacitance 87−35986
Nd magnets in actuators for computer peripherals 87−46344
SmCo magnets for space power demonstrator engine alternator 88−69334

magnitude convertors
see also transducers
power network meas., universal multifunction meas. convertor and voltage transducer *(Russian)* 86−56507

magnons

robot for military system maintenance and repair, man-machine interface for safety 87−43925
robotic applications for nuclear power plants 85−65057
robotic maintenance appl., long term development 86−19805
robotic systems for aircraft servicing/maintenance 87−29902
robotics and remote handling in nuclear industry, conference, Toronto, Ont., Canada (Sept. 1984) 85−49269
robotized manufacturing system maintenance, technician safety 87−43926
robots for nuclear power plant maintenance 85−48689
Rohde & Schwarz automatic test assembly for repair of radio equipment 86−60124
rolling element bearing failure detection using vibration transducers 88−29722
rolling mills automation, application of systems approach for the design 85−21979
Rome Air Development Center Automated R&M Package 86−60872
Rome Air Development Center technological products 86−266
rotating equipment predictive maintenance, Mechanitrak system 87−5196
rotating machine insulation diagnostics 87−35880
rotating machinery monitoring, vibration data management systems 87−16335
rotating machinery predictive maintenance using computer based methods 88−48888
rotating machinery vibration monitoring for preventive/predictive maintenance 87−64540
rotating machines, conditional maintenance, microcomputer-aided system *(French)* 88−37167
rotating machines, fault analysis, using systematic documentation on cards *(Czech)* 86−51555
rotating machines, utilisation and maintenance *(French)* 87−35888
Rouchain dam leakage control works 85−27146
RRV-1 remote reconnaissance vehicle, maintenance program, TMI-2 radiation monitoring 86−25817
rubber industry manufacturing process, maintenance policy for broken machine repair, queueing theory 87−51675
Rusail (Oman) gas turbine power station operation and maintenance contract 85−60042
safety factors regarding relays *(German)* 86−47126
safety lighting with central battery *(German)* 86−45810
safety of personnel during maintenance and repair of electric power equipment *(German)* 85−10418
safety switchgear equipment and safety circuits for accidents prevention *(German)* 85−60347
Salem PWR generating station, managed maintenance programme 85−59900
San Onofre, nuclear power plant, Bechtel's QA maintenance 86−25773
San Onofre Unit 2 nuclear power station, reliability-centred maintenance, appl. to auxiliary feedwater system 87−78362
Santa Maria de Garona nuclear plant, recirculation loop replacement 88−62108
Sapporo railway distrib. line feeder circuit fault locator *(Japanese)* 88−11433
Sapporo underground railway maintenance and management technology *(Japanese)* 86−40232
satellite communication systems, life cycle cost anal. 85−31009
satellite earth stations, baseband monitoring 88−35454
satellite links, automatic testing and maintenance 85−36992
satellite system, digital, AT&T, operation and maintenance 85−20135
Saudi Arabia long distance telecommunication network, operation and maintenance activity, 1980 to 1983 85−19610
SC 1800, SC 1900 and SC 1920 stereo-compact-systems, servicing *(German)* 87−49405
scheduled corrective maintenance for increased dependability and reduced maintenance 88−129
maintenance engineering continued
scheduled maintenance activity impact on redundant component systems 87−23430
second-generation chopper-equipped rolling stock *(French)* 85−60486
sectioning substations, preventive maintenance periods determ. *(Russian)* 85−16154
secure power supplies, safety and maintainability requirements determ. using Markov model *(Russian)* 85−43572
Security Pacific combined cycle cogeneration plant, reliability 88−43032
self-checking NMOS IC design 85−35204
self-repairing flight control system program overview 88−63107
semi-Markovian deterioration system with cost constraint, optimal maintenance policy *(Japanese)* 88−31625
semiconductor devices, prevention of electrostatic discharge damage *(Japanese)* 86−41727
semiconductor MBE systems, operation, maintenance and safety *(Japanese)* 86−46344
Sendai city subway, automatic control and monitoring of power apparatus *(Japanese)* 88−31100
Sendai city subway, equipment management systems for remote monitoring/control *(Japanese)* 88−31101
Sendai city subway, railway maintenance management *(Japanese)* 88−31102
sensitive electronic equipment, installation, maintenance and inspection to National Electrical Code 86−66576
service industry structure, goals and operation in electronics industry 88−55933
service life determination and extension, maintenance strategies, safety system failure prevention 88−62035
serviceability as missing link in design-to-test process 88−55932
Serviceability evaluations at Fermi 2 86−51300
servicing and maintenance of laboratory equipment and instruments 85−32887
servicing of distribution networks, local environment maintenance *(Japanese)* 87−78083
servicing of West German telephone network *(German)* 87−76447
SES-5 solar steam generator, risk from heliostats during maintenance 88−55241
Shearon Harris nuclear power plant, spare parts programme development 88−23632
ships classification and aimpoint maintenance 88−53379
short-term generating-unit outage co-ordination using cost criterion 87−78056
short-term unit outage coordination, cost minimising approach 87−42645
short-term unit outage coordination program at Eastern Utility Associates 88−5237
Siemens O&M supervisory control system for network efficiency optimisation 87−48411
signal engineering in private railways *(Japanese)* 86−33793
signal generator appl. 85−20629
signal protection equipment, automatic maintenance system *(Japanese)* 86−33792
signature analysers, principle, microcomputer maintenance appls. *(French)* 87−28905
simulated aircraft maintenance training systems, cost effectiveness study 85−9279
simulation programs for space systems availability and maintenance evaluation 88−42597
simulators conf. Orlando, FL, USA (April, 1987) 87−71210
single server two unit system, s-expected number of inspections and repairs, cost benefit analysis 85−22181
single-server two-unit system with slow switch/random service, cost-benefit anal. 85−33237
skin effect, induction and impedance heating, design installation, testing, operation, maintenance, IEEE standard 86−52059
Skytrain operations and maintenance radio system 88−3890
SLC 96 subscriber loop carrier system, maintenance and operation 85−30754
slurry and feedwater pumps for power plants, design, maintenance and reliability 85−21282
smart hand systems for robotics and teleoperation, satellite maintenance appl. 88−55935
SMART Software Maintenance and Reproduction Tools, development *(Japanese)* 87−33925
SMD, effective removal and replacement techniques 88−7178
SMD removal and replacement procedures and selection criteria 88−57057
soldering machine maintenance, monitoring 86−13470
solid-state controllers and motor starters, maintenance guidelines 85−32664
South African mining electronics, maintenance perspectives using systems engineering 85−39513
Southern California Edison Co. Cool Water plant combined-cycle unit reliability, availability and maintainability audit 86−12656
Southwestern Bell maintenance termination unit, development 87−55941
space power systems, assembly and servicing, robotics appls. 87−42155
Space Shuttle Orbiter, airline MSG maintenance logic appl. 86−60862
Space Shuttle processing at Vandenberg Air Force Base, automated integrated maintenance management 86−60892
Space Station extravehicular activity system, automated checkout, servicing and maintenance 88−30083
space station maintainability guidelines, computer and DBMS selection 86−60852
space-based system design, reliability and maintainability in systematic trade study 86−57252
spacecraft, on-orbit assembly and repair considerations 87−29881
spacecraft autonomous power system maintenance and control by qualitative model-based reasoning and expert systems 86−38904
spacecraft nuclear power application prospects 86−32461
Spanish nuclear power plants, technology transfer of operation and maintenance assistance 86−39366
Spanish nuclear power stations, computer-assisted operation and maintenance management system 87−15455
Spanish nuclear program, services engineering 86−39490
Spar 2500 remote manipulator system for nuclear heavy industrial uses, design features 86−25811
spare part specifications for optimised repairs *(Russian)* 87−89
spare parts cost optimisation in maintenance 87−58738
spare parts kits computation, limited repair channels case *(German)* 86−26570
spare units availability estimation using nonlinear integer programming and multiple gradient algorithm 87−72768

maintenance engineering continued
SPARTA embedded expert system for rocket engine health monitoring 88−36639
SPC systems, software design and maintenance problems 85−36848
SPC-800 electronic telephone exchange, maintenance system perform. *(Polish)* 88−73764
special services, remote testing 88−66859
speech technology appl., military maintenance technicians support 85−57317
Spiez (Switzerland) hydroelectric plant rehabilitation 88−69197
stair climbing robot for maintenance tasks 85−44477
stand-alone photovoltaic systems, operation and maintenance 86−6628
standby generator investment protection by preplanned servicing 87−4337
static batteries, for long service installations, reliability and maintenance *(German)* 85−5357
stationary batteries, Pb-acid and Ni-Cd, maintenance standards 87−43397
statistical vibration meter for machine fault detection 85−14735
steam and gas turbine upgrading, repair and maintenance 85−59991
steam plant thermal performance monitoring methods and microcomputer-based equipment 87−22149
steam surface condenser operating procedures and maintenance practices 87−78510
steam turbine, development, maintenance and future prospects *(Hungarian)* 85−21435
steam turbine casing life assessment and repair methods 87−15561
steam turbine generator emergency lubrication system development and testing 87−57925
steam turbine low-pressure rotor and disc weld repairs 86−61376
steam turbine lubricant cleaning for trouble-free operation 85−27287
steam turbine lubrication system maintenance guidelines 87−15562
steam turbine maintenance for performance improvement 86−61362
steam turbine R and D for improved coal-fired power plants 87−64417
steam turbine repairs by welding *(German)* 87−78486
steam turbine rotor life extension by overboring 88−37056
steam turbine safety using overspeed governors *(Russian)* 86−39521
steam turbines, life extension and operation *(German)* 88−5557
steam turbines, life extension techniques, NDT, deformation meas., material fatigue calc. *(German)* 88−30585
step-by-step system, relay and dial pulse dilemma 85−52113
stereo sound for TV 86−4801
stocking/replacement model with minimal-repair at failure 85−33235
storage batteries maintenance for telecommunication system, charging plant BZD 112 *(Croatian)* 86−51744
street lighting system design, installation and maintenance 86−52040
studios, radio and TV, technical maintenance services, influences of changing technology *(German)* 87−49236
submarine cable communication, reliability improvement, submersible robot appl. *(Japanese)* 85−52257
submarine cable repair work, Japan-China link *(Japanese)* 88−28626
submarine cables, laying, burying and maintenance procedures *(Spanish)* 85−30848
submarine international cable systems, book 85−32899
subscriber loop, construction and maintenance, testing equipment *(Japanese)* 85−19913
subscriber loops, line characteristic test set *(Japanese)* 85−19914
substation maintenance automated record tracking system 88−11339
substation maintenance needs, in-house and contract alternatives 85−65304
substation on-line monitoring systems for predictive and preventive maintenance *(Japanese)* 87−15831
subsurface cracks, eddy current inspection, aircraft struct. appl. 88−38287
supercritical power plant performance assessment 87−42678
superheater boiler header replacement for steam power stations 88−55201
SURBOT, mobile surveillance robot for nuclear power plants 86−25729
surface-mounted component soldering techniques and maintenance problems 85−54134
Surveyor mobile robot, experience in radioactive work environments 87−30319
Susquehanna Steam Electric Station, operational testing, impact on plant availability 86−51231
swimming pools, indoor and outdoor, natural and electric lighting 85−49197
Swiss nuclear generating stations refurbishment, legislation *(German)* 88−75274
Swiss Railways, power supply maintenance *(French)* 87−43557

electric connector/electronic component plating facility using computers and statistical process control 87−16371
electric machine manufacture, computer-based production operations management organisation 85−44501
electrical component parts industry, knowledge-based vertically integrated design automation system 88−70095
electronic components for equipment development/production, personal computer based information-measuring system *(Slovenian)* 87−49464
electronic components manufacture, with computer-assisted quality assurance *(German)* 85−54139
electronic equipment manufacture, integrated DP *(German)* 86−175
electronic equipment manufacture, Plessey Microsystems programme for computer-aided production 85−60735
electronic equipment manufacture, statistical process control using the parametric tester 87−23323
electronic equipment power supplies, flexible manufacture using JIT at Coutant Electronics 88−12705
electronic manufacturing process systems cost modeling and simulation tools 88−25679
electronic products, CIM systems, acquisition and implementation for small manufacturers 87−23329
electronics, computer aided manufacturing appl. 86−26619
electronics manufacture, CIM 88−31471

manufacturing data processing continued
electronics manufacturing industry, CD-ROM appl. 86−46080
Ericsson product reliability and maintainability calc., DEPEND system 86−57246
Ethernet local network and variants for computer aided fabrication in manufacturing environments *(French)* 88−52840
factory automation LANs, current approaches and standards role 87−48689
factory information networks, critical savings for electronics manufacturer 86−172
factory LAN, low-cost implementation from Motorola 87−28170
fiber optic broadband networks for the Manufacturing Automation Protocol 88−73631
fiber optic industrial LAN 88−35548
flexible IC assembly plant animated simulation 87−36479
flexible manufacturing system, control and data communication 87−20272
FLYSTER calculation system for industrial economics *(German)* 88−18415
focal plane products database developed by Rockwell 86−31442
foil dielectrics manufacturing process management software 88−1812
gate arrays, managing large volume of design/manufacturing/test data 85−1729
General Motors data communications standardization within manufacturing 85−3181
General Motors MAP using VLSI carrier band node 88−35095
hybrid IC manufacturing, component part number substitution in materials requirements planning 88−11715
hybrid IC printing process, registration accuracy improvement using computer aided techniques 88−57207
hybrid microcircuits, CAD/CAM low cost integrated system development 86−14744
IBM mask-making shop, integrated approach for improved yields, process control and turn-times 88−13292
ICL in-house CIM and MAP programme 87−28174
induction motor production process diagnosis using microprocessors, QC 87−42927
industrial data communication using manufacturing automation protocol (MAP) *(Swedish)* 86−16944
industrial LAN for flexible factories *(Japanese)* 88−9135
industrial LAN using token passing MAPs with optical links 88−73646
industrial local networks *(French)* 86−30405
information flow from design to manufacturing in the electronics industry 87−5179
information networks, critical savings for electronics manufacturer 86−34028
information system of reliability work and its application for the computer-aided maintenance of a rolling mill *(German)* 88−37781
integrated factory communication networks, General Electric approach 85−42309
ISO/OSI layers for CIM networking architecture 87−28069
job shop scheduling, reactive system, VLSI wafer fabrication appl. 87−53681
job-tracking system in PCB industry 86−27736
just-in-time production of VLSI circuit boards, test process management 88−70127
Kanzaki Paper Manufacturing Co. Ltd., audio response order entry system, development *(Japanese)* 85−3772
LAN applications, benefits 88−15079
LAN at National Engineering Laboratory, CIM 87−28173
LAN characteristics and products and MAP and TOP *(German)* 88−21719
LANs for factory automation, software development and use *(Japanese)* 88−9139
Macintosh, manufacturing facilities 88−166
maintenance integration into manufacturing process control *(German)* 88−37918
maintenance management, computerised, concept 85−123
management and technology conf., Atlanta, GA, USA (Oct. 1987) 88−31289
management of research, develop. and design using computers, book 88−31355
manual assembly, instructions to workers via laser disc 88−4205
manufacture, overview of LAN technology 86−17018
manufacturing applications, communications network 88−46463
Manufacturing Automation Protocol for Factory communication network *(German)* 86−64675
manufacturing with automated inventory management and materials handling 88−1250
MAP, current status and future developments 86−64780
MAP, fibre optic LAN appl. 88−9208
MAP, fibre optics as physical and media layer 88−73984
MAP, Overview 87−2871
MAP−technical and strategic significance, SINEC *(German)* 88−21720
MAP and communications standards proposed by General Motors *(French)* 88−35055
MAP appls., fibre optic LAN use 88−9206
MAP based FMS, architecture and appl. *(Japanese)* 88−9801
MAP for integrated production systems, conf. Hannover, West Germany (April 1987) 88−11594
MAP gateway, architecture and performance eval. 88−73647
MAP network adapter, performance anal. 88−66994
MAP progress for Europe 88−21616
MAP standard, OSI layers 86−69394
MAP/TOP, international activities 88−15150
MAPs, broadband LANs, backup provision 87−76309
microcomputer-aided QC system and cards *(German)* 87−5265
microelectronics design databases, management and documentation aspects 87−5181
multilayer PWB fabrication, CIM system implementation 88−32594
NDT systems integration for manufacturing quality 88−56337
networks for factory automation 85−42248
office communication *(German)* 86−16966
office communications system at Siemens/KWU, large-scale *(German)* 88−67013
OPGEN, PCB assembly process planning expert system evolution 87−36447
optical fibre use for MAP, physical network layer 87−63005
paper mill, computerised energy auditing system 85−4584
paperless test development activity−electronic transfer of information required for test documentation 88−74283
PC-host networking, machine tool industry case study *(German)* 88−67016

manufacturing data processing continued
PCB, cAD implementation for improvement of testability *(German)* 86−14645
PCB assembly factory , CIM database system 88−71239
PCB CAM data base management issues 87−66708
PCB component insertion machines, DP system using CAD system output *(Japanese)* 87−73903
PCB fabrication, CIM systems appl. 87−17541
Perkin Elmer's engineering database linking product design to MRP II 87−43933
photovoltaic manufacturing facility simulation and cost anal. 87−22759
plant automation, MIS/process control integration, communication as key 88−59690
power system design and manufacture by CIM system 88−42822
product weight monitoring by GEM80 microcontroller 86−38580
production scheduling system for high technology products 88−70094
production-orientated data collection system for wire and cable works 86−7513
productivity management systems, integration of data from test and repair 87−24586
programmable controller manufacture, CIM system 88−159
project financing 88−43670
project management in the technical office 87−58644
PWB manufacture, automatic digitizing system, CAM data output 85−40365
PWB manufacture/assembly, computer-aided process modelling and simulation tools 87−24606
QA for goods-inward and production *(German)* 87−5260
quality assurance system, computer-aided, for AG Motor Meter manuf. *(German)* 88−24593
quality control for technical controlling using integrated data processing system *(German)* 85−5817
quality design for CIM 88−38016
quality improvement by computerised data acquisition *(German)* 86−61959
quality information system concept and application *(German)* 87−5263
quality meas./universal sampling plan system, QMP/USP, alternative to MIL-STD-105D 86−211
quality planning using computerised prod. control *(German)* 88−49565
reliability of electronics improvement, Government Industry Data Exchange program 86−61970
S/3X network implementation at Crosby Group 86−64677
semiconductor factory management modelling and implementation 86−52239
semiconductor industry, integrated computer system improves yield, automatesproduction 86−46049
semiconductor production planning and scheduling hierarchical framework 86−52214
semiconductor wafer fabrication, signature anal. of manufacture log dispatch priority schemes 87−45730
semiconductor wafer fabrication operations, signature anal. for simulation in IC manufacture 87−45729
semiconductor wafer fabrication process automation 87−6629
simulation and modelling applications conf., Santa Barbara, CA, USA (May 1987) 88−43590
statistical quality control, framework for expert system development 88−56039
statistical quality control, semi-automatic meas./recording equipment *(Spanish)* 87−51885
steam turbine design and manufacture with computers 85−21463
Syllog prototype manufacturing knowledge base system 86−159
telecommunications equipment mfg. CIM systems 88−52679
test data acquisition and management at AT&T 87−23320
test data management system selection and effective implementation 88−55970
test information databases, effective utilization 86−7501
tobacco drying plant, solar energy aided, computer simulation *(German)* 85−32875
tool management using data storage on chips built into tools *(German)* 88−56631
tool verification vision system, automatic 88−47432
TOP and MAP, new versions, technical aspects and consequences 87−28091
tube US testing, with graphic display and data processing facilities 85−21043
turbine generator production, General Motors CIM facility 85−39524
VLSI CIM systems, information management aspects 87−67529
VLSI computer-aided manufacture, statistical control of fabrication processes 88−44812
VLSI computer-aided manufacture, statistical control of fabrication processes, software system 88−44813
VLSI manufacture, factory automation of Mitsubishi Electric's Saijo plant *(Japanese)* 87−65168
VLSI production, CIM opportunities 88−64718
VLSI wafer processes, total evaluation system, DBMS config. 86−21746
wafer fabrication plant scheduling 86−40508
workcell controller, knowledge-based, for production planning in electronic industry 88−55940
workshop level quality improvement, using computers in General Foods France 85−33208
yield prediction, manufacturing-based simulation 87−60583
yield prediction in printed circuit pack manufacture 87−24573

manufacturing industries
1.1 kW drilling-cutting electric spindle, for high-speed processing of printed circuit boards 85−39532
accelerated electron irradiation technology, industrial applications *(Rumanian)* 85−60602
advanced manufacturing technologies, implications for marketing strategies 87−72750
aeronautics industry plasma source development *(French)* 86−40329
aerospace industry assembly tooling inspection using photogrammetry 88−68517
aerospace industry problems for smaller countries 87−77700
American Astronautical Society 33rd Annual International Conference, Boulder, CO, USA (October 1986) 88−70028
American/Japanese manufacturing industries R&D management strategies comparison 85−44458
AMIE programme for UK electronics industry manager and project engineer training 87−51826
array processor manufacture, Floating Point Systems and Star Technologies 85−16658

manufacturing industries continued

many-valley semiconductors
doped, crit. transport props. 87−32220
hot carrier conductivity, multivalued anisotropy 86−67649
mobility anisotropy coeff. determ. 87−6358
nonlinear electronic transport in semiconductor with two types of carriers, appl. to GaAs 88−19665
n-Si, multivalued elec. cond. anisotropy, IV characts., intervalley carrier scatt. investigation 85−50192
two-valley semiconductors, small-signal differential conductance 85−55425
n-$Al_xGa_{1-x}As$ epitaxial layers, graded-gap, resistance, press. dependence 87−17716
$Al_xGa_{1-x}As$, variband cryst., hot electron noise, mag. field effect 87−53186
AlGaAs/GaAs hot-electron transistor, intervalley scattering 88−1640
AlGaAs/GaAs modulation-doped heterojunctions, 2D electron gas, DX centres 87−24839
AlGaAs/GaAs/AlGaAs quantum wells, hot electron transport, Monte Carlo simulation 88−50649
GaAs MESFET model based on hydrodynamic carrier transport eqns. 88−26342
n-n^+-GaAs Pt MM-wave Schottky barrier diodes, high-freq. noise 87−1478
GaAs, high-field diffusivity, many-particle Monte Carlo simulation 85−11927
GaAs quantum wells, electron interference effects, obs. of bound and reson. states 87−32312
GaAs satellite valleys, drift velocity and electron pop., field dependence 86−27860
GaAs two-valley semiconductor, negative differential mobility, Boltzmann eqn. 86−67670
n-Ge, heavily doped crysts., piezoresist. mechanisms investig. 86−35286
Ge, intervalley electron redistribution, dynamics 88−32756
Ge intervalley electron redistribution uniaxial stress *(Russian)* 85−6700
Ge, multivalley extrinsic, electron-hole plasma instability *(Russian)* 86−8742
p-Ge, transverse photovoltaic effect, laser excitation, thermal change in band gap 85−28941
Ge-Si alloys, multivalley energy band struct., thermoelectric value of merit, depend. 85−23484
$In_{0.8}Ga_{0.2}P$ solid solutions in strong elec. fields, intervalley scattering 87−37885
InP, two-valley semiconductor, negative differential mobility, Boltzmann eqn. 86−67670
$Pb_{1-x}Eu_xTe$ epitaxial film, growth, struct., elec. and magneto-optical charact. 85−39774
PbS-PbSe superlattice, magnetotransport and photoconductivity, mag. fields to 8 Tesla 87−66973
PbTe:In films, weak-field magnetoresistance 85−28981
Si (100) n-channel inversion layers, valley splitting determ. by tilted field method 86−8893
n-Si, S-type current density-mag. induction characts. 85−18059
n-Si, acoustoelectronic interaction 85−23416
n-Si, electronic transport, acoustic phonon scatt. anisotropy 85−55444
n-Si, hot electron transport, balance eqn. approach 88−32760
Si, intervalley electron redistribution, dynamics 88−32756
Si, intervalley transfer of electrons, influence on photomag. effect, spectral characts. 88−14002
Si inversion layers in MOSFET, model 2D system., oxide charge induced localized states and screening 86−67762
n-Si, many-valley semicond., recomb. and impact-ionisation peculiarities 86−41517
Si, multivalley extrinsic, electron-hole plasma instability *(Russian)* 86−8742
n-Si, multivalued electron distribution between equivalent valleys in mag. field 85−28938

equipment maintenance market, review 87−65150
European and world markets, comparisons, and views of Motorola *(Italian)* 85−34899
European electrical products, marketing in United States, guidelines 85−5725
European satellite communications, earth segment market *(Dutch)* 86−55250
European satellite TVRO manufacturers, marketing challenge 87−20680
European TV receiver market and manufacturers' strategy *(French)* 88−15725
European wind turbine market, Danish industry viewpoint 87−15618
exchange carriers in USA domestic market, matrix approach 86−16803
export competitiveness in UK manufacturing industry 85−5710
fibre optic market trends 85−35402
fibre optic sensor market forecasting, 1985 to 2000 87−26031
fibre optic sensor market growth model 88−16149
fibre optic sensors, European markets, future developments 88−4422
fibreoptic technology, 1986 report of market trends 87−20506
fine magnet wire, US industry update 86−62872
flow meters for process instrumentation, market and development trends *(Japanese)* 87−35006
French printed circuit industry, economic and market aspects 88−64051
fuel cell commercialisation strategies and role of EPRI 87−58309
fuel supply seminar, San Antonio, TX, USA (Oct. 1985) 87−22017
Harvest viewdata and consultancy service, use by advertising and marketing agency 86−69361
heat pump technology and marketing seminar, Kansas City, MO, USA (April 1986) 87−72611
high technology market venturing, policy decision anal. 87−36389
high technology services marketing 86−7458
Hitachi VLSI technology for the office automation market 88−32075
holography market trends, embossed holograms, opt. elements and NDT systems 87−12600
IBM business management simulation package, Komet, for education and training of executive management *(German)* 85−32960
IC markets, interest, and economic aspects for fast prototyping 88−20087
marketing continued
idea generation, marketing high technology services and products [thecost of ideas] 86−7457
information technology, market pull and technology push, Northern Telecom's experience 87−36386
information technology, market pull and technology push, R&D at BNR Ltd. 87−36387
instrumentation, control and automation industries in Scotland 88−63110
integrated optical components and market aspects *(French)* 88−72135
Intel research and devel. in memories and microprocessors *(Dutch)* 88−55892
interactive TV network for marketing support 87−28854
ISDN, British Telecom's operational experience 88−28480
ISDN, environmental aspects 88−28468
ISDN, recent progress and marketing problems 88−28467
ISDN marketing to business customers, pitfalls 88−28470
ISDN service and tariffs, history at Bell Canada 88−28469
Japanese market possibilities for US satellite producers, telecom. laws 85−16666
land mobile radio basics for new salespersons 86−30649
laser optics, market trend 86−3253
lasers in medicine, markets and opportunities 88−16770
learning programs in engng. design and CAD in Europe, marketing and support 87−23145
licensing and protection of software and semiconductor chips, conf., San Francisco, CA, USA (Oct.-Nov., 1985) 86−66541
linear IC market development in 1980s 86−2237
liquid crystal colour TVs, manufacturing and marketing consideration *(Japanese)* 87−56348
load management in Europe, marketing aspects, pricing, tariffs 87−30055
logic arrays, industrial distribution 86−46701
management, matrix relationships in R&D organisations, marketing support services 85−5713
management and technology conf., Atlanta, GA, USA (Oct. 1987) 88−31289
manufacturing electric technology innovations and summarised characteristics 88−11536
market research and corporate strategy rel. to technological change 86−57151
market research timing patterns for new industrial product situations 86−13413
materials selection and use, conf., London, England (July 1985) 86−52129
medical technology, regulation and development of engineering achievements 88−42474
Meridian DV-1, tailor-made for telemarketing 87−55542
microelectronics, industrial prospects and marketing considerations *(Spanish)* 88−1732
microelectronics developments and software tools, technological/market forecast *(French)* 85−12376
microprocessor, market survey and development review *(Italian)* 85−17459
microwave component and device market for manufactured products, summary and forecast 88−19351
microwave fibre optics, technology and market forecast, 1984-94 86−4660
microwave packaging, market growth and performance aspects 86−52286
Mid-Continent Area Power Pool rate schedule evolution 85−64801
military ATE requirement trends and commercial opportunities 88−68674
military electronic product and service marketing directory and buyer's guide (1987) 87−51695
mobile radio public services, market aspects *(German)* 86−64878
Mobira radio telephones, marketing and exports *(Swedish)* 85−14137
motor drive efficiency improvement, market potential for new technology 87−51522
natural gas market modelling system of USA Energy Information Administration 86−12545
nonvolatile memory market overview and technological considerations 85−54883
online information conf. Sydney, Australia (Jan. 1986) 87−43772
onsite fuel cells, opportunities in commercial market, benefits of gas industry 87−43403
optical fibre market potential in Asia, Africa, and Latin America 88−60189
oral marketing presentations in technology-based company, improving 88−62920
OTEC marketing and funding of develop., recent and future progress 87−51115
PABX market prospects for small British competitors 87−55893
PACS marketing, cost analysis of present image management methods 88−36559
paging industry, market scanning 87−56028
paging networks and marketing strategies 87−56026
peritelephony service competition and marketing strategy *(French)* 88−14974
personalization of vehicles via electronics as marketing factor 87−79160
pharmaceutical marketing using videodisc 86−17651
photovoltaic systems engineering methods and integrated approach to balance-of-systems 86−45262
product develop. project management *(Japanese)* 87−58648
product quality and marketing strategy, international perspective 86−66622
proposal evaluation, Red Team Review Process 85−39498
PV systems dissemination in developing countries, marketing strategy 88−17452
quality management and its role in marketing, engineering and manufacturing activities 85−16678
R&D/marketing interface evidence 86−40435
R and D, problems source related to marketing organisation 88−37893
R and D and marketing managers in high-tech companies, sociocultural differences 86−40433
R and D/Marketing co-operation in design of technologically advanced new industrial products 86−57143
radio paging, cost and market potential 88−60048
rare earth permanent magnet cost, markets, fabrication, motor applics. 88−7802
renewable energy technology 85−9797
RFI regulations overview for product marketing optimisation 88−58893
Rotterdam model, nested, market research appl. 88−59398
Saskatchewan Telecommunications approach to business market 86−16804
satellite communications appls. in broadcast industry, market factory in Canada 88−22058
scheduling analysis, modeling and pricing 87−34261
SDI, update on major programmes and 1988/89 funding forecasts 88−30222

marketing continued
segmentation and endogenous entry under consumer uncertainty of novel technologies 88−31366
semiconductor market, long-term forecast, developments in USA and Europe *(French)* 86−19792
semiconductor market in USA and Japan, possible combination *(Italian)* 87−65126
semiconductor markets, IC develop. and use of 3V industry standard 87−38355
semicustom ICs, gate-arrays, standard cells and Si foundry aspects, technology and market trends *(Spanish)* 85−29300
seminar planing, model for meeting costs 87−23263
short-term electricity sales forecasting methodologies compared 87−21895
SMD technology, impact on electronic manufacturing industry 86−41441
solar cell materials marketing, research and develop. 88−18009
solar thermal and biogas systems, medium term market perspectives, Italy 87−64228
Southwestern Bell ISDN, carrier marketing planning impact 88−3682
strategies for high-technology start-up companies 88−6191
subscription TV marketing efforts and inhibiting factors 86−24120
switchgear manufactures' marketing efforts and technical trends 87−22634
switchgear marketing 87−22633
Switzerland's videotex system, marketing activities *(French, German)* 85−8116
technology marketing, book 85−17
Telecom Australia's Iterra Network Service satellite alternative 87−62913
telecommunication industry, reorganisation and market aspects *(Spanish)* 87−40067
telecommunication service assessment function influences and marketing strategy 88−14899
telecommunications, future developments *(German)* 85−57583
telecommunications, market arrangements for technology transfer 88−34886
telecommunications as tool in business competition *(German)* 87−2743
telecommunications market structure choice, service monopoly *(French)* 88−21445
telecomputers in marketing and delivering routine messages 86−23352
teleconferencing, development, transmission link characts. and market anal. *(Spanish)* 86−4883
telemarketing, BT's Linkline services boost response 87−2802
telemarketing traffic, system design impact 85−42065
telemarketing trends, benefits and staff training 86−54801
Telephone Rentals, marketing activities 85−30609
teleshopping in United States, impact 85−19736
toll free telemarketing, new possibilities 87−13285
traffic-compatible electric commercial vehicle marketing strategy developing in UK 85−65548
TVRO consumer satellite marketing 87−40852
UK programme on information and communications technologies 88−34938
US electricity market forecasting using Energy Information Administration model 87−77975
US electronic equipment industry, economic forecasting methodology for market research 87−51907
US heavy electric power equipment industry, manufacturing and market aspects 87−22456
US Videotel, videotex service 88−35050
USA Western Systems Power Pool free-market bulk generation and transmission services 87−64089
utility demand-side management programmes, residential customer acceptance modelling 87−64096
utility load factor improvement by demand-side management programme marketing 86−25541
utility market analysis techniques for innovative products or services 85−53291
utility market research techniques 86−32707
vacuum switchgear, marketing strategy against SF_6 competition 88−17759
value added services market definition and realisation *(French)* 88−14902
value-added resellers, speech technology market 87−61789
variable speed drives, industrial, 7.6 to 150 Kw market intelligence service, UK 86−61779
video tape recorders developments in 1970s to 1980s, marketing and economic trends *(Czech)* 85−8604
videobased education programs, marketing to industry 87−23056
videoconferencing satellite communication, business market development 87−56094
videodisc courseware, marketing strategies 88−6159
videodiscs, marketing and POS appls. in Europe 88−9795
videotex, a continuing success 87−48519
videotex, market in Australia 87−48548
videotex software marketing 86−37437
videotex systems, media and marketing 87−76296
viewdata software products and consultancy services exporting 86−37436
voice mail technology, markets and economics 85−19727
voice messaging, sales and marketing appl. 88−66919
voluntary product standards, technical criteria links to marketing decisions 88−18432
Wang Integrated Information Architecture for communications 87−34095
weighing systems, electronic, Spanish market *(Spanish)* 86−70001
West German cable TV and videotex market inertia *(French)* 88−15814
GaAs IC technology, market and cost considerations 86−14180
GaAs MMICs, production forecasts and market considerations 88−25507
GaAs technology in Europe, market considerations 87−74165
H_2 technology integration market research methology and economic anal. model 88−11680
Pb/acid battery industry in Australia 88−55585
Pb/acid battery industry in Malaysia 88−55588
Pb/acid battery industry in Singapore 88−55589
Pb/acid battery industry in Thailand 88−55590

marketing data processing
see also advertising data processing; retail data processing; wholesale data processing
agrochemicals marketing, expert systems and videotex appl. 85−25446
electronics company, rebuilding sales, production and material management systems 85−44452
interactive videodisc for computer education, IBM PC marketing 86−33978
kiosk performance requirements, quantitative and qualitative criteria for assessment 88−9806
speech analysis, computer-assisted, improvement in questionnaire design and advertising copy 85−13505

marketing data processing continued
telemarketing and technology, modern business tool 88−21526
television viewing market research, use of INMARKT database by GfK *(German)* 88−47251
videotex and electronic shopping systems 85−19740
VIMOS software package, videotex for marketing information and field service operation *(German)* 86−69370

Markov chains *see Markov processes*

Markov processes

1-out-of-2:G system with preventive maintenance and detector, stochastic behaviour 87−31331
3-D vision, decision theoretic approach 88−73378
access control protocols, static and dynamic, state space analysis 85−57573
acoustic segment model based approach to speech recognition 88−72813
acoustic sub-word units for automatic speech recognition, investig. 87−61694
acoustics, speech and signal processing, conf., New York, NY, USA (April 1988) 88−69997
adaptive algorithms for nonstationary noise with pulsed and stepped disturbances 86−64269
adaptive autoregressive (AR) target model identification 86−48962
adaptive decoding method for double-encoding systems 87−2414
adaptive decoding method for double-encoding systems *(Japanese)* 85−19348
adaptive hybrid ARQ protocol, delay anal. 88−21688
adaptive hybrid ARQ protocol for continuous-time Markovian channel 88−21401
adaptive Markovian access control protocols, asymptotic analysis 87−55421
adaptive modelling and data compression 86−54487
adaptive segmentation of noisy images, EM-algorithm approach 87−39993
age-wear dependent model of failure 88−38032
aggregation and coherency, unified view 85−5894
aggregation of separable partial networks with flow-equivalent stations *(German)* 88−49630
algorithm of adaptive reception of discrete messages 87−39774
aliasing errors in signature analysis registers 87−44747
Aloha, slotted with multipacket reception capability, stability props. 88−66788
Aloha multi-access radio channel protocol, instability and geometric transience 88−41148
ALOHA-type systems, asymmetric buffered, stability, bounds and approx. 87−55418
alpha-beta filter with correlated measurement noise 88−14691
altimeter, low-altitude, signal processing devices synthesis 86−17530
approximate Markov modeling of high-reliability telecommunications systems 87−13224
approximated multiple Itô integrals with wide-band width processes, filtering theory appl. 86−3896
arithmetic coding for data compression 88−34591
arithmetic coding schemes for line drawings based on chain code representations 88−34595
ARQ go-back-N scheme under Markov and related error structures, throughput efficiency 88−34535
ARQ protocol, selective repeat, with n channels 85−47236
ARQ protocols, selective repeat, response time in communication links 85−63145
asymptotically least-favorable Chernoff bound for a large class of dependent data processes 87−39770
asynchronous data channel, digital bearer conveyed, simplified method 88−3409
atmospheric optical communication link, level crossing and fading probabilities, non-Markov process 86−43809
atmospheric optical probe signal processing by optical Markov filtering *(Russian)* 86−25408
ATP-1, adaptive multiple access protocol with mixed structure, analysis 87−27677
automatic speech recognition, continuous parameter and frequency domain based Markov model 87−19586
automatic speech recognition, hidden Markov models calc. *(German)* 87−75754
avionic electronics, reliability simulation using Markov and Monte Carlo methods 88−61541
bandlimited data classification using level crossings 88−36455
bidirectional multicore optical waveguide systems, for data transmission in power plants *(German)* 85−52327
binary DPSK, clock frequency fluctuation, optimum reception 85−25122
binary image segmentation, Bayes smoothing algorithm 85−19519
binary images, segmentation using third-order Markov mesh image models 87−48090
binary phase-locked loop, Markov model *(Polish)* 87−52462
binary signals, element-by-element reception, characts. anal. 88−66262
binary signals in fading Markov channel, noise immunity 87−47716
binary time series models, Markov dependence 86−320
block codes with incomplete decoding in fading channel, error and erasure probabilities 88−45909
blocking probabilities for trunk reservation policy 87−40007
boundary detection in digital images, Markov model 87−62154
bounds for dynamic programs 85−54305
Brouwer fixed-point mapping anal. of Markov decision processes 87−44115
buffered random multiple access schemes, queueing anal. 87−2673
buffered slotted ALOHA scheme, analysis, stability, and optimisation 85−42006
bursty binary channel benefiting from hidden memory in interleaved codes 87−54989
call gapping control using sampling monitoring mixed input queueing model and anal. *(Japanese)* 86−16606
carrier-sense multiple access with fixed retransmission assignment 87−40027
cepstral domain stress compensation for robust speech recognition 87−61684
cepstral domain talker stress compensation for robust speech recognition 88−45974
chains, Markov, with continuous parameter, filtering, interpolation and extrapolation 87−47648
Chinese 300 MW steam turbine-generator set maintenance *(Chinese)* 87−51036
Chinese character recognition by circular layer code approach 87−48170

Markov processes continued

Chinese four-tone recognition, hidden Markov model appl. 87−61688
class of optimal preventive replacement policies of systems subject to shocks 88−70178
closed Jackson network, settling time 88−31614
closed Markovian networks with state dependent service rates, asymptotic expansions 86−26711
closed queueing networks with heavy traffic, anal., asymptotic methods 86−7593
cluster anal. under Markovian dependence, image segmentation appl. 88−59330
coalescing stream, flow through processor, modelling 86−64393
code signal modelling with aid of Markov's chain *(Polish)* 87−19723
coding schemes based on chain code representations for line drawings 88−34580
coherent system optimal inspection and replacement 87−65248
collision channels, theory of Markovian access 88−21047
combined ALOHA/reservation access schemes for AA/TDMA system, channel partition methods, eval. *(Japanese)* 88−21397
common mode failure, Markov modelling of the reliability performance of a two component redundant system including scheduled maintenance activities 87−23440
communication protocols, preemptive D-timed Petri nets, timeouts, modelling and anal. 87−55572
communication systems routeing, entropy approach, dynamic justification 88−58983
communications, optimal control of parameters of random multiple-accessprotocols 86−23181
complex Markov systems, iterative method for steady-state reliability anal. 85−49382
complex power systems reliability calculationusing the Markov model of states *(Slovenian)* 86−39031
complex reliability anal. of two-parallelly connected elements 87−36532
complex signals search with respect to delay, time characteris. 86−16347
complex system reliability, maintainability, availability and testability, Markov models 86−263
complex system reliability modelling anal. 85−5872
complex systems availability determ. formulae *(Croatian)* 86−227
complex two unit system with stochastic demand 88−49576
component dependency models in Markov Monte Carlosimulation 86−251
components repair anal. 86−34003
computer network communication protocol with simple acknowledgments, performance evaluation model *(German)* 86−4306
computer network queueing model, with modified isarithmic flow control 85−25204
computer network with many transmitters, optimal hop-by-hop message flow control 88−46618
computer networks, closed Markov models, Gaussian diffusion approx. 87−28114
computer networks, dynamic flow control 87−33858
computer networks, end-to-end probability of undetected error 86−43547
computer networks, flow control protocol, GO-BACK-N, Markovian model 86−10606
computer networks, optimal hop-by-hop flow control 87−2879
computer vision appls. of deterministic Bayesian estimation of Markovian random fields 87−62370
conditional limit theorems for empirical measures and their marginals 87−51945
conditional limit theorems under Markov conditioning 88−27715
conditional probability method, for reliability/availability of system with common-cause failures 85−60803
conditional steady state distribution bounds 87−36576
conditional steady state probabilities in Markov chains and queueing models, computable bounds 87−13385
congestion control modelling, transient anal. of Markovian queueing systems 87−13173
connected digit recognition using hidden Markov models 88−66362
connected speech recognition by phonemic semi-Markov chains for state occupancy modelling 87−47821
connected word recogniser, training sequences generation using segmental k-means algorithm 88−72796
connected work recognition, Hidden Markov modelling and dynamic time wrapping approaches 87−47604
consecutive -k-out-of-n:F systems, economical design 85−49385
consecutive-k-out-of-n:F system reliability for Markov-dependent components 87−58720
consecutive-k-out-of-n:F system with (k−1)-step Markov dependence, reliability 87−58719
consecutive-k-out-of-n:F systems with (k-1)-step Markov dependence, reliability 87−31349
construction for systems represented by Markovian processes 86−26703
continuous and discrete Markov processes and chain, concurrent optimal filtration 87−39789
continuous and pulsed signals, optimum complex nonlinear processing 85−41909
continuous speech, acoustic-phonetic recognition, context dependent modelling 86−16243
continuous speech, hidden Markov models applied to very low bit rate coding 87−19468
continuous speech recognition, hidden Markov model algorithms *(German)* 87−2482
continuous speech recognition, large scale parallel processor implementatıcn 87−61702
continuous speech recognition, phonetic units design using hidden Markov models 87−19593
continuous speech recognition, statistical language modeling using a small corpus from an application domain 88−66395
continuous speech recognition and understanding, large-vocabulary system, expt. results 88−72791
continuous stochastic network models of computing systems *(Russian)* 87−16464
continuous time discounted Markov decision model, optimal policy *(Chinese)* 86−19899
continuous-parameter hidden Markov models 88−66343
continuous-tone pictures coding 85−41998
continuously spoken German sentences, word hypothesis generation *(German)* 87−2483
Markov processes continued
continuously variable duration hidden Markov models for automatic speech recognition 87−39679
control loop adaptive antenna weights, band-limited noise, exact solution 86−64118
convergence time of limiting probabilities, derivation *(Japanese)* 88−56111
convolutional codes in channels with additive Markov noise, optimal decoding 88−72751
convolutional coding scheme, Markov chain model 85−57283
cost-benefit analysis of a two-unit deteriorating standby system with detector 87−16430
critical distortion for Markov sources 86−13629
CSMA, distributed retransmission control 88−59363
CSMA, slotted nonpersistent and virtual time, distributed retransmission controls 87−55802
CSMA, station oriented, Petri network lattices, algebraic and geometric structure 87−39572
CSMA multihop packet radio networks, throughput anal. 87−40649
CSMA systems, persistent, throughput anal., comments 87−40005
CSMA-CD LANs with heterogeneous population of buffered users, queueing anal. 88−67035
CSMA/CD LANs with overload detection and protection 86−59634
CSMA/CD networks, delay characteristics 88−52612
CSMA/CD networks, matrix representation 85−25251
CSMA/CD system with link level flow control, performance anal. 88−46609
cumulative sum control chart design using narrow limit gauges 87−65225
cyclic convergence of iterative methods in Markov modelling 88−18570
data communication systems, reliability characteristics of network protecting signals *(German)* 85−51857
data compression, adaptive, min. descriptive length criterion, modelling *(Japanese)* 87−7745
data compression for a source with Markov characteristics 87−47650
data compression using dynamic Markov modelling 88−14653
data encoding, Markov process model, integer programming appl. 87−68991
data packet flow embedded randomly into scheduled speech packet, stability anal. 88−21384
data processing system, random signals recording from discrete readings, errors determ. 85−63924
data transmission, noise immunity anal. 85−13565
data transmission channel model 88−72719
data transmission reliability in computer networks with random errors 86−37180
decentralized dynamic routing as a Markov chain optimization problem 88−43765
degraded image restoration using Markov random fields 88−66716
Delta networks, performance eval. *(Italian)* 87−48395
deteriorating standby system with three modes and inspection, stochastic anal. 85−44550
diagnosability of system in presence of hybrid faults 88−6309
diffusion model for queues in randomly varyingenvironment 86−40614
diffusion model probability density function and drift coeff., recursive estimator simulation 85−28112
digital communication in random-phase channel, hidden Markov chain identification algorithms *(French)* 88−21054
digital communication lines, quasi-coherent diversity reception of Markov signals, noise immunity 86−48722
digital filtration, residual classes system 87−24341
digital messages, spectral anal. through finite-memory transformations 85−13441
digital PLL performance anal. method using time variant Markov chain model *(Japanese)* 85−30840
digital PLL tracking NRZ coded binary signals, performance 86−62496
digital system reliability study, three-state Markov model 88−18537
digitised grey-level images, dynamic adaptive encoding technique *(Japanese)* 85−51782
diphone-like segments based on trajectory concepts stochastic model 88−72839
directed networks, shortest paths with exponentially distributed arc lengths 86−66891
discounted-reward finite-state Markov decision processes, adaptive control 85−49430
discrete channel with frequency-dependent parameters, optimal reception 88−66505
discrete Markovian system steady-state probabilities *(French)* 88−38051
discrete sine transforms, computation and effectiveness, comments 87−2387
disorder detection in diffusion process, sequential procedure 88−40943
distribution substation load growth forecasting by computerised Markov processes 88−55548
double channel Markovian queue with limited waiting space, transient behaviour 88−38056
DSI, integrated voice and data link, performance anal. 87−40179
dual-VOR navigational system, repairable, maintainability, availability and reliability anal. using Markov technique 87−3258
duplex systems, reliability and availability of simple models 87−5279
dynamic fault tree development using Markovian process and supercomponent 88−243
dynamic system states, jumplike parameter variations, optimal estimation 86−13631
edge preserving image restoration, nonrecursive filter use 86−10522
electric water heating load prediction statistical model 87−58452
electronic equipment maintenance, life cycle cost of integrated logistic support 87−36432
electronic system reliability analysis using Markov models *(Spanish)* 87−65260
EM wave polarisation parameters randomness, nonlinear filtering of radar signals 87−47745
embedded Markov-chain model, packet noise anal. on LAN 86−16992
EOR project networks 85−33280
ergodicity of Markov channels 88−27706
error latency of delay faults in combinational andsequential circuits 86−46748
error performance analysis of digital connections 88−40765
ESS complete system failure, transient probability 88−59356
estimation in systems with semi-Markov switching model 88−38061
Ethernet protocol behaviour at limit to very small network lengths 88−35138
exact estimation and filtering algorithms, general condition derivation 86−37096

Markov processes continued
Expressnet protocol, anal., report 88−59386
Expressnet protocol, performance analysis using Markov model 88−15140
extended Markov generator, binary sequence synthesis 88−66264
failure analysis of a communication system with imperfect repair 87−40127
failure-free operation, absolutely guaranteed time estimation, model 88−31566
fast algorithm to formulate Markov system equations 85−5852
fault tolerant computer system for the A129 helicopter 85−53121
fault-tolerant system availability distrib., closed-form soln. 87−58713
Feynman-Kac formula, filtering theory appls. 88−8721
filtering algorithm for discrete-continuous Markov processes 88−52444
filtering in optimum planning of observations *(Russian)* 87−27382
filtering with inaccurate optimum processing algorithms 88−3038
finite Markov chains, large deviations, hypotheses testing and source coding, transition matrix 85−57182
finite Markovian queue, overflow process 85−16853
finite-user infinite-buffer slotted Aloha system, stability anal. of interacting queues 88−46371
fitting algorithm for Markov-modulated Poisson processes having two arrival rates 87−54774
flow-shop type production lines with phase-type operation and repairtimes and finite buffers 85−54122
fluorescent lamp radiative transfer calc. by Markov statistics 86−52030
formant tracking using hidden Markov models 86−16233
French digit recognition using word-based vector quantisation and hidden Markov models 87−27313
frequency and availability anal., graph theory concepts 86−13546
frequency-hopped spread spectrum packet radio networks, packet error probabilities 88−59366
functional of continuous Markov processes, distrib. 88−38052
fuzzy vector quantization applied to hidden Markov modeling 87−61672
gateway buffer size estimation *(Japanese)* 88−9163
Gauss-Markov stationary input, adaptive matched DPCM anal. 87−54835
Gaussian multivariate reciprocal processes representations 88−43767
Gaussian processes, quasilinear filtering, a priori uncertainty conditions 87−13029
generalised stochastic Petri nets, tangible reachability graph 88−309
GEODE system for energy management and equipment optimisation telecommunication power plants 85−64859
geometric aggregation, expansion and partial observations for Markov processes 87−44122
global connected digit recognition using Baum-Welch algorithm 87−19539
GRAFFITI and GS12 programs for system reliability calc. *(French)* 87−58704
gravitational antenna pulse detection efficiency anal. *(Russian)* 88−14485
gray-level images with multiplicative noise, stochastic relaxation for maximum a posteriori restoration 87−62287
ground cover thematic classification map, use of multitemporal data 87−4158
group homogeneous replacement, chain properties *(Polish)* 86−66682
HDBN transmission codes, error multiplication in decoder *(Polish)* 87−33616
heterogeneous packet switching system, buffer management schemes 85−36473
heterogeneous stand-by systems in Markovian environment, reliability 88−11801
hidden Markov modelling of speech based on a semicontinuous model 88−27828
hidden Markov models, basic ideas 88−66520
hidden Markov models, frame compression 88−72807
hidden Markov models, isolated utterances, natural sounding pitch contours synthesis 87−12946
hidden Markov models, probabilistic distance measure 85−39623
hidden Markov models for noisy speech enhancement 88−72821
hidden Markov models introduction, appl. to speech processing and recognition 86−43194
high level speech recognition using hidden Markov models *(Japanese)* 88−14619
HMM isolated word recognizer, speaker-stress resistant 87−61683
HMM-based large vocabulary speech recogniser, acoustic-phonetic detail modelling 88−72815
homogeneous Markov chain with set of strongly communicated states, limiting conditional distrib. *(Ukrainian)* 86−34117
human performance reliability, Markov models and error rate plots 86−57251
image coding, vector quantisers and block truncation coding appl. 86−54560
image coding reduction of blocking effects with lapped orthogonal transform 88−73251
image edge detection, Viterbi algorithm 88−21339
image encoding through transition probabilities 88−52542
image estimation by stochastic relaxation in the compound Gaussian case 88−66719
image processing, 2-D discrete Gaussian-Markov random field models 85−30462
image processing, Markov mesh and nonsymmetric half-plane Markov chain comparison 87−55273
image processing, slant transform, props. and fast algorithms 86−16540
image restoration in signal-dependent noise using a Markovian covariance model 85−19503
image restoration using an estimated Markov model 88−73227
image segmentation, accurate, adaptive hierarchical algorithm 86−16553
image segmentation, semi-Markov random field models 87−62248
image separation, probability approach *(Russian)* 88−3185
image texture anal., Markov random field model 85−30467
image-map registration, improved dynamic programming 87−69317
industrial plant, single-channel protective system reliability, demand and repair rate influences 87−36551
industrial plant load graph anal. using Markov chains *(Russian)* 88−43503
information source state reconstruction 88−2914
information without redundancy, Markoff-chains to complete relation networks *(German)* 86−29662
instability conditions arising in analysis of some multiaccess protocols 87−40057
integrated data/voice network traffic flow control protocols 87−34028
integrated discrete signal processing, partially coloured noise presence 86−43252
integrated hardware/software systems, dependability eval. 88−6321
integrated voice/data multiplexer with ARQ schemes, performance study 88−52607

Markov processes continued
inter-processor messaging in distributed systems, modelling and performance eval. 88−14861
interconnectd metropolitan area circuit switched telecommunications networks, performance analysis 88−34853
inverse texture problems, sampling schemes, use of Markov random field models 87−62167
inverter-minimum networks 87−31803
ionosphere f_0F_2, hourly variability estimation at low latitude station 87−33434
ionospheric plasma parameters, sequential estimation, Markov model with finite states appl. *(Russian)* 85−62946
ISDN, basic user access, subscriber loop, performance anal. 87−40177
ISDN moveable boundary multiplexing 87−40229
ISDN voice/data optimal switching at network node 88−46368
isolated utterance hypothesisation and verification in large vocabulary 87−47620
isolated utterance recognition, one and two pass strategies 88−66383
isolated word recognition, appl. of Gibbs distribution to hidden Markov modelling 88−66340
isolated word recognition, hidden Markov models 87−19495
isolated word recognition, speaker independent, appl. of hidden Markov models 86−16181
isolated word recognition based on finite state vector quantization and hidden Markov modeling 88−27861
isolated word recognition by Hidden Markov Model 87−47601
isolated word recognition over the telephone network 88−66892
isolated word recognition using hidden Markov models *(Portuguese)* 87−69071
isolated word recognition using hidden Markov models 86−16179
isolated word recognition using hidden Markov models with continuous mixture densities 86−10271
isolated words, speaker independent recognition 87−47621
isolated words, speaker independent recognition, template clusters and Markov models use 87−47549
isolated-word recognition, two-stage discriminant anal. 87−61682
iterative methods in Markov modelling 87−52031
k-out-of-n unit system with two types of failure and preventive maintenance 85−5850
Kalman estimation for a class of rational isotropic randomfields 86−54515
Karhunen-Loeve transform, special cases *(Chinese)* 85−54265
LAN, analytical model 86−64739
LAN, user systems throughput 87−48557
Laplace second-order autoregressive time-series model, NLAR(2) 86−13625
large vocabulary speech recognition system, obtaining candidate words by polling 88−72810
large vocabulary speech recognition using a hidden Markov model for acoustic/phonetic classification 88−72814
large-scale Markov decision processes, suboptimal policy determ., bounds 85−54255
large-scale Markov decision processes, suboptimal policy determ., numerical evaluation 85−54256
large-signal detection, error probability 87−47870
lexical stress recognition using hidden Markov models 88−66366
limit theorems for sums of dependent random variables 88−18571
linear feedback shift registers, bounds and analysis of aliasing errors 88−32130
linear multivariable systems, minimal realisation methods 88−40990
linear systems, complexity reduction method using aggregation techniques *(Korean)* 87−31666
linguistic units definition using hidden Markov models 87−19594
M_1, M_2/M_1, $M_2/S/S$ loss system, overflow process *(Japanese)* 86−59447
M_1, M_2/M_1 and $M_2/S/S$ loss system, overflow process anal. 87−19988
m-out-of-n system, asymptotic unavailability 87−36548
M/G/1 parallel queues, arrivals joining smaller buffer content system, anal. 88−14856
M/G/1 queue, Markov-modulated, busy period and buffer overflow time 87−65301
M/G/1 queue, Markov-modulated, stationary distribution 87−65300
M/M/1 queue in Markovian environment, sojourn time distributions 87−72896
M/M/*K* systems with M-phase fluctuations of traffic intensity 88−52323
magnetographic print engine, statistical study of toner particles flow 87−39337
maintained system with protection system, stochastic behaviour 85−5848
maintenance consideration in the reliabilitycalculation of parallely connected elements withequal characteristics *(Serbo-Croatian)* 87−152
maintenance model, problems and use of fault-tree anal. 85−39621
Mandarin lexical tone recognition, hidden Markov model use 88−66327
mapping problems, smoothing error dynamics 87−2396
MARKOV EXPLORER software package for hidden Markov modelling 88−48316
Markov transition matrices for simulating stochastic and persistence effects on weather dependent systems 86−61007
Markovian solver of QNAP2, queueing network analysis program and appl. 86−7605
matrix projector calculus methods *(French)* 85−28094
maxentropic Markov chains 85−288
maximum a posteriori array signal processing 86−16458
maximum likelihood detection of discrete time PAM innon-Gaussian noise 86−29706
maximum likelihood discriminant anal. on multivariate data, Markovian model 86−3987
maximum likelihood estimation for multivariate mixture observations 86−57317
mean time to failure calc., simple Markovian method 87−65249
measuring systems with search and control devices, stationary probability distribution anal. 87−56464
medium voltage distrib. network, faulted section location process, model *(Polish)* 87−15251
METACONTA 10C telephone transit exchange, calc. of mean operating time to failure *(Croatian)* 86−69539
microassembly process reliability in the cycle II *(German)* 86−14760
microelectronic system reliability and safety *(German)* 86−62948
microprocessor boards, compact markov models for random test length calc. 88−827
minimum discrimination information approach for hidden Markov modeling 87−61630

Markov processes continued
mixed input queueing model, input control with discrete monitoring, anal. *(Japanese)* 85−28105
mixed renewal and Poisson input queueing model, anal. 87−7890
mixed renewal and Poisson inputs queueing modelwith a finite waiting room *(Japanese)* 85−54236
mobile radio slotted ALOHA networks anal., Markov model 85−3369
models for reliability, maintainability and availability assessment 86−57279
modular architecture of dynamic programming and maximum likelihood sequence estimation 87−16523
moment formulas on correlation of multiple overflow parcels from a Markovian service system and their applications *(Japanese)* 88−52624
moments of stationary distribution of Markov chain by trial function method 86−52341
Monte Carlo, reliability modelling by inhomogeneous Markov processes 87−10218
moving mesh control, performance analysis 85−44665
multi-access communication channel, session admission control 87−55447
multi-unit parallel system, availability and failure freq. 87−65244
multi-user random access communication networks, output process approximation 88−52651
multiaccess channel, maximisation of one-step throughput 87−75975
multiarmed bandit problem with multiple plays, Markovian rewards 88−6356
multichannel filtering methods for color imagesegmentation 86−4051
multichannel sequential signal detect., asymptotic characts., effectiveness 85−2829
multichannel system, searching for moving Markov signal 86−29686
multichannel system with priority servicing of long demands, investigation using statistical tests 85−39611
multichannel systems with variable mode of operation, reliability estimated 85−60848
multihop packet radio networks, iterative model 86−64750
multihop packet radio networks, local Markov models, CDMA appl. 87−28381
multihop packet radio networks, throughput anal. theory 85−13680
multilevel images segmentation using Gibbs distrib. 86−16554
multilinear queueing systems with repeated calls, ergodicity 87−75990
multilook speckled images, segmentation 88−66756
multiple access protocol, behaviour, countable Markov chain theory appl. 85−51838
multiple access protocol, performance and stability of simple gated conflict resolution algorithm 87−62401
multiple bus LAN, Markov models for performance eval. 86−64692
multiple bus LANs, performance models via Markov process 87−27734
multiple radio channels, radom access system without retransmission discrimination discipline using packet switching 86−30096
multiple time-scale Markov processes, structural decomposition 88−31628
multiple-bus communication systems, performance anal. 85−36465
multiply connected Markov process, fiducial approach to adaptive filtering 85−41817
multiserver queues with *m*-phase synchronous fluctuation of traffic intensity 88−34865
multiserver queues with synchronous fluctuation of traffic intensity 88−21398
multispectral image context classification using the Markovrandom field 85−57539
multistate Markov models and struct. props. of transition rate matrix 88−31548
multistate Markov models and structural propertiesof the transition-rate matrix 86−61980
multivariate discrete Markov fields, filtering in uncorrelated noise presence 86−43251
multivariate empirical Bayes classification with nonstationary priors, decision-directed learning strategy 88−3167
mutual exclusion distributed protocols, performance evaluation via Markovian modelling 87−28221
natural textures, Gaussian Markov random field parameters, max. likelihood estimation 88−66725
navigation systems performance evaluation, using nonlinear filtering formulation 88−66602
nearly completely decomposable Markov chains 87−36587
nearly-uncoupled Markov chains, iterative aggregation/disaggregation techniques 86−40618
network interface units, quantitative anal. model 87−55808
network reliability with arc failures and repairs 88−70163
network-based speaker-independent connected-word recognition system 87−19546
networks under multiple and fluctuating operational conditions, reliability modelling 88−38029
noise compensation algorithms for use with hidden Markov model based speech recognition 88−72808
noise compensation for speech recognition using probabilistic models 87−19504
noise recording, inertial detector output process, time distribution 86−48934
noisy images segmentation modelled by Markov random fields with Gibbs distrib. 87−62244
noisy pictures, smoothing and segmentation, Markov random fields appl. 88−66749
noisy speech signals, adaptive Markov filtering algorithms 86−16164
non-maintained parallel systems subject to hardware failure/human errors, reliability anal. 85−33234
non-preemptive $\Sigma M_i/G/1(\Sigma N_i)$ system, priority packet transmission for ISDN, anal. *(Japanese)* 88−21394
non-zero-sum Markov games, convergence of numerical solutions of dynamic programming equations 86−62013
noncausal Markov random field segmentation, parallel hierarchical and relaxation algorithms 87−47899
noncoherent diversity reception, noise immunity in channels containing narrowband interference 86−49457
nondegenerate diffusions with noise correlation, pathwise nonlinear filtering 87−47757
nonGaussian time series, props. and generation 87−61919
nonhomogeneous semi-Markov systems, convergence of consolidated stochastic processes 87−52033
nonlinear distributed filtering with different local models 87−7784
nonlinear filtering, approximation method comparison 88−46065
nonlinear filtering, Monte Carlo methods 85−51665
nonlinear filtering, unique characterisation of conditional distributions 85−51673
Markov processes continued
nonlinear filtering and interpolation, quasioptimum algorithms 87−19712
nonlinear filtering equation, finite-dimensional approx. 87−75766
nonlinear filtering of an elliptically polarized pulsedsignal 86−48928
nonlinear filtering of Markovian processes, indirect method 88−8767
nonlinear filtering of speech signal with stationary noise 86−16165
nonlinear filtering problems with finite dimensionalmatrix estimation algebras 86−54519
nonlinear filtering problems with wide bandwidth observation noise 85−51674
nonlinear Markov signal model, synthesis 85−2827
nonredundant repairable multiplexing unit, reliability anal. 86−4404
nonregeneration points, Petri net interpretation for Markov renewal process 86−68944
nonregeneration points interpreted Petri net, probable behaviour anal. by Markov process *(Japanese)* 85−5899
nonstationary Markov sequences, adaptive filtering 86−37076
nonstationary priors, decision-directed algorithm 85−13546
nonstationary signal analysis, decision and classification directed methods 88−73036
nuclear reactor protection, supervisory systems, active-inactive times determ., system availability maximisation 87−71887
numerical approx. of Markov processes *(German)* 88−38050
one-dimensional randomly inhomogeneous medium, wave intensity fluctuations 86−3489
one-server systems with small load 85−49426
optical bus system reliability considerations *(German)* 86−69377
optimal control of arrivals at a blocking node 88−52670
optimal detection of a random packet of pulse signals 88−34676
optimal digital message reception in variable channel in pulse and fluctuation noise background 85−13564
optimal dynamic switching of voice and data in communication networks 88−67117
optimal filter design with correlated output noise, convergence properties 85−46924
optimal filter design with correlated output noise, convergence properties 85−57396
optimal image digitisation 87−47897
optimal reception quality for source and channel with memory, investig. 88−72716
optimal routing and flow control of a network ofparallel processors with individual buffers 86−64392
optimal sequential smoothing with uncertain observations 85−51604
optimum first-order time delay tracker 88−27702
optimum preventive maintenance for complex systems with interdependent equipment units 87−31271
optimum receiver of interfering RF-pulse signals, noise immunity estimation 88−72959
overflow probabilities in buffers, engineering calculations 88−21374
overflow queueing models, iterative methods 87−65394
overflow traffic from Markovian service system, moment formulae *(Japanese)* 87−33835
p_i-persistent protocol for unidirectional broadcast bus networks 88−289
packet radio networks, carrier sense multiple access with busy tone and collision detection 85−8319
packet switched networks, buffer blocking effect on operating characts. of data link 87−19978
packet switched networks within management information systems, multiple servicing theory appl. *(Czech)* 87−48261
packet switching, optimal adaptive scheme for two competing queues with constraints 86−64397
packet voice communication system, queueing anal. 86−16628
packet voice communications systems, models for anal. 87−13172
packetised voice and data traffic and related statistical multiplexer, Markov modulated characterisation 87−12869
parametric amplifier, single-circuit, noise AM pump, statistical characts. 86−40931
passage and conditional passage times for Markov chains in continuous time 87−31394
passive range estimation of an underwater maneuvering target 87−40998
passive underwater tracking of manoeuvring targets, adaptive state estimator 87−34663
performance analysis of interconnected CSMA/CD networks with finite population 88−52948
performance evaluation, teletraffic analysis, conf. Amsterdam, Netherlands, (June 1986) 87−31141
periodically nonstationary random processes, model and device for diagnostics *(Russian)* 85−25000
persistent CSMA/CD, delay and throughput anal. 88−46352
personal rapid transit systems, grade-separated interchange, control algorithm and traffic anal. *(Japanese)* 85−16321
perturbed covariance sequence modelling 86−62016
Petri net protocols with product form solution 87−55807
Petri nets with stochastic timing 86−7639
Petri-nets, inhibitor D-timed, performance analysis of communication protocols 87−7887
phase shift cosine transformation 87−16453
phase-keyed pseudorandom multistation signal in receiving antenna array, Markov model 87−33542
phase-shift keyed signals with fading, optimum filtering 88−40948
phased-mission systems, repairable, quantitative reliability model using Markov approach 87−31327
phoneme classification using Markov models 87−27321
phoneme recognition: neural networks vs. hidden Markov models vs. hidden Markov models 88−66359
phoneme-based speech recognition system, word-dependent coarticulatory effects 87−19585
phonemic models, speaker dependent connected speech recognition 86−16245
phonetic models for large vocabulary speech recognition 87−61658
phonetic recognition using hidden Markov models and maximum mutual information training 88−66360
phonetic to French transcription, probabilistic grammar 86−16263
phonetic units for hidden Markov models 86−54467
photonic switching modules, rearrangeably nonblocking, traffic capabilities 86−30753
photovoltaic stand-alone solar energy systems, probability of loss-of-power, day-to-day correl. in solar radiation effect 86−33212
piecewise constant Markov signal in presence of Poisson interference, jumps detection 86−29911

Markov processes continued
pixel labeling in a second-order Markov mesh 87−33797
polynomial-time cooling schedule 86−26739
polyphase phase-locked oscillator for input signals with periodical phase jumps 88−18966
power spectra of Markov sequences *(Chinese)* 88−24628
power system reliability, Markov model, of partial and postponable outages 87−50693
power system security control, ϵ-optimal generation schedule using iterative procedure 85−21135
power systems, reliability eval. in changing environment 87−9070
power systems reliability calculation methods and models *(German)* 88−23262
power unit equipment economical selection, reliability factors appl. 88−11102
practical reliability problems solution, continuous-time Markov methods use 85−49404

priority queues, anal. of closed priority queueing networks 86−26712
probabilistic spectral mapping, rapid speaker adaptation 87−61670
probability model, simplification by state merging 87−44071
process failure detection in the case of Markov noise 88−59125
pulse interference action stability, parameter estimation of state 86−29682
quantization of the stationary state probability inline code algorithm *(Czech)* 86−68986
quasicoherent diversity reception of signals in channels with Rayleigh fading 88−35353
quasioptimal complex receivers, sensitivity anal., pulsed and CW signals processing 88−21953
queue with two thresholds, steady-state probability 88−280
queueing Markov chain computation 88−38059
queueing models, asymptotics of covariances of semi-Markov pointprocesses 85−54243
queueing network with infinite queues, traffic anal. *(Russian)* 87−16458
queueing networks with symmetric standby channels 88−11830
queueing system with server's walking process/customer's thinking process *(Japanese)* 86−13618
queueing systems, multidimensional characteristics, asymptotic analysis 85−60840
queueing systems, randomly changing population states, anal. *(Japanese)* 87−5318
queueing systems anal. with randomly changing population states 88−34841
queueing systems in which population characteristic changes probabilistically *(Japanese)* 87−172
queueing systems with retrials and heterogeneous servers 87−65293
queueing theory techniques, recent developments *(German)* 86−40609
queuing networks, numerical computation of sojourn-time distribs. 85−33274
R-R interval state transition probability matrices, texture anal. 88−48186
radar image synthesis, lognormal random field models and their appls. 87−28658
radar performance assessment, new criterion 88−15653
radar range performance air/air interception, evaluation criteria *(French)* 87−13765
radiation sources with parametric uncertainty, detection and direction-finding 86−48946
radio engineering systems synchronisation 86−37723
radio meas. system analysis, Markov-chain methods 88−35571
radio systems and trajectory meas., optimal signal filtering algorithm 85−36283
radionavigation, discrete detectors, analysis using Markov chains 87−76880
random digital signals, distrib. and moments of sum 87−61883
random field identification from sample 88−73207
random field models in sampling scheme design 88−45813
random field structs. for clutter modelling 88−15537
random fields props. and characts. 85−49446
random input Markovian system, limit theorems *(Chinese)* 85−262
random processes relationship study 87−51950
random sequences, Bayes discrimination and estimation 86−29877
random sequences, property changes, nonsequential detection 88−31617
random testing anal. of cards 87−773
random walks, Gaussian processes and list structures 88−11826
random walks on the triangular prism and othervertex-transitive graphs 86−62045
randomly inhomogeneous media, wave propag., most probable characteristic determ. 88−45677
range finding systems, pulsed-phase difference, uncertainty elimination 88−9677
rapid algorithm for ordering the unknowns to solve combined equations with a sparse matrix *(Russian)* 85−44594
Rayleigh-Ritz refinement technique for nearly uncoupled stochastic matrices, convergence 85−330
RBMK-1000, control valve working life estimation using continuous Markov processes 85−59925
recursive scene matching using pyramids, fast correlation technique 86−23140
recursive source coding, gaarder-Slepian 'tracking system' conjecture 87−54897
reduced order estimation, smoothing aspects 87−61853
redundancy-free encodings, implementation *(German)* 86−48773
redundant systems with human errors, common cause failures and partially energised standby unit 88−49591
regenerative stochastic Petri nets 87−10275
regular processes on [0,1] interval, stochastic calculus appl. *(French)* 87−10249
reliability, Markov models, eigenvalue-eigenvector solns. 87−16437
reliability, monotone Markov models 87−23427
reliability analysis, probability bound estimation method 86−240
reliability analysis of Markov systems, Monte Carlo methods, nuclear power plant appl. 85−48765
reliability analysis of two special three-state devices 85−5853
reliability assessment using sensitivity analysis in Markov chain scheme *(French)* 88−49573
reliability indices calc. of Markov system models 85−54211
reliability model for multistate system with multistate elements *(Polish)* 85−33251
reliability models solution *(Czech)* 86−13539
reliability models specification using abstract language 87−31348

Markov processes continued
reliability of redundant systems with human errors, Markov models 86−275

electron cyclotron resonance maser, kinetic theory 86−68412
electron cyclotron resonance maser with combining periodic magnetic field *(Chinese)* 88−8090
electron Doppler shift cyclotron maser radiation pumped by an asymmetric undulator 85−51074
electron-cyclotron maser, induced reson., small-signal anal. 87−68314
electron-cyclotron maser instability caused by hotelectrons 86−2999
electron-cyclotron maser radiation from a relativistic loss-cone distribution 85−7335
electrostatic electron cyclotron reson. masers, orbit theory 88−58399
electrostatic electron cyclotron resonance maser, linear theory 86−54063
electrostatic electron cyclotron resonance maser, linear theory 87−12338
ELF expts., 2 mm wavelength 88−40260
enhancement of traveling wave gain and efficiency with a gyroresonant phase filter 88−39017
FEL, large-orbit nonwiggler, millimetre/submillimetre wave range 88−2304
FEL, LV type, megawatt operation near 300 GHz, design procedures and expt. study 88−51839
FEL experiments with pulse power beam at ILE, Osaka 87−75145
FEL magneto-orotron, dynamical slow-wave structs., anal. 88−51838
FEL program at Naval Research Laboratory, mm-cm wavelength 87−75141
FEL ubitron amplifier cold test results at Naval Research Laboratory 87−75142
five electron laser with tapered-wiggler, high-efficiency microwave radiation extraction 87−12519
free electron laser, tunable, in combined axial and wiggler mag. fields, microwave emission 85−51204
free electron laser relativistic electron ring, rot., microwave emission 88−8237
free electron laser was slow-wave structures, quantum description, FIR/microwave generation 87−7390
free electron laser-electrostatic electron cyclotron resonance maser hybrids, TEM mode operation study 88−51836
free electron lasers, near mm designs based on measured characteristics of small-period electromagnet wigglers 86−68568
free electron lasers at millimeter wavelengths, accelerator driven 88−58587
free electron maser and self-excited microwave undulator 85−35322
free electron masers, unified theory *(Chinese)* 85−51200
free electron millimeter-wave laser operating in collective regime, gain, bandwidth and tunability 86−9886
free-electron, ion-channel guiding 88−26997
free-electron laser, high-gain amplifier, microwave radiation prod. 85−35808
free-electron laser, MM-wave, sideband control 87−33222
frequency control, conf., Philadelphia, PA, USA (May 1985) 86−33920
frequency control symposium, Philadelphia, PA, USA (May 1987) 88−18316
frequency standards for measurement of time and of frequency *(French)* 87−41302
generators of diffr. radiation, miniaturisation 85−62611
gyro-peniotron oscillator, mode competition 86−21030
gyromagnetic perturbation of delay structure 86−48310
gyroresonant phase filter for travelling wave gain and efficiency enhancement 88−27000
gyrotron, high power, cyclotron maser theory 88−27006
gyrotron radiation, self-modulation instability 86−29023
gyrotron radiation, self-modulation instability anal. 86−58207
gyrotron with multi-mirror quasi-optical cavity 85−55375
high-power microwave sources, conference, Los Angeles, CA, USA, Jan. 1988 88−49345
high-Q micromaser, state reduction study 88−14064
induced resonance electron cyclotron (IREC) quasi-opticalmaser 87−2188
induced resonance electron cyclotron maser, higher harmonic generation 88−45332
induced resonance electron cyclotron maser, operation at higher harmonics 87−74948
induced resonance electron cyclotron quasi-optical maser 87−18875
induced resonance electron cyclotron quasi-optical maser in an open resonator 87−12337
induction linac-based FELs, master oscillator power amplifier 88−45476
intense relativistic cyclotron maser, electrostatic beam pumping method 88−58398
inverse Smith-Purcell effect, theoretical anal. and obs. 88−40254
ion-cyclotron maser instability, magnetic drift induced 87−54210
K-3 VLBI system, time and frequency standard 86−31115
literature review of microwave generation/amplification and tubes 88−32724
lowbitron, gain enhancement by coherently gyrophased electron beam 86−54265
micromaser, measurements-induced dynamics study 88−45333
micromaser, quantum theory, symm. breaking via off-diagonal at. injection 87−2048
microscopic, two-photon, quantum theory 88−14063
microscopic and macroscopic theory 87−68315
microscopic maser, theory and novel features 86−58853
microwave generation using plasma instability 88−26996
microwave generator, stimulated EM wave scatt. with high-current relativistic electron beams 86−2997
microwave signals, direct transmission over optical fibre, optoelectronic componentry 87−74950
millimeter-wavelength maser amplifiers, review 86−8451

masers continued
molecular beam disc resonator maser, oscill. polarisation ellipse rot., mag. field effects 86−22267
molecular beam masers, rectangular flat-roof microwave resonator 86−9709
NBS passive H masers, miniature design, characts. and performance 88−16516
noise adding radiometer for radioastronomy 87−63100
one-atom, and cavity QED, review 86−68417
one-atom maser, quantum collapse and revival, observation 87−26249
Orbitron, MM wave generation interpretation as stimulated emission of bremsstrahlung 87−54209
Orbitron, operation 85−24421
Orbitron, pulsed, cross-sectional number density 88−14068
Orbitron, theory 85−24422
Orbitron, time-dependent freq. shift 88−14069
Orbitron as a stimulated-bremsstrahlungglow-discharge maser 86−68413
Orbitron maser, electron orbits stability 85−24420
Orbitron maser, nonlinear theory and particle simulation code 88−14067
orbitron maser, simplified Vlasov-Landau treatment of electron motion 85−51077
orbitron maser, stimulated emission, amplification and upward freq. shift 88−26999
orbitron maser, theory 86−58854
Orbitron maser design, operating freq. up to 1 THz 86−2998
Orbitron MASER for producing MM and sub-MM radiation 88−65539
orbitron maser study 87−38968
orbitron type, 3D nonlinear theory 88−8091
passive H maser frequency standard 86−24658
permanent magnet helical wiggler for FEL and cyclotron maser appls. 88−1878
plasma and dielectric Cherenkov masers, particle simulations 88−45331
plasma Cherenkov maser, GW level design, theoretical study 88−51712
plasma maser effect, chaotic behaviour research *(Japanese)* 88−14066
plasma masers, passive mode locking with saturable absorbers 86−3001
Polish lasers and masers, development *(Polish)* 87−12403
proton maser, theoretical models and operation aspects 88−51713
pulsed electron cyclotron maser experiments 85−56460
quantum generator and singularities, general model 85−24423
quasi-optical electron cyclotron maser, operation 85−56463
Raman FEL, optical guiding 88−2305
Raman FEL, power and sideband studies 87−75143
Raman FEL oscillator, efficiency enhanced design 86−22416
Raman FEL oscillator, MM-wave regenerative gain 88−2296
Raman free electron laser oscillator with tapered undulator, efficiency and sidebands study 88−65749
relativistic cyclotron maser driven by an intense electron beam generator with 0.4 μs pulselength 88−27001
relativistic cyclotron resonance maser linear theory with resonant electrodynamic systems 87−33075
relativistic electron beam diodes, electrode design and appls. 87−16065
relativistic electron beam in solenoidal and longit. wiggler fields, maser and free electron laser modes 86−54167
relativistic electron masers, electron-optical systems 85−7336
rippled-field magnetron, cross-field FEL, millimetre wave emission investig. 86−21031
rod slow-wave structure asymmetrically arranged in a screen 86−9708
rotating electron beam in a rippled mag. field, MM wave radiation prod. 85−51202
rotating relativistic electron beam stability in waveguide near cyclotron reson. 87−46735
ruby, MM band centre inversion characts. 88−33909
ruby maser oscillator, superconducting cavity stabilized, performance 87−68311
N-Rydberg atom maser, squeezing, damping and thermal field effects 85−46297
Rydberg atom two-photon micromaser theory 87−26248
rydberg-bremsstrahlung maser, theory 86−58852
Rydberg-Bremsstralung maser emission, anal. 87−7231
semiconductor masers using cyclotron resonance 87−68313
single-atom, QED test 87−61056
single-atom maser, Rydberg states transitions and cavity resonator 87−46737
slow wave electron cyclotron maser with axial generation 85−23358
slow wave electron-cyclotron maser, with axial injection 85−2167
stabilisation with relativistic electron beams, feedback suppression 86−68416
statistical props. of N Rydberg atom maser, squeezing 85−51076
stimulated Cherenkov radiation of relativistic electron beams, powerful mm wave generators 85−18018
subMM generator with laser pumping source 88−50349
submm laser system for local oscillator use in heterodyne receiver, astron. appl. 87−18874
superconducting cavity maser development as stable frequency source 85−62469
synchrotron maser, instability, quasilinear theory 88−65534
travelling wave, paramagnetic, instant amplification band limits 87−68312
travelling wave, with comb-type slow wave system in pump waveguide *(Russian)* 85−41300
travelling wave masers, 3 mm, use of andalusite as active material 87−61055
TRW free electron maser, design 87−2046
two-photon Rydberg atom micromaser 88−72239
two-resonator oscillator with delay external feedback 88−974
Wien bridge oscillator transient behaviour, lab. expt. for undergraduate students 85−10352
$Al_2OSiO_4:Fe^{3+}$, maser characteristics *(Russian)* 85−56466
Cs atomic oscillators stand test of time 85−11070
p-Ge, hot hole FIR lasers and CR masers 86−29118
Ge maser, emission spectra, cyclotron resonance of Ge heavy holes 88−33912
H, Q-enhanced subcompact design 86−36364
H active masers for VLBI appls. 87−26250
H atomic source for masers *(French)* 86−3000
H, long-term continuous operation, automatic cavity tuning *(Japanese)* 85−62468
H, magnetic shielding, stability aspects, comment 86−15594
H maser, Teflon storage bulb coating deterioration process 88−20529
H maser at Shanghai Observatory 88−20526
H maser at temp. below 1K 87−26251
masers continued
H maser atomic standard, Johns-Hopkins built long-term performance 88−16515
H maser atomic standard, built at Johns Hopkins University, long term performance 87−14568
H maser cavities, using low-expansion materials, thermal and mechanical props. obs. 86−36363
H maser, cryogenic, recirculating, low temperature operation 88−33911
H maser, emission frequency, influence of atom-storage chamber wall collisions 85−51075
H maser freq. standards 86−38489
H maser frequency standard, transportable, design for VLBI field operations *(Japanese)* 85−58803
H maser, magnetisation basic eqn. 85−56465
H maser miniature passive clock, NBS design, characts. and performance 87−14446
H maser, operation below 1K 87−2049
H maser oscillator operating at temp. below 1 K 88−14062
H maser, recirculating cryogenic 88−14061
H maser, recirculating, cryogenic type 86−68415
H maser, spin-exchange freq. shifts, hyperfine contrib. 87−46734
H maser, spin-exchange freq. shifts, hyperfine contrib. 88−20528
H maser standard for Kashima 26 m VLBI antenna *(Japanese)* 86−29655
H maser with auto-tuning utilising cavity Q modulation 88−20527
H masers for radio astronomy 88−20525
H masers, single-state selection system 87−26253
H microwave-pumped cryogenic maser 87−26252
H, quality parameters meas. and interpretation 86−36362
H, single state selection system 88−20524
H, spin-polarised, maser action 86−68414
H^+ in water, stimulated emission and absorpt. *(French)* 85−56464
H_2 active masers, meas. results *(French)* 88−58400
H_2, compact resonance cavity *(Chinese)* 85−56458
H_2 maser with new state selector, operation and performance 85−58812
H_2 masers using cavity frequency switching servos, design and performance 85−58811
H_2, passive miniature, design 85−58912
H_2O photodissociation pump mechanism, maser model 86−29022
^3He nuclear Zeeman maser 88−33910
OCS pulsed optically pumped FIR laser and maser action 85−24463
OH astronomical masers, pump mechanisms classification 86−29022
Rb, optical-pumping light source and microwave cavity, fundamental characts. *(Japanese)* 85−29735
^{85}Rb, two photon maser oscillator 88−14065
^{87}Rb maser atomic frequency standard, expt. results 86−38500

mask layout from CMOS netlist using back-to-back cells generator 87−38566
mask pattern, optical inspection system 86−218
MEBES III electron lithography system, enhanced pattern accuracy 85−1437
memory IC mask design (pseudo matrix) for automatic inspection 87−5869
merchant mask-making, technology and economic factors 86−53755
metal lift-off patterning 85−23715
microcircuits, locating features placement, precision tooling 85−6616

masks continued
microlithographic, lasers in mask repair using combined Nd:YAG/argon laser 87−38426
microlithography, ion beam appls. 87−32632
microstrip circuit layout and mask cutting using MICROS3 CAD/CAM program 86−14490
microstrip masks realization, MICROS 3 CAD/CAM program 86−8422
microwave IC CAD, microdensitometer in write mode appl. 88−25740
microwave planar circuits, artwork generation and mask production 85−6542
modified anti-aliasing mask algorithm and error evaluation *(Japanese)* 87−27620
molded deep-UV portable conformable masking system 87−17872
MOS ICs, mask dependent models of faults 87−25608
MOS LSI mask layout pattern, ichnographic 2D anal. 86−67979
MOS VLSI, ion distrib. near mask edge with arbitrary shape 85−62086
MOS VLSI, X-ray lithography for 0.5 μm, mask accuracy patterning, damage 86−47861
MOSFET charge pump, injection efficiency and storage capacity improvement process 85−62079
MOSFET tetrode fabrication using X-ray lithography 87−38036
MOSIS−a gateway to silicon 88−64788
MOVAL framework, digital signal processing algorithms turned into custom chips 87−3263
multi-step contour etching process 85−29157
multilayer mask fabrication using electron beam registration technique 85−1458
multilayer thin-film deposition, sequential masking system 87−31571
multiple flash overlap defect 86−15226
multiple image masks from single image artwork for photolithography, simple and inexpensive photographic process 85−50355
NanoFix, focused ion beam repair system 88−13231
negative deep UV resist appls. *(Japanese)* 85−61591
NMOS transistors, process technology with electron beam lithography 85−34961
noncontact mask carrier 85−7012
novolac resin photoresist based high dry etching resist. portable conformable masking 88−13272
opaque defects on photolithographic masks for ICs, laser repair technology 86−67903
optical heterodyne detection of mask-to-wafer displacement for fine alignment 87−6511
optical lithography, 1:1 broadband stepper lens develops. 88−19890
optical lithography, high resolution linewidth control 87−11560
optical lithography, high speed reticle writing using scanning laser technology 87−11570
optical lithography, resolution improvement methods 87−11544
optical mask repair, comparison of focused ion beam and laser techniques 88−19866
optical microlithography, conf., Santa Clara, CA, USA (March 1986) 87−10009
optical microlithography, conf., Santa Clara, CA, USA (March 1987) 88−11
optical pattern generator, EM-559, industry test for mask fabrication 86−21305
optical resist, electron beam exposure for mask lithography 88−13224
optical stepper for lithography system *(Japanese)* 86−53504
optical waveguides, double-ion-exchanged glass type, masking process 86−68249
p-n junctions, avalanche breakdown voltage, improvement using different ion implantation mask geometry *(Russian)* 85−11979
pattern check program, MASPAC *(Japanese)* 85−61999
pattern defect inspection in photolithography *(Japanese)* 86−52298
pattern generation using scanning laser system 87−11555
pattern generator cuts mask production time 88−57195
pattern quality specifications for masks and lithographic equipment 87−11554
pattern transfer by dry etching through stencil masks 88−44666
pattern verification through die-to-database inspection 88−203
PC artwork image weight control 85−40346
PC manufacture, dry film solder mask, advantage over screened mask 85−1152
PC manufacture, dry film solder mask process acceleration 85−55290
PC manufacture, dry film solder mask processing for increased productivity and yields 85−1153
PC manufacturing, soldermask: an overview 85−61573
PCB, dry film solder mask lamination, process characterisation 88−38922
PCB, screen printing thermal solder mask 87−17519
PCB, vapor phase condensation heating for curing of solder mask 87−17520
PCB artwork protection and security 88−32621
PCB dry film solder mask cure test 87−11158
PCB liquid photoimagable solder masks 87−53002
PCB manufacture, improved phototool line quality 85−34316
PCB mask testing for contact faults, software *(Russian)* 86−8565
PCB masks, syntactic analysis problem in automatic coding 85−11778
PCB photoimageable resist liquid solder mask debubbling system solves board processing delay problems 88−38897
PCB photoimageable solder mask, Probimer epoxy resin system 85−61576
PCB solder mask: issues and answers 88−12765
PCB solder mask, degree of cure meas. using evaporative rate anal. 87−11136
PCB solder mask appl. technology 86−1517
PCB solder mask bleeding rectification 86−53158
PCB solder mask process optimization 87−17518
PCB solder masking technologies, comparison 87−11161
PCB solder masks for photo-imaging, developments and trends 86−35194
PCB solder-impeding mask, design and appl. *(Hungarian)* 85−40340
PCB soldermasks reappraisal 86−1499
PCB UV-curable solder-mask adhesion, surface prep. 87−53023
PCB/solder mask wiring plane relationship enhancement for reliability improvement 85−23256
PCBs, curing dry film solder masks 85−23216
PCBs, fully automatic repair process for photoemulsionmasks 86−27729
PCBs, Japan's SMOBC option 88−7160
PCBs, new solder mask technologies, an evaluation and justification 88−12832
PCBs, solder mask over bare copper 85−55275
pellicles 1985: an update 85−62013
phase shift masks, optical imaging characts. 85−12075
masks continued
phase-locked interferometry for automatic mask alignment in projection printers 87−67031
photo-imageable screen printed soldermasks 87−59981
photo-projection image distortion correction for 1 μmpattern process *(Japanese)* 85−55648
photoelectrochemical etching applic. to front-to-back mask registration 85−50442
photoimageable solder masks for high-density PWBs 88−32599
photointerrupter with high resolution encoder function moire stripe appl., Sharp GP1A35R *(Japanese)* 88−2080
photolithographic mask protection with PNO films 86−47438
photolithographic mask repair using laser-induced pyrolytic decomposition 87−11557
photolithographic submicron defect detection, backscatt. electron and optical images 85−29089
photolithography, excimer laser applications 87−6519
photolithography, optical overlay meas. system 88−4635
photomask and reticle materials review 86−53516
photomask defect repair by laser pyrolytic deposition 86−47477
photomask defects; causes and solns. 85−23606
photomask inspection and laser-applied repair technology *(Japanese)* 86−53508
photomask inspection instrument, DKG-160, automatic misalignment compensation system 86−24305
photomask linewidth meas. technique using optical microscope 85−29239
photomask pattern data processing system of bit-map method 86−67990
photomask pellicle support ring design 85−1185
photomask protection using glass coverplates 88−1596
photomask reduction camera, 10:1, components and operating conditions 87−11571
photomask repair, focused ion-beam etching technology progress report 88−57540
photomask repair by C opaque film growth by focused ion beam induced deposition 88−57542
photomask repair process for opaque chrome defects 87−6785
photomask repair using focused ion beam technique, substrate damage elimination with RIE 88−19867
photomask repair using focused ion beam technology results 88−57541
photomask repair using focused ion beams 86−8942
photomask repair using NEC SL454A laser repairer with CVD *(Japanese)* 87−68674
photomask stage for linewidth measurement, use of compound parallel spring with reduction flexure levers 86−5511
photomasks, large area type, photocomposition fabrication technique 85−1447
photomasks, opaque defect repair by sputter etching with focused ion beams 88−64455
photomasks, opaque defects, repair using focused ion beams 87−74155
photomasks, repair of clear defects using visible laser beam 85−55626
photoplotting with AutoCAD 86−58177
photopolymers, principles, processes and materials, conf., Ellenville, NY, USA (Oct. 1985) 87−16241
photoresist image hardening using conformable mould, appl. to portable conformable mask bilayer system 87−67049
photoresist mask for B plasma doping into the side-wall of a sub-0.5 μm width trench 88−19801
PLA, masks layout patterns, CAD program *(Korean)* 86−936
PLA folding using inverters *(Japanese)* 87−37192
PLA random-pattern testable design 88−12331
placement of mask critical image in chamfer area of chips 85−29294
PLAs, mask programming, appl. *(German)* 85−11178
plasma etching, electron resist and photoresist comparison *(Czech)* 88−13122
PMMA on Si, X-ray lithography exposures, Monte Carlo simulation 85−34710
PMMA resist patterning, X-ray mask fabrication using focused Ga ion beam exposure and subsequent dry etching 86−9032
poly(2,2,2-trifluoroethyl α-chloroacrylate), high sensitivity ion resist 85−1440
poly(butene-1-sulfone) resist, ion microprojection, submicron deep UV mask fabrication 86−21624
polyimide, direct patterning by pulsed electron beams in soft vac. 88−13225
polyimide as negative electron resist, appl. in crossovers and metal on polymer mask fabrication 86−35515
polyimide filters for radiation with quantum energies 0.1-1.5 keV 86−58359
polyimide for high resolution ion implantation masking 85−23900
polyimide high resolution ion implantation masks, thin film surface morphology and dielec. props. study 87−38074
polyimide X-ray masks fabrication, polyamide acid methyl ester prepolymer conversion 85−33525
polymer ion implantation masks for semiconductor doping, B ion range 85−29120
polymer solder mask testing: a progress report 85−61575
polymer via profile control with laser etching 87−32411
polymethylmethacrylate resist film, X-ray lithography, electron scatt. effects 85−23615
polytrimethylsilymethyl methacrylate co 3-oximo-2-butanone methacrylate deep UV positive resists, O reactive ion etching resistant, prep. and props. 85−55628
polytrimethylsilymethyl methacrylate deep UV positive resists, O reactive ion etching resistant, prep. and props. 85−55628
portable conformable mask process with an improved deep UV resist underlayer 85−1454
portable conforming masking excimer laser lithography using water-soluble contrast enhanced material 88−39291
positioning system for IC components fabrication *(Czech)* 86−8930
positive electron resists, characterisation by GHOST solubility ratio 85−29088
printability of mask defects in negative resist projection photolithography 88−50768
printed circuit protective masks *(Russian)* 88−25716
printed circuits, originals and masks correction *(Russian)* 88−25717
programmable cMOS logic arrays customised with one mask 86−41012
programmable logic array folding and mask pattern automatic generation *(Chinese)* 85−17257
projection printing, two-dimensional optical proximity effects 87−11564
projection X-ray lithography of periodic structures 86−58364
proximity corrections for electron image projection 86−21664
PWB, photo solder mask reliability *(Japanese)* 86−58110

masks continued
PWB pattern, automatic inspection system *(Japanese)* 86−1545
PWB solder masking 87−6243
raster scanned laser pattern generator 88−33107
registration errors using full-field mask aligners 87−11556
repair, focused ion beam induced deposition of Au 88−57543
repair using focused ion beams 88−13219
resist processing, mould controlled profile technique 88−13262
resistive IC with metallic film element, production mask generation using CAD *(French)* 86−27002
response to intense repetitive pulsed X-rays, dynamic response anal. 86−28090
reticle and background, effect on optical modulation 88−16188
reticle changer for step and repeat exposure 86−9200
reticle making by e-beam lithography 88−39307
reticle qualification, defect fidelity on coated glass wafers 88−1740
reticle writer using scanned laser beams from Ateq Corporation 86−15217
reticles, defect detection and location using die-to-database inspection 87−32625
RIE masks, hybrid resist process 85−40822
ROM customisation, GEREST design system for MHB8048 microcomputer *(Czech)* 86−28157
ROMs, mask programmed appls. 85−11235
rotary encoders for length and angle meas. using solar cells, scanning reticle and disc 88−74396
round- and shaped electron beam lithography systems, GHOST proximity effect correction scheme application 85−29087
scanning ion beam lithography appls. 85−23922
scanning laser technology applied to high speed reticle writing 88−7540
screen printing, metal mask stencil vs. emulsion screen, comparison 88−57163
screen printing in PC manufacture, user specification problems 86−20959
screen printing substrate holder 85−28842
semiconductor device manufacture, wafer stepping to high volume production 85−16765
semiconductor industry, pattern delineation technology, overview 86−28409
semiconductor integration, lithography alternatives and trends 88−7425
semiconductor localized diffusion doping through protective mask, stress and deform. anal. 85−12142
shadow projection mask, design and fabrication 85−34733
Si-based noncontaminating shadow masks for MBE 85−44712
silicon compilation environments 86−2325
Silicon Repeater for IC manufacture, optical aspects 85−29301
simulation of the scattering process for a beam of charged particles when passing through a mask in projection systems of ionic lithography 88−57159
SMAs, solder masks, dry film and liquid photo-imageable, comparison 88−1121
SMD production, screenability influences of solder paste and mask design 88−32658
SMT photoimaged liquid solder mask benefits 88−32666
soft X-ray source based on micropinch discharge, X-ray lithography appl. 86−58366
solder mask design and appl. constraints 85−178
solder mask imaging problems for PCBs 87−66722
solder mask over base copper, PC manufacture technique 86−20965
spray etching, automatic end-point detection in mask making 85−61806
stencil masks for submicron lithography, repair techniques 86−35492
step-and-repeat lithographic systems for mask making, overlay anal. 85−29071
step-and-repeat projection printers, pellicle defects effect on fine line images 85−6783
submicrometer lithography, conf., Santa Clara, USA (March 1984) 85−6
submicron defect detect. in IC photomasks, holographic optical processing 86−3380
submicron device fabrication, X-ray lithography use 87−6886
submicron linewidth meas., photomasks and wafers meas. appl. 88−57755
submicron lithography, double diffraction alignment method using checker grating 88−7534
submicron lithography, mask repair methods for Si transmission masks 86−1951
submicron lithography, problems with X-ray technology 86−41651
submicron lithography and DUV-master masks made byion projection lithography 86−21318
submicron lithography system using conventional source X-ray stepper 88−1511
submicron mask, structuring process using photolithography and etching 85−29100
submicron mask repair using focused ion beam technology 87−11533
submicron masks and wafers, high resolution metrology 88−68029
submicron MOSFET fabrication with X-ray lithography 86−9155
submicron optical linewidth metrology at NBS 88−13500
submicron optical lithographic masks, variable proximity corrections 88−7535
submicron production lithography, impact of 1X reticle defects 87−11553
submicron X-ray lithography, mask-to-wafer alignment technique *(Japanese)* 88−7408
surface relief gratings, photoresist mask fabrication 88−51553
switched capacitor filter compiler, synthesizer and mask generator for CMOS gate-array-type filter chips 88−25324
synchrotron radiation lithography, mask making 87−25435
synchrotron radiation lithography, mask-to-wafer alignment technique 87−25036
synchrotron radiation lithography for microstruct. fabrication, high aspect ratio 86−53741
synchrotron radiation X-ray lithography, mask-to-wafer alignment technique 88−13208
synchrotron X-ray lithography, high contrast, using Si masks and Mg beam windows 86−21325
TARIC, a global router for SUPER 88−39659
template-set approach to VLSI pattern inspection 87−74379
trench-forming process, mask form. for RIE 85−1508
two-sided semiconductor wafer alignment 88−32974
uniformly redundant arrays, fast decoding algorithm 88−8806
US Semiconductor Chip Protection Act of 1984, legal protection of mask work 86−15245
user-specific integrated circuits *(German)* 88−1704
UV sensitive and oxygen reactive ion etch resistant material 85−1506
UV solder masks as insulators for PCBs 85−61574

masks continued
UV-curable solder mask, definition and registration, automatic process 88−12791
variable shaped electron beam lithography system, for electron optics principle and control electronic verification 85−29079
VLSI, advanced X-ray alignment system, step-and-repeat 87−11913
VLSI, automatic inspection, GETMASKFILE and COMPARISON modules 85−35118
VLSI, defects in photomasks 85−35096
VLSI, high resolution dimensional metrology system 88−13239
VLSI, high-throughput 1-μm production automation, scanning and stepping lithography 85−7048
VLSI, limitation of optical inspection 85−62050
VLSI, realistic mask specifications 88−44831
VLSI, simple expert system for a mask shop 88−1729
VLSI, visual photomask inspection, illumination 87−60548
VLSI, X-ray lithography for submicron structs., techniques, resists and masks 85−1661
VLSI design rule checking, nearby vector searching algorithm *(Japanese)* 85−62032
VLSI digital circuit mask artwork, hierarchical verification using SLAVE program 85−45759
VLSI layout, orthogonal polygon conversion to boxes 87−25511
VLSI layout compaction 87−53646
VLSI local oxidation mask using implanted Si_3N_4 film 85−1518
VLSI Mask Artwork Checking program, MACH 85−23895
VLSI mask data, concurrent pattern operation algorithm 87−60554
VLSI mask fabrication, improved bounds for covering general polygons with rectangles 88−71724
VLSI mask geometry checking, processor architecture 87−38460
VLSI mask layout rules checking, using image processing methods 87−46131
VLSI mask pattern data, intersection calculation algorithm 85−45823
VLSI mask verification on the Connection Machine 88−63467
VLSI masks defect repair using focused ion beam system 85−29260
VLSI optical mask making techniques 85−23926
VLSI pattern design, polygonal region partitioning algorithm *(Japanese)* 86−62365
VLSI photolithography, focused ion beam repair techniques for clear and opaquedefects in masks 86−21675
VLSI schematics, fast data management method *(Japanese)* 87−23854
VLSI symbolic layout system, integrated MGX 85−1704
vote-taking lithography, mask-induced defect elimination 87−11568
voting lithography with defect detection capability 88−39285
wafer fabrication, conf., Paris, France (Nov. 1986) 88−61
wafer photomask and reticle blanks 88−33106
wafer-to-mask alignment, interferometric displacement detection method using three gratings 86−63152
X-ray, full-field alignment meas. method 87−53622
X-ray lithographic mask alignment using moire signals in refl. 87−63245
X-ray lithographic mask positioning technique using moire interference 87−24987
X-ray lithographic masks, automatic alignment technique using moire interf. 87−38034
X-ray lithographic masks, precision alignment technique using moire interference *(Japanese)* 86−14987
X-ray lithography, broadband source technology 88−39303
X-ray lithography, high resolution, using phase mask 86−41629
X-ray lithography, microfabrication of integrated circuits 86−63378
X-ray lithography, overlayer measurements, automatic procedure 85−34709
X-ray lithography, precision-submicron-dimensional mask 85−40817
X-ray lithography, research programme at Stanford Synchrotron Radiation Laboratory 86−8940
X-ray lithography, review of sources and mask technology 86−21323
X-ray lithography, soft X-ray and plasma sources 86−63379
X-ray lithography, sources and alignment technology for practical appls. *(Japanese)* 86−53506
X-ray lithography, step and repeat, patterning accuracy and overlay performance 87−25030
X-ray lithography, step-and-repeat, high flatness masks 86−35501
X-ray lithography, synchrotron radiation based, parallel mask projection 86−21723
X-ray lithography and mask technology 85−62012
X-ray lithography appl., technological developments *(Czech)* 86−1921
X-ray lithography in 0.2 to 5 nm range 88−39293
X-ray lithography mask distortion during fabrication 86−21329
X-ray lithography masks repairs, UV-laser photodeposition process 85−35047
X-ray lithography stencil masks 87−6801
X-ray lithography system charact. by automated elec. meas. techniques 86−53519
X-ray lithography using SiN masks and Kodak 771 negative resist 88−26143
X-ray lithography using synchrotron radiation 85−34754
X-ray mask, low distortion, using W-Ti absorber 88−64444
X-ray mask, submicron, with Ta absorber patterns 85−34756
X-ray mask defects, detection and printability 87−38038
X-ray mask distortion, process and pattern depend. 87−11535
X-ray mask distortions, causes and meas. 88−7426
X-ray mask fabrication, defect control method 87−25006
X-ray mask fabrication by tri-level electron beam lithography replication by X-ray nanolithography 88−26168
X-ray mask fabrication for lithography *(Japanese)* 88−39287
X-ray mask fabrication process using W absorber 87−38042
X-ray mask fabrication techniques 88−13210
X-ray mask fabrication using fine pattern definition with focused ion beams 85−34757
X-ray mask for submicrometer-channel-length MOSFET fabrication 86−28345
X-ray mask generation, half-micron, by electron beam lithography 85−50369
X-ray mask heating during electron-beam patterning 87−38041
X-ray mask inspection, backscatt. electron signal anal., Monte Carlo simulation 86−13526
X-ray mask making using high resolution electron beam lithography 88−26123
X-ray mask precision, influence of absorber stress 86−35503
X-ray mask repair by focused ion beam milling, influence of sputter effects on resolution 87−11531
X-ray mask stability, effects of stress 86−35502

masks continued
X-ray mask struct. improvement 86−41636
X-ray mask technology, advances 85−7031
X-ray mask technology for step-and-repeat alignment system 87−11534
X-ray mask-making with additive patterning scheme 86−53515
X-ray masks, absorber stress charactn. using holographic technique 86−21324
X-ray masks, alignment mark stability 86−35504
X-ray masks, clear defects-repair by laser induced metal deposition 88−19869
X-ray masks, DC electroplating of sub-micron Au masks 85−1625
X-ray masks, defect repair techniques 85−1629
X-ray masks, electron beam inspection technology 88−39295
X-ray masks, low distortion, using submicron Au patterns 88−64461
X-ray masks, pi-phase shifting scheme to increase intensity slope at feature edges 88−39296
X-ray masks, thickness variations effect on pattern fidelity 87−25003
X-ray masks for synchrotron radiation lithography, ion beam etching prod. techniques 86−21418
X-ray masks in focussed ion beam repair system, identification/removal of opaque defects 88−19868
X-ray masks with electroplated Au absorbers, critical dimension control 87−25005
X-ray masks with subhalfmicron feature size, linewidth metrology using electron beam methods 88−19870
X-ray microlithography, automatic mask alignment 87−25007
X-ray projection method using zone plates for mask prep. with submicron feature sizes 88−26131
Ag mask dependent Si etch rate enhancement 88−33045
Al and Al alloys, reactive-ion-etched, quality, masking resist. prep. effects 85−23719
Al line definition, metal deposited TiW mask 85−23716
Al/a-Si/resist struct., Al taper etching 87−11668
$Al_xGa_{1-x}As$, thermal oxide masks for selective area epitaxy, thermal stability 88−63308
Al_2O_3 resist for focused ion beam lithography, X-ray mask fabrication 88−26157
Ar ion laser CVD, nucleation effects, appl. to photomask repair 87−73138
Ar ion lasers for high speed, high accuracy lithography appl. 88−20579
Au absorber pattern electroforming on masks for X-ray lithography *(German)* 88−50925
Au absorber patterns, submicron, electroplating, ion beam etched multilevel resist technique 86−2055
Au absorber patterns, submicron, for X-ray masks, ion-beam etching fabrication 86−2075
Au/Cr evaporated film as mask for KOH preferential etching 85−23710
Au-C absorber on BCN substrate, X-ray mask fabrication 88−64446
B-H-N amorphous films, LPCVD prep., appl. to X-ray masks 86−34381
BH_xN_y X-ray lithography mask substrates, elec. resist. and radiation damage 88−26132
BN X-ray mask technology 86−8949
BN X-ray masks, radiation damage rel. to film deposition conditions 88−39298
BN lithography masks, X-ray induced damage 88−13222
BN membrane X-ray masks, in-plane distortions, study using diffr. techniques 87−38040
BN technology for synchrotron X-ray masks 88−39297
B_3NH mask membranes, irrad. damage under X-ray exposure 87−38037
Bi_2O_3 coatings for CRT shadow mask, secondary electron emission charact. 88−64215
a-C films, resist masks with high reactive ion etching resistance for nanometer lithography 86−41631
Cr mask fabrication, ashing rate, loading effect obs. 86−15220
Cr mask fabrication by using an electron beam resist, chloromethylated polystyrene, and dry etching process 88−33098
Cr, mask manufacture without etching step 85−45765
Cr master masks and masks for X-ray lithography, e-beam metrology 85−34708
Cr photomask fabrication technique 85−6794
Cr photomasks for VLSI 88−44721
Cr sputtered films, adhesion 88−13295
Cr sputtered films for photomask fabrication, optical props. 85−12082
Cr, thin film, characteristics rel. to deposition methods 85−33506
Cr/Cr_xO_y films for photomasks, optical props. characterisation and linewidth control 85−12074
Fe-Ni, invar, mask for colour picture tubes, discoloration-free realisation 87−1154
Fe-Ni-Co alloy for device metal masks or Si masks 85−7011
GaAs FETs, reactive ion etching of through-the-wafer via connections for contacts 88−19808
GaAs, doping with Zn, sputtered dielectric films as diffusion masks 88−57431
GaAs, etching mask using sputtered Si film 86−67801
GaAs, hot jet etching through stencil masks 87−67118
GaAs ion implanted integrated optics fabrication technology 85−46198
GaAs, magnetron ion etching, high rate masked etching 86−53554
n-GaAs substrates, selective Zn diffusion with sputtered Si mask at 650°C 86−21125
GaAs wafer surface patterning for MMICs 87−1727
GaAs:Zn,Si, selective double diffusion using sputtered Si masks 87−25090
GaAs-GaAlAs HBTs, dielec. film charact. 88−19939
$In_{0.53}Ga_{0.47}As$ MBE-grown masks for focused Ga ion beam lithography 88−64453
$In_{0.53}Ga_{0.47}As$ selective electroepitaxial growth on (100) InP:Fe 87−52151
$In_{0.53}Ga_{0.47}As$, ultrathin semicond. layer masks, high vacuum focused Ga ion beam lithography 88−50761
InP (100) wafers, v-groove etching, photoresist etch mask process 88−26064
InP MBE-grown masks for focused Ga ion beam lithography 88−64453
InP, ultrathin semicond. layer masks, high vacuum focused Ga ion beam lithography 88−50761
Mg X-ray masks and beam windows for contrast enhancement in synchrotron lithography 86−1971
Mo mask removal tool 85−55621
Mo relief masks for SiO_2 fine patterns defining using sputter etched Mo-oxidation technique 85−7025
Mo-GaAs, reactive ion etching using metallic Pt mask 88−26089
$MoSi_2$ film VLSI photomask 87−18219
$MoSi_2$ film high-performance VLSI photomask 87−1598
$MoSi_2$ photomask, charact. and performance *(Japanese)* 86−58360
Nd:YAG laser, appl. mask repair 88−1483
masks continued
Nd:YAG lasers in semiconductor processing 85−55633
Pb electroplating for X-ray absorber patterning 88−26134
Pb-alloy type SJD lift-off technology for preparation of Josephson junction integrated circuits using deep-UV photoresist 88−13700
Si (100) channelling masks for masked ion beam lithography, charactn. and optimisation 87−38032
Si, (110), deep narrow vertical-walled shafts fabrication 86−53558
Si IC, on-chip picosecond pulse generation and sampling using photocond. cct. elements 85−62465
Si X-ray masks, pattern placement and overlay accuracy 87−25001
Si X-ray masks, stress anal. of absorber metals 86−1969
Si and SiO_2, plasma etch rates with AL and photoresist masking 88−13128
Si, dry etching through organic masks 86−58420
Si, etching rates in CF_4/O_2 plasmas, effect of photoresist or Al masking 87−38118
poly-Si film mask for selective area oxidation 85−12180
Si filters for radiation with quantum energies 0.1-1.5 keV 86−58359
Si hole masks for demagnifying projection systems for ion or electron beams 88−26169
Si integrated circuit chips student design, using electron beam generated mask fast turnaround 85−22122
Si integrated circuit wafer mask lift-off process 85−50620
Si lithography masks, X-ray induced damage 88−13222
Si mechanical shadow masks, fabrication 86−2047
Si optical sensor fabricated by masked ion implantation 86−5245
Si periodic hole masks in μm and sub-μm range for electron-multibeam writing 87−25430
Si, polycryst. submicron etching, optimisation, effect of organic and inorganic masks, and their aspect ratios 87−1417
Si, polycrystalline, linewidth control in X-ray lithography 85−1627
Si, reactive ion etching anisotropy enhancement by sidewall protection using Al mask 86−58414
Si shadow mask for colour CRT, fabrication technique 86−14804
Si stencil masks for demagnifying ion projection 88−26144
Si thin film transistor, laser recrystallised, active matrix liquid crystal display appl. 86−31531
Si, thin membranes used in lithography, stress determ. and adjustment 87−25004
Si:B, Ge, stress-compensated membrane, masks for X-ray lithography with synchrotron radiation 87−53655
Si:B, Ge stress-compensated membranes for X-ray masks 86−1968
Si:B X-ray masks, alignment mark fabrication scheme 86−1967
Si:B masks for storage ring X-ray lithography 85−12379
Si:B substrates for X-ray masks, struct. defects 87−38039
a-Si:H inorganic resist, etching and UV light appls. 85−1441
a-Si:H layers, etching patterns for TFTs 86−41702
Si:P, polycrystalline, with tri-level resist mask, selective directional plasma etching 88−71438
Si:P/Al contact, contact resistance improvement by implantation through Al mask 85−1476
Si/Al contact, charact. of Al adhesion to amorphised Si surface, electrical props. 86−28232
$Si\text{-}In_{2-x}Sn_xO_{3y}$ two mask step polysilicon TFT technology for flat panel displays 88−26893
SiC X-ray masks by RF sputtering 88−26133
SiC X-ray masks for submicron device fabrication 88−64445
SiC masks for high resolution synchrotron X-ray lithography, stability charact. 87−25000
SiC masks for synchrotron-based X-ray lithography 88−13209
SiN lithography masks, X-ray induced damage 88−13222
SiN mask technology for synchrotron radiation X-ray lithography 88−26142
Si_3N_4 dummy T-gate and lift-off mask, high-temp. stable films 87−25565
Si_3N_4 films by plasma-CVD from SiH_4-N_2 and SiF_4-N_2-H_2 gas mixtures 85−50438
Si_3N_4 self-alignment mask, advanced nitride self-aligned process for bipolar LSI 85−7065
SiNx film mask for Zn diffusion in GaAs 87−74179
SiO_2, dry etching through organic masks 86−58420
SiO_2, etching rates in CF_4/O_2 plasmas, effect of photoresist or Al masking 87−38118
SiO_2 films, mask material for selectively buried epitaxial growth of GaAs metalorganic CVD 86−40727
SiO_2 ion implantation mask for bubble devices, reactive ion etching with vertical sidewalls 86−28207
SiO_2 mask, Si solar cell fabrication using masked ion implantation 87−16001
SiO_2 masks for proton implantation of (Al,Ga)As stripe geometry lasers 85−18223
SiO_2 selective deposition using plasma-fluorinated resist mask 88−64366
Ti, magnetron reactive ion etching for integrated optoelectronics 85−40649
$TiSi_2$ interconnects appl. in Si-gate process 85−23857
W absorber for low distortion X-ray masks, ion implant compensation of tensile stress 87−25002
W absorber technology for sub-0.5-μm X-ray lithography 88−26136
W masking layer use in producing selectively grown GaAs structures 85−44713
W multilevel IC metallisation with Cr nonerodible mask and etch stop layers 87−67604
W sputtered films for X-ray mask absorber appls., stress optimisation 88−26135
W/SiO_2, mask material for selectively buried epitaxial growth of GaAs metalorganic CVD 86−40727
W-GaAs, reactive ion etching using metallic Pt mask 88−26089
WN_x amorphous absorber, stress compensation with ion bombard., X-ray mask distortion reduction 88−39300

polyethylene, gaseous decomp. products due to high fields and partial internal discharges 85−35220
polyimide surface, in situ anal. of H,C,N and O using direct recoil time-of-flight technique 87−24769
polymer film photoresists, photoablation using synchrotron radiation 88−39333
quadrupole mass spectrometer gas analyser system, microprocessor controlled 87−63250
respiratory gas exchange calc. using mass spectrometer, correction for instrument time constant and transport delay 87−35380
rock chemical analysis, laser microprobe method for C, N, O isotopes 86−50736
scrubbing characts. of CCl_4 and C_2F_6 with Ti sublimation trap determ. 88−71415
secondary ion imaging, with charge-coupled device camera 87−29024
semiconductor process problems anal. with beam probes 87−17877
semiconductors, MOCVD, organometallic precursors monitoring by laser mass spectroscopy 87−10409
signal correction method using deconvolution filter 88−48032
SIMS for highly sensitive H, C, and O anal. *(Japanese)* 87−56888
thermal decomposition study instrument 87−34942
transcutaneous pO_2 probe based on mass spectrometry with low stirring effect 85−48214
triethylindium, reaction with arsine AsH_3 gas, mass spectra study, appl. for deposition of GaInAs 88−63362
ultratrace metals analysis in dopant materials, techniques 85−40607
vacuum arc quenching chamber residue gas content mass spectrometer anal. *(Hungarian)* 88−62510
vacuum instruments for measuring and controlling lasergases, quadrupole gas analysis mass spectrometer 86−22452
variable energy cyclotron, quadrupole residual gas analyser appl. 87−70846
wafer characterization with laser microprobe massspectroscopy 85−62015
Wyodak subbituminous coal molecular structure and reactivity obs. 86−51182
Al-Si wires, corrosion, surface anal. and microanal. investig. 85−34898
CO_2 laser lifetime studies, by mass spectroscopic technique 88−20717
CO_2, long term mass-spectrometric sampling technique for sealed gas lasers *(Chinese)* 88−40116
CdTe films, hot wall reaction tube, mass spectrometric study of vapour comp. 86−7782
CrO_2 magnetic tapes, friction, mech. and surface prop. effects, deform, props. 88−6533
Cu vapour laser, low-temp. operations using vapour-complex reaction of Cu+metal halide 86−22279
Cu_xS-CdS solar cells, comp. of differing junction types, AES, SIMS determ. 87−16003
F containing gases, mass spectrometry in reactive ion beam etching 87−45783
GaAs *(Japanese)* 85−29110
GaAs high-sensitivity microanalysis of impurities using multielement doped GaAs standard samples 87−53352
GaAs:C, low pressure organometallic VPE, in-situ mass spectrometric gas sampling 86−52496
GaAs:Se layers, MOCVD, local doping by laser stimulated diffusion, SIMS obs. 85−50404
GaAs-AlGaAs, etch and etch stop reactions in dichlorodifluoromethane plasma 87−60328
GaAs(100), thermal and ion-assisted reactions with Cl_2 87−1418
$^3He/^4He$ isotopes in seawater, automated cryogenic charcoal trap system 85−26916
InAs (100) SIMS analysis of surface prep. 87−45779
InGaAsP, MOVPE system, gas switching mass spectrometry 87−10396
Li/SO_2 cell chemistry and hazards by spectroscopy and accelerating rate calorimetry 85−49064
$LiNbO_3$ channel waveguides, Li depletion, SIMS characterisation 85−35493
$LiNbO_3$:H channel waveguides, anal. 87−12224
Mo, RIE mechanism using SF_6/O_2 plasma 88−13137
$Ni_{1-x}Mn_{2+x}O_4$, oxide spinels for thermistor appl., O_2 evolution during sintering 87−73157
Pb-In Josephson junctions, RF plasma oxidation, impurity effects 86−42163
SF_6 arc discharge decomposition reaction product determ. 88−39755
SF_6, degradation under gamma irrad. or corona discharge, influence of water 88−71841
SF_6, electrical discharge by-products, sensitive detection 86−47887
SF_6, spark breakdown, neutral decomp. products 86−47888
Si, Czochralski growth, O impurity incorporation 86−21117
Si, DC plasma etching in CF_4 and CF_4/O_2 mixtures, mass spectrometric transit obs. 85−23693

mass spectroscopic chemical analysis continued
Si, DC plasma etching in NF_3 and NF_3/O_2 mixtures, mass spectrometric transient study 85−23701
Si MBE grown layers, arbitrary doping profiles 87−6542
Si clusters, size-selected studied by Fourier transform mass spectrometry, chemistry 88−13113
Si, dry etching, ion-surface interactions study 86−28215
Si, etching by XeF_2, chem. processes 88−13142
Si, gettered impurity identification by laser induced mass anal. 88−7296
Si surface, 100, in situ anal. of H, C, N and O using direct recoil time-of-flight technique 87−24769
a-Si thin films, vacuum system design for contamination reduction 88−49865
Si wafer substrates, oxide removal, transient mass spectrometry, XPS studies 87−6597
Si wafers, etching by NF_3, plasma and reagent pulse induced transients 87−1415
Si wafers, surface contaminants, identification, depth distrib., SIMS 87−11673
Si:Ga(Sb), dopant incorporation during MBE 85−23673
a-Si:H, F solar cells prepared by plasma deposition, elec. charactn. 88−37473
a-Si:H films, plasma CVD, deposition kinetics *(Japanese)* 87−5462
Si:H, impurity anal. and haze generation on surface during ageing 88−7295
a-Si:H solar cell, mass spectroscopy of plasma film deposition coatings 88−37472
Si:O^+, N^+, ion implanted, oxynitride layers, O^+ and N^+ redistribution, mass dispersive recoil spectra studies 88−50695
Si:P films, low press. CVD process characterisation 85−10778
Si_3N_4, plasma etching, mass spectrometry, optical spectroscopy, and XPS study 85−6850
SiO_2, mech. of dry etching, case of direct reactive ion etching 85−34858
W CVD, selectivity loss mechanisms 87−58993
WO_3 films, optical props., stoichiometry influence, XPS and LIMA anal. 87−74865
ZnO films, highly oriented, MOCVD prep. from diethylzinc and alcohols 85−44798
ZnS ALE process, surface reactions, mass spectrometry study 88−31790

matched filters
absorption mains filter, description *(German)* 88−12480
achromatic optical correlator for white light pattern recognition 88−46204
adaptively matched filter performance, effect of intentionally interfering signal 85−30154
analogue and digital matched filter correlators forspread spectrum systems using concatenated codes 87−3043
angiographic time series, digital filtering 85−53044
antimultipath fading, adaptive matched filter and its significance 87−33440
approximate lower bound for the SNR of matched filters 87−61873
artificial nonuniform transmission line with distortionless property, filter synthesis 87−45013
BASIC program for matching filter networks, inductance, capacitance, frequency response and VSWR calcs. 86−13930
bioacoustic research methods applic. to acoustic imaging and pattern recognition 88−27944
biphase frequency shift keying with discriminator detector followed by matched filter 87−75684
broadband source at hydrophone array, combined detection and source motion estimation, thresholds 87−61991
CCD pseudo-noise matched filter, performance degradation and compensation, spread spectrum system appl. *(Japanese)* 86−41229
class 1 matched detection filters using generalised transforms, design 88−3126
CMOS gate array circuits as correlators and matched filters for spread-spectrum signals 88−21933
complex signal, simultaneous detection and arrival time eval., statistical characteris. 87−39777
composite matched filter for image recognition with inexact processing 87−19954
compound rotation-invariant spatial filtering technique 88−33845
computer generated matched filters with spatial frequency tailoring 88−33844
continuous phase modulation signals, coherent detection, average matched filter perform. 85−41932
detectors and optimum receiver filters for digital signals with intersymbol interference *(German)* 87−69104
detectors weighted partial decision and sample-and-sum, in Gaussian noise, penalties 87−75806
DFT, eigenstruct. props. and matched filtering appl. 88−40882
digital, design 86−27480
digital detector of harmonic signals 86−37084
digital filter for processing discrete combined frequency phase-shift keyed signals 86−35017
digital matched filter alignment system using stored pattern comparison, semicond. chip appl. 86−31290
digital matched filter design for correlation props. meas. of Gold codes 88−40790
digital matched filters as correlators for spread spectrum communication systems 86−59777
digital signals with ISI *(German)* 88−3012
digital subtraction and filtration techniques for use in angiography 87−21539
direct conversion radio, digital matching of I and Q signal paths 86−30625
direct sequence communication systems, adaptive filtering of nonstationary interference 88−46856
direct sequence spread spectrum receivers , book contrib. 88−73793
direct sequence spread spectrum system, fading multipath performance improvement, matched-filter use 88−41520
direct sequence spread-spectrum matched filterreceiver 86−64861
direct sequence systems, combined matched filter/serial-search acquisition 88−19256
Doppler frequency shift in matched processing, short-base signals synthesis 88−3035
DS spread spectrum systems, automatic decision threshold level control based on matched filtering 88−46849
echo processor as matched filter of radio pulses packet, operation 86−48930
echo processor operation as matched filter 86−16305
edge recognition, 2D optimum method using matched and Wiener filters 87−62350
electric matching circuit effects on SAW filter parameters *(Slovak)* 87−18458
fast Fourier transformation algorithms for aperture synthesis 88−4101
FH-SS signals in jamming, adaptive nonparametric acquisition 87−40691
fingerprint image enhancement, matched filter design 88−66702
finite length discrete matched filters, signal selection and SNR bounds 86−52929
FIR Nyquist filters with stop-band equiripple, optimum design *(Japanese)* 87−37470
FIR partial response filter pairs with equiripple stopband attenuation, design 88−56808
Forney's whitened matched filter, decision feedback for Viterbi detector 88−27940
four-phase digital matched filtering of spread-spectrum waveforms, expt. results 87−2513
four-port filters, switched multiplexers having low amplitude and group delay ripple 88−25385
Fourier transform matched filtering, acoustooptically addressed 85−36312
frequency multipliers, wideband parallel-type diode, matching network design 86−41269
hard-limited radar channels, design and implementation of filter matched to polyphase code 85−31079
holographic filters for optical image processing 88−34159

matched filters continued
holographic filters in digital-optical hybrid correlation system from processing aerial stereo photographs 88−34781
holographic match filtering with high diffr. efficiency 88−34784
holographic waveguide filter studies 88−26858
hybrid programmable filter appl. as matched filter 88−3817
International Radio Inc.'s 2/1 kHz SSB and 400 Hz CW filters 88−25303
LFM signal processing 87−45002
linear FM signal compression filters, cascade realisation 88−6991
M-ary DPSK signal in satellite aircraft multipath channel, matched filter detection, performance 87−69995
matched filtering using a signal microprocessor TMS320 *(French)* 86−48937
matched four port hybrid filters 87−73620
minimax robust receiver in coloured noise for local deflection 87−61990
Motorola DSP56200 digital filter chip appls. 87−59787
moving-average matched filter design, spectral estimation effects 86−1197
multi-h continuous phase modulation signals, practical receiver struct. 88−8660
multidimensional matched filter, global optimisation, multipaths separation 87−12971
multimode fibres, mode excitation and modal power distrib. meas. using computer-generated holograms 87−68068
multiuser asymptotic efficiency, optimum 87−7881
narrowband AM signals, processing using nonrecursive dig. matched filters 87−69158
nonsinusoidal signals with high average-to-peak ratiosusing orthogonal complementary codes 86−3900
normalized response synthesis 88−40904
NRZ-PAM, matched filter and square synchronizer 86−16109
NTSC encoding and decoding, multidimensional interpretation 88−41025
optical associative memories, correlation based, nonlinearity requirements 88−65128
optical associative memories with correlation nonlinearities, performance anal. 88−65124
optical correlation design, wavelength-angle multiplexing appl. 87−13099
optical matched filtering using holograms on amorphous mag. films *(Japanese)* 88−14308
optical receivers, robust matched filters 88−22078
partially coherent digital matched filters 87−73565
phase-only Fourier hologram as an optical matched spatial filter 88−40047
phase-only matched filter, noisy, under partially coherent illumination, anal. 88−34778
PN matched filters with clock frequency offset, performance degradation and compensation 87−73547
PN spread spectrum, combining with adaptive array 86−30596
pulse train, random, immersed in Gaussian white noise, pattern recognition *(Spanish)* 87−75898
quadratic tasks and the ideal observer, imaging system performance analysis 88−21306
quadriphase spread spectrum equipment, development and expt. results *(Japanese)* 88−15424
radar, moving target detection performance for quasi-matched filtering, Block-FFT method 85−47562
radar pulse compression waveforms 88−60226
radar pulse compressor, digital matched filter design for real-time signal processing 86−59945
radar signal processing, matched filter synthesis, appl. of number theory 85−52409
radar/sonar imaging, new processing algorithms 87−55124
rapid code acquisition algorithm employing PN matched filters 88−59017
rapid pseudonoise signal acquisition algorithms employing charge-coupled device matched filters 85−30282
RC two-stage low-pass band filter efficiency comparison with matched filters 85−49971
real-time polychromatic signal detection using colour liquid crystal television 87−60986
receiver optimisation, for frequency hopping code acquisition jamming 86−30579
recognition reliability in matched filter systems, improvements 88−46150
relaxation method of compensation in an optical correlator 88−21301
robust communication in a time-varying noisy environment 88−66265
rotationally invariant matched filters: Fourier plane on input plane encoding 88−8859
SAW convolvers, appls. to spread-spectrum communications and wideband radar 86−9362
SAW convolvers, use in spread spectrum and other signal processing appls. 86−9361
SAW convolvers for matched filtering, design, operation, performance and signal processing appls. 86−21942
SAW MSK matched filter, appl. to spread spectrum communication system *(Japanese)* 86−28587
SAW MSK matched filter, construction and characts., spread spectrum communication appl. 87−53850
SAW/FET programmable transversal filter for adaptive and matched filtering 87−59694
serial MSK filters, microwave implementation for TDMA satellite communication systems 86−27437
signal enhancement, cross-correlation 88−3099
sonar, range resolution, optimal sequences for detection using a matched filter binary integrator 87−63077
speech pitch boundary detector, robust algorithm 88−66420
spin-matched filter, harmonic interference exposure, noise immunity variation 87−69151
spread spectrum communication systems, programmable RF signal processors design 85−47414
spread spectrum receivers, appl. of matched filters using solid-state technologies 86−27434
spread spectrum satellite communication terminal with coherent matched filter 87−40812
spread spectrum systems, sequential estimation acquisition scheme, matched filtered cascaded sequence 86−55161
spread spectrum waveforms, digital processors *(German)* 87−13562
spread-spectrum system, matched-filter SNR boosts performance 86−43715
synthetic aperture radar processing, appl. of linear FM matched filtering algorithms 85−25922
tandem component filter for pattern recognition, performance eval. 88−40044
telephone signalling system, real-time digital signal processor for multifreq. tones 86−10885

matched filters continued
tubular dispersion waveguides, effect of tolerances on matched filter characts. 85−17772
waveguide holograms for matched filtering systems 88−45568

industrial robots, for nuclear power station inspection, materials handling and dismantling 85−38604
industrial transport systems for materials handling and storage *(German)* 88−5963
irradiated steel reactor components, in hot cell, robot for ultrasonic inspection 87−71827
lignite handling, preparation and combustion factors 86−65938
lignite handling procedures for coal-burning utilities 86−45051
linear induction motor control system for magnetically levitated materials transportation 87−5062
linear induction motors, single-sided, for transportation appls., dynamic behaviour 87−15792
low light level camera system, night-time freight handling appl. *(Russian)* 88−60762
Maglev system for magnetically levitated materials transportation 87−5061
magnetic levitation system with AC magnets 88−69833
magnetic system for conveyance and stacking of plates, optimised release 85−35980
mass flow meas., Granucor system for pneumatic transport *(Dutch)* 87−70488
MF narrowband wireless system for communications and vehicular control in underground mines 85−42498
microdrive, magnetically levitated, industrial appl. 88−43432
mobile robot, V3, multi-axis, AGV-based, for IC production 86−52237
multisite IC handler development 87−6281
nuclear fuel handling and storage systems in nuclear power stations 88−36923
nuclear power plant remote handling equipment, for maintenance and monitoring operations *(French)* 85−38651
odd-shaped components inserter for PCBs 88−50531
PCB, automatic drilling system *(Japanese)* 88−12785
PCB assembly, automating materials distribution 85−28792
PCB assembly industry, latest trends 87−32156
PCB manufacture, materials handling accessories govern production efficiency 85−11751
PCB materials handling process 87−37693
PCB pin insertion, robot appl. 87−17540
PCB workshop and materials handling equipment 86−1528
PCBs, simultaneously feed and register of PCB of variable sizes 85−6603
perchloroethylene as substitute for PCB in transformer insulation 86−45484
permanent magnet linear synchronous motor dynamics for magnetically levitated materials handler 88−62696
Pickering operations fuel performance review 87−57845
pneumatic-metric measurement of material volumes in sealed containers *(Russian)* 87−14619
polyphenyl ether connector lubricants 88−37972
powder bulk density meas. *(Japanese)* 87−63534
powder level meters, ultrasonic types *(Japanese)* 87−63306
power station truck tipper replacement *(Russian)* 88−5505
Process Experimental Pilot Plant opening and verification enclosure remote handling system, design det. 86−25805
pulverised coal flow tests for pneumatic transport into pressurised environment 87−71783
radio communication and control, warehouse appl. 85−63545
rail transport using modular vehicles, linear electric drives appl. *(Czech)* 88−62655
rail trolley, self-propelled electric type *(Russian)* 87−43570
remote automated inspection and maintenance of nuclear power plant equipment 85−43687
remote handling equipment, reliability, maintenance in radiation environment 85−44555
remote handling in nuclear facilities, conf., Oxford, England (Oct. 1984) 85−44396
remote handling operations in space exploration field *(French)* 85−38280
remote handling units, for parts separation in foundry *(French)* 85−39374
robotics and remote handling in nuclear industry, conference, Toronto, Ont., Canada (Sept. 1984) 85−49269
robots and their applications 85−32862
SAD 112, 132 line for final assembly of electric motors 88−30650
semiconductor manufacture, material flow optimisation, wafer transfer reduction 88−31470
semiconductor manufacturing, clean room as a system for contaminationcontrol 86−8952
semiconductor manufacturing, vacuum-compatible low contamination waferorientorsystem 86−53496
semiconductor wafer automated handling in wet process system 86−28185
semiconductor wafer contamination hazards and monitoring principles 88−32978
semiconductor wafer handling equipment to reduce particulate contamination 85−34725
Shinko LIM Liner Series of linear motors, appls. *(Japanese)* 88−11457
Sizewell-B design, health physics aspects 88−43002
speech processing system, audio link aspects 88−72865
stator assembly for video-recorder scanner motors, use of production line variable transport system *(Dutch)* 88−37249
stepping and reluctance special-purpose drives developments for industrial appls. *(Czech)* 88−24177
subassembly supply at Prime Computer Inc. 87−43974
suspended monorail in factory for goods transportation, sorting and storage *(German)* 88−6057
suspended monorail overhead transport system for machines and industrial robots, material handling *(German)* 88−6056
TMI-2, remote sampler for basement radiation anal. 86−25820
TMI-2 remote sludge sampler 86−25819
transfer systems using LIM series linear motors, standardised control units *(Japanese)* 88−11458
two-stage coal liquefaction residue combustion in hybrid boiler 87−30395
underwater petroleum connections, measurement apparatus for guidance implementation *(French)* 85−37491
unpositioned workpieces handling robot with visual andforce sensors 86−47205
vacuum-compatible wafer handler for semiconductor processing 87−1359
vibratory materials handling, influence of power supply on efficiency *(Polish)* 87−15877
wafer-aligning feature for a wafer-lifting device 85−5770
waste-to-energy power plants, control, boiler operation and materials handling 86−70836
weighing by flexible configurable microprocessor-controlled system *(German)* 86−17769
weighing equipment, electronic, design and appls. 87−63538
welding materials management, purchase, inventory and inspection 87−10136
X-Y actuator using linear induction motor, transportation and sorting control 86−6957
Xebec's automated printed circuit board assembly system 86−47190
Al can direct transfer system using linear induction motor *(Japanese)* 88−31255
SF_6 gas-handling system for electrostatic accelerator 85−48148
SO_2 control technology and conventional coal-fired plant waste products compared 86−51470
WF_6, physicochemical props. rel. to CVD for VLSI appls. 87−5492

materials preparation continued
superconductors, metastable, synthesis using high dynamic pressure 88−64999
TLD, background control in production 87−50462
ultra-fine powder prod. using thermal plasmas, fundamentals and applications 87−22923
vinylidene fluoride-tetrafluoroethylene copolymer, prep. and ferroelec. 85−35243
weightless processing in space, profits 85−5785
Al alloys, nonequilibrium processing, applications 86−40793
Al_2O_3-B_2O_3-SiO_2, multilayer glass-ceramic circuit board with Cu conductor, mech. props. 88−18762
As_2O_3-SiO_2 glass, reflow, depletion mechanisms 86−26929
$As_{2-x}Se_{3+x}$ glass fibres, chalcogenide IR, prep. and optical props. 86−521
$BaFe_{12-2x}Co_xSn_xO_{19}$ ferrite particles, prep., struct. and mag. props. 88−57920
$BaFe_{12-2x}Co_xTi_xO_{19}$ fine platelet particles, prep. and mag. props. 88−51251
$BaFe_{12}O_{19}$ hexagonal ferrite particles for perp. recording, precursor method prep. 87−46331
$BaFe_{12}O_{19}$ particles prep. by glass crystn. method 87−44399
BaO-V_2O_5-CuO semiconducting glasses, prep. and elec. props. 87−45619
$BaTiO_3$ piezoelectric ceramics, fabrication from fibrous particles *(Japanese)* 86−26923
$BaTiO_3$ preparation by solid reaction, $BaCO_3$ and TiO_2 aq. suspension stabilisation *(French)* 88−31869
$BaTiO_3$, semiconductor, elec. resist. rel. to mech. processing, X-ray diffr. 86−1754
$BaTiO_3$, tape casting, effects of particle size distrib. and dispersion processes 86−13844
$BaTiO_3$:Mn, synthesis and elec. props. 88−44892
$BaZn_{2(1-x)}(LiFe)_xFe_{16}O_{27}$, permanent magnetic materials, prep., mag. and structural props. 86−9418
C fibre reinforced C composites, mech. strength improvement by whiskering *(Japanese)* 88−12096
C fibre, uses and prospects, conf., London, England (Oct. 1985) 86−45934
C-C composites, elastic anisotropy during fabrication process 87−71475
CO_2 pulsed laser, medium repetition rate, materials processing appls. 87−12412
$CaSiTiO_5$-$CaTiO_3$-TiO_2 system, HF capacitor ceramics prep., permittivity, losses, elec. resist. 88−12092
$CaTi_4P_6O_{24}$-based low thermal expansion ceramics 86−13845
CdSe particles chem. bath precip. for use in photoelectrochemical cells 88−5819
CdTe thin film solar cells, rapid isothermal processing 88−37568
Co ferrite fine particles, synthesis and charactn. for coloured magnetic toner 88−44960
$Cs_2NaYF_6:Ce^{3+}$, prep. and prospects for tunable blue-green lasers 86−9800
Cu, finely divided powder, comparative anal. for hybrid IC 86−27761
Cu-O based high T_c superconductors, practical preparation methods 87−74562
CuGaSe chalcopyrite thin film growth by metallic film selenisation, struct. and chem. props. charactn. 87−58955
$CuInSe_2$ thin film solar cells, rapid isothermal processing 88−37568
Fe-Nd-B permanent magnets, prep. by liquid dynamic compaction 87−23746
Fe-Si, electrical steel, nonoriented and grain-oriented, development 86−35972
$Fe_{14}Nd(Y)(Ce)_2B$ fine particles prep. by hydriding, mag. props., recording appls. 87−25762
γ-Fe_2O_3 fine particles prep., one-step process involving thermal decomp. 86−26931
γ-Fe_2O_3 particles, low temp. synthesis, mag. props., particle size and morphology 88−57919
Fe_3O_4 particle dispersed polymer film, precip. prep., mag. recording appl. 87−67765
FeSi, prep. and secondary recryst. processes, power loss meas., review 86−15351
InP, polycrystalline, large scale synthesis and growth, elec. props. 88−24692
InP thin film solar cells, rapid isothermal processing 88−37568
$LaCrO_3$ based ceramics, synthesis, elec. and mag. props., conducting lead appl. 85−39817
Li ferrite, prep. from solns., anal. of formation stages 86−516
$LiAlO_2$ porous electrolyte matrices for molten carbonate fuel cells, hot-roll-milling technique 88−37378
$LiNbO_3$:Ti waveguide fabrication in the presence of water vapours, kinetics 85−35482
$Mg_2Al_4Si_{5-x}Ge_xO_{18}$-based low thermal expansion ceramics 86−13845
MgO-Al_2O_3-SiO_2 glass-ceramics for electronic packaging, nonconventional route 87−23753
Mn-Li-Zn ferrite powders, prep. by chem. method using metalorganic salts *(Polish)* 86−40800
MnZn ferrite power, molten salt synthesis, EM shielding appls. 87−39397
$MoSe_3S$ cathode for secondary Li batteries, prep. and characterisation 87−36099
$MoSi_2$ heating elements, microstructure study *(Russian)* 88−62762
Na_2O-CaO-SiO_2 coating glass for optical fibres, preparation 87−337
$NaZr_2P_3O_{12}$-based low thermal expansion ceramics 86−13845
Nb_3(Al, Ge) supercond. composite tapes fabrication by liq. quenching technique 85−62226
Nb_3Al supercond. tapes, fabrication and critical current meas. 88−45003
Nb_3Ga(Al) superconducting composites, synthesis by laser beam irradiation 86−36087
Nb_3Sn multifilamentary superconductors, prep. and props. *(Slovak)* 86−28725
Nb_3Sn powder, prep., supercond. critical temp. 87−53910
Nb_3Sn stranded conductors, external diffusion processed, critical current, effect of strain 85−46044
Nb_3Sn supercond. development by solid-liquid diffusion method 85−56244
Nb_3Sn superconducting coil, fabrication procedure 86−42201
Nb_3Sn tape conductor and multistrand wire, fabrication and performance 85−62216
Nb_3Sn-Cu superconducting wire, combination bronze in situ prep. process 85−56158
Nb_3Sn-Ti multifilamentary conductors, Nb tube method processing, props. and performance 85−62217
NbTi/Cu composite multifilamentary wire, production for Superconducting Super Collider 88−38274
$(NbTi)_3Sn$ superconducting coil, fabrication procedure 86−42201
Nd-Fe-B permanent magnet, properties and fabrication procedures *(Japanese)* 86−42145

materials preparation continued
Nd-Fe-B permanent magnets, mag. props. and prep., review 87−60789
$Nd_2Fe_{14}B$, permanent magnet production, hydrogen decrepitation process 87−53898
PLZT, transparent ferroelec. ceramic, fabrication, charact. and appls. *(Japanese)* 86−35943
PZT fibrous piezoelectric particles, synthesis and elect. props. *(Japanese)* 88−26596
Pb based ferroelec. relaxors, MLC capacitor appl. 87−52898
$Pb(Fe_{1/2}Nb_{1/2})O_3$, thin films, sol-gel prep. and dielec. props. 87−65579
$PbMo_6S_8$, supercond. wires, prep. by electro-plating technique, props. 85−46038
$PbMo_6S_8$ tapes, fabrication, metallurgical charact. and supercond. props. 87−67835
$PbNb_2O_6$ modified piezoceramics, coprecipitation prep., electromech. props. 87−53796
$PbNb_2O_6$ piezoceramics for US transducer design, prep. and charactn. 87−53800
$PbO-K_2O-B_2O_3-SiO_2$ system, GRIN glass rods prep. by sol-gel process 88−43951
$PbTiO_3$ gels and films, hydrolysis conditions effect on charact. 87−23754
$PbTiO_3$ modified piezoceramics, coprecipitation prep., electromech. props. 87−53796
$PbTiO_3$ piezoceramics for US transducer design, prep. and charactn. 87−53800
$PbTiO_3$ powder, coprecipitated, piezoelec. composite prep. 87−53772
$PbZn_{0.33}Nb_{0.67}O_3$-$PbTiO_3$ solid solns., sol-gel processing 87−52217
$Pb(Zn_{1/3}Nb_{2/3})O_3$-$PbTiO_3$ ceramics, synthesis and piezoelec. props. 87−53799
$PbZrO_3TiO_3$-polymer, fired 0-3 composites, prep. and piezoelectric props. 87−67630
$Rb_2NaYF_6:Ce^{3+}$, prep. and prospects for tunable blue-green lasers 86−9800
Si film prep., photovoltaic cell appls. *(German)* 88−37393
Si, porous, formation and microstruct., expt. and theoretical study 86−26930
Si prepared by advanced carbothermic reduction of silica for solar cell fabrication 86−71065
Si solar cell production by aluminothermic reduction of quartz sand 88−18014
$a\text{-}Si_{1-x}C_x:H$ semicond., glow discharge prep. and optical props. study 88−24766
SiO_2 glasses, prep. by sol-gel technique, dielec. props. 87−23762
SiO_2, high percentage in sol-gel procedure for optical fibres production *(Croatian)* 87−12203
SiO_2-TiO_2 glass planar optical waveguides, fabrication by soot deposition process 87−53965
Sm-Co permanent magnets, preparation by reduction-diffusion process 85−1855
$Sm(Co, Cu, Fe, Zr)_{8.92}$ powder prep. by H decrepitation, mag. props. 85−22548
$Sm_2(Co, Fe, Cu, Zr)_{17}$, permanent magnet production, hydrogen decrepitation process 87−53898
$SmCo_5$, permanent magnet production, hydrogen decrepitation process 87−53898
Sn surface brightness, improved solderability using sulphate electrolyte *(German)* 85−54140
$SnMo_6S_8$ tapes, fabrication, metallurgical charact. and supercond. props. 87−67835
Sr ferrite fine particles, prep., mag. props. *(Japanese)* 87−25789
Sr ferrite particles, colloidal, uniform, prep. 88−31863
$SrFe_{12}O_{19}$ hexagonal ferrite particles for perp. recording, precursor method prep. 87−46331
$SrFe_{12}O_{19}$ small particles, prep. and mag. props. 88−51252
TiO_2 sol-gel process, synthesis, structure and appls. 87−23755
TiO_2 varistor powder, efficient process for vol prod. 85−17004
V_3Ga composite tapes, in situ processed, microstruct. and supercond. props. 86−28727
$V_{40}(Hf, Zr)_{60}$ supercond. composite tapes fabrication by liq. quenching technique 85−62226
W-TaC, field-emission cathodes, manufacture 85−23310
Y-Ba-Cu-O high T_c supercond. ceramic wire prod., powder-in-tube process and props. 87−59017
Y-Ba-Cu-O high T_c supercond., manufacture and testing 87−59016
$YBa_2Cu_3O_7$, superconducting ceramic prepared using sol-gel process 88−63388
ZnO varistor ceramics, manufacture, microstruct., elec. props., book contrib. 88−1033
ZnO varistors, urea process synthesis, thermal evolution 88−71140
$ZnO-CoO-MnO_2-Bi_2O_3-Sb_2O_3$, varistor system, prep.. by evaporative decomp. of solns. 88−7076
ZrF_4-BaF_2-LaF_3-AlF_3 glasses with low intrinsic Rayleigh scatt. 85−1950
ZrF_4-based optical fibres, formation of extrinsic ZrO_2 scatterers 88−26781

annual review of materials science, book 86−26486
annual review of materials science, book 87−10018
composite material for the future, review 88−6532
corrosion, strength, temp. and conductivity frontiers of materials 88−31704
electronic packaging materials science, conf., Boston, MA, USA (Nov. 1984) 86−13304
future materials needs, conf., Crystal City, USA (Oct. 87) 88−43601
material design system for ferrites (MAGSYS-F) using knowledge engineering *(Japanese)* 87−7000
materials engineering and electrotechnics, demands on engineering education in the future 85−33376
new materials and applications, conf., Coventry, England (Sept. 1987) 88−62886
space materials, conf., Seattle, USA (Oct. 1986) 87−36342
C fibre, uses and prospects, conf., London, England (Oct. 1985) 86−45934

materials requirements planning *see manufacturing data processing; operations research; production control*

materials testing
see also acoustic applications; corrosion testing; creep testing; dynamic testing; electron beam applications; fatigue testing; fracture toughness testing; hardness testing; impact testing; insulation testing; mechanical testing; nondestructive testing; notch testing; tensile testing; ultrasonic materials testing; wear testing
1 to 3 GHz range, for radio-technical use, compensation-dynamic method *(Slovak)* 87−21216
20 MN multiaxial loading rig for nuclear structure integrity testing 87−44417
68-lead PLCC moisture absorption and mechanical performance of surface mountable plastic packages 88−63050
500 kV XLPE cables, R&D 87−30211
AC testing of soft magnetic materials, digital parameters *(Polish)* 85−39835
acoustical examination of construction elements, standpoints *(Hungarian)* 88−61702
AE of graphite with stress concentration *(Japanese)* 87−59030
Ag-Pd-C self-lubricating composite brush materials, contact voltage drop and wear 88−38810
analysis of space charge in insulating materials under non-uniform electric fields 88−1826
anisometer for electric sheet metal characterisation *(German)* 86−24710
antistatic floor covers 88−34225
aramid optical fibres, stress-strain properties 88−26824
ASTM testing for EMI/RFI shielding 85−46594
AT-cut quartz crystals, radiation effects on acoustic loss spectra 86−42028
ATE facility for nuclear power industry environment *(Czech)* 88−47400
ATE for destructive materials testing *(German)* 86−49932
AUPAL 2000, new Au-Pd contact surface 87−52960
automated materials testing, profitability and reliability *(German)* 87−44433
automatic system for computerised anal. of powders testing and production *(Spanish)* 88−56350
automatic testing system, computer-controlled, advantages *(German)* 85−20464
bimetals, test stand for characts. props determ. *(Polish)* 85−55181
boiler tube dissimilar-metal weld failures, accelerated laboratory test 87−23799
bondability of metallization surfaces, charactn. method 88−1292
brushes for homopolar machine, high-current high-slip-speed sliding contacts, materials and design 88−38808
C70250−a new copper alloy for electronic packaging 87−52211
cable insulation, toxicity of the products of combustion 88−25606
cable insulation life prediction based on Weibull accelerated testing without failures 85−38510
cellular insulation percent expansion, method for determ. 88−26601
ceramic material, operational reliability and safety factor 87−23750
ceramic Z5U MLC capacitors, mech. reliability 87−24503
ceramic-coated metal substrates in hybrid IC 88−1271
ceramic-metal seals, effects of metallic parts strain and stress reduction *(Chinese)* 85−55356
ceramic-metal seals, fracture energy, microstructural and chemical components 87−23359
chemisorption technique for trapped gas analysis 85−6033
chip die bond materials and interfaces, AES/ESCA/SEM/EDX studies 85−7042
chip-on-board IC encapsulation, liquid-drop epoxy resin 88−37982
coal abrasive props. meas. 85−27149
coal characterisation and ranking for gasifier slurry concentration potential 87−71782
coal delivery and testing for flow reliability enhancement 86−61385
coal gasification behaviour, TVA gasifier tests 87−50916
coal-water slurry viscosity and solids conc. rel. to temp., 27 to 93 °C 88−10958
coal-water-slurry fuel quality test procedures and laboratory standards 86−12551
combustion toxicity of materials and products, test methods 88−24850
combustion toxicology, principles, methods, and regulations 88−24849
compatibility of wire enamel and impregnating agent bymeans of bond strength evaluation 86−62317
composite, digital image correlation methodology use for deform. quantification 87−31618
composite, surface interaction with resistance-type strain gauge, opt. obs. 87−36844
composite materials, computerized thermal property testing 85−485
composite materials development *(French)* 87−44406
composite panel, whole-field strain determ. using coherent opt. processing 87−31619
composites testing, conf., Guildford, England (Sept. 1983) 85−28
computer graphics system for stress and strain anal. 85−28273
computerised instrumentation for meas. of partial discharges in dielectric materials *(Italian)* 86−44196
contact fretting in electrical connectors, survey 85−50086
contact material combinations testing, computer-aided expts. *(German)* 85−23181
cryogenic materials, conf., St Charles, IL, USA (June 1987) 88−37859
cured epoxy die attach adhesives, meas. and significance of extractable ionic impurities 88−471
DC partial discharge testing, ramp technique 85−33536
deep level spectrometer, modern, and characterisation application of semiconductor materials and structures *(Hungarian)* 87−52248
defect centers in semiconductors obs., apparatus with automatic temp. control 86−67654
defluxing solvents for military printed wiring assemblies 86−58152
degradation of composite materials, effect on dynamic response of large space structures 87−333
detector of insulator breakdown *(Spanish)* 88−57829
diamond turning marks for mag. storage devices, machined surface, STM study 88−56342
dielectric and encapsulant layers, adhesion testing, moisture detector technique using Ag ion migration effect *(Polish)* 85−35247
dielectric materials, rapid thermal ageing test, thermogravimetry-point-slope method 86−68023
dielectric materials, transient method for measuring thermal conductivity, computer-aided 88−42308
dry etch resistance of metal-free and halogen-substitutedresist materials 85−50648
elastomeric polybutadiene sealing compound for sealing elec. motors 86−62278

materials testing continued
electrical insulating materials testing, instrumentation overview 86−62311
electrical insulation materials, ageing degradation, viscoelastic characts. 86−57513
electrical insulators for liq. metal blankets of fusion reactors 87−25729
Electrical Overstress/ESD Symposium, Orlando, FL, USA (Sept.-Oct. 1987) 88−49369
electrical props. eval. of microelectronic materials, novel expt. techniques 88−56357
electrochemical measuring methods for corrosion in metals *(Dutch)* 85−44808
electrochemical measuring methods for corrosion in metals *(Dutch)* 85−44809
electronic equipment cooling by vapour, working liq. and wicking material selection 88−24572
electronic material surface analysis and depth profiling 88−24853
electronic materials characterisation, recent trends *(Japanese)* 87−5556
electronic materials quality and inspection *(Polish)* 85−18193
electronic packaging materials science, conf., Palo Alto, CA, USA (Apr. 1986) 87−23022
electronics and microelectronics appls. of photoelectron spectroscopy 87−65606
electronics gases and volatile reagents for device processing, reliable trace characterisation 85−40586
electrostatic discharge materials testing, using US Federal Standard 101C, Method 4046.1 85−10841
EM shielding effectiveness meas., instruments 85−62842
EM testing using RL- and RC- multivibrators 85−39830
embrittlement of crosslinked poly(vinyl chloride) insulation 88−24848
EMI shielding, mechanical and physical parameters consideration 86−3582
EMI/RFI shielding, plastics appl. 85−46593
energy conversion systems and batteries, materials testing packages 87−72358
environmental test facility for accelerated exposure test *(Japanese)* 87−36850
epoxy blob top encapsulants, phys. and elect. testing 88−24575
epoxy insulation study using X-ray computing tomograph 87−6946
epoxy joints and matrices for composites that must endurethermal cycling 86−26926
epoxy laminate, failure analysis using microsurgery 85−54578
epoxy molding compounds, moisture sorption and its effects upon microstructure 88−24582
epoxy spacers, influence of X-rays on partial discharges in voids 88−24536
epoxy-glass composites, dielec. loss meas. of moisture 85−37809
ESD dissipative material resistance meas. with two-point electrode 88−49541
ESD materials testing to avoid static problems with microelectronics 88−43972
ESD protection materials test procedures 86−46060
ethylene-propylene rubber, effect of molecular structure on dielec. props. 88−26624
exploding foil switches, testing of materials changes during opening 85−5336
extensometer using light interferometry for high accuracy 86−55838
fabrics for flexible ccts., tear props., reinforcement effect 88−25637
fiber optic composite impact monitor 87−56681
fibre optic sensor development for high speed material diagnostics 87−36854
fibre optic sensors developments and appls. *(Czech)* 88−33616
fibre reinforced composites, defects and quality assurance methods *(German)* 86−46395
fibre reinforced plastic strength member for non-metallic optical fibre cables, life testing *(Japanese)* 88−67384
filled epoxy casting resin, PD meas. with automatic measuring system 88−64838
fire behavior of insulating materials, characts. and prospects 86−68094
fire hazard analysis of dielectric materials−a new approach 87−23288
fire hazards assessment of elec. insulating materials, and systems, development of guides 87−23287
fire parameters and combustion properties of cable pulling compound residues 88−25604
fire-retardant cables for nuclear power plants, development 86−70691
fires, toxicity of multiple fire gases, what kills people in fires 87−23289
flame retardant nonhalogen wires and cables, develop. 86−56435
flexible optical solar reflectors 87−52221
flux evaluation criteria for rosin andsynthetic-activated formulations 86−57514
fretting corrosion of separable electrical contacts 85−53791
Fujitsu, laboratory automation system for materials testing of IHI Research Institute *(Japanese)* 88−12107
functional characterization of positive optical resists 87−11901
glass fibre reinforced plastics, components in power station cooling water systems, design problems 85−48869
glass-cloth/epoxy composite, dielec. and mech. props. interactions 88−467
glass-to-metal seals, microelectronic packages, thermal shock test, package lid effect 87−17552
graphite/epoxy, struct. props. for avionics chassis design 86−52537
green leaves material indices study, elec. and physical meas. 88−64800
heterogeneous materials, time-domain spectroscopic meas. of dielec. props. 88−29594
high voltage testing 88−55950
high-capacity transformers, EM device for structural element investigation under axial dynamic forces 86−33455
high-current arc gap with ablative wall: dielectricrecovery and wall-contact interaction 85−49657
high-quality quartz crystals, production developmental results 87−32788
high-temperature gas turbine material life prediction, conference, Syracuse, NY, USA (Aug. 1985) 86−56651
highly flexible flame-retardant silicon rubber coated fibreglass insulating sleeving, properties and testing 86−62272
holeburning storage materials capable of room temperaturecycling 86−58733
homopolar generator contacts, high current/slip speed type, materials development and testing 88−11238
HV capacitor fluids screening tests, low temp. partial discharge props. 85−65412
HV insulation materials condition estimating methods *(Czech)* 85−39822
HV machine insulation 85−16015
HV machine insulation behaviour under thermal and elec. stresses 85−38961
HV polymeric insulated cable accessories, test methods 88−23539
materials testing continued
hybrid microcircuits, materials-related current-leakage failures 86−62978
hybrid package moisture reduction by reactive organic die attach adhesives 88−19569
hydraulic bulge test on linear strain-rate-hardening material, anal. *(Japanese)* 87−59031
IC manufacture, materials and process characterization using ICP and AES 87−60247
IC materials analysis and testing at APL 86−20978
IC plastic packages under temp. cycling, life estimation based on fracture mechanics 87−73213
image analysis developments in materials science, review *(French)* 88−56347
immersion tin: its chemistry, metallurgy, and application in electronic packaging technology PTH PCBs 85−23254
impedance spectroscopy for materials testing, theory and use of programmable frequency response analyser *(Italian)* 88−4324
impregnant-polypropylene interactions in the all-film capacitor configuration 88−1049
impregnated paper insulated cables under AC stresses, PD spectra anal. 88−68959
induction-probe magnetometric instrument for temp. investig. during heat treatment 87−44436
industrial NDT appls. of holographic interferometry *(Dutch)* 88−27336
inorganic die attach adhesive−processing issues 86−14770
inspector retraining with aid of computer *(German)* 86−13324
insulating material accelerated life test data, computer graphic analysis *(Hungarian)* 86−2484
insulating materials, flame resistance testing in Italy *(Italian)* 87−1810
insulating materials for LV electrical equipment, insulation testing 85−56036
insulating materials partial discharges detection and processing *(German)* 86−50209
insulating oils, gamma-ray effects on elec. props. 87−25714
insulating thin film testing, conducting occlusion determination using magnetic device *(Russian)* 86−9330
insulation endurance under electrical, thermal and combined stresses *(Italian)* 86−68075
insulation multifactor stress 86−9331
insulation tester, portable, design *(Japanese)* 88−75210
insulators, comparative tracking index test using Cu electrodes 85−55986
interconnect technology, rapid statistical eval. using electromigration testing technique 87−18035
laboratory automation system *(Japanese)* 86−70009
LDPE, aged, surface cond. 88−64864
LDPE, space charge accumulation meas. using field probe 85−32188
LDPE, zero-field position determ. by thermally stimulated surface potential meas. with temp. gradient 88−469
LDPE films in cryogenic liquids, PD streamer interaction with polymeric films 88−44928
liquid crystal polymer for SMT appls., thermal expansion and dimens. stability tests 88−18499
liquid dielectrics, HV elec. props. meas., expt. methods to characterise 88−44903
load verification of testing machines, performance evaluation of testing machines 86−18149
low quality factor ceramics testing characterization, using optimization techniques *(French)* 88−56334
lubricants, polyether fluids 87−37647
LV fuse extinguishing media, candidate materials and test results 87−66659
machine insulation life estimation under combined elec. and thermal stress 85−38960
machine winding magnetic steel, materials testing by waveform sampling 85−27385
macroencapsulation conformal coating for electronic equipment 88−18502
magnet wire windability and formability, characterization and measurement 86−62875
magnetic disc media characterisation, magnetostriction meas. technique and test fixture 85−8939
magnetic materials' props. meas. in varying magnetic fields of high freq. *(Polish)* 88−68013
magnetic materials testing, standard specimens appl. 85−44816
magnetic materials testing by continuous stepwise variation of magnetising fields 88−36190
magnetic shielding, drop test study for effectiveness deterioration assessment 87−2320
magnetic steel, for electric motor applications, standard magnetic testing by waveform sampling 85−52638
magnetoelectric installation for continuous meas. and recording of stress relax. in torsion 86−57511
MARS tandem mirror reactor, normal conducting insert coil, materials design rel. to radiation damage 85−2492
materials inspection, review of test methods *(German)* 85−6040
measurement of complex coefficients for thick PVDF polymer 88−56360
mechanical testing, automatic, rubber bearing test appl. *(German)* 85−26189
metal meshes as electrode retainers and separators in Al-FeS_2 secondary cells with molten NaCl electrolyte *(Japanese)* 85−60388
metal specimens, destructive testing in pulsed mag. field 85−22566
metal-cordierite systems compatibility studies for electronic packaging 87−73161
metallic materials surface flaw inspection using computerised picture processing system *(Japanese)* 88−31884
MHD generators, coal-fired, ceramic channels testing 85−21836
mica-epoxy composites, mech. props. prediction and depend. on failure modes 86−62275
microelectronic packaging and materials characterisation, differential scanning calorimetry 85−34372
microwave antenna systems design, plastics technology appl. 85−46628
microwave broadband simultaneous complex permitt. and permeab. automatic meas. 88−74574
microwave conductivity and permitt. by cavity perturbation method 85−52852
microwave dielec. substrate meas. method 88−74575
microwave ferrites, complex magnetic and dielectric material parameters meas. method 85−12497
miniature fuses using ablative materials, design and breaking capacity tests 87−66664
minority carrier lifetime meas. technique using MOS capacitor 85−40580
MM-wave dielectric properties 85−8947

materials testing continued
mobile material testing, possible methods *(German)* 87−10527
motor manufacture, testing and electrical QC 87−9460
motor-cycle tyres adhesive charact., computer-aided meas. system *(German)* 88−67681
multicavity dilatometer, circuit board material and plastics testing 88−63406
multicomponent polymers, predictive design for PCBs 87−24553
novolak-based photoresists, DSC anal. 87−53623
nuclear power station shut-off valve, vibr. tests of hydraulic drive 88−23671
O-ring automatic testing for surface defects *(German)* 87−31278
oil-paper power cables with synthetic oil, performance and elec. charact. 87−30215
olefinic dielectric materials, vented water trees length distrib 87−16710
on-line quality data acquisition in material testing *(German)* 88−60617
optical fibre cable, residual tensile strain meas., for determining long term reliability *(Japanese)* 85−35506
optical fibres, strength meas. by bending 87−25971
optical methods in composites, conf., Keystone, USA (Nov. 86) 87−31136
organic insulating materials, ageing processes model, spectrometry with partial discharges 87−53761
organic photoreceptor materials for electronic photography *(Japanese)* 87−54155
oven drip performance of filling compounds in cables 88−24851
paper-oil insulation, influence of voltage prestressing on dielectric strength 87−25716
paraffinic oils, low-temp. physical behaviour 85−60240
passivation silicone elastomer vulcanized by the hydrosilation reactionand its influence on properties of a modified MOS device 85−55835
PCB electroless Cu metallurgical samples fabrication 86−8604
PCB epoxy resin gel permeation chromatography analysis 85−34315
PCB woven fabric composites, performance optimisation 87−24552
perfluorocarbon liquid/plastic film capacitors, material performance anal. 87−24499
permanent-magnet single-sided eddy-current brake performance rel. to disc material 87−51216
personal computer appls. for materials testing and anal. 86−4988
PET films, heat treated biaxially drawn, dielec. and mech. props. 85−56028
PET films, thermal endurance tests combining reaction rate meas. with ageing tests 87−16743
Philips PM 3360 signal analyser for difficult meas. *(German)* 87−8566
photomechanical analysis of composite and other materials 88−49919
photoresist adhesion testing method, VLSI fabrication appl. 85−29286
piezoceramic material analysis and characterisation for high-power US transducers *(French)* 88−39760
piezoelectric solids elastoelectric response to cyclic stresses obs., using computerised system 87−16766
plastic composites, EMI shielding effectiveness meas., using dual chamber facility 85−44804
plastic encapsulants for ICs, thermal cond. meas. techniques 87−18241
plastics, deflection temp. meas. under flexural load, improved method 85−6041
plastics enclosure shielding techniques, characteristics and test methods 87−26877
plastics for electric connectors, deterioration due to heat *(Czech)* 87−31592
plates, PWR nozzle intercontinental round robin testing, NDT and destructive exam. 88−482
polycrystalline semiconductors, experiment planning and metrological preparation 86−26940
polyester powder painting for public telephone equipment *(Japanese)* 85−25587
polyester resin and composites charactn. by DSC and TGA 86−62279
polyethylene, elec. ageing effects 88−64863
polyethylene, high-field dielec. dissipation factor 85−32190
polyethylene, PD meas. with automatic measuring system 88−64838
polyethylene electrical treeing, effect of absorbed O 85−56027
polyethylene insulated conductors, linked, reticulation density meas. using IR spectroscopy *(German)* 86−63501
polyethylene tape/oil cable insulating system subjected to elec. and thermal stress 88−68960
polyethylene water treeing using the water needle method: the influence of the magnitude of the electric field at the needle tip 88−64840
polyimide films for multilayer interconnects, stability and performance study 88−1190
polyimide resin for IC, thermal cycle and thermal shock tests 88−63394
polyimide thick film resistor system on insulated metal substrate, charact. 88−50428
polyimide wire insulation, hydrolysis temp. depend. 85−35248
polyimide-substrate bonding studies using γ-aminopropyltriethoxysilane coupling agent 86−62283
polymer coating effect on residual currents of MOSFETs 85−55836
polymer conformal coatings for PCBs, effect of process parameters on insulation resistance 87−37649
polymer dissolution rates meas. 85−50645
polymer electrical tree resist. tests, effect of sample prep. technique 88−30391
polymer film gas filled gaps, aspects of surface elec. charge 88−68961
polymer insulation pyrolysis testing, use of thermal imaging for the development of materials to withstand extreme service conditions 88−64868
polymer water treeing in cable insulation−are laboratory tests meaningful? 88−68962
polymeric coating purity testing, instrumental techniques 88−18769
polymers, shock absorbing characteris. *(Japanese)* 87−59022
polypropylene film immersed in silicone oils, interface traps and swelling 85−56029
polypropylene films in cryogenic liquids, PD streamer interaction with polymeric films 88−44928
polystyrene recovery voltage in capacitor dielec. absorpt. and equiv. cct. 87−52902
porcelain suspension insulators, cement growth failure mechanism 87−35673
positive photoresists, shelf life prediction based on accelerated ageing techniques 88−19888
powders for magnetic tapes *(Russian)* 88−20237
power capacitor dielectric materials testing 87−36088
power plants, condenser performance test and replacement tubing material evaluation 88−75277
power supply circuit testing, HV failure anal. and material eval. 86−20308
precious metal electrodeposits, make and break props. 85−50081
programmable analyser, metallurgical test appl. 87−20985
materials testing continued
PVC-S under fluctuating load, mech. behaviour *(German)* 87−44413
PVC-Sb_2O_3 flame retardant system, thermal anal. 86−70690
PWB bar-code label materials eval. 88−32605
PWB bar-coding label materials eval. 88−32612
quality assurance, computer-aided systems *(German)* 88−59673
quality assurance system, auxiliary element of materials testing 85−44811
quartz, cultured, quality standard updated by EIA 88−18812
quartz for crystal resonators 86−42024
quasistatic CV meas. in semiconductors, improved feedback charge method 87−21227
rail launcher electromagnetic-electrothermal technology and materials test facility 87−26661
railgun bore insulator material selection and evaluation 87−26706
railgun insulator and rail erosion expts. 87−26654
railgun insulator materials test 87−26695
Raman spectroscopy appl., semiconductor materials and devices testing 86−2093
reduced emissions plenum cable telephone jacket compounds 88−21907
reference materials for surface analysis, national and international standards activities 88−24854
refractories, crack resistance and crack sensitivities of different structures *(Russian)* 87−44401
refractories, high-temp. tubular oven design 86−13896
refractory ceramics, with high In_2O_3-SnO_2 additives, for MHD electrodes 85−21835
reliability study of relay suitable for surface mount process using high-temperature-resistant plastics 88−38818
remote reactor heat pipe material compatibility tests 86−39497
resist modeling and profile simulation 85−50646
rewritable phase-change type optical disk, recording material charact. required *(Japanese)* 88−33601
Ricoh OPC 60R organic photoreceptor with quick response, props. *(Japanese)* 87−54158
ring inspection helps avoid costly repairs in generators, NDT methods 88−17491
rubber tyres computer-aided expt. research, primary data storage *(German)* 88−67682
RX high-mol.-wt. high-fire-point liquid dielec., dielec. props. 88−26623
screening and tests of materials for space applications 86−46402
seal ring tester 87−23341
semi-insulating material Hall const. and resistivity, automatic meas. equipment 87−77109
semiconductor charactn. by both photolum. and Raman spectroscopy 88−7446
semiconductor materials measurements: present abilities and future needs 85−40587
semiconductor process problems analysis with beam probes 87−38055
semiconductor substrate materials, defect analysis technique using DLTS *(Hungarian)* 86−47500
semiconductor wafer diagnostics using organic thin films, book contrib. 88−1501
semiconductors, electrophysical parameters meas., methods and instruments *(Polish)* 86−9221
semiconductors, radiation-induced defect profiles 87−1358
semiconductors topographic exams., using modulated reflectance 85−31330
servo hydraulic materials testing machines, Instron 1340 Series 87−362
shape memory alloy charact. meas., microprocessor based apparatus 87−65597
sheaths of cables, microbiological organisms effects determ. *(Czech)* 85−38537
sheet dielectric defect-location probe 87−8599
sheet metals, quantative anisotropy characterisation using anisometer *(German)* 86−24709
shielding effectiveness meas. methods 88−2631
Si solar cells, SILSO, grain boundary charact., meas./test techniques 87−9729
Si-based ceramics, testing for use as insulator materials in slagged MHD channels 85−21834
silicone rubber, silicone vapor emission and contact failure due to formation insulating, Si compounds 88−38806
silicone rubber and EPDM insulator weathershed materials, effects of accelerated weather ageing on dielec. props. 86−68128
SMD packaging, selection criteria for liquid encapsulants in new microelectronic packages 88−63052
smooth test bars, scattering of strength and probability to failure *(German)* 87−44435
SMT soldering without cleaning using min. residue fluxes 88−32573
soft magnetic materials charact. investigation using magnetising devices 87−53875
solar application material testing and evaluation 85−28272
solar energy conversion and lighting technology, materials and optics conf., San Diego, CA, USA (Aug. 1986) 87−65041
Solar Max samples, erosion studies 87−23780
solder paste charactn. of particle morphology and rheological behavior 88−1160
solder pastes, tackiness meas., standard method 87−5541
solder wetting phenomena under reducing atm., meas. using wetting balance 87−23362
solderability testing of surface mount devices using the GEC Meniscograph solderability tester 87−6229
soldered soldered Cu thick-films, adhesion degrad. in temp. cycling, accelerated lot-acceptance test 88−44493
solders, fatiguing process, thermal cycling and failure mechanisms study 87−59011
solids study by radiation physics, apparatus for comprehensive meas. 87−59034
solventless varnishes versus solvent varnishes, comparison via systems testing 86−63506
solvents for PCB cleaning, TI tests find best cleaner. II for mildly activated rosin flux 87−45406
SSC superferric magnets, critical props. meas. monitoring 87−70935
stainless steel electrode surface damage anal. in high energy spark gaps 87−17584
static dissipative materials, charge decay meas. method 88−68003
static electricity avoidance, materials charactn., site testing and standardisation *(French)* 87−47084
steel, C, residual stress meas. methods comparison using bulk-zero stress standard 86−5544
steel, maraging, weld metal mech. props. study 88−55979

materials testing continued
steel pole transmission line, longitudinal dynamic loading, structure flexibility 87−50843
structural testing on-line monitoring system for multipoint strains, development *(Japanese)* 87−49447
subbituminous coal screening tests for two-stage liquefaction 87−71784
surface analysis techniques and their application to materials and device characterization 87−67037
surface engineering, conf., Brighton, England (June 85) 87−43771
synthetic quartz growth, Brazilian lascas charact. for synthetic quartz growth, props. correlation 87−32763
talc, substitute for asbestos as insulating material, safety, purity and quality aspects 88−39770
TCC Kapton spacecraft thermal control material, conductive layer, test programme 85−15363
telecommunication cable jackets, toughness props., polyolefin materials characts. 88−21892
tensile testing machine in metallurgical industries, microcomputer controlled *(Czech)* 86−17784
test+transducer, conf., London, England (Oct. 1986) 88−36
Texaco coal gasification process, evaluation of Illinois and Pittsburgh coals 87−51017
texture analysis, industrial visual inspection automation 88−59288
thermal aging of electrical insulation−technologyand standardization 86−9334
thermal analysis, electronic appls., base materials testing 87−43945
thermal analysis of PWB and electronic materials testing 87−17473
thermal power plant maintenance system with state dependence *(Hungarian)* 86−39526
thermal power station maintenance, chemical and metallurgical laboratory tests (July-Dec. 1984) *(Japanese)* 87−30378
thermoplastic cable insulation, functional anal. of antioxidant 85−40995
thermoplastic resin, molded cct. interconnects, performance and advantages 88−38936
thick film dielectric/conductor interactions and their effect on performance 88−50550
thick film inks US wire bondability, effect of mech. props. of thick film inks 88−1300
thick film multilayer circuits with 'buried' resistors−resistors under multilayer dielectric 88−1040
thick-film capacitor dielectrics with permitt. up to 100 85−11607
thick-film crossovers, reliability comparison of Cu and Pd/Ag 88−25725
thick-film experimental interfaces, structure/property relationships 85−6622
thick-film multilayer conductor systems for hybrid microelectronics, rapid eval. methods 86−41458
thick-film N_2 fireable materials for hybrids and multilayers 88−50548
thin film metallisations, indentation techniques for mech. props. evaluation 86−15079
thin film on substrate systems, indentation load relaxation studies 87−23802
tracking index tests, use of Cu electrodes, comments and reply 87−18370
transformer fluids, high fire point, flammability testing 85−122
transformer oil, partial discharges 88−26615
transformer oil, US homogenization influence on particle count and dielec. strength meas. of samples 88−49030
transformer oils, oxidation by-products influence on elec. props. 87−30748
transformer substation shunt reactor gas insulation modelling and tests *(Japanese)* 87−30736
turbogenerators stator cores, active steel testing standards 86−45337
type 3414 steel, magnetic reversal at HF 87−53874
UL 1446−a practical electrical insulation systemsstandard 86−9332
ultra-high-speed center-hole technique for difficultmachining materials 86−52573
ultratrace metals analysis in dopant materials, techniques 85−40607
uniaxially oriented polyethylene tape-oil insulating system, behaviour 88−5360
varnish on magnet wire, compatibility eval. using dielectrometry 88−25607
video/computer technology role in exptl. mech. 87−36855
VIM quality control system for materials testing/identification during equipment manufacture *(French)* 85−10541
VLSI fabrication anal. technology for materials and devices, review 87−74377
VLSI materials charactn., overview 86−21762
volt-time characteristics of insulating oils stressed by lightning impulses 88−44901
water-tree-retardant XLPE cables 85−38513
wettability meas. of solder paste materials, electronic device fabrication appls. *(Czech)* 87−56920
wire drawing lubricants, testing methods *(German)* 85−9010
wires and cables, conf., Arlington, VA, USA (1987) 88−24358
X-ray negative resists characterisation 85−50650
XLPE, accelerated oxidation 85−32187
XLPE, cure method influence on sol content and physical structure 88−5359
XLPE, high-field polarisation behaviour 88−30384
XLPE, hydrated and elec. stressed in power cable, dielec. behaviour 88−30383
XLPE and ethylene-propylene diene rubber, thermal response of cable insulation, shield and jacket materials aged at 130°C and above 87−30214
XLPE blended with ionomers, charging behavior 88−26621
XLPE cable insulation, microwave freq. dielec. study of halos 88−63393
XLPE cables, field aged and containing water trees, impulse life tests 87−30212
XLPE cables, service aged, insulation characts. and breakdown strength 87−30209
XLPE cables, water tree growth meas. 88−68963
XLPE insulated cables combined-stress behavior 86−70688
XLPE medium voltage cable used in France, insulation ageing tests 86−70689
XLPE miniature cables water tree degrad., effects of freq. and temp. 87−21945
XLPE service aged cable insulation, oxidation and water tree formation 88−5361
Ag alloy contact materials testing *(German)* 86−14598
Ag compatible multilayer dielec. materials, reliability comparison 88−50546
Ag thick film conductor materials, adhesion strength and microstructure, plated and unplated 88−1204
Ag thick film conductors, densification and adhesion 88−25728

materials testing continued
Ag-Cd alloy elec. contacts, metallurgical study 88−38804
Ag-CdO alloy elec. contacts, metallurgical study 88−38804
Ag-CdO and Ag-SnO_2 contact materials, arc erosion behaviours comparison 87−37619
Ag-CdO contacts, arc-induced erosion surface development 85−53786
Ag-CdO-Li contacts, Li content and contact density effects on arc erosion 85−53787
Ag-Cu and Ag-Pd alloy contact materials in telecommunications switches, materials testing *(German)* 86−20877
Ag-MeO electrical contact materials, DTA and TGA studies 86−41376
Ag-Pd (1%) thick film conductors with excellent leach resistance and solderability 88−50547
Ag-Pd electroplated coatings for elec. contact appl. 85−23183
Ag-Pd thick film conductor practical adhesion, acoustic emission study of pull tests 87−1111
Ag-Pd thick film conductor practical adhesion, acoustic emission study of pull tests 87−1112
Ag-W composite contacts, microstructure effects on dynamic welding 88−38803
Ag-W-Re composite contact materials for high current conditions in LV circuit breakers 87−43317
Ag-W-Re composite materials under high-current conditions, expt. 88−5797
Al heat sink adhesives testing and modelling for SMT PWB bonding 88−19551
Al to Al bolted joint connectors and conductors, contact aid compounds eval. 86−41384
Al wire bondable doped Au thick film ink, investig., of parameters 88−1301
Al-Al wire junctions in residential wiring, erratic behaviour 87−42456
AlN 87−73156
AlN ceramic substrate, highly thermal conductive, development by green sheet technology 86−62267
AlN substrates, high reliability thick film development considerations 88−50549
AlN translucent ceramic substrate 86−62268
Al_2O_3-Na_2O solid electrolyte ceramic for Na-S cells, rapid testing 86−62303
Au alloy thick film, solderable, and capable of withstanding multiple firings 88−50552
Au thin film etchable comp., Engelhard M 305-A, alternative to thick and thin film 88−1205
Au-Ni hardened electroplated contacts, wear resistance 85−50072
$(BiTm)_3(FeGa)_5O_{12}$ garnet films, cell switching, heating effects 87−26104
Co-Cr layer prep. mag. recording media, prep. by DC magnetron sputter roll-coating 88−51239
Cr electroplated coatings, physical, chem and mech. props. *(Russian)* 88−12109
Cu alloys in bending, stress relaxation data, meas. and use 88−64049
Cu layers, electroplated, mechanical props. rel. to annealing and ageing *(Polish)* 87−59033
Cu thick film conductors, additives for adhesion enhancement 88−57180
Cu thick film conductors on alumina and multiglasses, wetting, leaching and solder adhesion study 86−53221
Cu thick films, soldered, adhesion degradation in temp. cycling, accelerated lot-acceptance test 88−57179
Cu-Sn-Zn alloy electroplate, temp.-time effects on oxide film growth 85−50074
Fe-Si electrical steels, magnetising device for magnetostriction meas. 87−5539
FeSi materials for power convertors, testing methods *(French)* 88−33522
GaAlAs solar cells for space appls., materials testing 87−72444
GaAs 100 mm diameter wafer substrates for MIMIC manufacture, quality assessment 88−19400
GaAs LEC grown semi-insulating substrates, comparison of microscopic uniformity using MESFET array 86−35914
GaAs, impurities and microdefects characterisation 85−34743
In-Bi-Sn solder bumps for Pb-alloy Josephson chip packaging, intermetallic compound formation 88−1902
In-glass vacuum seal, adhesion strength, meas. method 87−31613
Li-ferrite thick-film ferrimagnetic pastes, prep. and characterisation 85−50122
Ni-Cd cell separator material performance evaluation 86−33613
Ni-Zn ferrites, isostatically pressed, porosity meas. using computerised picture analyser *(German)* 86−13838
Pb-Sn solder PCB joints, fatigue and thermal fatigue testing 87−65180
Pb-Sn solder alloys, microstruct. and mech. props. 87−65614
Pb-Sn solder, deform. props. 87−23803
Pb-Sn solder for die bonding of Si chips 86−14769
Pb-Sn solder on Cu plates microstructure and mech. behaviour 87−23804
Pb-alloy Josephson device packaging, water soluble flux 88−1901
Si epitaxial structures, reference specimens with structure defects 85−61015
Si single crystal, standard orientation specimens 85−45499
Si solar cells for space appls., materials testing 87−72444
Si, using wideband phase shifter 86−11520
Si wafer testing, O_2 and C content determ. by IR absorption spectroscopy 87−5552
Si wafers, stress-rate and proof-testing 85−39823
Si:O, precipitation test methods 86−21341
SiC advanced ceramics for high power and microwave circuitry, eval. 87−73156
Si_3N_4 ceramic materials props. 85−33518
SiO_2 hollow microspheres filled glass-ceramic low-permitt. thick-film material, charactn. 87−73925
SiO_2 intrinsic thin films thermally grown on heavily doped Si substrate, dielec. reliability 87−60323
SiO_2-Si interface stress in thermally grown thin films, determ. using analytical technique 85−40529
Sn connector contacts in accelerated degrad. tests, eval. of contact resist. characts. 87−73850
Sn-Pb alloy preplated strip surface props. and qualities *(Japanese)* 86−511
Ti interlayered Al films for VLSI metallisation, eval. 86−28446
W CVD refractory coatings for railgun barrels 87−26679
W-Re alloy CVD refractory coatings for railgun barrels 87−26679
W-Y_2O_3 and W-La_2O_3 metallisation pastes for 99% BeO ceramics, research 86−62962
Zn-Al eutectic alloy superplastic, circular-die hydraulic bulge deformation *(Japanese)* 87−59032

2D interactive calculations of electric fields 88−45623
2D nonsingular MIMO digital filters separation into cascade of 1D filters 88−63800
2D state space digital filtering, coefficient sensitivity bound 86−62736
2D state-space digital filtering, roundoff noise considerations 87−45083
2D state-space digital filters, roundoff noise anal., 2D Lyapunov eqns. 86−20740
2D state-space fixed-point digital filter structs. with min. roundoff noise, synthesis 87−10986
2D symmetric half-plane recursive digital filters, 2D block implementation 88−56795
3 D separable-denominator recursive digital filters, approx. and min. roundoff noise synthesis 88−19276
3-connected matroids, chains 87−16472
3-phase bridge rectifier, external short-cct. current calc. *(Chinese)* 86−39939
3-phase transmission circuits, computer aided anal. *(Russian)* 86−6313
3-phase unbalanced distrib. system, fault anal. using bus impedance matrix 88−30338
10 kV Belgrade network, optimal limits of feedback *(Croatian)* 88−48552

matrix algebra continued
100 kW synchronous generators with magnetic field 3rd harmonic excitation 88−23877
110-330 kV networks of Lithuanian power system, connection matrix forming *(Russian)* 86−44944
p-adic number theory 88−49663
QR factorization of Toeplitz matrices 86−62116
Q-matrix implementation of the Boxer and Thaler*Z*-form method 86−66895
A-continuity of real fns. 87−10233
AC ccts. calc. using TI-59 calculator *(Czech)* 88−18862
acousto-optic matrix-matrix multiplier 88−45248
acousto-optic matrix-matrix multiplier, space integrating 85−24349
acousto-optic processor, binary space integrating for vector-matrix multiplication 85−2108
acousto-optic systolic processors, fabrication and achievable operations 85−12680
acousto-optical cell pyramidical pipelining for computing successive matrix powers 88−58279
acoustooptic binary processor, systolic time-integrating, for matrix-vector multiplication 85−12676
acoustooptic cell planes, R and F algorithm mapping, 2D systolic geometry 87−68233
active RC network driven by white noise, stationary capacitor voltage variance matrix calc. 87−45034
active RC realisation of voltage gain matrices with prescribed ranges of passive RC element values 87−867
adaptive antenna array interference cancellation, hyperbolic Householder transformations 87−27065
adaptive antenna processing, wafer-scale systolic array 88−72704
adaptive array algorithms, implementation 87−12787
adaptive array antennas, steady state and transient performance anal. 86−29636
adaptive array processing, spatial lattice algorithm and direct matrix inversion, performance 87−39832
adaptive array techniques for direction finding 85−42677
adaptive filter simulation of sampled matrix and Applebaum Howells methods 86−29931
adaptive noise cancellation algorithm using singular value decomposition *(Chinese)* 86−69033
adaptive signal processing, VLSI implementation of partial rank algorithm 87−60575
adaptive spatial signal processing effectiveness with time correlation of training samples 88−40965
adaptive tuning of interference compensation systems, convergence rate anal. 88−66106
admittance graphs, semi-complete and semi-uniform, anal. using isomorphic transformations *(Russian)* 87−59042
algebraic approach to system identification 86−69056
algebraic normal form of arbitrary functions over finite fields 87−68924
algebraic Riccati eqn., relaxing detectability condition 88−336
ALGOL 60 computer language, digital mathematical methods algorithms *(Polish)* 88−63232
algorithm to solve linear and slightly non-linear equations, financial modelling application 85−16889
algorithm-based fault tolerance for parallel matrix equation solvers 87−13020
algorithms programmed in ALGOL 60 *(Polish)* 88−56186
aligned machine AC winding circuits, matrix analysis *(Russian)* 86−6678
alpha stationary stochastic processes based on inverse scattering, general representation 87−47463
alpha well-posedness, alpha stability, and the matrix theorems of H.-O. Kreiss 85−33369
alternate adaptive tuning of separate interference compensation systems 88−66107
analogue circuit testability, multifreq, meas. 87−65763
anisotropic thin film multilayers, design anal. 88−2670
antenna array, optimum gain error, noise field effect 87−27064
antenna array, radiators parameters for matrix description 85−13381
antenna array pattern synthesis, generalised, projection matrix use 85−24925
antenna arrays, angular coordinates estimation of several signal sources, from cross correlation moments 86−48696
antenna linear array pattern synthesis with null constraints, fast algorithm for optimal weight computation 85−13220
antennas, spatial/spectral filtering with linearly constrained minimum variance beamformers 87−39461
antimatroids, homomorphisms and Ramsey properties 87−16480
aperiodic damping polynomials, symmetric matrix type criterion *(Japanese)* 87−16532
aperture waveguide modes, Galerkin formulation for electric field *(Portuguese)* 87−68844
apparent power in three phase and single phase systems, definitions *(Slovak)* 86−32623
arbitrary linear digital networks, one-dimensional, amplitude scaling factors 85−23037
arbitrary linear digital networks, roundoff noise 85−63043
arbitrary linear resistive multiports, synthesis using switched-capacitor technique 86−34979
ARQ schemes, converging, for information feedback 85−36187
array beamforming, structured covariances estimation 88−14512
array design for matrix computations 87−73001
array matrix generalization for signal processing 87−19761
array multipliers, two's compliment, design 87−31832
array processing, high resolution, sector-focussed stability 87−62126
array signal processing, real-time coherent signal subspace-transformation, digital realisation 88−73112
assembly algorithm using finite element method for solving partial differential equations *(French)* 85−243
asymmetric induction heating systems with ferromagnetic loads, calc. using elliptic integrals 86−71126
asymmetric Toeplitz matrix algorithms and inverse scattering, connections 88−63141
asynchronous machine anal., transformation matrices and conversion *(Polish)* 86−33396
asynchronous machine theory, stator and rotor matrix equations *(Russian)* 86−6746
attitude transformation matrices, least square error orthonormalisation algorithm 87−5310
automatic indexed calc. of Wachspress' rational finite element function, editor's introduction 85−54343

matrix algebra continued
automatic indexed calculation of Wachspress' rationalfinite element functions 85−54344
automation of nested matrix and derivative operations 87−73013
B-spline surfaces, recursively generated, analysis using matrix approach 87−5357
ballot sequences and a determinant of Good's 86−34134
band-pass filter obtained from low-pass prototype transformation, matrix formulation for coeffs. 88−56731
banded matrix algorithms, optical implementation using outer products 88−26915
bandlimited signals, finite-record filtering 87−62035
bandwidth and profile reduction 85−54365
BASS-ALE broadband signal subspace spatial spectrum estimation 88−66469
Bayes analysis of accuracy in simultaneous meas. procedures 85−37393
bearing estimation, transform based covariance differencing approach 87−63028
bearing estimation problem, superresolution by structured matrix approximation 88−46043
bearing estimation without eigen decomposition 86−10440
bearing estimations, projection approach 87−56215
bearing estimations, projection matrix computation 87−39741
Bendixson's theorem for matrix eigenvalues problem improvement *(Chinese)* 86−34228
Bent functions sequences decoding by fast Hadamard transforms 88−66310
BFGS and DFP optimisation algorithms, quadratic function minimisation 86−19955
bidiagonalization and diagonalization 88−11916
bilateral polynomial matrix equation, unique solution 86−19882
bilinear transform matrix, discrete convolution 85−49415
bilinear transformation matrices for polynomials 85−54222
bilinear transformation using new transformation matrix 85−247
binary and almost binary orthogonal sequences and matrices *(German)* 88−21164
binary coding sequences construction based on eigenvectors of Walsh matrices 87−54875
binary nonlinear feedforward sequences, complexity anal. through min. polynomials of compound matrices 86−43152
biological macromolecules, projection images, classification by multivariate matrix anal. 85−51724
bistatic power scattering matrix props. for stable object in characteristic orthogonal polarisation basis 87−75414
bit complexity of matrix multiplication and related computations in linear algebra 86−13605
black box multigrid for periodic and singular problems 88−31665
block digital filter structures based on continued andblock partial fraction expansions 86−46993
block iteration for solving large sparse least-squaresproblems *(Chinese)* 86−7687
block Toeplitz matrix formation for 2D PLSI polynomials 88−14651
block transforms, 2D, and props. 87−33682
block-pulse operational matrices 85−329
Boolean functions, Rademacher-Walsh spectral coeffs., determ. 86−34105
Boolean matrix multiplication, improved algorithm 86−46261
Boolean reliability model, digraph matrix analysis [reliability model] technique 86−34072
bordered system algorithm 88−18640
bordering approach for deriving lattice models 85−25088
boundary selection for adaptive power network matrix reduction 88−10710
broadband beamforming using doubly-steered coherent signal-subspace approach 88−73114
broadband signals, angles of arrivals estimation 87−62117
broadband source direction estimation using a circular array 88−73113
broadside-coupled striplines with anisotropic substrates, unsymmetrical type, anal. 86−42890
Brownian matrices, properties and extensions, digital signal processing appl. 86−23043
brute force number crunching problems 88−6410
bursts duration distrib. eval. of nonGaussian random processes 88−40966
bus impedance building algorithm related to bus admittance matrix 87−42431
C-transform and C-matrix appl. to picture processing *(Slovak)* 85−63090
CADDETH three-dimensional device simulator, matrix soln. algorithms 86−21475
canonical digital filters, equiv. struct. generation method 86−1308
canonical forms calculation, simple algorithm 85−33350
capacitance, direct determ. from finite-element matrices 86−22604
capacitance matrix algorithm, solution of elliptic PDEs 87−72993
capacitance matrix method using strips with alternatingNeumann and Dirichlet boundary conditions 85−54384
cascade subtraction of matrices 86−685
cascaded transmission-line networks, anal. and realisation using transfer scattering matrix 86−20230
Cauer third form, state-space realisation using integrators 86−46972
CEDAR multiprocessor for numerical linear algebra 88−40911
centrohermitian matrices solution, pattern recognition appl. 86−69192
characteristic polynomial of integer matrix, exact computation 87−65285
charge-controlled nonlinear elements containing networks analysis 87−44517
Chebyshev approximation of a rectangular matrix by matrices of smaller rank as the limit of l_p-approximation 85−22355
Chebyshev solution of linear matrix eqn. 85−54360
Cholesky factorisation of Toeplitz matrices, linear statistical models for stationary sequences and related algorithms 87−33677
circuit anal. by tree enumeration from incidence matrix 87−44449
circuit analysis, bordering algorithm for forming a matrix of cofactors 87−52289
circuit analysis, simulation and design, book 87−51716
circuit design, nonlinear equivalent cct. derivation method *(Russian)* 85−22612
circuit simulation, linear complementarity problem 87−481
circuit simulation by iterated timing anal., local convergence 87−31650
circuit testability measures and test-point selection, via QR factorisation of linear models 88−15880
circuit theory, balanced model reduction in time- and frequency-domain 86−62370
circuits containing operational amplifiers, admittance matrix anal., comments 85−33556
class functions character decompositions 87−51980

matrix algebra continued
closed nonproduct form network, anal. 86−30069
closest rank-p approximations, continuity 87−75787
CMOS IC gate matrix layout, graph-theoretic description 86−58620
codes with given distances 87−47499
coherent signal-subspace method, new focussing matrix 88−73047
coherent signal-subspace processing, focussing matrices 88−72916
coherent-weighted processing filters with real weighting factors, synthesis 87−55085
collinear integrated acousto-optic signal processor, config. and matrix multiplication appls. 88−20472
collocation matrix norms, asymptotic properties 85−44647
colour TV signals, real time transform codec 88−53440
combinatorial problems 87−211
common signal detection on noisy channels, generalised coherence 88−73125
communication network design using matrix calculation 88−52312
commutator motor, rotor side supplied three phase machine, generalised transformation using matrices *(Polish)* 85−32440
compact and modular VLSI design for the solution of general sparse linear systems 87−44193
competence of R&D within firms, programmes-competencies matrix 88−43658
complex anisotropic layered media, Green's function in spectral domain using matrix method, resonators and radiators appl. 86−48549
complex anisotropic planar layered structures, radiators and resonators, matrix approach 85−13193
complex LMS adaptive filtering algorithm, transient mean-square error 87−7763
complex matrices, singular value decomposition, computation algorithm *(Japanese)* 85−54228
complex matrices SVD, systolic array computation 87−55115
complex orthogonal and kernel polynomials, roots computing 88−31675
complex system representation, relationship of digraph matrix anal. to Petri net theory and fault trees 85−22281
complex systems, edge and node deficient network struct., modelling, and reliability calcs. *(German)* 85−214
components analysis application to remote sensing 85−43463
composite ordering scheme for sparsity-directedelimination 86−57386
computational mathematics, conf. Argonne, IL, USA (Sept. 1984) 85−54326
computer aided finite element anal. method *(Russian)* 86−3414
computer network reliability calc. method utilising Boolean algebra and graph theory 87−2910
concatenated codes based upon superimposing method, generalization *(Japanese)* 87−54877
concurrent error diagnosable systolic arrays for band matrix multiplications, design 88−32125
concurrent VLSI computing structures, fault-tolerant matrix and signal processing 86−62630
conjugate directions, statistical computation 86−7675
conjugate gradient method, INV block preconditioning 87−23565
conjugate gradient method termination criterion 88−63222
conjugate gradient method with preconditioning by projector 88−24673
conjugate gradient methods, polynomial preconditioning 88−70266
constant group delay network synthesis approx. technique 88−18888
constrained maximum likelihood estimation, results 87−19814
continued fraction expansions for irrationals 86−46199
continuous tone images, bilevel representation method *(Japanese)* 85−30363
controlled transmission lines, natural capacity calculation method 85−43598
convergence of powers of interval matrices 85−33354
conversion algorithms for Walsh functions 86−16091
convertor circuit digital simulation, connection matrices generation using tensor approach 88−24043
convex programming, multidimensional parameter, problems. 88−313
convexity, appl. to discrete systems 86−34126
convolution matrices, rate of growth of condition numbers 87−44096
convolutional encoders, analytic design 87−54936
convolutions, interrelationships among class of circular operations 85−25104
correction theory and algorithm for reachability matrix model *(Japanese)* 88−18544
correlation matrices estimation 88−21051
cosine symmetrical transform approximation *(Slovak)* 85−22297
coupled-mode theory for reciprocal anisotropic waveguides 88−33727
covariance difference eigenstructure, signal detection and estimation 87−27501
covariance differencing approach, transform-based for parameter estimation 88−52421
covariance matrices, iterated Toeplitz approx. 88−63140
covariance matrix approximation, high resolution bearing estimations 87−62037
covariance matrix estimation, sample size determination 87−65332
covariance matrix for α-β-γ filtering 85−36262
covariation matrix of stationary interference, estimate 85−7764
cross-spectral matrix, phase angles estimation 86−69053
CSMA-CD anal. with variable slot size 87−48255
CSMA/CD networks, matrix representation 85−25251
CSMA/CD protocol, computation time reduction technique *(Japanese)* 85−2924
cycle polytope of a binary matroid 86−34106
cyclic reduction algorithm 88−63230
D-optimal design construction for $N \equiv 2 \bmod 4$ using block-circulant matrices 86−34139
data fitting, total approximation problem in separable norms 85−33323
data matrix cyclic extension, positive-definite Toeplitz embedding 85−46787
data parallel algorithms 87−31450
Davidson's method for computing eigenvalues of sparse symmetric matrices, generalisation 86−62145
Davidson's method for eigenvalues of sparse symmetric matrices, generalisation 85−33356
Davis-Kahan-Weinberger soln. of norm-preserving dilation problem 86−61994
DC nonlinear network solvability using matrix algebra *(Polish)* 88−24948
DC stability of nullator-norator-modeled resistive networks realized with practical electronic devices *(Japanese)* 85−936
decomposing a sequence of matrices that differ only in one submatrix 88−49609
decomposition, spectral and singular methods *(Hungarian)* 86−13610

matrix algebra continued
deconvolution using number theoretic transforms 88−56121
definiteness test for Hankel matrices and their lower submatrices 87−72983
degenerate specialisations of linear matrices 85−54219
dense linear systems, parallel resolution by matrix diagonalisation *(French)* 86−66774
determinant and characteristic polynomial of matrix computation 88−63226
device simulator, high convergence matrix solving scheme *(Japanese)* 87−25194
DFB laser, asymm. phase-shifted, numerical matrix theory of complicated laser structs. 86−36512
DFB lasers numerical matrix method for anal. of structure 87−33076
DFT algorithm using butterfly structure fast convolution, permutation matrix, comments 87−65450
DFT and sinusoidal transforms, fast algorithms 86−62202
diagonal innovation matrices 87−65406
diagonal innovation matrices, fast O(n) complexity algorithms 85−22290
diagonally weighted conformal mapping, polynomial matrix spectral factorisation using Z-plane methods 86−19883
diakoptical circuit analysis at the change of branch impedances 88−24860
dielectric cylinder, complex scattering matrix 88−27493
differential equations in unbounded domains, simple infinite element 85−337
digital filter transfer matrices, lattice realisation using discrete version of Richards' theorem 86−62743
digital filters, asymmetric half-plane type, block implementation 87−45080
digital filters, generalised Grainian matrices appl. 85−46840
digital filters, lattice-ladder realisations using generalised Schwarz form 86−20728
digital filters, linear time-invariant type, under limit cycle condition, mathematical models 86−62774
digital filters, low-pass, state space matrix anal. *(Czech)* 88−56769
digital filters, m-dimensional, Walsh matrix implementation by decomposition theorem 85−46848
digital filters, second order, covariance and unit noise matrices 87−928
digital image edge detection, stochastic approach 85−30372
digital image restoration under additive noises by generalised inverse of matrix *(Japanese)* 85−51771
digital images restoration theory, additive noises, constrained generalised inverse matrix 87−19964
digital optical matrix multiplication based on a systolic outer-product method 88−26914
digital signal processing, FFT algorithms, matrix interpretation and computational efficiency 85−7878
digital signal processing, nonuniformly sampled data, spectral estimation, matrix inversion methods 88−46130
digital-pattern thinning, max. algorithm *(Chinese)* 87−27569
dimensional analysis, matrix method 86−40605
direct method for solving linear systems 88−337
directed circuits in graph, distribution algorithm 86−57347
directed switching games on graphs and matroids 86−57307
direction finding, eigenvector methods implementation 85−31119
direction of arrival estimation by eigenstructuremethods with unknown sensor gain and phase 86−10445
directional coupler, branch guide type, CAD using admittance matrix charactn. 88−32388
directions-of-arrivals estimation, eigenstructure, smoothed rank profile tests 87−27437
directly coupled adaptive noise suppressor, efficiency investigation 85−36051
discrete and composite-discrete Fourier transforms, variance distribs. *(Korean)* 85−257
discrete ccts. analysis, using cyclic matrix *(Czech)* 85−17059
discrete Fourier and cosine transforms, computation 86−20017
discrete Fourier transform and W transform, fast algorithms, in FORTRAN-type language 85−346
discrete influence systems, preperiods 86−34127
discrete Karhunen-Loeve transform for stationary processes, approximations 85−19464
discrete Markovian system steady-state probabilities *(French)* 88−38051
discrete Riccati matrix equation, inequality anal. 85−33261
discrete time Wiener-Hopf equations soln., algorithm based on Euclid's algorithm 86−57295
discriminant computing of algebraic number field 86−26770
distributed networks with two coupled propagating modes, synthesis method 86−62391
distribution line carrier propagation anal. using bus impedance matrix 88−21903
distribution line carrier sensitivity analysis using bus impedance matrix 88−21904
distribution network, computer aided diagnostics using matrix methods *(Russian)* 86−25581
distribution network state estimation of static state power flow using sparse matrices *(Spanish)* 86−50987
distribution network transient-stability study using complex Y-matrix algorithm 86−32722
distribution networks, compensating capacitors, optimal placement planning *(Chinese)* 88−48550
division using generalized SRT iteration 87−213
Dolph-Chebyshev beamforming, matrix formulation 87−26929
dominant component data reduction method for eigenvector computation 88−274
Doppler and array processing, detection loss of the sample matrix inversion technique 85−25086
driving-point conductance matrices for spherical grids 86−57540
dual polarisation scattering matrix radar rain backscatter meas. eval. in X and Q bands 87−47215
dual RF admittance bridge analysis 85−58826
dyadic symmetry and Walsh matrices, unified matrix treatment 87−36556
dynamic decomposition method for linear programming problems with generalized upper bounds 87−52087
dynamic error correction of instruments, by matrix computation 85−37394
dynamic Leontief systems, characterisation using undefined coeff. matrices *(German)* 85−39602
dynamic system with multidegree of freedom, initial conditions identification *(French)* 86−52604
eddy currents, finite element anal., matrix equations soln. 88−55281
efficient algorithm for partial fraction expansion of the linear matrix pencil inverse 88−6595

matrix algebra continued
eigenproblem solution, finite element method based on subspace iteration, BASIC listing 85−28158
eigensolution of real symmetric matrices 85−60899

extended periodic structures, algorithms and anal. results *(Russian)* 87−47132
extreme eigenvectors soln. 86−62139
$f(A)\chi=b$, iterative solution method using Krylov subspace information obtained for symmetric positive definite matrix A 87−58861
factorised extended Kalman filter 88−51650
factorization of the minors of characteristic matrix sI-A and DM decomposition of its representation graph 88−271
fast algorithms and architectures based on triple matrix product 88−3088
fast cosine transform, 2-D 86−29667
fast Fourier transform: matrix- and algebraic approaches 87−31468
fast Fourier transforms, algorithm study, software accomplishment *(Chinese)* 85−28202
fast Hadamard transform, matrix factorisation 88−6426
fast inner product processor based on equalalignments 86−46878
fast multidimensional discrete Fourier transform algorithms, matrix approach 87−31467
fast Toeplitz orthogonalization using inner products 88−339
fast triangular transform and its applications 87−58899
fast Walsh transform-based data compressionmulti-microprocessor system: application to ECGsignals 86−18337
fault simulation and matrix multiplication, $O(n^2)$ complexity bound 87−66142
fault tolerance techniques for systolic arrays 87−66001
fault tolerant VLSI matrix multiplier 87−18340

matrix algebra continued
feature evaluation of similar images by modified andconstrained average method 86−16502
FFT, multidimensional with mixed base, economic algorithms 85−22447
FFT algorithm via transposed transformation 88−52476
FFT based on symmetry of matrices, algorithm 88−49782
fibre optics, mode transition matrices for differential mode attenuation and dispersion 87−34584
field theory problems, numerical solution on basis of space matrices 87−5366
filter design for integrated data input 86−48927
filtering, covariance decompositions via elementary transformations 88−34631
fin line cascaded discontinuities, transmission matrix representation 85−62864
fin line cascaded discontinuities, transmission-matrix-representation 85−19204
finite algebraic formula 87−23446
finite area convolution, algebraic model 87−47646
finite length discrete matched filters, signal selection and SNR bounds 86−52929
finite Markov chains, large deviations, hypotheses testing and source coding, transition matrix 85−57182
finite projective planes with single (P,l) transitivity 88−43832
FIR beamforming structures, general framework for anal. 87−7632
FIR filters, maximally flat, transfer function coeffs., matrix approach 87−45068
FIR quadrature mirror filter banks, perfect reconstruction problem 87−69213
fitted diagonals for reducing I/O bandwidth in systolic systems 87−65407
fixed increment adjustment adaptive algorithms, tap weight variance anal. 86−69044
flexible spacecraft, vibration anal., distributed element method, transfer matrices 86−6016
floating vector processor for power system simulation, sparse matrix solution 86−32625
Floquet solution of ordinary DE, infinite matrix problem 86−46281
flow networks with min. edge capacity sum, construction with min. number of edges 86−62343
form recognition using moment invariants for 3D perspective transformations 87−62200
forward and backward autoregressive models, matrix polynomial computation 85−10569
forward-pass fixed interval smoother in continuous time systems, algebraic solution 86−10368
forward-pass fixed-interval smoother using U-D information matrix factorisation 86−37108
four-port matrix theory as required for SC network analysis 87−59128
four-terminal network, matrix parameters as rational fns. *(Russian)* 86−13943
fourth order alternating direction method based on the (2,2)-Pade approximant 88−24665
Frank matrix, generalisation 86−62147
Frank matrix for testing mathematical software 86−26768
frequencies estimation, eigenvectors and eigenvalues computation 87−12972
frequency domain matrix corrector, rapid alignment 87−55148
frequency-domain adaptive matrix equalization 86−43261
frequent mode piezoelectric transducers, KLM model appl., transfer matrix based *(Spanish)* 88−57846
fuzzy intersection graphs 88−63162
fuzzy matrices, generalised, transitivity prop. 86−7623
fuzzy matrix, strongly transitive, canonical form 87−58796
Gaussian channel, group codes struct. 87−54931
Gaussian elimination with partial pivoting for sparse systems 85−33349
Gaussian random signal, instantaneous frequency estimation, Wigner-Ville distrib. appl. 88−34663
GEM 21 gate matrix connection *(Croatian)* 88−49968
general array signal processing, signal eigenvector method 88−40918
general forbidden configuration theorems 86−34138
general tridiagonal matrices, explicit inverses, calc. and appls. 86−52328
generalised anisotropic layered media, propag. const. calc. using numerical spectral matrix method 88−27558
generalised matrix continued-fraction descriptions in second Cauer form 85−60831
generalized and statistical estimator matrix inverses 86−57300
generalized consistent orderings and the accelerated overrelaxation method 87−10312
generalized eigenproblem: pole-zero computation 88−31935
generalized inverses of matrices 86−62151
generalized Schur-complements and a test for total positivity 87−58857
generator transient stability simulations, simultaneous implicit approach 87−57991
Gerschgorin type theorem and the perturbation of theeigenvalues of singular pencils *(Chinese)* 86−7686
Givens' eigenvector recurrence revisited 85−54231
Golub's method, extension beyond complex multiplication 85−49494
GPS-type navigation equations, direct algebraic solution 87−56293
gradient-index material, propag., matrix wave theory, appl. to square law medium 85−2580
Gram-Schmidt orthogonalisation of data matrix, RNS optical adaptive processing use 88−73218
Gram-Schmidt orthogonalization, algorithm and systolic architecture 86−23940
graph isomorphism and theorems of Birkhoff type 86−46175
graph matching algorithms, linear algebraic approach and VLSI systolic array implementation 86−19938
graph theory in electrical network calcs., book 86−19722
graphs, matching polynomials, matrix approach 86−66705
graylevel co-occurrence matrix, use in threshold selection 88−73229
greedy concepts for network flow problems 87−16470
ground fault current distribution calculations 85−43581
group explicit iterative methods for solving large linearsystems 85−60880
group homogeneous replacement, chain properties *(Polish)* 86−66682
Hadamard matrices 87−72890
Hadamard matrices and 2D error correcting codes, generalisation 87−27210
Hadamard matrices and doubly even self-dual error-correcting codes 87−54869
Hadamard matrices construction, novel method 87−16452
matrix algebra continued
Hadamard matrices generated by an adaptation ofgeneralized quaternion type array 86−66694
Hadamard matrices of order 28 with automorphisms oforder 7 86−34135
Hadamard matrix, number of submatrices 88−49603
Hadamard matrix series 88−56090
Hadamard transform, matrix factorisation based 87−19664
Hadamard weighted transform, fast algorithm 88−27973
halftone image reproduction, bilevel rendition method using threshold matrix *(Japanese)* 85−2903
Hamiltonian circuits in digraphs, enumeration procedure 86−13906
Hamming spaces, γ-partitions design 87−68972
handle bases and bounds on the number of subgraphs 87−23486
Hankel matrix, standard, model reduction with alternatives 88−43761
Hankel matrix systems, solution using FFT and conjugate gradient methods 87−58863
harmonic retrieval of analogue signals 88−27903
HDTV signals, compatibility of NTSC colour decoders 86−69888
Hermitian Toeplitz matrices, eigenvalues recursion 88−63138
Hermitian Toeplitz matrices, generalised two-term recurrences and fast algorithms 87−58864
Hermitian Toeplitz matrices in singular case rel. to Levinson algorithm 87−55196
Hessian quadratic programming, parameterised, active set algorithm 86−62064
heuristic classification algorithms, correction problem, completeness and universal constraints 88−41049
Heyting matrices 87−36559
HF antenna array, control of phased transmission 85−46646
hierarchical scene matching, VLSI appl., space-time domain expansion approach 85−50626
hierarchical systems of linear equations, generalised nested dissection 88−11918
high cellulose leaves, digital simulation of chem. and elec. properties 88−48153
high throughput matrix processor for Kalman filtering 87−7782
high-reliability communication network design by matrix calculation *(Japanese)* 87−69537
high-resolution array processing principles, book contrib. 85−46812
high-resolution spectrum analysis by dominant-mode enhancement, book contrib. 85−46811
highly concurrent algorithm for solving large systemsof linear equations 86−66781
highly parallel eigenvector update methods with applications to signal processing 87−55114
Hilbert space positive semidefinite operators charact. 86−40638
Holocoupler-Selfoc fibre system, coherent transfer matrix description 87−12198
hologram interferometry and speckle metrology appls. 88−2415
holograms and specklegrams quantitative interpretation 88−51966
homomorphically processed images, matrix quantisation 87−39978
Hopf bifurcation points, computation 85−54403
Householder reflections, updating of triangular products 85−22395
HSD matrices, contraharmonic mean, interpretations for elec. networks 86−298
Hurwitz polynomials, very strict, testing using modified Ansell-Hermite matrix method 87−58766
HV high phase order transmission systems, Levinson algorithm for fault calcs. 88−48542
hybrid AC electric machine windings, matrix anal. 86−25985
hybrid algorithm for fast-Toeplitz orthogonalization 88−63229
hydro-thermal short and medium term scheduling, modular and flexible software, MINOS 88−11138
hyperbolic Householder transformations 87−16450
ideal transformer circuit analysis using algebraic methods *(Russian)* 85−32539
IIR digital filters, circulant and skew-circulant matrices as normal-form realisation 88−56791
ijk forms of factorization methods 88−56184
ijk forms of factorization methods 88−56185
ill-conditioned least squares problems, cross-validation function computation 85−22363
ill-conditioned power systems, state estimation algorithm by Newton's method 87−50619
image algebra closed-form representation of convolution dilation and erosion 88−73371
image detection by singular value decomposition of image matrices 87−69386
image generating functions, pyramid 88−41080
image processing, halftone patterns for arbitrary screen periodicities 88−66704
image restoration of an ultrasonic transmission imaging system with crossed-arrays 88−21221
image segmentation with multiple components, multi-resolution feature reduction 88−73352
image separation, probability approach *(Russian)* 88−3185
images, pseudo-gray rendition, adaptive selection of threshold matrix size 85−30340
imbedding unknown subnetwork, identifiability considerations 85−33609
impedance-matrix formulation of feedback amplifiertheory 86−801
implication structures for reachability matrix model *(Japanese)* 86−40604
improper integral calc. for axisymmetric surface potentials *(Russian)* 86−42730
incidence matrices of finite projective planes 86−40602
incoherent optical signal processing system, real-time 85−30303
incomplete factorisation preconditionings, efficient implementation 86−13684
incomplete factorization methods for nonsymmetric block-banded systems of partial differential equations 85−5953
indefinite-impedance matrix for network anal. 85−54587
inductance, matrices practical synthesis *(Japanese)* 87−59116
induction drive, quasi-frequency controlled with thyristor convertor, EM transients anal. *(Russian)* 87−43499
induction heating systems, with ferromagnetic loads, calculation by elliptic integrals 85−32813
induction machines, asymmetrical stator windings, matrix anal. of space harmonics 87−64583
induction motors, field oriented and field acceleration control 86−39798
induction motors, stationary electromagnetic process eval. using fast search algorithm *(Russian)* 86−66067

matrix algebra continued
inertial navigation systems, norm and orthogonality preserving algorithm 88−30060
infinite families of perfect binary arrays 88−58986
information matrix charact. polynomial for 4^n-type balanced resolution V design using 2^{2n} factorial 88−14704
information network decomposition using reachable vector method and local adjacent matrix *(Chinese)* 88−21381
information processing in linear vector space 85−2722
inhomogeneous lossy dielectric objects, EM field distrib. anal. by method of conjugate gradients 85−13031
inhomogeneous media, light transmission and reflection calc. 87−68126
initial value problems, numerical soln., matrix-valued version of result of von Neumann with time discretisation appl. 85−54379
initial vectors for eigenvector calc., symmetric tridiagonal matrix, Wielandt's iteration 86−34223
integral eigenvalue approach to eddy-current transient field problems 88−8412
integral matrix transformations for periodic states anal. of nonlinear networks *(Russian)* 87−16839
integral system of linear equations investigation and soln. *(Russian)* 88−63233
integrated optical architectures for matrix multiplication 85−36369
integrated optical spatial light modulator, electrooptic grating based, for analogue computation 85−12652
intensity/range images, determining motion parameters using intensity guided range sensing 85−36404
interference composition systems, adaptive tuning, converge of decomposition procedures 88−8648
interference suppression filters synthesis 87−19210
internal node subcircuit reduction method 87−52260
inverse computation, Schur factorisation 88−6342
inverse eigenvalue problems for Hermitian matrix almost everywhere *(Chinese)* 88−11920
inverse eigenvalue problems for real symmetric banded matrices *(Chinese)* 88−49761
inverse matrix admittance of elec. power systems *(Croatian)* 88−48470
inverse matrix techniques for solving BVP on parallel processors, explicit semi-direct method 87−44243
inverse pairs of test matrices 87−210
inverse problems, stability of solns. *(Chinese)* 87−10315
inversion, monotone inclusion algorithm, PASCAL-SC *(German)* 88−49757
inversion appl. to radio antenna array processing, space-time algorithms 86−10371
inversion of matrices, decomposition method 86−46263
invertible periodically time-varying digital filters 87−59785
invertor, current fed, for induction heating appls., stability *(Hungarian)* 86−12891
invertors with high-output, harmonic effects of feeder network compensation *(Hungarian)* 86−12890
irreducible characters of group $GL_6(2)$, 86−34165
irreducible matrix-fraction descriptions and the McMillan form of a transfer function meromorphic in the unit disk *(Japanese)* 87−31380
irregular transmission lines, matrix parameters, solutions 86−62873
isolated cylindrical dielectric resonator, modal field distrib., computational procedure 85−23094
isolated words recognition, approximation and elimination algorithm *(Spanish)* 85−57302
isomorphic algorithm of graphs ZMA matrix 86−66736
iterative image restoration, unified approach 88−41071
iterative method for inclusion of inverse matrix *(German)* 86−7668
iterative method for subspace computation 86−62140
iterative methods for large scale matrix problems *(Japanese)* 88−24662
J-singular matrix values 88−18545
J-singular value decomposition of nonsingular matrices of an even order 88−49610
Jacobi matrices from spectral data, numerically stable reconstruction 85−248
Jacobi method for real positive definite matrices, condition numbers and convergence relations 85−33353
Jacobi methods for singular value decompositions 88−340
Jacobian and Hessian matrices arising in finite difference calcs., optimal estimation 85−5945
Jacobian matrices, run-time estimation of spectral radius 85−22386
junction admittances matrix, unsymmetrical operating conditions in power systems using phase coordinates *(Russian)* 86−25477
K matrices, finite characterisation 86−52330
k-cyclic matrices, equivalence of k-step iterative Euler methods and successive overrelaxation 88−63227
Kramer drive switching transients computation 85−27676
Kreiss matrix theorem, resolvent condition 85−22388
Krylov subspace methods for discrete Newton algorithms 85−5948
L_p-norms of matrix, convergence 86−26767
ladder estimation, recursive least-squares algorithm 87−7752
ladder networks, envelope delay calc. 88−63435
ladder networks, matrix anal. 86−1193
lambda matrix eigenproblem, including iterations 86−7670
Lanczos method and the Rayleigh quotient 87−10322
Lanczos method for solving symmetric linear systems with several right-hand sides 87−52050
Lanczos procedures for very large real symmetric eigenvalue problems 85−49496
Laplace transforms, inversion using Taylor series approach, numerical instabilities 87−44099
large change sensitivity analysis in linear systemsusing generalized Householder formulae 86−46509
large scale power systems, fast decoupled state estimator with error processing 86−50921
large-scale circuit simulation, complete LU decomposition/conjugate residual method *(Japanese)* 87−36886
large-scale network hybrid anal. by node tearing 86−66930
large-scale networks, hybrid anal. by node tearing 86−52603
large-scale nonlinear programming, sparse matrix techniques in generalised reduced gradient algorithm 88−24653
large-scale nonlinear programming by generalised reduced gradient algorithm, sparse matrix techniques 86−342
large-scale radial distribution networks, sensitivity anal., computerised algorithm 85−21194
large-scale sparse matrix, LU decomposition, parallel processor 86−57297

matrix algebra continued
lattice algorithm, least squares linear prediction problem 85−22361
lattice algorithm for matricial spectral factor computation, props. 87−27495
lattice filters and non-Toeplitz systems of equations 87−23448
lattice structures for factorization of sample covariance matrices 85−19483
layer anisotropic random medium, modified radiative transfer theory 88−58830
LC circuit regular matrix groups and N-blocks *(Russian)* 87−36867
LC circuit resonant frequencies, matrix group reduction *(Russian)* 87−36866
LC-cct. structural theory, regular matrix beam subgraphs *(Russian)* 87−16833
least-squares determination of the inversion of Laplace transforms via Taylor series 88−31585
Levinson algorithm generalisation for Hermitian Toeplitz matrices with any rank profile 86−10352
limited range computer tomographic image reconstruction using fast algorithm 85−26767
linear active circuit design, state-space technique for freq.-domain 86−673
linear active RC network synthesis by matrix expansion *(German)* 87−52708
linear circuit anal., Mason matrix graphs, variation theorem 87−73248
linear circuits, computer analysis, matrix reduction algorithm *(Slovak)* 86−13920
linear codes and generalised Pless identities, weight distrib. of translates 87−47519
linear complementarity problem, polynomial solvability 88−6344
linear continuous systems, stability and sensitivity analysis 87−44497
linear differential eqns., stretched type, soln. via Laguerre fns. 87−52062
linear electronic networks with correlated noise sources, numerical anal. *(German)* 85−54611
linear EM networks and using unified matrices method *(Russian)* 87−75339
linear equation solution for real-time signal processing, VLSI implementation 87−55133
linear equation systems with symmetric coefficient matrix, block banded algorithm solution *(Polish)* 85−28196
linear equations solving, stability, strong stability, and weak stability appls. 87−52052
linear equations system related to transportation problem 86−46166
linear equations systems, polynomial-time algorithm 86−7680
linear equivalent ccts, multivariant analysis, numerical method *(Russian)* 86−46427
linear feedback shift register circuits, parallel implementation 86−34665
linear fractional transformations and spectralfactorization 86−46148
linear frequency-independent circuits, stability criterion 87−31665
linear graphs and elec. networks, theory 85−489
linear matrix eqns., properties of l_1-solutions 87−52020
linear multiterminal transmission networks, admittance matrix determination 85−43577
linear multivariable systems, minimal realisation methods 88−40990
linear network anal., scattering network matrix decomposition 86−66969
linear networks, freq. response limitations *(Chinese)* 87−65762
linear networks, periodic soln. using state equations 85−6121
linear ordering polytope, facets 86−13650
linear ordinary differential eqns., sparsity exploitation 86−13692
linear prediction polynomials, stability margins 87−27527
linear predictors for nonstationary processes, group actions 88−59156
linear programming, modified simplex method, power system appl. *(Chinese)* 86−25469
linear recurrences formula 85−33355
linear sequential circuits, Walsh function representation and noise anal. 85−33791
linear system response change, computational algorithms and appls. 85−28320
linear time-invariant differential systems, software for closed-form solns. 86−57395
linear tubular motor with composite rotor, dynamic characts. determ. 85−32518
linear two-port network parameters derivation from cofactors of node admittance matrix *(Chinese)* 87−65761
linear unstable stationary filtering, constant Kalman gain 86−43233
liner multiparametric optimization with parameter-dependent constraint matrix 85−39644
LMS adaptation, optimum gain parameter 87−69133
load flow, complex vector anal. 86−38998
load flow algorithm, matrix of factors updating for iterative solution 87−50660
load flow algorithm, modification of matrix of factors 86−18632
load flow calc. using optimal pivot strategies 87−50658
load flow calculation parallel processing method using sensitivity matrix 86−25495
load shedding, optimisation with load voltage and frequency charact. considerations 85−59592
location, extended Xiaoshu-Hua theorem 87−10313
Long vectors for quasi-Newton updates 87−16517
low sensitivity digital filter structs. passivity props. study 86−1311
low sensitivity digital filters, orthogonal implementation, matrix LBR extraction scheme 86−1310
low-increase sensitivity function calc. 85−49674
LP, embedded generalised networks extraction 85−44617
LPC speech, shape gain matrix quantizers 87−19419
LU decomposition of sparse matrices 88−341
LU-decomposition of dense matrices on optimal array 88−738
lumped linear time-invariant k-ports, and ccts., hidden modes and stability study 85−54615
M(t)/M/N loss system, blocking probability eval. using numerical method 86−26697
M-splittings theorems of singular M-matrix depending on graph structure 85−10605
MA spectral factorisation, Jury matrix and Newton-Raphson method 88−3129
machine finite volume modelling using connection matrices, EM network simulation 88−17551
machine space harmonic analysis using space phasor matrix eqns. 87−42981
magnetic field calc., numerical methods survey 85−24702
manipulation using modified Faddeev algorithm 85−28177
manipulator Jacobian computation, parallel algorithms and VLSI architectures 88−63725
marked graph, token distance matrix, props. and appls. 85−22336

matrix algebra continued
Markov modelling, cyclic convergence of iterative methods 88−18570
Markovian service system, moment formulae, for overflow traffic *(Japanese)* 87−33835
Marple algorithm, extended matrix formulation 87−58771
matrix inversion lemma generalisation 86−66650
matrix multipliers, arithmetic expander using feedback *(Russian)* 85−61190
matrix numerical rank computation, algorithm 86−26795
matrix Riccati differential eqn., canonical form 85−54401
matrix signal flow graphs, simplification *(Chinese)* 86−3886
matroid decomposition theory, minimal violation matroids 86−19916
matroids representable over $GF(4)$ 87−5336
matroids with max-flow min-cut property, decomposition 87−16483
matroids with parity condition, principal partition into strongly irreducible minor pairs *(Japanese)* 85−22332
maximal dynamic polymatroid flows and applications 87−180
maximum distance separable codes, exhaustive testing, iterative procedure 87−54991
maximum likelihood angular resolution of multiplesources 87−8344
maximum likelihood estimation automatic calc. program 85−5876
maximum likelihood estimation of structural covariance matrices and periodograms, relationship 87−19661
maximum likelihood estimation of the autoregressive model by relaxation on the reflection coefficients 88−72922
maximum-likelihood estimate of structured covariance matrices 85−22291
Maxwell eqn. general solution for excitation by slotted aperture source in conducting cylinder with concentric layering 87−39287
Maxwell equations for static, resonant and transient problems, numerical soln. 88−2455
McMillan form of transfer function meromorphic in the unit disk 88−24857
measurements evaluation, uncertainties treatment standardisation, German activities 85−37389
Menon type sequences, symmetric, 4-complementary, theoretical proof *(Japanese)* 88−6338
metrics for comparing structural descriptions 87−5327
microstrip antennas, multi-port disc, impedance matrix and radiation pattern determination *(French)* 85−51495
microstrip linear on anisotropic substrates, dynamic 3D transmission-line matrix anal. 85−62867
microstrip step-discontinuity, anal. using mode-matching formulations 86−10150
microwave antennas, near zone, power density calc. and representation 88−72666
microwave nonlinear active devices, mathematical formulation for harmonic optimisation, cct. synthesis appl. 88−56979
microwave ovens loaded with lossy process materials, transmission-line matrix analysis method 85−27798
microwave π-hybrid Butler matrix, generalised design method *(Chinese)* 87−37523
microwave transistors, meas. of y-parameters of admittance matrix 86−14505
mine power system analysis, using non-iterative approach 85−27000
minimal realisation of symmetric transfer-function matrix using expansion 85−44578
minimal realisation of transfer function matrix using modified Markov parameters 85−60832
minimal realizations of pseudo-positive andpseudo-bounded rational matrices 85−54221
minimum cuts, modular functions, and matroid polyhedra 85−44628
minimum eigenvalue separation for matrices *(Chinese)* 86−7688
minimum feedback vertex set problem, strongly connected digraphs 85−44606
modelling programs speed, matrix-equation coefficients, storage modes influence 87−10598
modified beamformed array data inversion 86−16392
monomial matrices, doubly-extended Reed-Solomon codes 88−72743
monotone linear complementarity problem, bounds 87−10281
monotone subsequences in (0,1)-matrices 86−62029
MOS digital cct. simulation, multirate iterated timing anal., sufficient conditions for convergence 88−6720
motor control by stator winding axis reorientation *(Russian)* 86−6681
motor driving system fault diagnosis, influence matrix approach 87−58374
moving average system identification iterative method 88−27897
moving finite-element eqns., structure 85−44646
moving sources in anisotropic plasma, Em fields *(Korean)* 86−54264
Muller matrices of polarisation systems, general props. 87−34681
multi-element cavity mode calcs., variable method *(Chinese)* 88−72350
multi-input/multi-output systems numerical testability evaluation 88−15884
multi-rotor electromechanical energy convertor, generalized model *(Russian)* 85−60278
multichannel 2D linear prediction, appl. to color image coding 88−73254
multichannel images, digital restoration, Wiener soln. 87−62288
multichannel singular predictor polynomials 88−34667
multicolor reordering of irregular sparse matrices 88−63220
multiconductor transmission line asymmetrical condition simulation by vector-matrix polynomial method *(Russian)* 86−44947
multicriterial comparisons, diagnostic characteristics selection *(Polish)* 86−66651
multidimensional harmonic signals, frequency and amplitude estimation 88−34727
multidimensional interpolation of images, real-time 88−8863
multilayer magnetooptic recording media, 4×4 matrix method use in optics 88−45230
multilayered array computing 88−72936
multimachine power system, synchronizing torque matrices 88−68755
multimode optical fibre local network planning using mode transition matrices *(German)* 85−42596
multiparameter eigenvalue problems, generalised P-SOR method *(Chinese)* 86−62143
multiple geometric mesh, L_2-projections on splines 87−52036
multiple measurement effects on correct inference of measured quantity, probability matrix study *(Polish)* 85−31283
multiple processor systems, fault-tolerant matrix operations using weighted checksums 85−30250
multiple sensor array having spatially correlated noise, optimal delay estimation 86−29847
multiple sinusoids frequency estimation, improved Toeplitz approx. method 88−73061
matrix algebra continued
multiple source parameter estimation, modified maximum likelihood approach 87−55123
multiplication, lower bounds on the computational efficiency of optical computing systems 87−69249
multiplication systolic array 87−23563
multiport matrix signal flow graphs, heuristic topological method, gain formula 85−22582
multiport network cascade realisation via factorisation of rational matrix functions 87−405
multiport networks, tensor analysis of orthogonal network using matrix algebra *(Russian)* 88−38322
multiports, voltage matrix fraction descriptions synthesis with cascade or parallel active RC networks 87−37445
multiprocessor systems, parallel solution of eigenproblems 88−40926
multirate filter banks theory 87−39757
multisplittings and parallel iterative methods 88−11917
multistate Markov models and structural propertiesof the transition-rate matrix 86−61980
multiterminal passive networks, indefinite admittance matrix 88−38314
multitone signals, parameter estimation, proof of Rife and Boorstyn's hypothesis 86−59183
multivariable bilinear transformation matrices, proof of general prop. 87−36557
multivariable digital lattice filters, general family, development and synthesis 86−20735
multivariate Pade approximation 86−46245
N-port network, admittance matrix simulation and sensitivity anal. 85−22625
N-port networks, sensitivity, perturbation matrix analysis *(Polish)* 86−605
N-port networks state equation formulation by Rosenbrock method *(Polish)* 85−17045
N-ports, linear reciprocal without active and reactive power, anal. *(German)* 85−10943
n-winding transformer equivalent circuit *(Czech)* 85−39051
near field adaptive nulling, theory and anal. 88−2698
near-spherical dielectric scatterers, T-matrix method, sparse matrix soln. 87−47155
Nehari interpolation max. entropy principle 87−209
network analysis, hierarchical tearing method 86−66899
network analysis, pivoting algorithm for avoiding zero pivots in modified nodal approach 86−46429
network analysis modified nodal approach, matrix size reduction 85−44835
network analysis using complement method 85−17057
network constraints, matrix of bottlenecks 87−59061
network matrices and transformations, props. 86−610
network nodal analysis, large no. of nodes, procedure *(Croatian)* 87−52255
network partitioning, heuristic algorithm using fundamental loop matrix 85−492
network synthesis, space localisation method appl. 86−62344
network topology of linear one-port networks with ideal transformers using matrix algebra *(German)* 85−17106
networks, structure of distances 86−34173
networks with large number of nodes, soln., anal. and procedure *(Croatian)* 88−501
Newton's method, extension to matrix case 86−13685
Newton's method applied to numerical problems 88−334
Newton's method for the matrix square root 86−52380
nodal admittance matrix of passive networks, topological eval. of arbitrary cofactors 86−62326
nodal analysis of networks containing elements without a voltage-controlled description 88−56375
nodal impedance matrix for networks with mutually coupled inductors, algorithm 88−36830
noise-immunity loss analysis, reception of signals with random initial phase 88−21177
non-negative iteration matrices, comparison theorems 86−13677
noncommutative algorithm for multiplying square 5th order matrices *(Russian)* 87−31451
nonGaussian processes using cumulants, state-space and input-output identification results 88−40932
noniterative tuning of matrix equaliser in frequency domain 86−43262
nonlinear algebraic equation soln., parallelism 86−57389
nonlinear analog fault diagnosis scheme, pseudo nominal tableau approach 85−537
nonlinear electric field problems, computer simulation using matrix methods 88−27398
nonlinear filtering problems with finite dimensionalmatrix estimation algebras 86−54519
nonlinear matrix equations, iterative solutions using fixed number of steps 85−30251
nonlinear network synthesis using transformation multiports and M, N matrix description 88−49996
nonlinear networks, discrete-time simulation in state-space, general algorithm *(German)* 85−22610
nonlinear networks, parameter matrix decomposition multiparameter modification formalism 87−59118
nonlinear residual least Pth and P-norm optimization, combined Newton/1st order approx. with Hessian approx. 87−23533
nonlinear resistive ccts., containing current-controlled current or voltage-controlled voltage sources, anal. 86−46514
nonlinear resistive network anal., relaxation method with network tearing *(Japanese)* 87−59123
nonlinear surface waves, TE-TM interaction 88−58214
nonlinear time-variant networks synthesis *(German)* 86−13952
nonnegative definite matrices minimisation 88−6407
nonnegative integer elements with fixed row and column sums 85−44575
nonnegative matrices, bounds for positive eigenvectors and for approxs. by decomposition 85−33352
nonsalient-pole damped alternator, unsymmetrical short-cct. operation, Floquet's-reference frame determ. 87−78637
nonstationary normal process, overshoots duration distrib. 87−61547
nonsymmetric linear systems, convergence theory of extrapolated iterative methods 85−22396
nonuniform active transmission line as a multipole, anal. *(Polish)* 86−59109
nonuniform sampling techniques for antenna applications 87−54693
normal-forms for IIR filter realisations, based on circulants and skew-circulants 87−66406
Northeastern United States power system, optimal power flow by Newton approach 85−15466

matrix algebra continued
nowhere zero flow and circuit covering in regularmatroids 86−19919
null field integral techniques in scattering problems 88−40544
null space problem 87−187
numerical methods for integrating chemical kinetic rateequations 86−66776
numerical Schwarz alternating procedure and SOR 86−62150
numerical solution of matrix polynomial equations by Newton's method 87−72997
numerical solution of queueing problem *(Japanese)* 86−40611
once-through subcritical steam generator dynamics, numerical simulation, math. modelling 88−37030
one-sided switching networks composed of digital switching matrices 88−21379
optical computation of determinants 88−13982
optical computing, electrooptical processing of signal transforms 87−39868
optical crossbar interconnected digital signal processorwith basic algorithms, matrix-vector multiplier 86−37141
optical fibres, anisotropic polarisation maintaining coupled modes anal. 88−33626
optical fibres, hybrid birefringent, polarisation parameters of plane waves 87−68109
optical fibres, numerical anal. using matrix approach 88−72034
optical fibres in local networks, planning using mode transition matrices *(German)* 86−4303
optical flow, Gramians, generalised inverses and least squares approx. 87−62315
optical LANs, loss evaluation using mode transfer matrices 87−34585
optical linear algebra processor, banded-matrix high-performance algorithm and architecture 85−46885
optical linear algebra processors, matrix preconditioning 87−74853
optical linear heterodyne matrix-vector processor , design 88−72190
optical matrix processors 88−8842
optical matrix vector multiplication by four-wave mixing 87−26534
optical matrix-matrix multiplier based on Kronecker product decomposition 87−33730
optical matrix-multiplication techniques for advanced matrix algebra operations 85−13587
optical matrix/vector processors, variable accuracy, speed/accuracy tradeoffs 88−34776
optical methods for soln. of linear and nonlinear eqns. 85−2871
optical processing of covariance matrices for adaptive processors 88−73220
optical twos-complement data processing for improved encodedmatrix-vector processors 86−43282
optical waveguides planar, GRIN, numerical anal. using matrix method 87−60914
optimal approximation of matrix under spectral restriction *(Chinese)* 86−57381
optimal circulant preconditioner for Toeplitz systems 88−63231
optimal linear feature extraction for three-class equal-covariance Gaussian case 87−69281
optimal nondivergent filtering algorithm without distribution density, synthesis 88−3026
optimal power flow and reactive compensation using Newton's method and penalty function *(Chinese)* 87−50677
optimal power flow determ. using quadratic approx. approach 87−64101
optimal reception of partially polarized waves 88−27518
optimal signal detection, effects of estimated noise covariance matrix 87−47674
optimisation algorithms, matrix calculations 85−54369
optoelectronic processors, hybrid, superconvergence 88−20458
orbital architectures for matrix products 88−739
order $N \log_2 N$ WHT/DHT algorithm 88−31700
oriented matroids, linear and quadratic programming 86−13662
orthogonal and J-orthogonal matrix inversion techniques *(Chinese)* 87−65274
orthogonal least squares fitting with linear manifolds 86−46246
orthogonal transformations, 1-D and 2-D algorithms 86−16321
orthogonal transforms family, derivation based on parametric sinusoidal matrix *(Korean)* 88−6350
orthonormal and nonorthonormal least squaresapproximation of a function subject to linear equalityconstraints 85−54348
oscillatory synchronous motor structure and equations 87−42874
overlapped beams generated by antenna array, efficient matrix feed 87−54767
pair, solving the generalized eigenvalue problem with singular forms 88−18543
para-Hensel codes for exact parallel matrix inversion with systolic processors 88−58286
parallel algorithms for multiplication, optimal *(Chinese)* 88−63228
parallel computation algorithm for static state estimation by means of matrix inversion lemma 87−77936
parallel implementation of matrix operation in Connection Machine, linear time complexity 88−52462
parallel matrix and polynomial arithmetic ccts. 85−33881
parallel perturbed biharmonic solver 87−65421
parallel sparse matrix solution algorithms, nuclear engineering appl. 86−13607
parallel substractjon, operation of deconvolution for convex quadratic forms *(French)* 88−18601
parameter identification problems 87−19366
parameterization of 2-D lattice filters 87−66422
parametric network algorithms, optimal scalings 85−44616
partial total least squares algorithm 88−38107
partially correlated sources localisation at short range *(French)* 88−21269
partitioned linear block simplex matrix codes for computer memory and communication systems 87−61580
partitioned matrix representation for time- and freq.-domain anal. 86−62768
partitioning and mapping algorithms into fixed size systolicarrays 86−26991
partitioning for optical computing 85−7934
partitioning techniques for mapping algorithms into systolic array processors 87−66204
passive networks, parameter calculations using nodal analysis and matrix equations *(Russian)* 85−17614
path algebra for switch-level logic simulation of VLSI ccts. 86−28516
path and cct. matrices, realisability and testing procedure 86−62325
pattern recognition, appl. of reducible matrix structures to dimensionality reduction and spectral estimation 87−47848
pattern recognition, matrix symmetries results 87−7819
pattern recognition, unified, part geometry anal. 85−2887
matrix algebra continued
pencil method, performance 88−73088
pencils, RGSVD algorithm for Kronecker structure and reducing subspaces 86−46269
pencils of matrices, positivity props. 86−46151
perfectly conducting periodic surface, EM scatt., T-matrix approach 85−62750
periodic reaction-diffusion systems, stability of num. soln. 85−54385
periodicities detection using cooccurrence matrices 87−33683
permanent, interpretation 86−57296
permuting relay channels capacity 87−54808
perturbations of eigenvalues of non-defective matrix *(Chinese)* 86−57406
perturbed matrices, convergence conditions *(Japanese)* 87−31379
perturbed waveguide, axial cylindrical conducting objects, mode determ. using numerical method 85−13184
phase controlled thyristor equipment, generated harmonic voltages anal. by nodal potentials method *(Hungarian)* 85−32606
phase shift cosine transform 87−36678
phase shift cosine transformation 87−16453
phase transition matrix evaluation 86−46431
phased array, shaped beam synthesis using power matrix technique 87−27074
photovoltaic power system tracking DC-DC converters stability 87−9443
pictorial data anal., interactive forming matrix, data representation, efficiency estimation 87−2593
picture processing, singular value decomposition method *(Slovak)* 87−69267
piecewise linear resistive networks with uniquesolutions 86−20235
piezoelectric structure anal., three-dimensional finite elements formulation 87−67627
pipeline prime-factor DFT for VLSI using cyclic shuffling 87−72995
Pisarenko's nonlinear spectral estimators, regression formulation 87−47767
Pisarenko frequency estimates determ. as eigenvalues of orthogonal matrix 88−40925
pivoting in the multifrontal method for sparse indefinite systems, threshold 88−11915
PLA folding, interval-graph based, formulation 86−62575
planar graph, mesh matrix, generation algorithm 85−296
planar network, dual theorem on the summation of return differences 85−28288
planar shapes, description and discrimination using shape matrices 86−23129
planar structure, complex anisotropic layered media immersed, propag. const. determ. 85−24898
Poisson equation, axial symmetrical case soln. for potential distrib. in mercury vapour lamp *(German)* 87−54465
polar decomposition, computation and appls. 87−10320
polarimetric radar networks, Mueller matrix elements, Huynen's target-description anal. 86−37925
polarity-coincidence correlation variance with arbitrary covariance matrix 85−19282
polyhedral functions minimisation, regularised decomposition method 86−66746
polynomial diophantine equation solution, resultant matrix approach 85−54230
polynomial matrices, continuous-time stability criterion, orthogonal matrix approach *(Japanese)* 85−60833
polynomial root distribution with respect to conic contours 85−5883
polynomials, generalised, solution of $ax+by=d$ 85−54229
polyphase networks, block digital filtering, LPTV systems and alias-free QMF banks 88−32332
positive definite iterative matrix, convergence rate acceleration 85−44639
positive definite symmetric matrices, simultaneous orthogonal transformation to nearly diagonal form 86−46268
positive definite Toeplitz matrices, bounds on extreme eigenvalues 88−63133
positive-definite matrix which is not extendible 85−2720
power convertor ccts., static and dynamic performance determ. *(German)* 87−22510
power convertors for multiple power transmission, mathematical simulation study *(Russian)* 85−53762
power flow equivalents matrix reductions 87−57489
power network, generalised network parameters matrix refinement for electrical energy shortfall estimation *(Russian)* 87−64121
power network shunt branch admittance matrices *(Russian)* 87−50747
power overhead transmission lines, modal parameter calculation for multiconductor systems 85−38518
power plant flexible rotor machines, real-time simulation with reduced matrices 85−60144
power plant machines with multishaft rotors and fluid film bearings, unbalance response determination 85−60143
power semiconductor structs., transmission-line matrix modelling 85−1548
power station personnel behaviour simulation when diagnosing fault situation, matrix method *(Russian)* 86−57137
power system, load flow and outage simulation, comparison of mathematical techniques 86−12235
power system, normal operating conditions calc., elements simulation, modified Newton method *(Russian)* 88−36798
power system 3-phase symmetrical short-circuits calc., using bus hybrid matrix 85−59621
power system admittance matrices inversion *(Croatian)* 87−64024
power system anal., application of diakoptics *(Croatian)* 85−32065
power system appls. of partial matrix refactorisation 86−50786
power system appls. of partial matrix refactorisation 86−56305
power system connections, matrix anal. of circuit coherence *(Russian)* 85−59553
power system critical contingencies, filtering and ranking method using sensitivity matrix 85−43525
power system dynamic stability, state space matrix method *(Chinese)* 88−30253
power system dynamics, coupling between state variables and modes 86−39004
power system harmonic anal., admittance matrix model of synchronous machine 88−23885
power system integrated security analysis and remedial action package 87−71597
power system load flow, cartesian coordinate based state-of-art method 86−61045
power system load flow calc. using phase equation *(Russian)* 86−18633

matrix algebra continued
power system load flow distrib. calc. in maintenance and past fault regimes simulation 88−36788
power system operating region, optimisation models 86−50792
power system operational reliability eval. method 87−21833
power system optimal ordering triangular factorisation, sparse vector methods 88−23290
power system optimal voltage control using a constant sensitivity matrix 87−42323
power system security assessment, linear reactive power flow methods 86−65618
power system security eval. by matrix modification techniques 87−77951
power system simulation, multiple factoring algorithm for parallel soln. of simultaneous linear algebraic eqns 85−53292
power system stabilisers optimal location identification 88−54874
power system stability calcs. using high-order characteristic equations *(Russian)* 86−56299
power system state estimation, by modified power-to-current measurement transformation 85−21053
power system state estimation, computer aided methods *(Czech)* 86−32671
power system state estimation, identification of bad measurement data using orthogonal transformations *(German)* 85−21093
power system state estimation matrix triangulation enhancement using VLSI techniques 88−30234
power system state estimation observability anal., bad data processing using Hachtel augmented matrix 88−10709
power system state estimation using decoupled LP 86−50789
power system state estimation using general row merging algorithm 88−23302
power system state estimation with complex solution matrices, orthogonal transformation *(German)* 87−9054
power system static state estimation using Hachtel's augmented matrix method 86−18749
power system steady-state calculations, junction impedance matrix *(Russian)* 86−25479
power system topological observability anal. using incidence matrix *(Korean)* 88−36741
power system transient stability anal. using potential energy boundary surface method 88−48454
power system voltage-reactive security assessment and enhancement 86−50890
power systems, centralised online voltage control *(Chinese)* 85−15474
power systems, dynamic equivalents using inertial averaging aggregation 86−25474
power systems, economic dispatch, on-line security constrained, constant reduced Hessian matrix algorithm 87−42324
power systems, higher harmonics calcs., appl. of multidimensional matrices theory 87−71490
power systems, large, small signal anal. 88−42755
power systems, Newton-Raphson power flow, adaptive acceleration factors 86−65619
power systems, observable island identification for state estimation using incidence matrix [power systems operation] 88−30228
power systems, optimal active and reactive power control using computer aided analysis 85−26947
power systems, optimal load dispatching using fast power flow technique 86−12341
power systems, phase shifter distribution factors and lineload alleviation 85−59607
power systems, quality criteria for analysis and optimisation *(Russian)* 85−38430
power systems, three phase, fault analysis by component method 86−25483
power systems, voltage and reactive power control *(Chinese)* 85−15475
power systems and pools, steady state conditions with inadequate telemetry data, operational anal. *(Russian)* 86−25478
power systems and transmission networks, steady state calcs. using directed-approximation method *(Russian)* 85−53300
power systems network observability analysis through measurement Jacobian matrix reduction 87−57488
power systems with several generators, loss of field and hydroelectric generator protection *(Chinese)* 85−9414
power transmission lines, transformation matrix determ. of double phase parameters 85−48569
power transmission networks, computer aided harmonics anal. 87−4348
power-boundedness of interval matrices 86−34225
practical preventive reliability using matrix forms 85−5827
practical reliability problems solution, continuous-time Markov methods use 85−49404
pre-ordered electrical circuits, transients anal. *(Russian)* 85−49679
preconditioned conjugate gradient methods, implementation and appl. 85−28171
preconditioned iterative methods for linear equations 85−28180
predictive transform coding algorithm for bandwidth compression of digital data 86−68993
predictor polynomial, stepup and stepdown computations, efficient procedures 88−63139
principal nth root of complex matrix and matrix sector functions, fast and stable algorithm 88−63224
principal partition of matroids with paritycondition into strongly irreducible minors pairs 87−183
probability that a numerical analysis problem is difficult 88−49759
programmable real-time incoherent matrix multiplier foroptical processing 86−69099
programmed binary freq. dividers, matrix method *(Polish)* 85−876
projection approach to bearing estimations 87−12994
prolate functions calc. for optical analysis, stable and unstable laser resonators 87−61188
pseudo-inverse of matrix computing, iterative computational method 86−26766
pseudoinverse computation, impact on minimum variance reduced-order filtering 86−23030
public-key cryptosystem and digital-signature schemes based on linear algebra over a local ring 87−75705
public-key cryptosystem based on generalised inverse matrix *(Japanese)* 88−52352
public-key distrib. system based on matrices, improved version with conference scheme 87−75700
pulse mode sequential logical networks, anal. *(Chinese)* 87−37136
quadratic, nonnegative solutions 85−33260
quadratic digital filters for image processing 88−59208
matrix algebra continued
quadratic forms on unit ball of max. norm, computation of max. 85−22394
quadratic matrix, ALGOL 60 programming algorithm *(Polish)* 88−49763
quasi-Jacobi matrices, RC networks and Aizerman'sconjecture 86−608
quasi-Newton methods updates generation 86−40637
quasi-planar transmission lines, propag. consts. determ., modified mode-matching technique 86−10138
quasi-tridiagonal matrix, inverse 86−52398
queueing loop of two general servers, matrix-algebraic soln. 86−52338
queueing Markov chain computation 88−38059
radar data, digital processing using coded matrices algebra *(Russian)* 87−3221
radar detection waveforms with nearly ideal range-Doppler ambiguity props. 85−3487
radar polarization mixed target state decomposition techniques 88−60235
radar systems, multicriterial optimisation by correlation matrix, generalised indices selection 88−4072
Rademacher transform, fast computational algorithm, monochrome/colour image coding appls. *(Japanese)* 88−41097
radiating sources, bearing estimation using Household reflections 87−56213
radio interferometer adjustment, antenna phase centre correction eqns. *(Russian)* 87−40664
radioastronomy, polarisation meas., polarisation-refl.-matrix determ. 85−58265
railway overhead wire displacement and stress anal. by FEA 87−36222
raindrop size distrib. by coherent polarimetric radars, three-parameter characterisation 85−41618
random signal detection concentrated in subspace, interference with unknown correlation matrix 86−48941
rank determ., statistical anal. of effective singular values 88−52316
rank revealing QR factorisations, SVD alternative 87−55112
rank-p modification of linear system, stability 86−46270
rapid algorithm for ordering the unknowns to solve combined equations with a sparse matrix *(Russian)* 85−44594
rapid approximation solution of a matrix equation *(Czech)* 85−39603
ray matrix method for analysis of opt. resonators with image rot. 87−26474
Rayleigh-Ritz refinement technique for nearly uncoupled stochastic matrices, convergence 85−330
reactive power dispatching using revised linear programming 88−75039
real decaying exponentials in noise, accurate estimation 87−61962
real matrices, approx. by integral matrices 86−66713
real symmetric positive-definite Toeplitz matrix, split algorithms, digital signal processing 88−66574
real-time signal processing, algorithms and technology, conf., San Diego, CA, USA (Aug. 84) 85−27915
real-valued matrix permutation problems 87−10230
rectangular speech signal analysis using co-occurrence matrix *(Slovak)* 88−14610
rectangular waveguides, stepped inhomogeneities calc. partial regions convergence method 85−24908
rectification machines, vibration behaviour *(Romanian)* 88−53942
recurrences, R-order with appls. to inclusion methods 87−10300
recursive bordered block diagonal matrices, LU decomposition, forward-backward sub. 85−22292
recursive calculation of curved finite element stiffness matrices error analysis 85−33316
recursive digital filter, transfer function calc. using Pascal matrix *(Czech)* 86−1294
recursive least squares signal processing algorithm anal. 87−55118
recursive optimal processing algorithms for interference correlation matrices of a specified structure 88−21191
recursive periodically time-varying digital filters with highly quantised coefficients 88−52423
recursive two-dimensional causal filter approximation using astrictly causal filter 86−35009
reduced Gaussian method using constant Jacobian matrix for solving network type nonlinear simultaneous equations 85−4606
reduced order modelling using integral manifold for nonlinear systems 88−48918
Reed-Muller codes of 1st order, covering radius 87−68995
Reed-Muller expansions of incompletely specified functions 87−72994
regression models with linear constraints andnonnegative regression coefficients *(Chinese)* 86−7676
regular splittings and monotone iteration functions 85−49484
remotely sensed image data anal. by means of category decomp. *(Japanese)* 87−55311
reordering a sparse matrix to a sparse blocked form 85−39601
residue arithmetic VLSI array architecture for manipulator pseudo-inverse Jacobian computation 88−63647
resistance n-port networks, description and realisation 85−33610
resistive n-port network, realisation of tridiagonal impedance matrix 87−44448
resistive networks, piecewise-linear type, homeomorphism of matrix eqns. 88−31970
restoration of images degraded by motion blur usingmatrix operators 85−51805
reusable systolic optical matrix multiplication processor 88−26919
reversible codes 86−36927
ribbon matrices inversion, analytical and numerical solutions 87−19633
Riccati differential eqn. with const. coeff., numerical soln. of Davison's method *(Japanese)* 87−52070
Riccati equation, algebraic, computational aspects of matrix sign function solution 85−49500
Riccati equation solved by matrix triangulization 85−16888
Riccati matrix, nonautonomous, solution, computational method 86−46152
Richardson iteration, optimum iteration parameter calculation, for solving any linear set 86−13680
RLC four-pole asymmetrical latticed circuit, immittance matrix, transformerless realisation 87−45022
RLCM circuits with perfect transformers, math. model *(Russian)* 86−66896
rotation based method for solving covariance and related linear systems 88−66576
rotationally symmetric conducting bodies, radar cross section computation using transition matrix technique 85−20259
row-ordering schemes for sparse Givens transformations, bipartite graph model 85−28179
salient pole synchronous machines, nonlinear math. model using magnetic permeance matrices 87−9525
satellite communication, matrix decomposition complexity 85−58059

short-cct. calcs. in power networks, online technique using parallel programming 88−48540
shuffle-exchange graph, placement algorithm 88−18875
sign structures of 3×3 stable matrices and their generalization to higher order matrices *(Japanese)* 87−72891
signal angle-of-arrival estimation, bias and resolution of vector space methods 87−62122
signal extrapolation, Lanczos method 87−62031
signal matrix, spatio-temporal spectral anal. by SVD 87−62125
signal processing, 3D data/instruction systolic array 88−40941
signal processing, matrix exponential approach to elementary operations 87−55129
signal processing, rank-one eigenvector update, highly parallel, improved method 87−62064
signal processing, recurrent algorithms synthesis 87−19676
signal processing, subspace approximation based covariance eigensystem solver 87−39742
signal processing, Toeplitz matrices, displacement ranks and fast algorithms 88−14744
signal processing, with interference and noise, very fast adaptive array processing method 87−55193
signal processing algorithm, Levinson-type recurrences and Toeplitz systems solving 88−332
signal processing and sensors, computerised, fast algorithms and architectures for mathematical techniques 88−12432
signal processing applications of concurrent array processor technology, book contrib. 85−46809
signal restoration, with missing high-frequency components using two low-pass-filter matrix dimensions, speed comparison of methods 85−57498
signal subspace method for interference cancellation 88−40919
signal-fn. reconstruction in terms of finite data set *(Russian)* 87−27419
signals and matrices, algorithms for linear problems solution 86−16350
simple networks for solving linear equation systems using BASIC programs *(German)* 86−18634
simulation, real-time, conservation eqn. appl. 87−71769
simultaneous linear equations, parallel elimination *(Japanese)* 88−18641
single loop feedback systems, chaotic motion 87−52322
single phase distribution lateral, fundamental-frequency impedance study 86−39146
single sinusoid in noise, freq. estimation with short data records 86−3923
single-mode light fibre, annular fibre interferometers appl., nonreciprocity matrix anal. 85−7278
singular matrix reflexive inverse, linear complementarity problem 88−11820
singular points computation of nonlinear equations 85−332
singular value decomposition 86−300
singular value decomposition, generalized, (A−λB)-problem 85−22387
singular value decomposition, iterative algorithm 85−30245
singular value decomposition based algorithms, threshold anal. 88−73076
singular value decomposition computation using optical processing techniques, highly parallel algorithm 85−30302
singular value decomposition with systolic arrays 85−30244
singular value decompositions of complex symmetric matrices 88−18638
singular value problems solution using systolic arrays 85−30243
sinusoidal signal with coloured noise, robust estimation using decentralised processing 88−46122
sinusoidal signals with additive white noise detection method, goniometer appl. *(French)* 88−21250
sinusoids, high spectral estimation, in coloured noise using modified Pisarenko decomposition 87−19735
six-port matrix calibration formalism using five standards 88−42262
slab waveguides, almost-periodic distributed feedback, anal. via fundamental matrices 87−74662
SLAPP, Systolic linear algebra parallel processor 87−66202
SMI adaptive antenna arrays for weak interfering signals 87−12834
Smith form equivalence for matrices over rings 85−5884
smooth air-gap machines, small signal anal. using space vector theory 88−49197
smoothing splines, fast procedures for calc. 87−10310
space-time reception channels, central symmetry, recurrent adaptive processing algorithms 86−37030
spacer-dampers for transmission line two-conductor bundles, stiffness study 86−51061
spanning trees, most and least uniform 87−16474
spanning trees of regular networks 88−24634
sparse admittance matrix approach to computer-aidedanalysis of the linear time-varying networks in thefrequency domain *(Polish)* 86−13959
sparse basis computing, for null space 87−212
sparse coeff. matrices for higher-order eqn. systems, efficient soln. *(Russian)* 87−65271
sparse Givens transformations, general row merging schemes 87−10321
sparse Jacobian matrices, FORTRAN subroutines for estimating 85−28174
sparse Jacobian matrices, orthogonal procedure for updating 85−39669
sparse Jacobian matrices, subroutines for estimating, discussion 85−28173
sparse linear equations soln. over finite fields 86−46149
sparse linear least squares, elimination, orthogonalization and iterative methods 85−5932

matrix algebra continued
sparse matrices, parallel inversion, directed acyclic graph representation 86−46150

sparse matrix techniques 87−51908
sparse matrix techniques for online network appls. 87−71573
sparse network eqns., fast solution using array processor, transmission network appls. 86−56409
sparse nonlinear least squares algorithm 88−18636
sparse ordinary DE solvers, effect of partial pivoting 87−16542
sparse symmetric matrix decomposition, partial pivoting strategy 87−65404
sparse systems of equation, conf. London, England (Nov. 1983) 85−27957
sparse vector method improvement using mode ordering algorithms 88−49602
sparsity, direct methods for linear equations 85−28181
spatial filtering systems, correlation matrix models mismatch, effectiveness 88−40957
spatial signal processing, high-resolution identification and covariance matrix estimation *(French)* 88−21255
spatial spectrum estimation using linear aperiodic array, element placement considerations 86−16332
spatial spectrum estimator, high resolution, statistical anal. using augmented covariance matrix 88−14665
special parallel processor for LU decomposition of alarge scale sparse matrix *(Japanese)* 87−166
special-purpose arrays design for matrix computations 88−25115
spectral anal., maximum likelihood identification of structured correlation matrices 88−3130
spectral analysis of time series eigenvector props. of Toeplitz matrices 85−2844
spectral estimation, from conventional methods to high-resolution modelling methods, book contrib. 85−46810
spectral estimation, modern, theory and appl., book 88−31283
spectral factorisation algorithm 86−19881
spectral factorisation problems, numerical algorithms and software 88−73161
spectral transformation implementation 87−52051
spectrum analysis using a new autocorrelation measure 88−73086
spectrum estimation, maximum-likelihood algorithm for Toeplitz covariance matrix, Burg technique 87−39740
specular point curvature recovering from polarimetric scattering matrix data, high frequency inverse scattering model use 85−19111
speech, LPC, matrix quantiser design using generalised Lloyd algorithm 85−57290
speech recognition, connected, automatic determ. of phonemic confusion matrix 87−47608
split Levinson algorithm for Toeplitz matrices of any rank profile 88−31686
square matrix characteristic polynomial computation algorithm *(Chinese)* 86−7587
square-dot matrix patterns having specific three-valued periodic-correlation function 88−66248
SS/TDMA systems, scheduling algorithms for SS/TDMA systems improvement 85−31000
star-diagonalization of 3×3 scattering matrices 88−56092
state transition matrix, efficient algorithms for computation in closed form 86−57299
state-space digital filter, constrained roundoff noise minimisation 88−63810
static Kramer drives using slipring induction motors, matrix and eigenvalue anal. 87−16109
stationary normal noise with time correlation between samples, complex correlation matrix evaluation 86−36892
steady-state power system linear model soln. *(Croatian)* 86−12262
Stein-Rosenberg type theorem in interval anal. 87−16531
stepsize selection for Runge-Kutta codes 88−70264
stochastic Petri nets, anal. by transition rate matrix decomposition 87−61545
strapdown navigation matrix, SVD for optimal orthonormalisation 86−43876
strict positive real problem, Markov parameter characterisation 85−289
strong eigenvector component extraction from sample vectors 88−46141
strong regularity condition of matrices in minimax algebra 85−49493
strong unimodularity for matrices and hypergraphs 87−16477
strongly unimodular matrices, structure and recognition 87−72998
structural elements of circuits, equivalent circuits and matrix algebra of equations *(Russian)* 87−36862
structural optimisation by force method, sparse orthogonal schemes 85−5941
structural theorems for submodular functions, polymatroids and polymatroid intersections 88−56140
structured addition antialiasing zoom algorithm for binary images *(Chinese)* 88−46152
structured matrix approximation problems, simultaneous frequency and wavenumber estimation from 2D array data 88−70194
successive approxs. method and well-positive definite matrices *(Rumanian)* 86−66773
SVD of product of two matrices, computation 87−10319
SVDs, rotation angles computation, online schemes 88−40928
switched capacitor filters with a row dominant nodal admittance matrix 87−10971
switched capacitor networks, generalised matrix anal. *(Bulgarian)* 85−10954
switched capacitor networks, ideal and nonideal types, symbolic anal. 86−62415
switched capacitor networks, passive type, wave variable anal. 86−62414
switched three-phase asynchronous motor, feasible two-axis representation 86−39806
switched-capacitor networks, frequency domain anal., sequential orthogonal transformations 85−23019
switched-capacitor two-port, analysis using MINICO SC program *(Czech)* 87−59719
switching two-port ccts., synthesis method 88−24950
symbolic matrix inversion based on multidimensional DFT; electronic cct. appl. 88−31684
symbolic-numerical analysis of electronic ccts., algorithm 87−73222
symmetric block designs, new proof of a theorem of Szekeres 86−34144

matrix algebra continued
symmetric eigenvalue problem, fully parallel algorithm implementation 87−55113
symmetric positive definite Toeplitz matrix, min. eigenvalue computation 86−46264
symmetric successive overrelaxation method *(Chinese)* 87−44220
symmetric Toeplitz matrices, comments and reply 86−7588
symmetric Toeplitz matrices, eigenvectors 85−60830
synchronous machines composite armature windings, matrix methods of anal. *(Russian)* 87−35916
synthesis sparse matrix algorithm for computer aided circuit design *(Chinese)* 85−10917
system failure detection using parity checks, frequency-domain approach to system failure detection using parity checks *(Chinese)* 86−66629
systems-analysis problems, matrix inversion formulas appl. 87−10623
systolic algorithm and architecture for solving sets of linear equations with multi-band coefficient matrix 88−70267
systolic architecture for optimal filter design support 88−40886
systolic architecture for solution of linear systems over GF(p), CMOS design appl. 87−52491
systolic architectures for polynomial and polynomial matrix manipulations 88−672
systolic array, sparse matrix-vector multiplication 88−70683
systolic array construction from algorithms, systematic method 87−65696
systolic array for efficient execution of the Faddeev algorithm 88−24674
systolic array for matrix computation 87−61829
systolic array for matrix triangularization and eigenvalue computation 88−38442
systolic array implementation for matrix multiplication, testability conditions 86−26992
systolic array methods for band matrix factorizations 87−10311
systolic array OCSAMO, design 87−66080
systolic array structure for least square problems 87−24154
systolic arrays, dependence graph based design for algebraic path problem 88−737
systolic arrays, design methodology 87−55132
systolic arrays, fault tolerance techniques 88−25113
systolic arrays, matrix-based discrete Fourier transform 88−822
systolic arrays, spacetime transformation 86−64312
systolic arrays , estimation system of numerical stability for matrix operations 88−70667
systolic arrays for eigenvalue computation 87−13019
systolic arrays for matrix I/O format conversion 88−56648
systolic design using S-MP, matrix-vector multiplication example 88−70853
systolic Kalman filtering based on QR decomposition 88−40914
systolic linear algebra processor, one-third gigaflop 85−28555
systolic LU-factorisation of tridiagonal systems 88−26916
systolic partitioned and banded linear algebraic computations 87−55134
systolic solution of linear systems over GF(p) with partial pivoting 87−58865
systolization methods using matrix techniques 87−37254
T-mode, irregular transmission line, transmission matrix 87−13547
target parameter estimation in the near field with two sensors 88−72921
target tracking filters, closed-form solutions 85−25089
TDMA wide-band systems, channel estimation and synchronisation technique 88−28155
telecommunication channels, parallel switching, address matrix division *(Russian)* 87−48259
telecommunication systems, functions in urban areas, block identification anal. *(Japanese)* 86−30161
telecommunication traffic matrices, estimation method *(Japanese)* 87−27129
teletraffic, assignment problem solution through rearranging process *(French)* 86−59167
test matrices for generalised inverses 86−34224
testability numerical evaluation improvements 87−70341
texture anal., cooccurrence matrices and subspace methods appl. 87−48121
texture feature extraction from cooccurrence matrix 88−8837
textured surface classification based on reflection data 87−13129
thematic classification error matrix anal. using categorical data techniques 85−57540
theorem for locating eigenvalues 86−7586
thermal analysis of square shaped packages, finite element method 88−49548
thermal/hydroelectric system power distribution optimisation matrix *(Croatian)* 86−18690
thin film resistors, irregularly shaped, resist. calc., mesh anal. algorithm 87−24633
three phase transmission lines, untransposed, state equation modelling and simulation programs 85−21229
three-dimensional EM fields calc., involving laminar eddy currents 87−68717
three-phase arc furnace cct., linearized mathematical model 85−49199
three-phase unbalanced power systems, computer based impedance matrix 88−68720
time delay systems and 2D digital filters, minimal-realisation techniques 87−17251
time discrete spectral factorisation, iterative algorithm 85−57336
TMC2301 image resampling sequencer, matrix notation simplifies image processing algorithm design 88−46163
Toeplitz approx. method for direction finding problems, props. 87−62107
Toeplitz matrices, close-to, vector algorithms for computing QR and Cholesky factors 87−62062
Toeplitz matrices, eigenstructure 85−319
Toeplitz matrices, eigenvalue distribution 88−73089
Toeplitz matrices, eigenvalue recursion 87−58859
Toeplitz matrices, inversion of those which are not strongly nonsingular 85−28175
Toeplitz matrices, parallel QR decomposition 87−52053
Toeplitz matrices, real symmetric, inverse eigenvalue problem 88−63136
Toeplitz matrices, three term recurrence and fast algorithms 88−49762
Toeplitz matrices inverses, circulant approximations, stationary random processes appls. 86−26691
Toeplitz matrices with singular minors, Levinson and Schur algorithms 88−63137
Toeplitz matrix operations, parallel algorithms 86−13686
Toeplitz solvers, numerical performance improvement using pivoting 87−55110
Toeplitz system of eqns., soln. using fast algorithm 85−44577
Toeplitz systems of equations, stability of methods 85−33322

matrix algebra continued
Toeplitz systems of linear equations, Levinson recurrence and fast algorithms 87−61836
Toeplitz theorem extension and appl. 88−46094
Toeplitz-constrained covariances, iterative maximum-likelihood estimation 87−44121
Toeplitzization of correlation matrix in multipath environment 87−27061
tracking filters, exponentially correlated vel./accel. types, closed-form solns. 88−8728
tracking Kalman filter, parallel implementation 88−70888
transfer function determ., two variable, state equations 86−26960
transfer function matrix realisation by expansion about general point 85−22579
transfer function matrix realisation from Markov parameters and moments mixture 85−39598
transfer function matrix realisation using Taylor series expansion 85−246
transfer function Z transformation by the P_n and D_n matrix 87−401
transformation matrices for general double bilinear transform. of bivariate polynomials *(Chinese)* 87−65275
transients analysis in linear ccts., using matrix version of Heaviside theorem 87−44496
transistor circuits, topological proof of Nielsen-Willson theorem 86−46515
transmission line matrix method, microwave line appls. *(French)* 88−66114
transmission line stability anal. using orthogonal experimental-design matrices 87−21929
transmission lines, lumped network model for charact. eval. 88−12656
transmission network security analysis incorporatingnetwork islanding, diakoptic method 86−70651
transmission networks, junction-impedance matrix calculation using BASIC program *(German)* 86−25556
transmission statistics of waves with random coupling and random propagation constants 85−995
triangular factor updating under rank one change 86−26769
triangular matrix complexity of realization by gate circuits of different depths 86−14159
triangular matrix decomposition rel. to linear interpolation 85−249
triangulations (tilings) and certain block triangular matrices 85−22328
tridiagonal complex symmetric matrices, eigenvalues calc., QL algorithm 86−297
tridiagonal matrix, condition no. computation 86−46266
tridiagonal matrix, determinant, eigenvalue and inverse *(Korean)* 87−31378
triple matrix multiplication, simultaneous, application of three dimensional systolic cubic architecture 86−41914
TT-scheme double transmission line analysis *(Croatian)* 85−15553
turbogenerator magnetic circuit, design using tooth-loop permeance method 85−43931
turbogenerator set rotor-bearing foundation system, mathematical vibration anal. *(Chinese)* 85−9825
turbogenerator system, excitation controller design using exact model matching techniques 88−5656
two graph minimum modified nodal formulation for cct. matrix 87−65619
two- and three-dimensional system theory, algebraic nature 85−46845
two-dimensional asymmetric half-plane digital filters, approx. using strictly causal filters 86−1274
two-dimensional IIR half-plane digital filters, block realisation with matrix convolutions, FFT appls. 85−46853
two-dimensional recursive digital filters, 2-variable very strictly Hurwitz polynomial (VSHP) generation using matrix theory 85−46849
two-port network configs., noise wave correlation matrix and noise figure determ. *(German)* 87−65764
two-port network parameters, linear algebraic technique appls. 85−28318
two-port resonant ccts., Q-factor meas. using network analyser 86−13910
two-ports and multi-ports analysis, setting up matrix equations *(Slovak)* 85−11392
two-variable very strictly Hurwitz polynomial, generation using matrix theory, 2D digital filter design appl. 86−62750
two-weight codes, association and difference sets 87−68983
TWT with field phase jump, gain 85−61634
ultra-metric matrices *(Japanese)* 87−65273
uncertainties treatment in precision meas., w.r.t. West German standard 88−15881
underground distribution systems, maintenance personnel safety, digital simulation of primitive impedance matrix *(French)* 85−32156
underground power cables, soil transient temp. anal. using PCs 88−61934
underlying graph and total length of optimal realizations of variable distance matrices 88−11859
uniform lossless transmission line, EM transients calc. 88−23488
uniformly redundant arrays, fast decoding algorithm 88−8806
unimodular matrix over $R[z_1, z_2]$, simplified derivation of completion theorem 85−28086
universal real-time transformer for image coding 88−21336
unsymmetric matrices, look ahead Lanczos algorithm 85−39670
unsymmetric SOR method, appl. to p-cyclic matrices 87−5367
updating conjugate directions by the BFGS formula 87−72999
vectorised LU decomposition algorithms for unstructured sparse matrix 86−57568
very strictly Hurwitz polynomial and recursive filter appl. 88−886
VHV transmission system asymmetric working conditions calc. using matrix polynomials *(Russian)* 88−10836
vibration-proof radio equipment, construction rigidity matrix, computer-aided formation 87−40654
vision camera location determ. from 2D/3D line and point correspondences 88−73298
VLSI architecture for covariance eigen systems, real-time Pisarenko spectrum estimation 86−14285
VLSI array processor for matrix multiplication 85−11377
VLSI complexity of some arithmetic and numerical problems 88−50905
VLSI implementation of fast solvers, band linear systems, constant coefficient matrix 86−9210
VLSI interconnect modeling as inverse scatt. problem *(Chinese)* 87−67487
VLSI models, linear systems soln. using iterative methods, error anal. 86−15218
VLSI package, rectangular and cylindrical stubs, inductance matrices 88−50970
VLSI systolic array simulation for load flow throughput enhancement 85−23911
voltage invertor, using thyristors, anal. using matrix-logical algorithm 85−49008
voltage transfer function matrix with active RC network, synthesis 85−17637

matrix algebra continued
Volterra nonlinear time-invariant digital filters of second order, semisystolic realisation *(Slovak)* 88−19263
W*-algebras, relative entropy of states, variational expressions 86−299
Walsh domain filtering, symmetry and sparseness 87−39758
waveform relaxation method, local convergence 88−38321
waveform relaxation method, monotone convergence *(Japanese)* 87−5365
wavefront array architecture for executing sequences of matrix operations 88−29304

best wave interferometer with Zeeman laser for measuring short range 87−14550
biological systems, fluorescence decay meas. using synchronously pumped, cavity dumped dye lasers 85−19064
biomedical applications of opt. sensors, review 86−56116
biosensors, fluorescence-based using laser light, principle 88−60704
BIPM tasks and achievements concerning meter, kilogram, and ampere 88−15879
birefringence meas. in single-mode optical fibre, using circularly polarised light 86−11760
blood flow, evaluation of laser Doppler flowmeter by video microscopy 86−56114
blood flow, laser Doppler flowmeter output obs. using calibration standard 88−68367
blood flow measurement in skin by laser Doppler method with different lasers 88−74816
blood flow measurement in skin by transient thermal clearance and laser Doppler flowmetry methods 88−68368
blood flow monitoring using Doppler method 85−4297
Bragg angle meas. technique using acousto-optic modulator and He-Ne laser 85−31610
calibration and comparison of laser interferometer systems 87−7463
calorimetric spectroscopy on flows 87−70866
CAMAC-compatible automation of microwave relaxometer using IZOT TsLANP-0270 computer system 87−70780
CARS appls. in industrial research *(French)* 88−65925
cars development appl. at Volkswagen *(German)* 87−75294
CCD sensor for adaptive welding 87−49533
cell image meas. system using flow technique *(Japanese)* 87−63317
ceramics, props. meas., conf., Soverato, Italy (Sept. 1986) 87−5124
chromatic dispersion meas. of multimode optical fibre waveguides *(Czech)* 87−7099
chromatic dispersion measurement system using 'n' LD light sources different in wavelength 87−8753
chromatic dispersion of single-mode fibres meas., using GaInAsP lasers *(Czech)* 85−58918
chromatic focusing technique for video discs 85−64278
clean rooms, semiconductor manufacture, submicron aerosol particle meas. 86−8953
CMOS IC latch-up phenomenon study, localised obs. techniques and sensitivity meas. *(Italian)* 88−57798
CMOS IC metallisation, rapid recognition of interconnect features for customisation 88−13186
CMOS latch-up anal. by laser scanning and SEM 87−1754
CMOS latch-up sensitivity mapping under laser-scan irrad. 87−6924

measurement by laser beam continued
CMOS VLSI, surface induced latch-up investigation using laser probe 88−39687
CO_2 laser heterodyne rangefinders, velocimeters and radars 85−42659
coating thickness meas. and control during thermal spraying 87−35193
coherent laser radar 3-D vision sensor, industrial robots appl. 86−55563
color laser microscope for inspection of semiconductors 87−68677
combined use with thermography as diagnostic tool for plasma forming 88−494
combustion device and chemical reactor diagnostics using CARS 85−51340
combustion diagnostics, CARS appls. 87−49982
compact discs testing *(German)* 87−70278
composite panel, whole-field strain determ. using coherent opt. processing 87−31619
computer aided laser measurement techniques *(German)* 87−75293
computerised laser system for straightness and angular meas. *(German)* 86−18109
computerised sensors for roughness evaluation ofsmooth surfaces of optical components 87−3397
conference, laser science advances, Dallas, TX, USA (Nov. 1985) 87−5122
conference, lasers and electro-optics, San Francisco, CA, USA (June 1986) 87−65063
conference on industrial laser interferometry, Los Angeles, CA, USA (Jan. 1987) 88−18305
confocal laser microscope for submicron structure measurement, VLSI cct. appl. 87−33347
coordinate meas. instruments inspection, ATE with laser interferometer *(German)* 86−18107
coordinate meas. using laser scanning head, mould design and tool making appl. *(German)* 87−56841
coordinate measurement with a tracking laser interferometer 87−34935
coordinate measuring machine for cylindrical aircraft parts 88−8376
core centering in optical fibres 88−51470
corneal parameters meas. and diagnosis using real-time analysis keratometer 87−77625
crack tip propagation measurement by pulsed holographic microscopy *(Japanese)* 87−23797
cross-spectrum technique for high-sensitivity remote vibration analysis by optical interferometry 88−60914
cryogenic radiometer for the realisation of anabsolute radiometric scale 86−24807
curvature radii meas., real-time using diffraction edge waves 85−43095
cutting tools, threaded, automatic lead-error meas. machine 87−63512
DC elec. field distrib. in dielec. liquids using modified Kerr electrooptic technique 88−29568
DC-induced prebreakdown events in n-hexane 87−18369
deflection measurement by laser optical line of sight system 87−39268
developments *(French)* 86−29264
dial indicator verification by He-Ne laser beam *(Rumanian)* 86−24586
diameter meas. using laser scanning devices 85−56916
diameter meas. using lasers and CCDs 87−77414
dielectric liquid, elec. field assessment using real-time interferometer 86−50199
differential absorption LIDAR, spaceborne and airborne, H_2O profiles meas., sensitivity anal. 88−28977
diffraction method of meas. small linear dimensions, mode composition effects on errors 87−56844
diffuse surface height measurement system for defects detection 85−37756
digital flowfield imaging technology, review 87−77464
digital ICs, GHz, speed meas., optical technique 85−6248
digital image recovery and synthesis, conf., San Diego, CA, USA (Aug. 1987) 88−43564
digital TV speckle interferometry technique for dynamic motion meas. 86−24162
DIII-D tokamak operation diagnostics using CO_2 quadrature heterodyne interferometer 88−74609
dimension meas. for computer aided QC of internal combustion engine *(German)* 88−45607
dimensional inspection, laser and electro-optical techniques 88−2437
dimensional meas. using computer vision techniques, error analysis 88−60773
dimensional metrology use of galvanometric mirrors and polarised beam 88−4644
diode laser, appl. in an ESPI system 87−39121
disc drive technology application of heterodyne interferometry 87−47047
disk, rotating bladed, vibrating anal. using holographic interferometry and laser vibrometry 87−19077
disk substrates, optical inspection tool 88−34188
displacement control using Michelson laser interferometer *(Russian)* 85−46512
displacement detector using nonlinear effects in active medium 86−68651
displacement meas., automated optical system using Vernier scale method *(Japanese)* 87−77424
displacement meas. using laser-speckle interferometry and stimulated US stress waves 87−21232
displacement meas. using optical heterodyning method 86−55834
displacement measurement, laser instrument with built-in microprocessor 86−5526
displacement measurement, laser interferometer system 87−70793
displacement meter, laser-Doppler principle 87−77406
displacement monitor for large structure meas. 87−33346
distance meas., online precision meas. tool 88−42286
distance meas., precision optical methods *(Japanese)* 86−5522
distance meas. in robotics, laser beam techniques *(Spanish)* 88−53879
distance measurement *(Japanese)* 87−12645
distance measurement using pulse train from laser diode 88−14317
distance measurements using a laser diode and by heterodyne detection with an avalanche photodiode 88−29642
distance-measuring instrument, microwave electro-optic modulator 88−27352
Doppler anemometer, for flow meas. of heated air in circular tube 88−47717
Doppler displacement measurement 88−2427
Doppler displacement meter *(French)* 88−53863
Doppler interferometer for displacement meas. 88−74586
Doppler meas. of vibration and motion 86−5531
Doppler method for operative monitoring of laser beam diameter *(Russian)* 85−48103
Doppler tissue flowmeters, in vivo evaluation of signal processors, cat obs. 87−41942
Doppler vibrometer, expt. modal analysis system 88−4699

measurement by laser beam continued
Doppler vibrometer, miniature DC motor brushes meas. appl. 86−24752
Doppler vibrometer testing for power plant diagnostics 87−63575
Doppler-tuned laser spectroscopy combined with beam probing, magnetic field meas. appl. 88−29605
double grating frequency shift effect of the laser beamand its application, in velocity and displacement meas. *(Chinese)* 85−62696
double-beam laser interferometer arm length limitations 85−19066
droplet size distribution changes of water-in-oil emulsion due to electric field induced coalescence 86−68672
droplet sizing techniques, laser interferometric, performance comparison 87−21241
dual-beam laser deflection sensor 86−3257
dye laser, high resolution computer controlled, for spectroscopy appls. 87−12413
dye laser, mode-locked, for ps pulse generation and short time interval meas. *(Spanish)* 88−72293
dye laser, ultrashort pulse, for femtosecond nonlinear spectroscopy 88−20594
dye lasers, tunable, high repetition rate, spectroscopy appl. *(Chinese)* 88−40424
dynamic magnetic domain readout with high spatial resolution 85−4088
dynamic measurement of watch mechanism by means of laser Doppler effect 87−61291
Earth core vibration meas. by laser interferometry with fibre optics *(Russian)* 86−38924
edge position meas., microcomputer based system using fibre sensors 86−60347
electric current meas. using Faraday effect for He-Ne laser beam 87−77354
electro-optic sampling technique for testing of fast electronic and optoelectronic devices 86−42665
electro-optical frequency modulator as optical heterodyne, operation analysis 88−2053
electro-optical sampling techniques for testing picosec. electronics, appls. 86−63889
electro-optical technique for intense microwave meas. 85−52853
electronic connectors and DIP sockets, automatic inspection by lasers 85−11691
electronic tablet Billiard Scanner using laser beam scanner *(Japanese)* 85−52875
electrooptics field testing in complex avionics system 86−18481
EM distance measurements, instrument for accurate determ. of geodetic baselines 86−24783
EM field probe, sensitive HF, using semiconductor laser in small loop antenna 87−21219
emissivity of hot cathode determ. during arc discharge, by laser reflectometry 87−66813
enamelled wires crazing inspection and monitoring, using light scattering 87−66613
end bar measuring instrument, design 87−49444
engineering meas., conf., Cannes, France (Dec. 1985) 87−16248
epoxy resins microvoid formation and growth under mech. and elect. stress, meas. by laser scatt. 88−64860
etching end-point-detection technique 87−6583
fast ion beam collinear laser spectroscopy, applications, sensitivity, resolution 86−15818
fast sector scan and pattern recognition for CW laser Doppler anemometer 86−18566
fatigue detection based on the change of laser-produced diffraction patterns 88−40411
fault location in inaccessible cables using semicond. laser amplifying characts. 86−11125
femtosecond laser flashed frame imaging utilizing a femtosecond streak camera 87−56528
fermentation, online laser turbidimeter *(Japanese)* 87−41438
fiber optic laser vibration sensor 86−48095
fiber ring interferometer current sensor: a new method of stabilisation 88−74455
fibre, monomode, dispersion meas. with tunable 1.3 μm external cavity laser 86−2834
fibre, single-mode, chromatic dispersion meas. using sinusoidally modulated laser diodes 85−41140
fibre bandwidth variation with wavelength in 850 nm region, meas. using mode-locked styryl-9 dye laser 88−65181
fibre chromatic dispersion, field meas. and laboratory results comparison 88−72079
fibre connector dimensions meas., using He-Ne laser and CCD camera 88−45086
fibre diameter, tolerance checking during drawing 87−32953
fibre dispersion measurement using only two wavelengths, field-usable method 86−31684
fibre interferometer technology and hydrophones 88−7893
fibre interferometric sensor 88−7906
fibre optic displacement sensor using diode transceiver 88−36050
fibre optic evanescent-wave coupling force transducer, using He-Ne laser 87−29085
fibre optic gyroscope, phase modulated, coherent backscatter analysis 87−26040
fibre optic laser probe for flaw detection using opt. meas. of acoustic wave produced surface displacements 85−10891
fibre optic links, fault location and loss meas. using time-domain reflectometer 85−46148
fibre optic position sensor, using FM semiconductor laser 88−42142
fibre optic pressure sensor, using 20 mW laser and photovoltaic cell 88−36028
fibre optic sensors, conf., Erice, Italy (May 1986) 88−6125
fibre optic temp. sensor using fluorescent decay of laser pumped alexandrite crystal 87−68081
fibre preform refractive index meas. model 87−54072
fibre reinforced composites, optical NDT methods, book contrib. 88−12123
fibre testing, using Nd:YAG 1319 nm laser 85−18697
fibre-based chirped freq. interferometric distance sensor with AlGaAs laser 87−68174
fibres, IR, dispersion and attenuation meas. using Pb-salt laser 85−18670
fibres, single-mode, dispersion meas. using optical sampling with mode-locked laser diode 86−48135
fibres geometric characts. meas., using semiconductor emission source 88−33620
field test equipment for optical fibres 88−60168
film thickness and surface profile meas. by FM laser beam 85−4111
measurement by laser beam continued
film thickness meas. by twin-path laser interferometer *(Japanese)* 88−36209
fine droplet sizing in dense sprays by using in-line holography *(Japanese)* 85−56887
finite element methods unification 88−2151
flame propagation studies using simultaneous laser diagnostics probing 87−49956
FLATS, feederless antenna test system, laser diodes appl. 86−3664
flow meas., density fluctuation detector using differential interferometer 87−50002
flow measuring methods using laser *(Italian)* 88−16557
flow particle counter and analyser for biomedical analyses 86−25213
flow velocity meas. in gas jet, by laser speckle photography 86−38611
flow visualisation using pulsed laser 86−31726
flowfield diagnostics, nonintrusive, using laser-induced fluoresc. 85−58948
flux compression generator multimegampere current meas. using fibre optic sensor 85−35416
food manufacturing, optical instrumentation appls. *(Japanese)* 87−41313
free shaped objects, 3-D coordinate noncontact meas. *(Japanese)* 88−60911
frequency, interferometric laser frequency division and stabilization 87−12653
frequency modulated fiber optic interferometric sensors *(Portuguese)* 87−68175
frequency standards tabulation, 10 THz to 580 THz 86−70190
gain-switched pulse-compressed DFB laser diodes for optical waveform sampling 87−41619
gas flows, rapid vel,-field meas., two-freq. laser induced fluorescence technique 85−48145
gas lasers for Raman spectroscopy, low power air cooled 86−36405
gas pressure measurement by laser interferometry, analysis 88−47714
gasoline engine vibration meas. by laser-Doppler vibrometer, quality control appl. 86−24330
gear circumferential vibr. meas. using double aperture method 87−75269
gear tooth surfaces, holographic rapid error detect. 86−11710
geometrical variables meas. using laser interferometer machine tool industry appl. *(Czech)* 85−8957
geophysical laser interferometer with 12.5 m base 85−53144
glass fibre laser Doppler anemometry systems for appls. in internal combustion engines 85−62344
graded index fibre diameter measurement using diffr. pattern 87−46517
ground surveillance robot, autonomous vehicle with vision and laser detector for unknown terrain traversal 87−77402
groundwater contaminants monitoring using laser fluorescence and fibre optics techniques 87−63980
gyro history 85−35930
gyroscope based on Sagnac effect, principle, struct., operation and performance *(German)* 85−35938
gyroscope with optimised resonator geometry 87−49953
gyroscopes, rotation detection appl. 88−16120
gyroscopes for inertial navigation, configs. and characts. *(Spanish)* 86−54237
Hamburg port dredging survey vessel positioning by POLARFIX system 88−4121
hard disc flying head slider dynamics meas. 88−51324
harmonic modulation of semiconductor lasers *(German)* 87−12504
head/disc interface dynamics, $5^1/_4$ and 8-inch disc drives 85−56104
height profiling for thick film hybrid inspection 88−57227
height sensor characteristics of Melcut-3DCM laser cutting machine 87−7476
heterodyne interferometer combining collinear-beam Bragg cell and polarising beam splitter 86−68359
heterodyne interferometric laser probe to measure continuous ultrasonic displacements 85−35948
heterodyne ranging using mode-locked local oscillator for bandwidth compression 86−49736
heterodyne vibr. meas. method 88−42335
high power pulse lasers for fiber optic measurements 87−74758
high resolution optical time domain reflectometry for optical components 88−47701
high speed photography, videography and photonics, conf., San Diego, CA, USA (Aug. 1986) 87−51705
high-power laser system for length meas. *(French)* 88−42278
high-speed, pulsed-laser interferometry 88−42291
high-speed laser interferometry, transient vibration meas. of impacted metal bar 85−4106
holographic cinematography and its applications 88−20789
holographic contouring rel. to wavelength-change characts. of semiconductor lasers 85−24579
HV insulation compounds, cleanliness determ. by laser inspection technique 85−15613
HV meas. using HV probe 88−27368
HV transmission line current meas. by lightguide Faraday rotation *(German)* 86−65705
hydrophone absolute calibration using laser interferometer, freq. range up to 15 MHz 87−42280
hydrophysical laser sounding complex, collection and data-processing system 88−48328
hypersonic shock tunnel, viscous interactions obs. by visualisation 88−42327
IC and semicond. electronic props. visualisation using Laser Scan Microscope 87−11863
IC critical dimensions meas., focused laser beam versus conventional bright-field scanning microscopy 87−11864
IC internal function testing using laser beam 88−13508
IC metrology, confocal scanned laser imaging system design criteria 87−11862
IC plasma etch endpoint detect., laser interference fringes quantification 88−13153
IC testing using optical beam induced currents generated by a laser scan microscope 88−39597
imaging correlography with sparse collecting apertures 88−46252
impurity clusters in semiconductors obs., by small-angle light scattering method 86−7868
in-plane translation meas. by speckle calculation, using linear image sensor 87−49972
industrial appls. of laser and optoelectronic technologies, conf., Xiamen, China (June 1986) 88−49340
industrial appls. of laser and optoelectronic technologies 88−51983
industrial inspection and control, laser scanning and video-based inspection systems comparison 86−202

measurement by laser beam continued
industrial inspection appl., conf., Quebec City, Que., Canada, June 1986 87−43749
industrial meas. and inspection using optoelectronic techniques 88−49560
industrial optical meas. methods 88−53937
industrial optics appls., conf., Brussels, Belgium (June 1986) 88−55786
injection laser application for measuring surfacegeometric parameters 87−3769
injection lasers for rise-time meas. of photodiodes 87−54190
insulating oils, dielectric constant, laser meas. 88−33457
insulating oils, dielectric constant meas. using linearly polarised laser beam 87−38621
insulating oils, gamma-ray effects on elec. props. 87−25714
insulating oils heat effect on quality, assessment by laser beam 87−43303
integrated factory test system *(German)* 88−44425
interference comparator for certifying engraved and endlength measures 86−11699
interference method for studying the vibrations of a welding tool 88−45581
interference nanometer for pressure to 120 kPa, using Hg meniscus and He-Ne laser 87−63567
interference vibration speed meter with digital indicator 87−3745
interferometer, dynamic yield strength of rods determ., aerospace appl. 86−38875
interferometer for optical components testing *(Czech)* 86−10036
interferometer in variable gravitational field, astronomical and geophysical appl. 86−44768
interferometer measurement systems, laser, for machine tool industry and microelectronics 85−58887
interferometer-fringe counter for position and velocity sensing 88−74594
interferometers for ultra-precise meas. and NDT *(French)* 88−72462
interferometric frequency-ratio determination of stabilized 473 THz and 88 THz laser radiations 85−48047
interferometric laser rangefinder using FM diode laser 88−16474
interferometric metrology, 1987 trends and future prospects 88−53877
interferometric metrology, conf., San Diego, CA, USA (Aug. 1987) 88−49348
interferometric micrometer construction and operation *(German)* 88−74404
interferometric optical-fibre sensors, semicond. laser performance requirements 85−46162
interferometric probe resolution improvement, 3/2-order PLL design 86−31364
interferometric sensors, sideband noise of large phase carrier 87−77199
interferometry, electrooptical phase shift control, metrologic appls. 87−54120
interferometry, high-accuracy displacement, in air 85−37749
interferometry, laser and fringe scanning *(Japanese)* 86−22572
interferometry applied to tires NDT 88−51986
intracavity laser spectroscopy, sensitivity, influence of emission spectra kinetics of multimode lasers *(German)* 87−68320
IR and laser spectroscopic charactn. of Al defects in cultured quartz 87−32765
IR automatic laser inspection instrument, solder point integrity determ. 85−55305
IR CCD MTF meas. method using laser speckle 85−58588
IR laser beam interferometry, appl. to length meas. of large components *(German)* 88−60916
IR laser gas analysis system calibration for atmospheric gas composition meas. 88−42650
IR phototransducers frequency charact. meas. device 86−17979
IR temperature meas. using pulsed laser 88−36264
IR-optics materials, optical losses determ. by laser optoacoustic method 86−28777
jaw movements recording, He-Ne laser position recorder 85−15298
Kern E2 precision theodolite, graduated circle, accuracy anal. *(German)* 88−42277
Kerr constant in weakly anisotropic liquids 88−10149
Kerr effect birefringence meas. apparatus, nanoradian sensitivity 88−51577
LAMBDA dual beam probe *(German)* 85−62702
LAMBDA laser meas. system *(German)* 85−64288
Lambda meas. technique, thermal effects neutralisation *(German)* 85−62701
laser appls. *(Japanese)* 86−22566
laser Doppler heterodyne interferometer for photoacoustic applications 88−10616
laser FM measurement technique, suppression of residual AM 87−12642
laser frequency stability for metrological appls. 88−33920
laser generation and reception of ultrasound 88−10172
laser generation of ultrasound 88−10173
laser interferometer signal detector, design and operation *(Czech)* 85−7561
laser interferometers containing wavefront reversal mirrors, appls. 88−47694
ring laser magnetic sensor, for weak field measurement *(Chinese)* 87−4104
laser ranger testing, range simulation 85−62706
laser ranging in turbulent atmosphere, meas. errors *(Polish)* 87−39258
laser scanning system, transmitter-receiver parameters 88−41755
laser scanning techniques for bottle inspection 85−24686
Laserax laser meas. system, manufacturing QC *(German)* 88−36210
LaserMike optical micrometer, noncontact gauging of profile dimensions 87−49709
LASINTERF-T20 laser interferometer for length meas. *(Rumanian)* 85−19070
LDT-1 microstepmotor dynamical characteristics measuring system, review 88−41965
LDVs using polarisation preserving optical fibers 86−31720
length, laser interferometer application for testing line measures and gauge blocks *(Croatian)* 85−43094
length and angles meas. automation, VEB Carl Zeiss Jena company developments *(Czech)* 87−14533
length meas., miniaturised laser diode interferometer, Michelson type config. *(German)* 87−18991
length meas. by laser interferometry *(German)* 86−11715
length meas. of material in motion using laser Doppler effect, surface roughness effect *(German)* 86−60351
length meas. technique *(Japanese)* 86−50218
length measurement *(German)* 85−8961
length measuring interferometers, electronic processing of interferograms 87−3760
light path as delay line of sinusoidal-wave oscillator *(Japanese)* 88−36235
light scatt. from particles on Si surfaces, calc. 88−13088
light velocity meas., using streak camera and ring laser 87−14579

measurement by laser beam continued
liquid surface shape meas., self-reproduction phenomenon appl. 87−14544
liquids, thermal diffusivity determ. by laser flash method 88−22822
logic ccts., Joule displacement microscopy study of dynamic current distrib. 87−31788
long-haul single mode fibre attenuation meas., laser and LED source effects 87−26026
LSI defects detection, particle size meas. apparatus, nm order by light scatt. 88−50966
LSI fabrication, confocal scanning laser microscopy use in three-dimens. metrology for submicron lithography 87−38429
M530BH high-speed displacement meter using laser beam *(Japanese)* 88−16473
machine rotating shaft alignment using lasers and data technology *(Danish)* 88−11176
machine vision optics, illumination and image sensing, conf., Cambridge, MA, USA (Nov. 1987) 88−51980
machined surfaces texture meas. by laser beam scatt., computer identification 85−20725
machining machine instrumentation development 87−77077
magnetic discs, surface topography meas. using laser Doppler vibrometer 86−53899
magnetic recording systems, laser Doppler interferometry appls. 86−28647
magneto-optical measuring DC current transducer, 8 kA 85−8821
magnetohydrodynamics, engineering aspects, conf. Mississippi, USA (June 1984) 85−10330
magnetometer, all-fibre interferometer, using stabilised semicond. laser source 85−62347
manufacturing applications, conf., Los Angeles, USA, (Jan. 86) 87−43744
mask-to-wafer alignment technique for 0.25 μm synchrotron radiation lithography 87−25036
mask-to-wafer displacement, optical heterodyne detection for fine alignment 87−6511
masks, high resolution dimensional metrology system 88−13239
materials anal. of failed flex circuit using laser microprobe mass spectrometry 87−6208
measuring head for practical three-coordinate measurement techniques *(German)* 85−19068
metal film-substrate adhesion testing, nondestructive indicator using optically-induced thermorefl. meas. 86−26939
metal surfaces, plastic deform. meas. and elastoplastic boundary determ. using laser beam *(Chinese)* 85−13005
metal-halide lamps, Na groundstate density profile meas. using laser absorption spectroscopy 88−37728
meter standard realisation, using He-Ne laser comparator 87−63516
methane gas remote detection by diode laser spectroscopy 88−40432
metrology by laser methods *(Spanish)* 87−12638
MHD convertor channel secondary flow, meas. using laser Doppler anemometry 85−16254
Michelson interferometer based meas. system 87−54458
Michelson laser interferometer using a dual interference method, stabilised system design, displacement meas. appl. 87−56840
microcomputer-controlled YIG sweeper for a laser heterodyne spectrometer 85−14825
microdimension meas. by using laser and CCD sensor 88−16489
microdimensional measurement by laser *(Japanese)* 87−61292
microfibres, calibration charact. calc. of scanning laser analyzers, diameter meas. accuracy 88−7863
microlithography, conf., Santa Clara, CA, USA (Mar. 1987) 88−11568
micrometer-order displacement measurement of vibrating objects with laser Doppler effect *(Chinese)* 88−68022
microparticle analyser, charact. correction for radiation flux density distrib. nonuniformity 86−24771
microparticle analyzers, calibration charact. calc. 88−20806
microstep of digital control for step motor and its test using a laser interferometer measurement system 88−5716
military helicopters, advanced flight control and navigation system implementation 88−68544
milk quality, analysis of multicomponent polydispersed media by optical methods on-line with a computer *(Russian)* 85−4150
MIM structures, field injected space charge obs. by laser induced stress waves 85−12057
Mini Laser Rangefinder, review 87−41033
minority carrier lifetimes meas. in semiconductors, using scanning laser microscope 88−42250
mirror, high reflectivity dielec., used in free electron laser cavities, precise meas. 86−58951
MM and sub-MM wave detection techniques 88−29622
MMIC and digital high speed circuit testing using ultrafast optical techniques 88−38730
mobile laser for automatic log diameter measurement 88−34195
mobile robots, navigation system using pattern of angles to identical beacons observed by laser 88−68036
modular hand-held eyesafe laser rangefinder 87−41028
modular laser system for gas flow meas. and combustion products analysis *(German)* 86−55892
moire measurement trends and new techniques *(Japanese)* 86−50215
moisture levels in semiconductor packages, meas. by laser spectroscopy 87−51875
molecular vibrational relaxation meas. by laser phase absorption method 88−40450
monofrequency laser interferometer with fine resolution 87−14551
motion monitoring, using light as tool 87−77427
moving materials length meas., using laser-Doppler effect *(German)* 86−11695
multi-channel optical streak cameras 88−47579
multi-point laser scanned optical monitor of cardiac action pot. propag. 88−29956
multi-pulsed high-speed holography with electro-optical framing, transient process obs. appl. 88−45574
multichannel photon counter, fast, for fluoresc. spectroscopy 86−11505
multidetector deflection measurement system development 85−19060
multioscillator laser gyro theory 85−35931
multiple bridge displacement meas. by intelligent laser beams 88−68034
multiple laser diode extended range interferometry, stability requirements 88−40426
multiple lines of laser light for machine vision illumination 87−47065
nanosecond light-pulse generator for spark discharges diagnostics 86−68652
NASV 30 computerised instrument for IC functional testing and component trimming with laser beam *(Italian)* 88−27344

measurement by laser beam continued
Navy appl. of broad optical band testing, using pyroelectric detectors 85−29973
Nd:YAG laser rangefinder/designator 87−39271
near MM-wave propagation meas. instrumentation 86−38306
NEC 3D shapes scanner SC-RF1, development *(Japanese)* 88−2430
nephelometer design, for low concentrations meas. in industry 86−44459
nitrobenzene laser potential transformer, voltage meas. using Kerr electrooptical effect *(Korean)* 88−42242
non-contact picosecond prober for integrated circuit testing 87−46134
noncontact elec. field meas. using GaAs injection laser, electro-sampling technique 86−68330
noncontact inspection using laser triangulation probe 87−12643
noncontact laser detector system for meas. workpiece dimensions 87−34927
noncontact laser extensometer 88−22788
noncontacting measuring instrument, with laser interferometer, for microshapes measurement *(Japanese)* 85−35947
nondestructive laser prober for IC internal logic analysis *(Japanese)* 87−10750
O-ring automatic testing for surface defects *(German)* 87−31278
ocean-optical studies, design, testing and calibration of semiconductor laser-based instrumentation 87−77890
on-line glossmeter for stainless steel sheets 87−47063
on-line instrument for N_2 concentration meas. in natural gas *(German)* 88−74629
optical displacement meter, MD-1211, laser based, principle and features *(Japanese)* 88−9986
optical distance meas. probe for rapid automatic calibration on machine tools *(German)* 87−29125
optical dynamic holography technique, ultrasonic vibrations amplitude meas. 87−68667
optical fibre diameter meas., optimal longit. periodicity 85−58879
optical fibre preform meas. by focused laser transverse illum. technique, resolution model 88−58089
optical fibres, magnetooptic analysis of KRS-5 fibres using intracavity scheme 85−35433
optical field determination in water 88−67980
optical meas. of acoustic and photoacoustic effects 87−71410
optical noncontacting probe for detection of displacement, position, and angle *(Japanese)* 86−38343
optical range sensor based on bright ring pattern projection, robot appl. *(Japanese)* 87−41529
optical ranging meas., high resolution, of jet stream thickness 88−51977
optical signal phase meas. error when passed through multimode optical fibre 87−19114
optical surface sensor, high precision, based on laser beam critical reflection 88−29308
optical systems using low power lasers, conf., Los Angeles, USA (Jan. 1987) 88−31269
optical testing and metrology, conf., Quebec City, Canada (June 1986) 87−58513
optical thickness meter, MD-2301, laser based, principle and features *(Japanese)* 88−9986
optical time domain reflectometer with a laser diode operating as light emitter/photodetector 85−37776
optical time domain reflectometry *(Japanese)* 87−77435
optical waveguide bandwidth measurement, nanosecond pulse generation using semiconductor injection laser *(Czech)* 85−18948
optics symposium, Budapest, Hungary (April 1984) 85−54025
opto-electronic system for displacement and vibration measurements 87−77418
optoelectronic microprofilometry based on triangulation principle 88−53730
optoelectronic technologies for remote sensing from space, conference, Cannes, France (Nov. 1987) 88−62851
organic FIR laser lines appl. to absorption spectroscopy of water and acetonitrile 86−68440
organic molecule triplet extinction ratio meas. using ion lasers 88−20577
OTDR using SiO_2:P_2O_5 fiber Raman laser for meas. 88−33629
paper sheet moisture measurement using far IR laser 85−20761
particle siting with phase Doppler spray analyser, nonspherical drops effect 87−21240
particle size and velocity measurement using phase Doppler particle analyser 87−21239
particle size distribution in multicomponent systems, polarisation intensity ratio and pointer beam techniques 87−21238
particle vel. and size meas. using laser system *(Russian)* 86−50249
particles on wafers, Inspex EX2000 patterned wafer inspection system 88−13085
particulate contamination detect. on patterned wafers, review 88−13086
particulate contamination detection on semiconductor wafers 88−13087
PCB solder joints testing, by laser holographic technique 88−19495
PCB voltages by optical reading 88−38863
phase sensitive scanning optical microscope, interferometer-based design with submicron resolution 87−14541
phase-detector and counter for fine displacement meas. 87−77425
photodetector wideband freq. response meas. system using optical heterodyne detection 86−36333
photodetectors phase characts. meas. using bimodal lasers 88−53814
photoelasticimetry, for stress field analysis of adhesively bonded joints 88−58756
photoemission for voltage testing high speed semiconductor devices/ccts. 88−39628
photoemission sampling technique for high-speed integrated-circuit testing 88−39602
photoemissive probing of high-speed signals 88−13512
photoluminescence power and quantum yield meas. in narrow-gap semiconductors 87−3779
photon detector devices, local investig. by scanning laser microprobe 87−21076
photon-limited laser pulses, arrival time estimate in presence of shot and speckle noise 87−54454
photonic sensors, introduction and overview 88−60752
picosecond optical oscilloscope, real-time, for low-voltage picosecond signal meas. 87−41564
picosecond semiconductor lasers for characterizing high-speed image shutters 87−14146
piezoelectric laser-beam scanner using multi-path reflection method *(Japanese)* 87−60715
PIN diode lifetime testing, computer-controlled system 86−58436
measurement by laser beam continued
pipe-surface inspection using laser techniques and fibre optic bundle photodetector system *(Japanese)* 85−5813
planar graded waveguides, parameters meas. in near IR, refractometric method 87−18677
plasma experiments, image pattern data, computer processing *(Japanese)* 87−75854
plastic film thickness measurement using angle-scanning laser interferometer 87−49924
platform vibration detection, laser beam meas. 86−63880
polymer electrets, spatial distributions of polarisation and space charge, laser intensity modulation method determ. 86−50204
polymer films, dissolution rate meas. using laser interferometery 86−1884
polymer thin film props. during semicond. device fabrication, laser interferometric monitor 87−17861
position meas. with submicron accuracy *(Slovak)* 86−70217
position measurement, laser interference measuring system for electronics *(Czech)* 85−52871
position sensor using fibre optic interferometer, design and implementation 85−35472
position/dimension meas., laser-based system with triangulation format 87−21233
positioning, fast, precise by laser measurement system 88−45604
powder coatings deposition, particle speed determ. 86−522
powder grain-size analyser, laser-diffraction type *(Japanese)* 87−63515
power cable insulation, shielded, void detection by Mie scatter power of laser radiation meas. 87−50813
precise positioning mechanisms *(Japanese)* 85−48087
precision motion transducers adjustment device 88−74318
pressure distribution meas. device using laser light *(Japanese)* 88−53926
processed surface condition meas. by laser scatterometer *(Japanese)* 86−24761
profile measurement of continuous casting moulds, and the height measurement of rails *(German)* 85−13007
profile measuring system, 3D, using laser beam measuring system 86−60343
profiles scanners for hostile environments 88−42289
profilometry and roughness meas. *(German)* 87−77422
profilometry with absolute values of profile height 88−4642
projectile angle measurements, optoelectronic system 87−21246
projectile yaw angle measurement using optoelectronic system 86−5528
proton beams angle and energy characts. determ. 87−29406
prototype laser tracking system for corner cube to realize active position measurement of three-dimensional vehicle 87−77399
pulsed laser caliper for noncontact dimensionalmeasurement 86−55829
pulsed laser interferometry of military vehicle components 88−20786
pulsed photocells transient characts. meas., using streamer semiconductor lasers 86−29001
PVDF piezoelec. profiles 88−26622
quality assurance appl. of optical instrumentation 86−40523
quartz crystal resonators, small vibration meas. using laser interferometer with optical directional-coupler 88−53861
radar imagery simulation, using LADAR sensor 87−14182
radius-of-curvature meter for reflecting surfaces 88−36221
railgun diagnostics development 88−58819
range finder, active triangulation based, with laser and solid-state camera, for robot vision *(French)* 86−17849
range finder, hand-held eye-safe design *(Japanese)* 86−37949
range finder, real-time correction of three-dimens. nonlinearities 86−59951
range finder, synchronised scanner approach, signal processing requirements 88−53726
range finder based on synchronised scanners, for surface topography meas. 85−15021
range finder for mobile robots, available under direct sunlight, using laser triangulation *(Japanese)* 88−68032
range finders, optical, eikonal fluctuation averaging effect on accuracy 85−8960
range finding using frequency-modulated laser diode 86−55828
range-finding intelligent peripheral, calibration and segmentation algorithms 87−14171
rangefinder optical heterodyne using CO_2 laser, distance determ. 86−10037
rangefinder with AM and double heterodyne demodulation 85−20272
rapid bacterial testing method by size distrib. meas. with laser light scatt. 85−59272
Rayleigh scattering, signal analysis developments 87−61293
real-time range and elevation finder, microcomputer control 85−26478
rectilinearity monitoring by laser beam, baseline reproduction error analysis 87−68669
reference signals shaping in laser gas analysers, with mechanical switching of optical channels 85−47911
reflectance characteristics of selected materials for reference targets for 10.6-μm laser radars 88−65116
reflective tomography, images from range-resolved laser radar measurement 88−67485
reflector surface measurements of the IRAM 30-m radiotelescope using theodolite-laser-tape system 86−37968
refocused optical profilometer with telecentric laser beam scanning for reliable height meas. 87−8738
refractive index of liquid crystals, wedge method using tunable coherent source 88−36256
reheating furnaces, remote and continuous monitoring of temp. and gas composition by laser spectroscopy *(Italian)* 85−8984
relativistic electron beam, high-current, parameters meas. by laser light scatt. 85−13049
remote displacement measurements using a laser diode 85−26475
resonance Raman clock, using Na atomic beam 86−38575
respiration diagnostics, tunable diode laser based spectroscopic system 87−57106
RF magnetic field meas. system, amplitude and phase sensitivity, LD and optical fibre 87−56821
ring laser gyro for angular velocity detection *(Japanese)* 88−65762
ring laser gyro theory 85−35814
ring laser with random frequency base, error, asymptotic estimate 87−68557
robot dynamic performance measurement using laser tracking system 87−35205
robot end effector position measurement by laser tracking interferometer 86−36619
robot end-effector position measurement by automatic laser tracking 87−14545
robot laser rangefinding sensor for robotic weld seam tracking 88−31486

measurement by laser beam continued
robot manipulator repeatability measurements using low cost laser-based system 88−51979
robot tool position meas. using freq. stabilised laser interferometry 88−34193
robot weld seam tracking by laser dimensional meas. sensor 88−34192
robotic manipulators contouring accuracy meas. scheme using laser beam 85−13010
rotating component strain anal. using pulsed laser ESPI 85−58903
rotation direct meas. by laser speckle method 85−4117
rotation measurement accuracy using ring laser, random freq. pedestal influence 85−56734
rotor balancing, laser-based system *(Russian)* 85−28039
runways meas. using laser beam, rolling mills appl. *(Czech)* 87−70798
Russian applications of lasers, review presentation *(French)* 88−27364
San Diego, CA, USA (Aug. 1987) 88−49337
satellite location range-finders *(Polish)* 85−56899
satellite ranging, Nd:YAG laser transmitter of picosecond pulses *(Czech)* 88−72363
satellite tracking with dual-wavelength laser ranging system, feasibility 86−30892
SAW filters, acoustic field investig. using fibre optic homodyne laser probe 87−1831
SAW generated by slanted transducers, propagation, laser probe study 88−51144
sawmill, increased sideboard yield and customer oriented production via edger optimisation 88−34196
scan sensor for surface microdefect detection and classification, computer-aided system 87−149
scanning laser acoustic microscope, SAW velocity anisotropy meas. 88−61672
scanning laser Doppler vibration analysis system *(German)* 85−47835
scanning laser microscopy for semicond. appls. 86−1923
scanning laser range finder design for three-dimens. robot vision 86−3386
scanning laser-range-finder with dual receivers 87−49190
scanning lidar bathymeter for water depth measurement 87−41040
scanning surface topography using reflected laser beam 88−36222
secondary length standard using He-Ne laser *(Romanian)* 87−56846
seismometers based on automated laser interferometers 87−77843
self-calibrating spatial distance measuring system forcoordinate determination in space, laser interferometry *(German)* 86−31657
semiconductive tape, characterization of smoothness via laser profiling of a surface 88−22792
semiconductor, processing and fabrication techniques, laser diagnostic methods 87−10477
semiconductor bicrystal, diffusion length and grain boundary recomb. vel. determ. by laser excitation 87−29219
semiconductor components testing, using Zehnder-Mach interferometer *(Czech)* 87−10118
semiconductor device NDT by spectroscopic ellipsometry, ultra-short laser pulses and SAW 85−61025
semiconductor devices, optical beam induced current meas. 88−64480
semiconductor housings, moisture meas. *(Dutch)* 88−11706
semiconductor laser, external-grating controlled, 1.3 μm, 6 GHz wide continuous tuning, high-resolution spectral meas. appl. 88−65677
semiconductor laser and integrated optics for optical fibre sensors 87−18698
semiconductor laser interferometer for industrial displacement measurement *(German)* 86−31409
semiconductor manufacture, laser displacement interferometry, residual errors from air turbulence and nonlinearity 87−61271
semiconductor production, laser based crit. dimension meas. 86−15007
semiconductor wafer and technical flat planeness testing interferometer 88−60909
semiconductors, homogeneity profiling using automated light spot scanning apparatus 85−3871
sensors in industrial metrology 87−77212
servo-controlled lasers progress and appls. 87−12547
shearing interferometry at 10 μm 88−10040
shift measurement, laser heterodyne method, acousto-optic interaction 86−11698
single mode fibre, OTDR meas. using semiconductor laser 86−53992
single mode fibres, chromatic dispersion meas. by wavelength temp. tuning of laser diodes 88−65235
single mode optical fibre, direct dispersion meas., $Ba_2NaNb_5O_{15}$ cryst. laser pumped light source, pulse cross correlation function 85−46191
single-mode fibre, mode field radius wavelength variation meas., far-field pattern method 86−15465
single-mode fibres, long-range 1.5 μm optical time-domain reflectometry using lasers 85−46145
SMD solder joint inspection, laser/IR technology 88−1176
SMT boards 3D second generation automated optical inspection using laser scanner 88−38898
SMT boards solder paste height meas., using structured light technique 88−50489
soft X-ray scanning microscope, two-dimens. laser interferometric encoder 88−48060
soil height profile meter, optoelectronic 88−15911
solder joints in flat-packaged devices, shape detection by laser spot scanning light-section method *(Japanese)* 87−17536
solder pads inspection, laser system for metallurgical diagnostics 86−35251
space-borne docking/berthing sensor using a laser diode rangefinder, CCD and video tracker 88−61535
spark/flame temp. and concentrations meas., by multicoloured laser beams, for improving combustion *(Swedish)* 85−37782
spatial fluctuations of directivity pattern axis estimation 85−46436
spatial location of laser beam energetic axis, stability improvement 85−46446
speckle differential strain measurement system 88−51982
speckle interferometry, imaging techniques comparison 88−45709
speckle pattern meas. method for in-plane displacement anal. 88−68031
speckle technique for hydraulic structure model test 88−51985
spectrometer with telescopic resonator, link between diffraction losses and light beam cross section 88−2346
spectroscopy in industrial research 88−40434
standards development for length and frequency, laboratory and industrial appl. 85−37758
steel, microstructural monitoring by laser-ultrasonic attenuation and forward scattering 87−16749
steel industry, length and profile measurement using lasers and optical fibres 87−77419

measurement by laser beam continued
straightness measurement system with error correction 87−77397
straightness measurement using heterodyne moire method *(Japanese)* 86−5523
streak tube, magnetically focused and electric field deflected, elementary analysis 88−47585
STRIPE, scanning triangulation range imaging package for engng. 88−45606
stroboscopic magneto-optical flux detection, high-resolution, in supercond. 85−58856
submicron critical dimension metrology on wafers 88−7671
submicron critical dimensions meas. using confocal scanning laser microscope 88−13501
submicron lithography, 3D metrology using confocal scanning laser microscope 87−18251
submicron masks and wafers, high resolution metrology 88−68029
submicron semicond. geometries inspection/process control, LMS 2000 metrology system using laser interferometry 88−18451
submicron-level length meas. technology *(Japanese)* 86−5521
submillimeter laser interferometer withinterference-field visualization 86−31615
supersonic turbulent flow, simultaneous meas. of temp., density and pressure, laser appl. 86−38613
surface assessment technique appl. to engine manufacture, computer controlled system 88−42285
surface crack mapping−active and passive techniques 88−18826
surface evaluation by laser scanner 88−36225
surface evenness, application of laser techniques for measuring and processing purposes in the steel industry *(German)* 85−15026
surface of hot slabs inspection, by laser scanning method 87−47062
surface profile meas. by focused laser beam, accuracy 85−31594
surface profilometry using two-frequency laser 88−36223
surface roughness assessment using ang. distrib. of backscattered field from laser spot 85−56915
surface roughness inspection using laser beam *(German)* 88−10127
surface roughness meas. by contactless optical stylus *(Japanese)* 86−24762
surface roughness meas. by optoelectronic method, expt. study *(Czech)* 86−50214
surface roughness measurement by contrast of laser speckle in real time 88−53872
surface roughness measurement by laser beam for in-process sensor 86−38548
surface roughness of cylindrical machined parts, optical meas. method 86−70227
surface smoothness laser measuring system *(German)* 86−18108
surface with circular symmetry, analysis using opt. polar profilometer 85−52877
synchrotron radiation X-ray lithography, mask-to-wafer alignment technique 88−13208
synthetic interferometric distance-measuring system using CO_2 laser 86−38547
TEGFETs and MESFETs characterization using electrooptic sampling technique 87−26238
temperature dependence obs. 86−11791
tensometer laser displacement meter 88−67754
textile fabric quality testing by laser scanner *(German)* 86−48519
theodolite, digital, using IR radiation 88−60573
theodolite, KERN DKM 3A, laser-diode distance meter 85−4107
thermal expansion meas., automatic absolute interferometric dilatometer 88−22778
thermal expansion meas., laser speckle dilatometer method 86−18165
thickness measurement using scanned ATR technique 87−49925
thickness of membranes, measurement *(Japanese)* 88−14315
thin film thickness meas. using improved laser probe 88−53882
thread grinding of leadscrew, laser meas. system *(Japanese)* 88−8370
three-component laser Doppler anemometry, review 88−42324
time-of-flight laser receiver for moving objects 86−65027
time-to-digital converter with an analog interpolation circuit, laser range finding meas. appl. 87−21018
TOF mass spectrometer for microelectronics industry 88−23011
TPC, field inhomogeneities calibration with laser rays 85−43179
transducers and meas. systems for industrial appl., book 88−55889
transformer/switchgear oil, assessment of insulating liquid deterioration by laser measurements 88−33454
transient photoconductivity measurements of amorphous semiconductors by subnanosecond nitrogen lasers 87−14459
transient response meas. in cryogenic environment, using electro-optical sampler 88−39832
transparent solid and liquid films, uniform thickness meas. 88−7842
turbulent atmosphere displacement meas. using laser beam spot dance analysis 86−50750
turbulent flow meas. using laser Doppler system with Pockels cell 85−58946
two dimensional displacement meter 88−22776
type 55 laser Doppler vibrometer 85−43103
ultra-thin tungsten wires production control, using real-time laser and microcomputer system 88−49503
ultrafast event measurement techniques with mode-locked dye laser, phase modulation role 85−62705
ultrafast supercontinuum laser source uses, self-phase modulation 85−29958
ultrahigh precision electron gun-tube alignmenttechnique for millimeter-wave applications 86−47236
ultrasonic field meas. using laser interferometry, use of pulse-excited hydrophones 87−35524
underwater measurement techniques using low-power lasers, seawater props. determ. 88−36676
US, disc transducer, radiation field, laser probe investig. with tomographic scanning 87−73173
vacuum arcs, high current, particle and vapour density meas. by laser techniques 87−37783
vapour concentration surrounding evaporating droplets, laser-induced fluorescence meas. 86−31681
vehicle position and heading measurements by laser and reference points *(Japanese)* 86−11714
vehicle position meas. using laser beam tracking, expt. 88−47223
velocity measurement device *(German)* 88−36242
very-high-speed semicond. devices charactn., conf., Bay Point, FL, USA (Mar. 1987) 88−37822
vibration amplitudes meas. by laser interferometers 85−48089
vibration analysis of large structures, using CW laser holographic interferometry 88−53949

measurement by laser beam continued
vibration meas., semiconductor laser based technique for minute displacements *(Japanese)* 88−16501
vibration meas. by laser interferometry 86−29282
vibration meas. methods using lasers 88−34189
vibration meas. using graded optical filters 86−11704
vibration measurement using laser feedback interferometer with matching lens *(Chinese)* 85−31591
vibration parameters checking, laser system with single frequency source 85−48094
vibration sensor inspection test system for gear boxes 88−35847
visual axis measurement by laser beam 85−4306
VLSI, laser beam testing of finished integrated circuits 88−39686
VLSI ccts. probes development 86−53762
VLSI contactless probing 87−60549
VLSI environment probing using sub-ps optoelectronic switches 87−26246
VLSI high speed device testing and internal node diagnostics 88−13507
VLSI logic states determ. using automated laser prober 85−40034
wafer contamination and defect size meas. using temporal reflectance variation 85−64279
wafer particulate detect., polarization diversity surface analysis system 88−13089
wafer stepper precision alignment and metrology using diffraction gratings and laser interferometry 87−11515
wafer surface defect detection, calibration standard for scanning laser defect detect. instrum. 85−45510
wafer surface temp. meas. during plasma processing using optical thermometry, expt. *(French)* 88−16548
wafers, Thermal-wave inspection of ion implantation, dry etching, and wafer polishing 88−7447
wavelength metrology, spatial coherence of laser beam 86−5465
wavelength unit for pulsed laser, working standard 88−2345
wear measurement using angle transducers and lasers *(Swedish)* 88−4700
weld pool surface temperature measurement by radiometry/laser reflectance 88−29684
welded structural shape inspection by automatic co-ordinate meas. systems 87−56835
welding robot with laservision for improved performance *(Norwegian)* 85−57464
wide-band multi-layer coatings, phase dispersion meas. by multi-beam interference 88−27343
wide-spot analysis of optical disc media 88−65151
wideband optical phase detector, using the He-Ne lasers 86−68650
wind tunnel expts., automated optical instrument for water droplet impingement data extraction 88−48268
wind tunnels, US laser method for flow field meas. 87−71227
wind-shears and microbursts, laser air data meas. 88−23163
workpiece dimensions measurement device, laser-based system *(Hungarian)* 85−41536
Young's modulus temperature dependence obs., of elastic transducer materials 86−11791
Zeeman laser, stabilised transverse, applics. to polarisation meas. *(Chinese)* 87−39259
Al-based metallisation, stress meas. and interpretation, role of thermal history 87−38161
AlGaAs, RIE monitoring by in-situ, laser interferometry 88−19828
CO_2 CW heterodyne laser rangefinder, remote vibration and imaging analysis appl. 87−3247
CO_2 laser, Faraday rotation meas., semiconductor materials testing appl. 87−46604
CO_2 laser, far distance emissivity meas. 87−54456
CO_2 laser interferometer accuracy verification for distance meas. 88−68028
CO_2 laser transmissometer, temporal stationary points in far field 88−2340
CO_2, multiatmosphere laser, broad-band emission, spectroscopy appl. 86−3072
CO_2 pulsed laser automatic frequency control , remote sensing and target ranging appls. 88−72366
CO_2 two-mode laser, metrological charact. 87−54225
Cd^+, ion drift velocity in He glow discharge, meas. using AlGaAs laser *(Japanese)* 87−12495
Cs beam standard laser diode optically pumped 86−24655
Cs, optically pumped, freq. standards 86−38488
D_2O 385 μm laser system, for plasma diagnostics, parametric study 86−29082
GaAs IC picosecond sampling of integrated circuits 87−46135
GaAs MMIC amplifier, freq. response meas. by electrooptic sampling 88−19360
GaAs MMIC signal meas., noncontact electro-optic sampling technique 85−55135
GaAs, RIE monitoring by in-situ, laser interferometry 88−19828
GaAs, device defect location using laser probing, intensity/frequency converter 88−51988
GaAs digital ICs and MMICs, direct electro-optic sampling using Nd:YAG laser 86−35821
GaAs digital ICs, ps propag. delays in logic gates, differential optoelectronic technique 85−6291
GaAs high-speed monolithic ICs, microwave and digital, charact. by direct electro-optic sampling 86−47747
GaAs planar digital ICs, electro-optic sampling 86−14091
H, transition freq., precision metrology by visible laser 86−5464
He-Ne laser appl. to intracavity dispersion meas. 85−2357
He-Ne laser, fibre light guides diagnosis appl. 88−33749
He-Ne laser, optical distance measurement using intermode beat 86−29267
He-Ne laser, photoluminescence imaging appl. to semiconductor surface props. uniformity control 88−7502
He-Ne laser, single freq., used as sub-angstrom detector 86−36417
He-Ne laser test-pattern exposition device *(Hungarian)* 88−40433
He-Ne, noncontact gauge for lateral surface motion meas. 88−29359
He-Ne two-frequency laser for precision angular measurement 88−36226
He-Ne/I_2 laser, metrological charact. 87−68670
InGaAs photodiodes, high-speed/long wavelength photodetectors, electro-optic sampling system for response meas. 86−36332
InGaAs ultrahigh-frequency optical detector bandwidth meas. using interferometric FM sideband technique 88−22595
InGaAsP injection laser for electro-optic sampling of fast electric signals 86−22186
InP, RIE monitoring by in-situ, laser interferometry 88−19828
InP/InGaAs high speed integrated circuits, electro-optic sampling meas. 87−53692
InP-based ICs, electrooptic sampling at high speed 87−46232
measurement by laser beam continued
KCl:Li F_A(II) colour centre lasers appl. to intracavity laser spectroscopy 87−26584
KrF excimer UV laser radar for image, range and Doppler measurements 88−28969
N_2 laser, four-channel TEA, for interferometric meas. on plasma focus 87−26282
Nd:YAG laser, intracavity coherent reception for high-sensitivity recording of weak reflected or scattered radiation 88−20807
O_2, single-pulse 2D temp. and density meas. by laser beam 88−45596
O_2, singlet, optical monitoring of generation during photodynamic treatment of tumours 87−41930
Rb atomic clock, optically pumped, highly stabilised semiconductor laser appl. 86−38574
SF_6, laser meas. of electric fields *(Swedish)* 87−74474
Si, CVD, in situ laser meas. 85−10811
Si, Czochralski crystal growth, diam. var. and control monitoring using laser beam 85−54432
Si ICs, optical detection of charge modulation using multimode laser-diode probe 87−74353
Si etch rate detecting technique using laser beam, deep dielec. trench isolation appl. 86−53544
Si micromechanical optically excited resonant beam pressure sensor 88−16058
Si, minority carrier lifetime and resist. mapping, flying-spot scanning method 87−3716
Si wafer screening, O conc. detect. using tunable diode laser 85−50350
Si wafer surface temp. meas., nondestructive contactless technique using laser beam reflectometry 86−55869
Si wafers, O and C conc. meas. using IR vidicon camera 86−14842
Si-Al_2O_3 composite waveguide, optically controlled, MM wave meas. 88−25360
SiO_2 optical fibres and preforms, irradiated and nonirradiated, fluoresc. emission by mol. impurities 85−35428
Sn, shock-loaded sample, melting in release, detection using reflectivity meas. method 88−45519
YAG:Nd^{3+} laser, high-speed processes study appl. 88−14325

measurement errors
1.25 MHz attenuation meas. system 86−65246
3-D coordinate measurement based on phase shifts of multiultrasonic waves 88−74583
3-D measuring machine guideway errors *(Japanese)* 85−4112
3D position recognition using shape, error analysis and optimisation of observation system 88−29645
6-port reflectometer, effect of powermeter errors, Monte Carlo simulation anal. *(Chinese)* 88−22760
10 mA LF AC current standard using single-junction type thermal AC-DC transfer convertors *(Japanese)* 87−8700
120-Mbit/s TDMA, pseudo-bit-error-rate meas. 85−57203
150 kHz sonars for Doppler acoustic velocity profiling in the Arctic 87−9022
750 kV current transformers, additive errors in measurement windings *(Russian)* 86−19328
A/D converter quantisation errors, effect on periodic signal meas. 88−15978
A/D convertor, errors analysis by means of expt. data 85−47913
A/D convertor error charact. meas. under dynamic conditions, using sign method 86−31324
A/D spectral analyser, measurement errors of meas. errors analysis and correction *(Russian)* 85−58642
absolute distance meas. by wavelength shift interferometry with laser diode, systematic error sources 87−56833
absolute distance meas. to 25 m by multiwavelength CO_2 laser interferometry 87−56834
absorption factor of plane specimens determ. 88−2343
absorption spectrophotometers with simultaneous detection, metrological aspects *(Polish)* 88−22501
AC bridges with inductive voltage dividers, temp. meas. appl., bridge calibration techniques *(Polish)* 88−22696
AC earthing device meas., EM induction errors and countermeasures *(Russian)* 86−6431
AC voltage working standards, error analysis 88−16388
AC voltmeters with rectifier modules, harmonics effects on systematic errors *(German)* 87−14365
AC-DC thermal standard convertors, comparator using computer-aided measurement *(Japanese)* 88−22715
AC-DC transfer charact. of thermal convertors, errors determ. and elimination 87−14326
AC-DC transfer differences of thermal convertors determ., LCIE methods 88−16383
AC-DC transfer errors in single-junction thermal convertors 85−58646
accelerometers, vibration-related error meas. *(Russian)* 87−63308
accumulation error correction in measurement data transmission *(Russian)* 86−69992
accuracy characteristics of two-point correlation method for measuring the frequency of narrow-band random signals 88−47389
accuracy classes, changes due to passage of service time *(Polish)* 88−35763
accuracy estimation for automated computer-measurementprocesses 86−44107
accuracy improvement using a priori information 87−8493
accuracy of instrument adjustment in the presence of noise 88−4267
accuracy of meas. in presence of random noise, criteria 88−53512
accuracy verification of meas. instrument scales, member of check points determ. 87−3367
active high voltage divider and phase shifter, with small phase-angle uncertainties 87−11009
active network phase and magnitude meas., noise and EM induction influence obs. 88−16406
adaptive A/D conversion, effect on sampling and total error 87−3547
adaptive algorithm for unification of measurement results 88−4265
adaptive Kalman filtering for systems with unknown step inputs and non-Gaussian meas. errors 86−43221
adaptive Kalman filtering for systems with unknown step input and non-Gaussian meas. errors 86−10404
adjustable error current transformer for laboratoryassessment 86−1420
admittance and impedance, precision meas. *(German)* 85−37721
admittance of measuring cell with a dielectric sample 88−4590
AF and RF power meters, design, operation, appls. and errors *(Italian)* 85−20632

measurement errors continued
air quality monitoring network design assessment rel. to EEC Directive 85−48481
aircraft gas turbine engine, computerised testing under transient conditions, metrological support 86−31266
aircraft radar errors caused by inaccurate antenna stabilisation *(Russian)* 87−63036
aircraft sensor fault anal., parameter insensitive anal. 87−77752
all-fibre temperature sensing system 86−11569
alpha-beta filter with correlated measurement noise 88−14691
AM field strength meas. data, systematic bivariate anal. 86−65240
amplitude adaptation to signal statistics 88−29186
analog interface for the collection of measurement data *(German)* 86−70061
analogue multipliers errors correction, by switched modulation conversion method 87−3541
anemometer calibration accuracy *(Rumanian)* 87−14620
angle meas. using light interferometer 88−16487
angle-measuring signals, envelope detector output with reflection interference, time position fixing errors 86−49745
angle-phase-digital transducer, multiturn two-reading type *(Russian)* 85−37594
angle-position meas. error anal. in production systems 87−49438
angular displacement measurement using Emkosin transducer, error anal. *(Russian)* 88−35973
anomalous errors minimisation in measuring systems employing search and control devices 85−19459
antenna field meas., using movable SHF channel, distortions reduction 85−64215
antenna gain measurement by the extrapolation technique[automated system] 86−31578
antenna meas. appls., phase-pattern corrections and phase-centre determination, phase errors anal. 86−3654
antenna near field-far field transformation by pseudo sampling technique, meas. errors 86−29568
antenna near-field measurements, displacement errors, effect on far field 88−66160
antenna planar near-field meas., random errors effect 87−26941
antenna radiation pattern restoration error, sampled readings of amplitude-phase distribution 88−40660
antenna surface measurement using microwave holography, error estimation 88−2402
applied potential tomography−data collection problems 86−32243
aspheric surface testing with computer-generated holograms, adjustment and shape error anal. 86−3321
asymmetrical short-circuit current measurement, by current transformer, measurement errors *(Polish)* 85−8922
ATE, calibration improvements, economic model 85−42859
ATE calibration, economic model 86−44137
ATE error components reduction, subnanosecond meas. accuracies assurance 86−49942
ATE subnanosecond accuracy 87−56481
atmospheric absorption error reduction by differential emission meas. with ground-based microwave radiometer 86−6120
atmospheric solar spectral irradiance, zero-airmass voltage error rel. to time-varying optical depth 86−6122
attenuation standards, automatic reference setup for certification in 0.1 to 100 MHz range 87−34933
audio distortion analysers, electrical performance tests 87−8479
autocompensation as structural method of instrument accuracy meas. 87−70338
autograph readout errors 85−48015
automated photometric ellipsometers, accuracy charact. 86−35528
automated pulse reflectometry, accuracy increase 87−3384
automatic network analyser measurements, errors, simulation model and statistical anal. 87−77064
automatic network analysers, meas. config. and errors *(Spanish)* 86−50019
automatic pulse calibration system 88−60588
automatic self-calibration, compromising on accuracy, cutoff freq. and duration *(German)* 88−4296
automatic vector network analyser with 12-parameter error model, TRL calibration method 86−31119
automatic weather stations, errors checking errors estimation *(Russian)* 88−16914
averaging digital phase meters, high-frequency sampling error 88−29500
averaging error of phase meters with phase difference-to-voltage-to-code conversion 85−48052
averaging undifferentiable monitored parameters 88−53518
Avogadro's number refining, structural constraint sources limiting 88−74238
backscatter cross-section of cylindrical body, meas. distance error prediction 88−15503
balance correction method usefulness assessment 88−29191
balances error calc. and minimisation, due to nonparallelism of knife-edges 88−36248
bandwidth effects in noise-figure measurements 88−47668
basic criteria for the selection of transducers (sensors) *(Spanish)* 87−63395
Bayes analysis of accuracy in simultaneous meas. procedures 85−37393
beam-balance platform bending effect on weighing accuracy 86−18154
bearing error statistics for *m*-distributed signal amplitudes 87−47741
bench universal counter-timers, time error correction 85−58755
birefringence errors in magnetooptical high-current converters 87−63368
bit error rate in digital links, fast measurement 87−69746
blood flow parameters simulation and meas. 85−48213
blood pressure, direct meas., significance of reference 87−50211
body temperature estimation by a Kalman filter *(Japanese)* 85−15066
borehole iron ore resource permeability meas. by resonant meter 88−68615
bounded meas. error estimates 88−60520
bridge deformation detection, vision technique 88−66701
bridge instruments, errors in combined meas. of multi-unit two-terminal elements *(Russian)* 86−65230
built-in test detectability meas. error correction model 86−57173
burst error structures in baseband systems with decision feedback, DC restoration *(German)* 88−3013
C-V curve meas. in semiconductor device manufacture, errors reduction 88−36204
calibrated power meters, connector variation errors 88−67987
calibration, upper confidence limit for uniform distrib. parameter 87−34889
calibration curve construction for means of meas., by maximum-compactness method 88−35765

measurement errors continued
calibration measurement uncertainty, computer and software impact 86−65096
calibration of high-accuracy wattmeters, with standard generator 85−58800
calibration of phase meters with linear response characteristic 87−70706
Canadian National Research Council new candela realisation 88−22815
capacitance meas., sine-wave oscillator with operational amplifier appl., error reduction 88−74550
capacitance meas. using digital transformer bridges, errors of long range meas. *(Russian)* 86−11637
capacitance sensor of displacement, error calc. from nonlinearity of conversion function *(Russian)* 87−77260
capacitive profilometer, surface roughness measurement 88−16483
capacitive sensors for free-flowing materials, parameters stability *(Russian)* 87−21033
capacitive vacuum gauges, error components analysis 88−4686
cardio-CT, ECG-triggered, phantom meas. and error estimation in vol. determ. 85−9167
cathode temperature measurement, optical pyrometry, in-house primary standard blackbodies 86−14780
cemented strain gauge accuracy, elastic element strain gradient effects 88−67753
chaotic filtered signal, meas. error considerations 88−59167
chilled mirror hygrometry 88−29724
chopper amplifiers, high accuracy, for DC voltage meas. *(German)* 85−6176
chromatic dispersion meas. at 1300 and 1500 nm, error anal. 87−70077
Chromel-Alumel thermoelectric calibration convertors, calibration charact. instability obs. 87−3568
circuit testability measures and test-point selection, via QR factorisation of linear models 88−15880
circular angle digitizer calibration 86−11517
circular displacement convertors, accuracy investig. 87−68288
circular gauge, systematic errors correction, computerised calibration procedure 87−35039
classification according to purpose 86−38175
clock errors, Allen variance and diffusion coeff. calcs. 88−22804
clocks comparison through optical communication channels 85−4123
CMOS VLSI devices designed to drive TTL loads, timing meas. 87−24102
co-ordinate meas. instrument deviations and acceptance tests *(German)* 86−18124
coating thickness meas., errors simulation 88−53856
coating thickness meas. by coulometric methods, meas. error determ. 85−48096
coaxial line joint losses determ., from swept-frequency reflection data 88−15305
coaxial line sensor, open-ended, for medical and industrial dielec. meas., assessment 86−55725
coaxial noise source, calibration method using waveguide standard, error anal. 87−77069
coaxial probes with finite ground plane for biological dielec. props. meas. 88−36416
coaxially-cylindrical capacitance sensor for level meas., error compensation *(Russian)* 86−38612
code reliability determination for angle-parameter-code converters 88−4344
coherent spectrum analyser, optical system adjustment errors 85−26265
coil constant determ. in γ'_p expt. at PTB, flux profile meas. 88−16443
coil oscillographs, linear accuracy determ., method *(Polish)* 87−14361
color characteristics derived by indirect measurement 88−74608
combining measurements to reduce total cost *(Russian)* 86−31110
communication signal near-field scattering TDOA errors 87−33512
commutation inversion method, error correction using polynomial error theory 86−44078
compound signal mean-square value transducer checking 88−22849
computerised precise measurement of geometrical dimensions and digital processing of 1D patterns 88−16481
computerised test systems, material props. meas., sources of error 87−3388
concentrating photovoltaic arrays, test date anal. 87−16014
conductimetric instrumentation, due to bubble adhesions on electrodes 85−31570
confidence intervals correctness for variance of meas. errors 87−77063
constant heading trajectories, maximum likelihood estimation 88−15555
constant-density gas thermometer pressure meas. error sources and corrections 88−22842
contact resistance, transmission line method meas. using island electrodes, study of GaAs/Ag-Zn contacts 88−47660
contact resistivity meas., current crowding and misalignment effects in self-aligned test structs. 87−49884
contact resistivity meas. errors, current crowding and misalignment effects, computer simulation 87−49883
contactless measuring of the axial speed at the cross-rolling *(German)* 87−14558
contactless radio-wave level meter 87−63367
control theory appl. to meas. system, measuring path conversion accuracy *(Polish)* 87−34892
conversion to SI and resultant errors *(Russian)* 86−38184
coolant temperature meas. in nuclear reactor, using computer controlled combined sensor *(Slovak)* 85−20577
cooling towers, emitted vapour, measurement methods, instruments and errors *(German)* 85−15803
coordinate diameter meas. 88−4623
coordinate meas., 3-D, based on phase shifts of multiultrasonic waves *(Japanese)* 86−55837
coordinate measurement in unmanned machines and error correction *(Hungarian)* 86−31647
coordinate measuring instrument, accuracy research 86−55841
coordinate measuring machines, self-calibration, error compensation 87−34955
correlated parameters meas., significant errors detection 88−67621
correlation interval of noise, characteristics of adaptive device *(Russian)* 86−24746
counters, programmable, time-interval meas.-error anal. program 85−26181
critical dimension meas., accuracy of electron optical methods 88−16494
critical dimension meas. in SEM, noise contribs. 88−16495
critical mass flowmeters, meas. error due to flow restriction 88−53941
current meas., temp. errors in thermostabilised logarithmic convertors *(Russian)* 85−43059
current transformer, two-stage, expt. and theoretical errors difference 88−42243

measurement errors continued
current transformer error compensation by low-power current convertors 88−32504
current transformer errors during a transients 88−69452
current transformer errors taking VA charcts. into account *(Russian)* 87−11088
current transformers, metrological properties, influence of near situated ferromagnetic materials *(Polish)* 85−44064
current transformers, verification test setup, magnetic current comparator appl. *(Polish)* 85−42856
current-measuring convertors, transformer-type, mathematical modelling of stochastic processes *(Russian)* 85−26271
curve tracking system for strip chart recorders, photo-diode array sensor appl. 86−31274
curved surfaces, glossiness meas. using CCD line sensor 87−63525
CW LIDAR using m-sequence pseudorandom modulation, response and error meas. *(Japanese)* 88−74045
cylindrical form, discrete meas., sampling space 87−63511
cylindrical products, radius and elec. cond., meas. errors, eddy current method 86−531
cylindrical surfaces, diameter meas. rel. to shape deviations 86−11700
DAC, measurement error due to inaccurate reading dating in aDAC 86−31107
DAC dynamic characteristics measurement 88−56706
data acquisition in checking means of measurement, using programmable hand calculator 88−35869
data acquisition-error compensation and dimension-gauging in high-performance systems *(Italian)* 86−49997
data and meas. systems, error charcts. normalisation, determ. and control 86−44105
data convertors error distrib. analysis 87−59810
DC measurement amplifier accuracy and speed with two-channel galvanic separation 85−20685
DC voltage dividers testing errors at high voltages, compensation method 85−8917
Debye-like dielectrics meas. ammeter induced perturbations of Argand diagrams 88−22747
definitions and uses of words error, uncertainty, measured value and true value 85−26158
deformation holographic interferometer design, fringe pattern interpretation using relative orders 88−20775
deformation meas. using wire and foil strain gauges, error evaluation standards 88−53642
derived signal measurement and eval. *(Russian)* 87−63337
deviation from straight line, flowchart and FORTRAN program *(Rumanian)* 86−24307
deviations from rectilinearity meas., systematic error determ. 88−36212
device for checking analog measuring instruments, errors 87−28915
diameter meas. of precision solenoid, systematic error anal. *(Japanese)* 86−63926
diameter of cylinder meas., diffraction method accuracy increase 86−44420
dielcometric water-content meter, methodological error in checking by use of water content simulators 87−29369
dielcometric water-content meters, metrological charcts. 87−29368
dielectric constant meas., error calc., scattering matrix elements 88−39743
dielectric meas. by time-domain reflectometry, time misalignment, waveform truncation and noise effects analysis 86−60321
dielectric resonator, parallel-plate, dielectric const. meas., airgap influence, error anal. 86−62808
dielectric spectroscopy using shielded open-circuited coaxial lines, error analysis 86−65256
diesel engine indicated pressure and heat release meas. data calc., error anal. 85−15076
differential Doppler velocity meter with fiber waveguides 87−70860
differential meas. amplifier with switched inverting of input signal 86−40924
differential-capacitor sensor for displacement measurement, electrode misalignment effects *(Russian)* 85−58696
diffraction method of meas. small linear dimensions, mode composition effects on errors 87−56844
diffrequency stereo, theoretical basis, disparity measurement error 86−69112
digital communication channels, reliability losses meas., error anal. 88−46840
digital coulometer, design and measurement errors *(Polish)* 88−36117
digital CRO, error sources and Hewlett-Packard instruments *(French)* 88−29525
digital cross correlators, errors due to quantisation and differential nonlinearity 87−49617
digital differentiation errors in measuring angular acceleration for internal combustion engines 87−29306
digital display instrument tolerance definition and calc. *(Spanish)* 88−74514
digital Fourier anal., reliability anal. *(German)* 87−33716
digital handling of dynamic meas., acquisition errors occurrence 88−4320
digital instrums., characterized analysis reduces error in digitizing instruments 88−4518
digital integratjng meters checking, errors reduction 88−53543
digital measurement errors of power system variables, use of Lotus 1-2-3 spreadsheet 87−35703
digital measurement systems modelling errors 86−31111
digital measurements data, minimax evaluations of effectiveness of algorithms for filtering transient errors *(Russian)* 85−58480
digital measuring instrument error allowances using worst-case method and RMS method *(Danish)* 88−41937
digital meter with automatic sensitivity calibration and optical lines between transducers 88−16246
digital multimeters market review *(Norwegian)* 85−31507
digital time interval meas., parametric estimates of statistical tests 85−64305
digital TV planimeters, extremum errors and actual precision *(German, Russian)* 86−18114
digital wattmeters, mixed-mode sampling and error estimation 85−4011
digitally controlled phase shifter *(Polish)* 88−12542
digitization errors of fast digital recorders 87−14260
digitization errors of fast digital recorders 88−16240
dimensional meas. using computer vision techniques, error analysis 88−60773
dimensional measurement with bright field optical microscope, instrumental errors 88−16493

measurement errors continued
diode thermometry, meas. system induced errors 86−44456
dipole current source determ., sensitivity to elec. noise and to electrode misplacement 86−50592
direct reading microwave moisture meters, error analysis, adjustment, calibration 88−68080
direct-write electron beam patterning reregistration and metrology 85−29248
directed-graph reflectometer error analysis *(Russian)* 87−41298
directional couplers of total multimode power using ridge waveguides, charcts. 88−25392
discontinuous meas. scales, errors of precision, meas. and resolution *(French)* 88−67626
discrete measuring apparatus, dynamic distortion error avoidance *(Russian)* 86−24249
displacement meter errors reduction, using two different sensors and microcomputer 87−3748
displacement transducers with self-adjusting corrector 85−47950
distance to surface meas., sounding signals optimisation 85−24808
distribution laws stability under normal meas. conditions 87−3360
distribution transformer loss testing using uncertainty calculations 85−27462
DO 28D aircraft longitudinal motion parameter estimation, effect of measurement errors *(German)* 86−38174
Doppler velocimeter meas. of object moving along extended refl. surface 85−58895
dosimetric discrepancies obtained using a guarded parallel-plate ion chamber with a high input impedance electrometer 87−8958
dosimetry, radiochromic film, precision improvement by individual dosimeter charcts. 85−20974
dosimetry, short-time accuracy meas. *(German)* 87−29315
double layer transducers, temp. meas. in elastohydrodynamic contacts, pressure influence *(German)* 87−56658
dual six-port automatic network analyser, online accuracy assessment, systematic errors calc. 87−14252
dual six-port automatic network analyser, online accuracy assessment 88−16462
dual six-port automatic network analyser, online accuracy assessment, expt. results 88−16464
dual six-port automatic network analyser, online accuracy assessment 88−16465
dual six-port automatic network analyser, systematic errors analysis 88−16463
dual-channel sampling systems for power and phase angle meas. 86−38311
dual-slope phase meter , microprocessor-based 88−74505
DVM error charcts. checking methods 86−18012
dynamic, due to oscillographs 88−29499
dynamic error correction of instruments, by matrix computation 85−37394
dynamic errors of weighing during motion 86−31679
dynamic meas. correction by mean of quadrature formulas 88−29190
dynamic multicycle phase shift measurements 88−29581
dynamic systems, freq. charcts. determ. from pulsed transient function set *(Russian)* 85−58481
dynamic test system for high speed mixed signal devices 88−22451
dynamometer machines, three-level standard system 87−3773
ECG, equivalent cardiac dipole estimation from body surface pot. distrib., bias and scatter *(Japanese)* 86−50579
ECG, equivalent cardiac dipole estimation from body surface pot. distrib., bias and scatter *(Japanese)* 86−50580
ECG classifiers, improved tolerance to electrode errors 86−12004
eCG recording error in an automated measurement system 88−61359
echo path response meas. 88−66473
eddy current electrical cond. meters, inspection errors rel. to geometric parameters 87−16729
eddy current instruments, electrical conductivity meas., errors and verification methods 88−10098
eddy current tests, contactless meas. of shaft vibrations, distances and thickness, temp. errors *(German)* 88−36234
eddy current transducers errors due to mechanical vibrations, electronic simulation *(Russian)* 88−35974
eddy-current parametric transducer with improvedcharacteristics 86−57500
EHV transmission lines, power loss meas. *(Russian)* 86−65700
electric distortion meas., instruments and techniques *(Italian)* 85−37744
electric field meter, multiple-source and frequency error anal. 85−26432
electric field strength meas. at 30 MHz, comparison of standard means 85−8918
electric motor transients, angular-vel- and accel.-meas. error anal. *(Hungarian)* 88−30667
electric power systems, measurement error characteristics determination when estimating state *(Russian)* 86−50779
electric resistance meas., using quantum Hall effect 85−64241
electric resistance/impedance measurement techniques, error causing factors and electromagnetic shielding *(Japanese)* 85−26445
electric variables measurement, entropy errors and loss of information *(Polish)* 86−55512
electrical conductivity measurement of materials of curvilinear products, electrical conductivity measurement *(Russian)* 85−58842
electrical conductivity of moving fluids, systematic meas. errors *(Russian)* 85−14979
electrical energy meas., errors *(Russian)* 86−32862
electrical impedance tomography system, meas. error charcts. 88−61376
electrical resistivity of cylindrical testpieces using eddy current probe, errors determ. 86−57499
electricity meters, sample testing, error behaviour *(German)* 88−36100
electricity meters, solid-state type, error influences in calibration 88−10923
electricity meters metering charcts., anal. of fault influences and measurement inaccuracies *(German)* 85−48630
electro-optical sensor, positional measurement errors due to object tilt 85−37386
electrodynamic suspension, levitation parameters measurement errors *(Russian)* 85−39267
electromagnetic transducer, permitt. and specific elec. cond. meas. *(Russian)* 88−74350
electron beam testing, shot noise limits to meas. accuracy and bandwidth 86−35793
electron lithography, shot noise errors in registration 87−17868
electronic counting scale with minimised count errors 86−18157
electronic instrumentation and measurement techniques, book 86−18
electronic watthour meters, charcts. errors *(German)* 85−31515

measurement errors continued
electrophysical devices metrological parameters determ. within complex systems 88−74220
electrophysical parameters meas., experiment planning and metrological preparation 86−26940
ellipsometric metrology of ultrathin films, using dual incidence angle meas., error anal., optimum angle determ. 87−14578
elliptic instability determ. of cylindrical magnetic domains, using TV image analyser 88−36189
EM displacement transducers, error sources in dynamic appls. 87−29093
EM distance meas. for surveying appls., systematic error elimination 85−4116
EM emission data measured in nonideal environments, correction 86−59094
EM field meas. apparatus, feederless technique 85−64216
EM flowmeters, noise reduction 87−21059
EM radiators, far-field amplitude estimation from close-field meas. 86−29564
EM voltage transformers, meas. errors, influence of core construction 88−11257
embedded stress cells, loading history consequence on measuring error 88−60929
embedding network characterisation, low-loss meas. appl. 87−14454
EMF meas., temperature compensation cct. for saturated standard cell 86−24457
EMI meas. inside shielded enclosure, error study 86−3586
EMI measured values, proposal for obtaining good agreement 88−14417
EMI test site design for open field 88−14419
Emkosin capacitance sensor for angular displacement meas., errors caused by electrodes, anal. *(Russian)* 88−60917
energy accounting and monitoring systems, data accumulation errors 86−6446
energy luminance spectral density meas., unit reproduction, effect of azimuthal nonuniformity of magnetic field 86−44488
energy meters, errors estimation *(Italian)* 86−6444
engine exhaust gas anal., air-fuel ratio determ. 85−15072
engineering component acceptance, measured parameter choice 88−4264
engineering meas. accuracy calc., major stages determ. 86−4932
equiprobably distributed meas. errors, unexcluded systematic error bounds calc. 87−3358
equivalent-perturbation method in accuracy evaluation for indirect measurements 88−4260
error analysis, fundamentals 86−38180
ESD tests, applicability of statistical concepts 88−33325
estimation and correction of errors, in automatic process control of thermal power stations 87−65128
estimation by means of meas. during checking 86−17725
estimation for smoothly varying quantities 85−47780
estimation in initial approximation of transfer function 88−53517
estimation of errors caused by sampling 85−37401
evaluation of measuring instruments quality based onparameters of error distribution *(Polish)* 86−52332
experimental data analysis, 'metrological statistics' approach using biased estimators 87−56447
experimental error study by graphical procedure *(Japanese)* 85−3821
experimentation and meas., errors, statistical anal. 85−3825
eye position sensor, differential meas. generalisation 85−38009
far-field uncertainty due to random near-field measurement error 88−72685
fast digital recorders, dynamic performance testing 86−60207
FCC site-attenuation approx. error anal. 85−64229
FET, noise temperature measurement accuracy 88−22768
fibre lightguides damage site detection, instruments certification and meas. errors 85−63651
fibre optic communication lines, comprehensive meas. procedure *(Russian)* 88−72062
fibre optic gyro, heterodyne, drift reduction 88−67868
fibre optic gyroscope, phase-modulated, coherent backscatter-induced drift study 86−42251
fibre optic gyroscope with birefringence modulation, nonreciprocal phase error 88−10003
field focusing NMR-CT for noninvasive thermometry, temp. resolution study 87−57086
field strength meas., whip antenna appl. 85−48038
filtration analyser, flow measurement errors modelling *(Russian)* 86−55888
fitting of parametric physical models, choice of criterion 85−37391
flame in cylindrical tube, double-exposure holographic interferometry temp. meas. 87−54426
flat surface electric field meas. with electrostatic fieldmeters 85−46520
float-area type air flowmeter, correction for line press. change effects *(Japanese)* 88−22576
float-type flowmeters, pulsation error at high Reynolds numbers *(Japanese)* 86−70249
floppy disc drives, read-write head alignment, EM meas. methods 86−63566
flow meas., orifice surface conditions effects on accuracy obs. 88−60981
flow measurement errors *(Italian)* 85−8992
flow rate generator in test system, leaks in internal gaps of pump 86−5218
flow rate measurements, accuracy *(German)* 85−31632
flow test stand construction and evaluation 86−5594
flow-rate generator errors determ. 85−9002
flowmeter, float-type, large amplitude pulsation and waveforms effects *(Japanese)* 85−43134
flowmeter, microcomputerised system, accuracy estimation 87−34928
flowmeter, NMR, front sampling parameters effect on systematic error 87−35008
flowmeter, NMR, relax. error elimination method 87−35009
flowmeter, turbine-type, test system error determ. 86−24491
flowmeters, differential-pressure type, automatic zero compensating system 85−15080
flowmeters constriction devices parameters determ., w.r.t. optimal meas. accuracy 88−36284
fluctuating signal meas. errors and compensation methods *(Polish)* 86−5456
fluctuation analyzer with ideal filter in circuit forming reference oscill., statistical estimate of error 87−70490
focusing errors, lateral, influence of observation conditions *(Russian)* 86−24256
force measurement ranges and accuracy rel. to appl. 86−18139
force measurements in aerodynamics usingpiezoelectric multicomponent force transducers 86−38880
forecasting error distributions for means of measurement 87−63204
measurement errors continued
four-pole networks phase-amplitude response meas., accuracy improvement 86−70191
four-terminal AC standards, correct use 86−38479
four-terminal LRC meter connections and lead resistance effects 88−16237
frequency error of difference-signal dispersionestimate 86−4931
frequency meas. in microwave range using multi-channel freq. discriminators *(Polish)* 85−64227
frequency response meas. from step response data 87−14256
frequency spectrum analysers, design, error sources and appls. *(German)* 85−26260
frequency transducers, precision criteria *(Russian)* 85−37591
frequency-deviation standard for FM signals 85−8678
furnace tube temp. meas. error correction 86−31447
galvanic coating thickness meas. uncertainty and relative error *(Croatian)* 85−43093
gas flow measurement, appl. of critical nozzles *(Polish)* 85−58949
gas flowmeter calibration, low-flow rate, NBS accuracy 86−60378
gas meters for industrial use, correcting devices errors assessment 88−53925
gas-liquid mixture, devices for measuring gas content *(Russian)* 86−65297
gasdynamic method for volume meas., error stabilisation by optimal volume determ. 87−3801
gauge for nonsinusoidal signal meas., eval. using admissible peak factor *(Polish)* 87−34891
Gauss algorithm based estimators, weighted least absolute value *(German)* 88−41936
generating unit technical and economic characteristics, measurement reliability check 85−60000
geodesy, carrier signal multipath interference effects on relative GPS positioning 88−54729
geodetic VLBI, errors in Earth rot. parameters and baseline lengths 87−42222
geoelectric sounding, resistivity error due to finite-length contained vertical conductor 87−71274
Geometrical Dilution of Precision, Navstar/GPS and multilateration systems *(French)* 86−23997
geophysical instrumentation, accuracy determ. method 86−24258
geophysical observations classification, error probability estimation 86−6074
glass calorimeter for spatially resolved studies in arclamps 86−38600
GPS, phase III anal., computer simulations *(Japanese)* 86−65034
GPS, ranging errors due to multipath wave, reduction method using multipath suppression cct. *(Japanese)* 88−22237
GPS marine kinematic positioning accuracy and reliability 88−9681
GPS observables 87−76894
GPS position fix using single frequency reception, ionospheric propagation delay *(Japanese)* 87−56295
gravimetric primary standard gas mixtures, calcs. by computer program 86−11767
gravity acceleration meas., using ballistic methods 88−47392
gross errors recursive identification in linear data reconciliation 88−67617
group delay measurement using AM systems, error minimisation aspects 85−58867
Hall coeff. meas. at high interference level 88−10117
Hall effect magnetic induction meter for 0.5 to 15 T pulsed fields 88−22752
harmonic signal phase estimation in presence of noise and amplitude fluctuation 85−52838
harmonic voltage signal RMS value meas. using linear detector, error estimation 85−48034
heading-dependent error correction for MF and LF position-fixing 88−4140
health phys. meas., impact of instrument response variations 85−48353
heat conductivity of thin films, expt. determ. *(German)* 85−1188
heat flux transducer on furnace wall surface, error analysis 85−58930
heat meas. accuracy in heat evaluation apparatus for solar collectors *(Japanese)* 88−24164
heat transfer meas. by thin skin technique, meas, errors determ. 86−17929
heat transfer suction pyrometry, using microcomputer 85−15068
heat-flow calorimeter, random errors reduction 86−31566
height finding radar, systematic errors study for navigation accuracy meas. *(Japanese)* 87−34677
heterodyne interferometer to measure vibration parameters 85−4114
heterodyne radar, radial velocity meas., atmospheric turbulence, error estimation 88−22185
Hewlett-Packard, network analyser, accuracy prediction 85−14720
HF DF system, computer modelling of ionospheric errors 86−30908
HF errors of electric field meter in complicated EM environments 86−31134
HF linear network parameter meas. in China 86−65155
HF meas. techniques, conf., Braunschweig, Germany (June 1983) 85−10336
HF phase-storage device, based on selective amplifier, metrological charact. *(Russian)* 85−32605
high magnetic induction measurement in 25 cm Epstein frame, air flux influence on errors *(Polish)* 85−43080
high order moments of time dependent series, expt. determination accuracy assessment *(Russian)* 86−4925
high-digit-rate bit error ratio measurements, circuit structures 87−66019
high-temperature tensoresistors life tests, strain reproduction errors 88−53888
holographic image meas., errors due to exposing and viewing conditions mismatch 86−22544
holographic interferometer optimisation for small displacement vector meas. errors 85−56878
holographic interferometry: errors caused by thermalgradients in holographic plates 85−56861
homodyne system meas., use of modified Hilbert transform in anal. 88−60517
hot wire anemometry, velocity calibration relationships 88−36241
hot-wire anemometer, turbulence data correction due to angle deviation 86−44473
hot-wire probe calibration facilities, blockage correction effects 87−70868
human 3D movement, improved accuracy of tracking system 86−70215
HV capacitance meas. bridge, frequency dependent errors 87−14469
HV impulses distortion by meas. system, reconstruction by iterative deconvolution algorithm 86−60304
HV measurement transformers, operating safety *(German)* 85−48621
HV test facilities, voltage impulse meas. errors *(German)* 87−10119
HV voltage dividers, direct numerical measurement of dividing portion during measurements *(Rumanian)* 85−31547
hydrophones calibration, using internal cavity, sensitivity evaluations accuracy determ. 87−71433

measurement errors continued
hydrophysical laser sounding complex, collection and data-processing system 88−48328
hygrometer for atmospheric humidity meas. in climatic chambers 88−36295
hyperthermia, clinical, practical use of thermocouples for temp. meas. 86−70383
IC wafers, critical dimensions, optical meas. uncertainties and process tolerances 85−29238
illumination meas. by RPCh-1 radiometers, use of UPR-1 checking apparatus 86−31686
image convertor operation, collective photoelectron interaction contribution to time distortion of signals 86−41488
impact spectrum analyser, calibration signal selection 88−35881
inaccuracy evaluation and terminology problems in Polish metrology *(Polish)* 88−22396
increments and small consts. meas. errors decrease *(Polish)* 87−41294

indirect meas. result error estimation 86−44076
indirect measurements, error propagation *(Spanish)* 86−55511
indirect method for measuring the errors of current ratio of inductive current dividers *(Polish)* 87−49871
induction meter for velocity meas. of electrically conducting bodies, charact. eval. *(Russian)* 87−29307
induction motor drives, microcomputer-based optimal control for reducing parametric variations and speed measurement errors 85−27707
induction motor drives with microcomputer based optimal control system 86−45743
induction motor field-oriented adaptive control reducing effects of parameter variations and meas. error 87−43021
induction motor noise and vibration measurement, meas. scatter statistics *(Bulgarian)* 85−9871
induction watthour meter accuracy with nonsinusoidal currents 87−70684
induction watthour meter performance harmonic anal. 85−37658
inductive flowmeter meas. signal error reduction, adaptive method *(German)* 85−14576
inductive size monitoring, dynamic charact. 86−24487
industrial sensors, nonlinearity correction cct. *(Dutch)* 87−49667
industrial weighing machines, sensitivity and zero errors meas. *(German)* 85−48113
inertial navigation, free surface characteristic problems *(Japanese)* 86−65487
infra-low-frequency elec. prospecting, meas. channel design *(Russian)* 86−24441
inspection, repeated meas. to reduce meas. error effect 88−43718
inspection processes, measurement errors effects on results *(German)* 88−24595
instrument design, measurement technology *(Russian)* 88−53523
instrument errors, non-guaranteed limits *(Polish)* 87−20834
instrument temperature transducers, unified DC output voltage, meas. errors 86−11539
instrument transformer errors determ., under operating conditions 85−48044
instrumental errors due to entropy *(Polish)* 86−38183
instrumental measuring errors, anal. method *(Chinese)* 85−58479
instrumentation, effects of atm. evaporating impurities *(Russian)* 88−15902
instruments with numerical program control, mathematical treatment-error model 86−38176
integrated meas. system error reduction using Kalman filter *(German)* 85−14567
intelligent electronic sensors verification and standardisation *(German)* 86−38367
intelligent meas. instruments charact. 87−3403
interference source, radiation charact. error anal., power meas. based 86−3609
interferometric fringe counting methods for displacement meas., 10^{-9} m to 1 m range 88−29640
intermediate meas. error summation, statistical method *(Polish)* 86−60089
international time comparison and factor anal. in freq. instability, NRLM time scale *(Japanese)* 86−31673
interval evaluations of errors in digital measuring devices *(Russian)* 87−34890
ionic conductors, solid, impedance studies, bridge balance conditions and error corrections *(German)* 87−21197
ionising radiation interaction with matter, stochastic processes meas. optimisation 87−8838
ionometer readings correction algorithm 88−29501
IR film thickness gauging, optical interference suppression 87−21252
IR imaging system, blackbody source effective radiant output, background temp. changes effect 88−53734
IR microimaging, emissivity correction 88−4474
IR radiometer for background noise investigations *(Russian)* 87−49752
IR signal calibration, meas. errors 85−52781
iterative correction methods for systematic errors in meas. information systems *(Polish)* 88−15886
kilowatt-hour meter error meas. using microcomputer technique *(Chinese)* 86−6447
kilowatthour meter accuracy rel. to thyristor and rectifier harmonics *(Italian)* 86−65788
KRAMS airport automatic weather stations, error checking *(Russian)* 88−16915
Landsat-4 multispectral scanner and thematic mapper data classification accuracy, expts. 87−50548
laser beam diameter meas. by moving CCD sensor 88−72377
laser beam energy distrib. meas. errors, effects of matrix transducer filling 85−56764
laser cavity mirror reflectivity precise meas., intensity balance of two light beams with single detector 85−29875
laser Doppler velocimetry, velocity and fringe bias effects in turbulent flows 86−38617
laser frequency meas., phase fluctuations influence 86−29028
laser gyroscopes, optimum correction in spatial stabilisation and guidance systems *(Russian)* 87−68671
laser obs. of artificial Earth satellites, statistical analysis of atmospheric corrections 85−4450
laser radiation power meas., wide-aperture meas. facility, sensitivity study 87−61217
laser radiation spatial energy charact. determ., meas. transducer model 88−9943
laser ranging in turbulent atmosphere, meas. errors *(Polish)* 87−39258
measurement errors continued
laser scanning system, transmitter-receiver parameters 88−41755
lateral heat conduction effects on heat-transfer measurements with the thin-skin technique 88−5039
least squares estimates of standards, for unequal accuracy meas. 85−37407
LEDS, optical properties meas., noise limits *(Polish)* 85−2159
length and angle digital meas., quantisation error anal. *(Polish)* 86−18120
length meas. using mechanical meas. instruments, optimal design and manufacture *(Rumanian)* 87−21237
length measurement, improving sensitivity, noise removal *(Japanese)* 87−29292
lever-arm balance, errors due to clamping determ. 85−48111
LF noise sources minimisation in electronic meas. 88−16368
LF waves on the sea, effect of nearby mountain, direction finding errors study *(Japanese)* 86−54296
lidar aerosol backscatter measurements: systematic,modeling, and calibration error considerations 86−18560
light pulse temporal position, meas. errors in turbulent atmosphere 88−60912
light sources colour meas., metrological support 86−38187
light-beam oscillograph time marker 85−48014
lightning tracking system, meas. of tracking error *(German)* 86−54373
linear analogue meas. instruments, errors estimation 88−4263
linear bearings design, angular and lateral errors *(German)* 85−48926
linear dimension meas. in engineering 85−64281
linear dimensions of workpiece meas., force exerted by jet eddy probe determ. 85−3966
linear motor, double sided, static charact. meas. *(Polish)* 85−9932
linear optical encoders, error sources 86−38354
linear rational expectations model, unobserved components and errors in meas. 87−28889
linewidth meas. in near-micron and submicron regions 86−24785
load cells, error reduction by correct installation 87−41472
load cells accuracy determ. for rolling mills appl., using finite element analysis 86−11584
lock-in amplifiers below unity S/N ratios, precision limits determ. 86−31332
logic analysis at high freqs., meas. errors *(German)* 85−26243
logic analysis measurement errors *(German)* 86−17878
Loran-C position correction and comparison with GPS data 88−9684
loss function minimisation *(Russian)* 85−47779
loudspeaker driver parameter meas. techniques 86−17688
low leakage meas., ATE error analysis and countermeasures 85−64224
low temperature measurement by Pt resistance thermometer, errors 87−8760
low-angle millimeter wavelength radar tracking, multipath effects 88−15656
low-voltage ELF electric field measurements in ionic media, tissue culture appl. 85−43322
LSI circuit parameter monitoring, measurement accuracy 86−9183
LSI system testing, test data quality assurance 87−41355
luminescent material colour charact. determ., errors estimation 86−38584
luminous flux meas. method reducing error using integrating sphere *(Polish)* 88−36252
machine vision systems, induced metrology distortions 86−18129
magnetic body field meas., exponentially decreasing error model 88−68012
magnetic DC comparators, with fractional magnetic flux control, metrological anal. *(Polish)* 85−17759
magnetic field strength meters calibration, using loop antennas, conductive objects effect obs. 88−16445
magnetic inspection, localised pulse method, clearance change errors 85−6056
magnetic materials testing, standard specimens appl. 85−44816
magnetoencephalogram moving dipole inverse solns., effects of meas. errors and noise 87−3944
magnetometers using superconducting flux transformers, induced current error elimination 88−9965
magnetotelluric surveys, electric line contour effects 88−14347
manufacturing yield calc. allowing for randomly variable quality meas. *(German)* 86−26665
mass meas., systematic error due to air density changes elimination 88−36250
mass meas. standards, correction for buoyancy and gas adsorption 85−64308
mass measurement and errors, high precision, conf., Braunschweig, Germany (Feb. 1984) *(German)* 85−10350
mass standards calibration, adsorption errors minimisation 86−44442
mass units, primary, secondary and working standards, weighing processes *(German)* 85−15054
maximum-demand meter electronics and error limits *(German)* 86−61198
Measurement Assurance Programs, audit experience 86−65097
measurement-information systems error correction method 85−63928
mechanical meas. system with oscillatory link, statistical description 88−4652
mechanical-variable transducers, anal. of conversion methods *(Russian)* 86−50068
medical imaging systems, detective quantum efficiency and noise equivalent quantum exposure meas. errors analysis 88−23060
medical impedance imaging, errors caused by contact impedance 86−56145
metal props. meas., quantitative charact. for data reliability 85−47784
metalclad switchgear temp. distrib. meas. by thermal imaging *(Polish)* 86−19429
meter, core-magnet type, moving coil, flat, indicating errors caused by external mag. field *(Japanese)* 87−3644
meter transformers accuracy testing, using automatic electronic equipment *(German)* 85−47999
metrological model of data-and-measurement system 86−24276
micro-wavelengths transmission meas. with error correction, device under test modification 85−14733
microelectronics dimensional metrology in SEM 87−35200
microfibres, calibration charact. calc. of scanning laser analyzers, diameter meas. accuracy 88−7863
microparticle size and conc. meas. by working vol. separation 85−4154
microwave, frequency meters, computer-controlled calibration system and error considerations 86−11434
microwave amplifiers, minimize harmonics in scalar tests of amplifiers 88−4603
microwave cct. large-signal charactn., computer-aided load-pull meas. system with error correction 87−20901

measurement errors continued
microwave circuit, reflection matrix meas. using network analyzer 87−63500
microwave coaxial noise source, calibration using waveguide standard 88−29608
microwave conductivity and permitt. by cavity perturbation method 85−52852
microwave dual-channel phase shift meas., mismatch error cancellation 86−24667
Microwave Landing System elevation guidance, diffr. error *(Japanese)* 88−54726
microwave measurement, coherent RF error statistics 87−8734
microwave moisture measurement instrument, error analysis 88−36296
microwave oscillator/amplifier large-signal load-pull meas., vector error-corrected calibration technique 88−22756
microwave power measurement, principles, sensor types and meas. errors 85−48076
microwave pulse power meas., pyroelectric receiver appl. *(Russian)* 85−64261
microwave sensor applications in industry 88−53597
microwave six-port junction, optimised choice *(Chinese)* 87−70775
microwave spectral analyser specification parameters and meas. uncertainties 88−67718
microwave system meas., EM wave polarisation processing techniques 88−4604
microwave test fixture de-embedding procedure, propag. const. determ. 88−38723
microwave thermal noise sources, noise temp. eval. method using auxiliary transmission line 88−29610
microwave wattmeters calibration, mismatch errors elimination 87−70686
mid-ocean navigation system integration for geophysical research cruising 88−5194
miniature force transducers with strain gages 86−11574
missiles, RF anechoic chamber testing, accuracy estimation 86−29460
MM-wave automated noise figure and gain meas. techniques 88−68016
MM-wave radiometers, multisheet transmission windows, comp. 88−68015
mobile communication systems, cochannel interference meas. *(Japanese)* 86−49512
mobile communication systems, cochannel interference meas. technique *(Japanese)* 85−30939
mobile robots, position referencing and consistent world modelling 86−4941
mode field diameter meas. of single-mode fibre, systematic errors 88−39931
modeling of errors for measurement and estimation 85−37388
modulated scattering technique, cylindrical near-field scan, error considerations 88−2840
monitoring, metrological characteristics, errors in determ. 86−11395
MOS capacitor mismatching, precision meas. technique using on-chip cct. 86−63445
MOS capacitors, CV meas. with two top capacitive contacts 88−13057
Mossbauer spectra meas. with high count rate 87−29681
motor winding protection by temp. sensors with dynamic error compensation *(Russian)* 86−56685
MPD thruster, direct thrust meas. using an accelerometer 85−31599
MSL data functions integrity analysis 88−16871
multi-channel systems, calc. of meas. accuracy using generalized limiting errors *(Polish)* 87−34893
multichannel DAS metrological characts. determ. and monitoring 88−29282
multichannel digital duty-factor phase meter, low-frequency error calc. 88−4579
multichannel meas. systems, error normalization for analog instrument transducers 86−31386
multichannel remote energy metering system error reduction 88−69078
multicomponent force sensor with cross sensitivity, calibration error effects *(Japanese)* 87−49962
multielement radiation detector, stabilising image speed *(Russian)* 86−24535
multipath communication signals, time-delay-of-arrival resolution 86−10092
multipin connectors, with mismatched loads, shielding effectiveness meas. errors 85−11676
multiple resolvers for angular position meas., error study 88−74596
multiple-Doppler radar meas. accuracy for vertical vels. in convective storms 87−63038
multiple-scale measuring systems, synthesis 88−74226
multistage monitoring, conditional-risk calc. 88−67664
multitarget tracking, trellis decoding 88−53322
mutual-inductance transducers, elec. circuit parameters for given dynamic error *(Russian)* 88−16079
NAMS height finding radar system, height estimation error evaluation *(Japanese)* 85−42655
nanometer-range precision meas., environmental effects *(Japanese)* 87−29291
nanometre-resolution SEM metrology in microelectronics hostile fabrication environment, EMI and meas. error reduction 87−11522
narrowband and broadband emission measurement using peak and average detection 88−16471
natural gas energy flow meas., averaging and continuous computation errors compared 86−24646
NBS measurement assurance program, implementation 85−8682
NBS Measurement Assurance Program Services 85−8681
NBS radiance temp. meas. methods and instrumentation calibrations 88−68069
NC machine tools, motion accuracy, motion error meas. and eval. *(Japanese)* 87−14532
near-field antenna meas., probe position errors correction using computer 86−68867
nearly geostationary satellites, diurnal error bound in predicted ranges 87−40784
neutron-activation detectors, activity meas. by gamma spectrometry, systematic errors 87−29439
noise and disturbances effects analysis 88−15888
noise disturbances correction using 'non-holding' methods 87−3548
noise figure error, correction 85−15018
noise in coincidence and pulse phase meters 88−16407
noise temperature measurement system for mismatched noise sources 85−20538
noise thermometer structure diagram synthesis 85−58924
nomenclature and metrological characts. of meas. means establishment, for transient processes 85−63922
measurement errors continued
non-Gaussian meas. errors, nonlinear filtration problem, stable soln. 85−58485
nondestructive inspection instruments, graduation characts., plotting errors 86−13864
nonisothermal flow meas., using microwire temp. sensor, recovery coeff. determ. 86−55612
nonlinear meas., recurrent method for lower bound on accuracy *(Russian)* 86−38177
nonlinear meas. instruments analysis, using fractional linear transformation function 88−74221
nonlinear receiver or amplifier noise factor meas. error reduction 85−20720
nonlinear reverse filtering and linear prediction, interfering pulses, mutual shifts meas. accuracy 86−69079
nonsinusoidal signals meas., error analysis, requirements on frequency determ. *(Czech)* 86−24641
oceanic expendable dissipation profiler mechanics model 88−48356
oceanographic current profiling system design and calibration, HF volumetric backscattering 87−9027
oceanographic near-surface current meas. over Norwegian continental shelf 87−9008
oesophageal pH monitoring, 24 hr, with monocryst. Sb electrodes, accuracy and choice of procedures 87−14829
ohm determ., relationship between the SI ohm, the ohm at NPL, and the quantized Hall resistance 88−16413
ohm unit absolute reproduction, use of bifilar resistance standards 86−38512
on-board antenna radiation field characts. of flying vehicles meas., coordinate determ. errors 85−64214
operational amplifier common mode transfer characts. and input offset volt. meas. *(Chinese)* 85−17159
optical fibre, tolerance checking on diameters during drawing 87−32953
optical fibre and preform refr. index profile meas., error analysis of focusing method 86−2662
optical fibre OTDR, range and accuracy in backscatter measurements 87−8755
optical fibre power meas. for optical sources *(German)* 87−70833
optical fibre power meters, potential errors in use 88−39930
optical fibre refractive index profiling using focusing method, error analysis 88−65169
optical fibre single-mode cutoff wavelength meas. errors 87−26011
optical fibres, bandwidth measurement, pulse spectrum analysis method 87−34588
optical fibres, chromatic dispersion measurement by phase shift method, influence of LP_{11} mode cutoff length depend. 87−46527
optical fibres, excess length measurement 88−26823
optical fibres, multimode, bandwidth measurements, factors affecting accuracy 86−36199
optical fibres, refr. index meas. comparison of three methods 88−58088
optical fibres, single mode, chromatic dispersion meas. using phase shift method, precision anal. 87−46526
optical flow estimation, error analysis of gradient-based methods with local optimisation 87−47901
optical microscope, dimens. meas., automated, development and analysis 88−9874
optical passive ring-resonator gyro, drift due to Faraday effect 88−67870
optical single-mode fibre dispersion measurement techniques comparison 86−22109
optical single-mode fibre spectral attenuation precision meas. 87−46481
optical wavelength meter, design and characts. *(Japanese)* 86−31689
optical-aperture probing system, influence of piezoelectric-drive hysteresis *(Russian)* 88−20204
optimal device characteristics based on significance of measuring accuracy and cost *(Russian)* 86−24760
optimal meas. time determ. of nonstationary signal parameters, by integrating devices 88−4262
optimum design of measuring channels *(Russian)* 86−24275
optimum measurement of state vector of deterministic object *(Russian)* 87−31438
optoelectronic devices, impulse and transfer characts., error of expt. estimates 87−56448
optoelectronic devices with quadrant sectional photodiode, meas. errors *(Russian)* 86−2953
optoelectronic goniometer accuracy, elimination of signal shape difference effect 85−20565
optoelectronic scanning systems for measuring coordinates of moving emitters, error anal. *(Russian)* 85−14650
orbital radar imagery, geometric accuracy testing 88−30151
oscilloscope probe *(French)* 85−26368
OTDR present and future, meas. accuracy 87−29325
parameter estimation, fundamentals and random errors 86−4933
parameter estimation for measurement series distributions evaluation 88−67619
parameter estimator for the mean flow velocity based onthe correlation principle *(German)* 86−31719
parametric eddy-current convertor for 2-parameter meas., error calc. *(Russian)* 85−64118
partial discharge detector bandwidth, correlation with inherent integration errors 87−25655
partially diffuse sound field, intensity meas. validity determ. 86−31728
PCB continuity testing, false errors elimination in high volume production operation 86−35220
pencil type indicator in high precision coordinate meas. system *(Russian)* 86−5335
performance evaluation 88−16247
performance evaluation for new meas. methods, minimal parameter variance 88−67620
periodic time intervals meas., accuracy improvement 85−64306
phase fluctuation analyser of RF pulses 86−70076
phase meter, compensative type with lock-in detection, performance anal. 86−5351
phase meter for phase shift meas. between pulse sequences, errors and characts. *(Russian)* 86−38505
phase meters, orthogonal with clipped signals, noise error statistical characts. 87−35165
phase meters, overlap factors selection of errors *(Russian)* 86−18013
phase shift angle meter, fine setting methods 87−3709
phase shift meas. with harmonic noise error anal. *(Russian)* 85−52839
phase shifter error meas. by digital methods, accuracy aspects 88−908
phase-meas., errors from data sampling 86−18064

measurement errors continued
phase-measurement error compensation techniquesuitable for automation 86−44376
phase-wavefront distortions, angle-measuring errors compensation 87−55142
photocathode, FEU-100, sensitivity nonuniformity, spectrophotometric meas. 88−50571
photodetector, emission flux measurement errors, nonuniform irradiance effects *(Russian)* 85−58711
photodetector error, anal. in determ. of law governing light flux intensity changes *(Russian)* 85−31611
photodetector spectral sensitivity for short wavelength, error representation *(Chinese)* 86−38379
photodetector system with photodiode and operational amplifier, high speed photometry of half-tone images 85−26342
photodetectors, spectral responsivity function determination 85−37636
photoelectric colorimeters, in-house checking and reproducibility of measurement 86−55860
photoelectric tracking systems, limiting storage time in presence of image flicker 88−35583
photometer, NDIR, nondispersive error model, for difference meas. of CO_2 in air *(German)* 87−41514
photometric transducers, spectral match quality determ. 87−8629
photomultiplier signals distortion, by background luminous flux 88−36257
photovoltaic array I-V characteristic measurement error 87−4928
photovoltaic conversion efficiency meas., uncertainty anal. 88−37408
picosecond pulse measurements at NBS 86−17900
picosecond pulse waveform meas. system at NBS, calibration and error anal. 86−38194
piezoelectric accelerometers, dynamic matching for differential acceleration measurement 87−35209
piezoelectric/-resistive accelerometer calibration, sensitivity problems discovered at SIRA 87−77192
piezoresistive pressure sensors, charact. *(German)* 88−4382
plasma noise power standard calibration, uncertainties and stability *(German)* 85−14967
plotting probability density function of resultant error with two or more components 87−28886
point objects, coordinate determ. by means of television systems, error 88−36218
polarographic O_2 electrodes, vibr. by piezoelec. elements: flow artifact reduction method 88−10302
polytetrafluoroethylene thermal conductivity meas., 5 to 310 K 88−29677
ponderomotive reaction meas. of torsion balance in dynamic state 88−29573
position control in electric drives, data acquisition accuracy determ. 86−55568
position meas., error detect. with incremental sensors *(German)* 88−53656
position meas. accuracy using magnetic field *(Japanese)* 87−56837
position measurement, magnetic field appls., accuracy *(Japanese)* 85−58893
position measurement of moving objects in production and storage *(German)* 88−53850
position measurement with a resolution and noise-limitedinstrument, statistical analysis 86−55846
powder dispensing by weight, accuracy evaluation 88−16524
power convertor, PFM, metrological charact. improvement 87−36022
power meter, time division, errors determ. and reduction 86−24645
power meters, DC automatic verification 87−35125
power standard using symmetrical two-resistor power splitter, reflection correction determ. 88−16398
power station natural gas consumption, meas. accuracy improvement using error anal. *(Russian)* 87−78478
power system, steady state analysis using measurements containing errors *(Russian)* 85−32057
power system bad-data-detection and pre-estimation 86−70566
power system fault diagnosis, meas. error estimation, decision theory approach 87−64035
power system networks, decreasing meas. errors *(Russian)* 87−15392
power system phase voltage meas., error correction using iterative methods 85−59827
power system state estimation, allocation of meas. set to minimise estimation error *(Chinese)* 87−21992
power system state estimation, error detection and identification *(Czech)* 86−45034
power system state estimation, identification of bad measurement data using orthogonal transformations *(German)* 85−21093
power system state estimation algorithm eliminating need for bad data detector 87−35583
power system state estimation multiple bad data detection using linear programming 88−54953
power system voltage quality determ., accuracy effects of digitisation errors *(Russian)* 86−56508
pre-balancing of transducers with strain gauges *(Slovak)* 86−50027
precise dimensional meas. by line sensor camera, errors *(Japanese)* 86−44043
precision and adaptive correction, status in USSR *(Russian)* 86−65094
precision balance, error in a remote-reading system 88−16523
precision clocks and oscillators, time-domain characterization methods 88−22803
precision instrument calibration, criteria for neglect of small errors 87−3368
precision RMS meas. of periodic elec. signals, appl. of digital signal processing *(Polish)* 88−22714
precision solenoid, diameter meas., error anal., *(Japanese)* 85−46541
precision solenoid diameter measurement, systematic error anal. *(Japanese)* 87−14519
precision solenoid dimensional meas. error anal., expt. verification *(Japanese)* 87−14520
predicted-value errors inherent in least-squares method *(Russian)* 85−14566
pressure gauge standard by error reduction in air-piston type dead weight gauge *(Japanese)* 87−29353
pressure meas., error estimation of Soviet secondary standard, 10^{-3} to 10^{3} Pa range 85−64328
pressure sensor in elastic and plastic media 86−11560
pressure sensor long-term accuracy, stress relaxation charact. expt. *(Japanese)* 87−70622
pressure setting mechanisms with noncylindrical piston 87−3795
primary humidity sensors for upper-air radio probes, metrological charact. 85−64341

measurement errors continued
probability assignment to systematic deviations by the principle of maximum entropy 88−15883
process yield and test system noise rel. to specifications and test limits 85−54168
processing, automated system 87−39871
processor IC characteristics meas. *(Russian)* 86−34862
product specimen testing, error charact. determ., parameter deviations 85−8671
product specimens testing, indirect test condition specification 85−63925
product-specimen parameters monitoring, meas. errors-reliability relationship 87−65166
production parameters control, effect of measuring errors *(Russian)* 88−35764
profilometer error estimation in roughness measurement 88−16482
pulse radiation energy meas., absorption coeff. of receiving elements determ. 88−2344
pulse-counting photometry, implications of photomultiplier fatigue, astron. appl. 85−23369
pulse-frequency and secondary convertors in meas. channel, systematic error simulation 88−35900
pulse-time power-measuring convertor, digitization error 86−39251
pulsed microwave signals, meas. instruments using semicond. detectors, operation and error minimisation *(German)* 85−14995
pyrometer, two-colour, temperature error calculation, using reference wavelength method 88−60721
pyrometers and radiometers, angular sensitivity, investigation 85−58716
Q-factor, of LF quartz resonators, meas. method and cct. development 87−35180
quadrature digitiser system, fast calibration 88−12465
quality control of measurement−measurement assurance 86−38179
quality specification of saw material, intake defectiveness calc., indirect method 85−64283
quantisation, statistical theory, measurement procedures and errors 86−4934
quantum Hall effect device as resistance standard 85−58829
quantum Hall effect meas. at LCIE, farad and ohm absolute determ. 88−16412
quartz dilatometer for thermal expansion coeffs. meas., errors due to nonuniformity determ. 86−31652
quasi-integer-period-sampling, accuracy improvement 87−14261
R-SQUID noise thermometer with cooled FET preamplifier, optimisation 85−48130
radar scattering coefficient meas., model for prediction of precision and accuracies 88−60221
radar targets, error-tolerant range destaggering, choice of pulse repetition freq. 86−17419
radar wind meas. systematic errors, numerical considerations 88−41746
radar wind measurement, systematic errors, observational results 88−41745
radial slack meas., deviations from coaxiality in concentric surfaces 87−3752
radial velocity of moving objects, smoothing circuit synthesis *(Russian)* 88−29654
radiance temp., meas. methods and instrumentation 87−56878
radiation meas. procedures for noncontact temp. and emission props. determ. *(German)* 87−56873
radio direction-finding, two-station systems, position/fixing errors anal. *(German)* 88−22233
radio-meteor systems for time-scale synchronisation, accuracy criteria 87−29312
radiometer TV system resolving power, influence of bandwidth and noise of video transceiver channel 86−31011
radiometric ellipsometry method of surface layer thickness and dielec. props. meas., error calc. 87−73168
radiometric NDT devices, nonlinear conversion of pulses of spectrometric flaw detector 87−36827
radiosonde humidity and temp. errors anal. 87−71323
radiosonde meas. error determ. method using satellite obs. 88−74977
radiotelescopes, system stability meas. and characterisation 87−20657
random error calc. method 88−35762
random error of analog-digital phase meters 87−63475
random pulsed mag. flux meas., intensity ratios, meas. accuracy *(Russian)* 86−24715
random variables, summing, using polynomial distributions 88−35760
range finders, optical, eikonal fluctuation averaging effect on accuracy 85−8960
rangefinding by optical method, precision, for long baseline meas., error of point approx. method for air integral refr. index 87−35189
reactive power convertor with complex input ccts., operational aspects for meas. appls. *(German)* 86−52640
reactive power measurement, supplementary error calc. due to 3-phase system voltage asymmetry *(Rumanian)* 87−49873
real power computation from asynchronous samples of current and voltage *(German)* 86−5447
real power computation from asynchronous samples of current and voltage, appl. 86−5448
receivers, wideband transmission loss meas., impedance mismatch errors impact 88−15327
rectilinearity monitoring by laser beam, baseline reproduction error analysis 87−68669
recurrent time interval meas., random coincidence method improvement by synchronisation 88−22807
reduction of calibration points via *QR* factorization of linear models 87−14060
reflectometer calibration with sliding termination, residual error estimation 88−16458
reflectometers, systematic errors estimate 85−28695
reflector surface error detection from near-field data, edge diffracted field effect 88−2713
refractometric water-content meas., systematic error reduction by structural method and microcomputer 87−29367
regularising method for retrospective error compensation 85−52626
relation between product specimen parameters and influence coefficients 88−29185
relative humidity meas., errors of a two-pressure moist gas generator 86−55902
relays operating speed and errors under transient conditions *(Russian)* 86−6406
reliability estimate for multiparameter NDT 87−358
reliability growth meas., dormant and cyclic failure rate effects 86−57253

measurement errors continued
remote control systems, measurement results transmission 85−64045
remote transducers, charact., errors and their compensation *(German)* 88−53672
residual humidity control in textiles, meas. errors *(Russian)* 86−11790
resistance bridge for capacitance meas., meas. uncertainty *(Croatian)* 85−43038
resistance meas. above 100 GΩ, integrating method appl., accuracy analysis 86−24690
resistance measurement, microprocessor-based 87−29244
resistance sensor self-heating and self-cooling effects on temp. meas. *(Polish)* 87−77263
resistance thermometers comparisons, Allen-Bradley, TVO and TSKU-21 87−21048
resistance thermometers with thermistors and Wheatstone bridges, supply voltage changes compensation *(Rumanian)* 86−31392
resistive strain gauge using Wheatstone bridge, preliminary balancing arrangements effect 86−38339
resistors of decade values in range 1Ω to 1 MΩ, uncertainties determ. 86−31589
resolving method anal. of basic errors, accessory errors and method errors *(Chinese)* 85−3820
resonant cavity measurements of constitutive parameters 86−14480
resonant string sensors for process control in IC manufacture 86−1875
resonator dielectric meas., inductance effects 87−56810
RF, IF and AF attenuation and ratio−national standards 86−38503
RF and microwave network analysers, automatic error correction 86−44227
RF and microwave power measurements, error reduction considerations 86−31567
RF and microwave uncertainty charts from NBS 86−38181
RF error statistics for power, voltage and phase measurements 87−20827
RF meas. technology advancements *(German)* 85−14580
RF noise meas. in radioastronomy *(Spanish)* 87−3260
RF pulse parameters meas., using electronic frequency counters 85−64228
RF vector voltmeters accuracy analysis 88−60849
rheocardiographic study of modelled stroke volume accuracy 86−25243
rigid body 3-dimensional position meas., error anal., optimisation *(Japanese)* 87−29300
ring laser with random frequency base, error, asymptotic estimate 87−68557
ring wire anemometer, calibration and cooling laws 88−22797
rivers, EM flow meas., interference sources *(Polish)* 87−77889
RMS signal meas., accuracy and error sources *(French)* 86−55797
robust estimation method for outlying meas. errors *(Japanese)* 88−34703
rotary magnetic scales, error correction recording method *(Japanese)* 88−16449
rotatable horizontal line array, azimuthal and vertical arrival angle resolution 88−41759
rotating coil magnetometer, errors due to eccentricity, vibration 88−29603
rotating transformer signals conversion to angular code, cyclic convertor error determ. 87−2443
rotation measurement accuracy using ring laser, random freq. pedestal influence 85−56734
roughness meas. of polished metal surfaces, reflectometric method 85−4113
roundness deviations meas. by difference method, computer simulation 85−48092
roundness meas. of small balls 88−10123
S-parameter meas. of stripline components using automatic network analysers, errors estimation *(German)* 87−66477
S-parameters meas. in HF transistors, simplified error model 86−31610
sampled data phase meas., error analysis 86−24664
sampled optical time-division multiplexing of asynchronous data 88−9534
sampling digital wattmeters, error estimation 85−37548
sampling systems, time jitter elimination 86−50006
SAR imagery, distortion free 88−15664
SAR imagery, geometric positioning error prediction 88−15624
satellite altimetry calibration for ionosphere and wet troposphere 86−6127
satellite communication parameters meas. procedures and instrumentation 88−60084
satellite laser ranging, error sources and error magnitudes 85−59425
satellite microwave ranging, model for correction of water vapour error 88−5122
satellite microwave ranging, prediction of excess path length due to water vapour from ground meteorological meas. 88−5123
saw material thickness parameter estimation from restricted number of blade meas. 88−22777
scanistor coordinate meter characteristic, linearity evaluation 87−29290
scanning microdensitometers for image processing, photometric channel struct. and meas. errors *(Russian)* 85−31280
scattering chamber for cyclotron expts., angular characteristics, systematic errors 87−50188
Seafloor Benchmark Positioning System expt., acoustic positioning accuracy 88−5197
search and control devices, stationary probability distribution anal. 87−56464
second-order measuring transducers, scope *(Russian)* 87−70626
secondary cells, high capacity, Faradaic impedance measurement, errors and automatic calibration procedure 85−53810
secondary time standards, meteor-linked systems, anal., errors *(Russian)* 85−4128
self-cohering arrays, phase ambiguity resolution 85−7756
semiconductor laser, power meas. method using scatt. plates 86−29211
semiconductor manufacture, laser displacement interferometry, residual errors from air turbulence and nonlinearity 87−61271
semiconductor thermistor thermometer 87−63365
semitransparent materials temp. measurement under radiant heating, calc. of measurement error 85−43117
sensors, individually calibrated, error components significance evaluation 88−67622
sequential state analyzer for safe error-detection mechanism 87−8569
shaft torque meas., magnetoelastic method, errors calc. *(Russian)* 87−8748
sheet length meas. by roller method, error components estimation 86−31643
SHF moisture meters effectiveness evaluation 86−38432
shipboard 115-kHz acoustic Doppler current profiler, performance evaluation 88−16921
short-circuited line method appl. to microwave conductivity and permittivity meas. uncertainty analysis 86−44381
SI ohm determ. and NML, Australia 88−16411
side-looking radar for remote sensing, imaging geometry and errors 87−76822

measurement errors continued
sight-glass scales, ATE for precise reading *(German)* 87−70356
signal phase meas. error when passed through multimode optical fibre 87−19114
signal processing oscilloscope, precision limits of waveform recovery and analysis 87−70698
signal source angular coordinate meas. using antenna array, estimation accuracy study 85−14381
Siluet accelerator magnetic for system, magnetic field meas. device 88−60888
simulation modeling for estimation of the characteristics of measurement errors 87−63547
simulation used in metrological support 86−55527
single microwave pulse energy meas. using ponderomotive transducers, dynamic error calc. *(Russian)* 85−31583
single mode fibre chromatic dispersion meas. using modulation phase technique, meas. accuracy 85−35456
single mode optical fibre, mode field radius meas. by near field pattern technique 86−68244
single-mode optical fibres, mode field radius meas. using near field pattern technique *(Japanese)* 85−48118
six-port automatic network analyser, error analysis by stimulation 87−14507
six-port automatic network analyser, error analysis using computer simulation 88−15995
six-port automatic network analyser, online accuracy assessment, statistical methods 87−14251
six-port correlators precision, comparative study 88−60895
six-port meas. system precision improvement, using linear space concept 88−60893
small electric motor, characteristics, automatic recording *(Polish)* 85−21666
soil heat flux density determ. using heat flux meters, systematic errors *(German)* 88−68628
soil moisture, effect of meas. error and confusion from vegetation on passive microwave estimates 87−57402
solar cell short-circuit current measurement, using reference solar cell method, spectral mismatch error anal. 85−32711
solar cell spectral response mismatch error analysis and correction 87−78953
solar cell testing by reference cell method, short-circuit current meas., anal. of errors due to spectral mismatch *(Japanese)* 85−44180
solar cells, calibration, indoor and outdoor methods 87−36131
solar cells, reference cell calibration under global irradiance, errors 86−40084
solar central receiver temp. meas., IR thermography appl. 85−52673
solid-state imager, sensor element sensitivity distrib. meas. technique and error anal. 86−5039
sorting of parts by size using photodetectors, errors evaluation and reduction 86−24756
sound level meas. using microphone, tripods and clips influence determ. and limitation 86−31729
space link parameters meas., accuracy limitations 88−22009
specific heat meas., errors and disrepancies determ. due to temp. scales 87−70835
spectral anal. of discrete signals, mean square error criterion 87−55086
spectral analyser using square-wave approximation 86−50023
spectral analysers, digital, dynamic range determ., w.r.t. meas. errors 87−3533
spectral corrections to optical-density measurements 87−63541
spectrometer input signal processors, statistical-error anal. *(Russian)* 85−20438
spectroradiometer, CCD transient, development *(Chinese)* 88−42090
speech signals, time-domain pitch determ. using laryngograph 87−39706
spherical near-field antenna measurements, book 88−62872
spindle error roundness compensation 87−3767
standard HV cylindrical capacitors, voltage-capacity coeff. determ. error 86−35133
STARFIX geostationary C-band satellite-based positioning system 88−9678
stationary temp. meas., error minimisation in dynamic method *(Russian)* 85−64317
statistical error analysis with appl. to optimised interferometer 86−3337
statistical summation and trust levels calc. *(Polish)* 86−60088
steady state measurement investig. for chem. anal. appls. 88−47390
steam turbine acceptance testing, measurement uncertainty and coverage 85−21471
step gauges calibration of coordinate meas. machines, overlapping strategy *(German)* 86−60350
stochastic processes charact. accuracy improvement, redundant channel data utilisation 87−3359
strain gauge dynamometer, temp. errors compensation 86−70108
strain gauge linear deformation meas., initial error effects on accuracy 88−67752
strain gauge temporary errors compensation, due to elastic imperfections 86−70107
strain gauges, resistance, temp. charact., error in determ. 87−35040
strain meas. at high temp., errors estimation using FORTRAN program 85−58898
strain meas. using metal foil gauge, errors and uncertainties 86−5274
strain measurement errors, human factors 85−52622
stratospheric aerosol meas. by laser radar, calibration and error analysis *(Japanese)* 87−42238
stripline calibration of automatic network analysers *(German)* 88−4325
stroboscopic conversion, signal distortions determ. 88−42019
submicron critical dimensions meas. using confocal scanning laser microscope 88−13501
subsystem of electrical quantities with microprocessor for error correction *(Russian)* 85−14614
superconducting magnets, magnetisation curves and losses meas. at pulse durations ≈1 s 86−48012
surface contamination, particle monitor, coincidence losses 88−29638
surface profile meas. by X-ray methods, accuracy determ. 87−56842
surface pyrometer, systematic error *(Chinese)* 88−29381
surface roughness parameters determ., accuracy and applicability to production testing 87−3762
surface texture analysers, error sources *(Polish)* 87−77408
sweep generators for frequency meas. with point to point bearings *(Italian)* 85−4002
switched inverting in meas. devices, using finite weight functions 86−44232

measurement errors continued
systematic error component determ. for voltmeter 88−35759
systematic error of a measurement channel containing pulse-frequency and secondary data converters 87−70340
systematic errors in composite microwave system, computer-aided algebraic anal. 86−38534
Tektronix 91HS8 logic analysis system calibration Vernier method 87−28942
telecommunications, measurement of DDV64, DATEX-64000 and TELECOM-1 connections *(German)* 88−74246
telemetry errors, adaptive rejection *(Russian)* 87−40312
telephone lines required in overloaded groups with repeated calls, traffic meas. errors 86−37331
television equipment for remote measurement of dimensions *(Russian)* 88−4171
temperature determ. from microwave radiation, plasma diagnostics, appl. 85−47981
temperature meas. error in unbalanced bridge system, calc. *(Russian)* 87−3650
temperature meas. error of noise thermometer, influence of cct. noise *(Polish)* 86−60216
temperature meas. using thermocouples, error reduction and diagnosis *(Spanish)* 88−53915
temperature measurement from opt. radiation meas. methodology 86−60253
temperature measurement using pyrometers, effect of surface roughness upon errors *(Polish)* 86−60255
temperature measurement using transducers with built-in standards *(Russian)* 88−35944
tensoresistors errors point and interval evaluation, strain meas. results 88−53643
test facilities, auxiliary, standardising and checking of accuracy charact. 87−31281
test meter inaccuracies 87−41560
testing of ROB 305 monolithic regulator, ATE meas. error calcs. *(Romanian)* 88−35782
testing procedures for instruments with significant random error, parameters selection 88−4261
thermal detectors, elec. calibrated, of optical radiation, absolute radiometers 86−24546
thermal energy meter errors, causes and performance improvement 87−56884
thermal power station fuel consumption monitoring, effect of meas. errors *(Russian)* 86−39541
thermal sensors, transistorised, long-term stability *(Russian)* 85−31617
thermal-transducer inertia meas. *(Russian)* 86−38340
thermocouple drift due to ordering, effect on nuclear plant economics 86−5259
thermocouple errors due to electrode inhomogeneity determ., by graphical method 86−55611
thermocouple thermometer for temp. meas. in clouds, meas. accuracy and time const. 88−16908
thermocouples calibration and accuracy 86−5281
thermocouples for steel manufacture appl., meas. errors due to thermocouple wire damage 86−5570
thermocouples low temperature meas. errors *(German)* 88−53513
thermoelectric convertors, sodium-steel, for sodium temperature meas., sources of error 87−42597
thermoelectric power comparators, angular error determ. *(Polish)* 87−77355
thickness measurement by US echo pulse flaw detectors, errors determ. method 86−52546
thin films, ellipsometric meas., error reduction 88−74611
three-phase mains digital imbalance meter quantisation error analysis *(Russian)* 88−10922
three-phase meters for electrical energy, error anal. *(Russian)* 88−61991
three-phase networks voltage asymmetry meas. , correlation method, error analysis 88−74543
three-wavelength distancers , design improvements and limiting accuracy 88−74963
thyristor power convertors, power parameter measurements *(Czech)* 86−6869
time and frequency, standards, using Omega radionavigation system 86−31570
time and frequency standards, efficiency determ. of meas. information processing algorithms 88−4656
time determination, universal, current accuracy 87−34899
time domain lumped capacitor dielectric spectrometer 86−55815
time interval counters, systematic errors calibration 86−50231
time interval distribution digitisation 85−20735
time interval meas. by difference-period quantisation 87−63529
time interval meas. using digital oscilloscope, accuracy considerations *(German)* 88−42300
time measurement, posteriori weight factors in measurement processing 85−4126
time signals transmission via satellite TV channels, prediction error 86−44438
time-division power convertor for active power meas., computer aided error anal. 86−65790
time-domain network analyser, automated, error corrections 87−14236
time-domain spectroscopy, lumped-capacitor, experimental errors calc. 86−50201
time-to-code digital convertors, error reduction *(Russian)* 85−26277
tissue US attenuation meas., phase-cancellation artefact obs. 87−3964
TLD, element correction factors production 86−18392
tolerance test efficiency analysis, using programmable microcalculators 87−108
top dead centre measurement in engine, microwave technique and errors 86−31641
topological properties of measurement procedures *(Russian)* 85−52624
torque meas. by shaft angle monitoring, remote measuring system with transducer *(Polish)* 85−31471
torque transducer, strain gauge based, scaling, compensation and error evaluation *(Polish)* 87−77265
total uncertainty reduction in meas. 88−53520
trans-Pacific optical fibre cable route survey navigation data processing 88−5200
transducer, static errors correction, synthetic methods *(Chinese)* 87−41462
transducer group comparison method, for large forces meas. 85−64302
transfer functions, aliasing measurement error effects 85−28290
measurement errors continued
transformer-type parametric convertor spectral analysis by successive approximations *(Russian)* 86−56833
transient error meas. of measurement current transformers *(Russian)* 86−41366
transient recorder for fast changing voltage waveform meas., reliability *(Croatian)* 85−58764
transient response settling time meas., dynamic characts. meas. of DAS channel 88−4266
transient time constants determ., three point method 87−3356
transmission network measurement mean errors determ. of state estimator *(German)* 88−68865
transverse EM cell for standard E and H-field generation, calibration, errors eval. 88−47509
triangulation ranging, time delay meas. errors modelling by conditional beta density functions 87−69123
true field intensity meas. using deviated measured values *(Chinese)* 88−47654
tube, cylindrical interferometric probing using holography 85−62676
turbulent pulsations meas., error research 86−31711
turning FP module, contact indicator meas. accuracy 88−4625
TV channel selectors, prod. testing, freq. response meas. errors 85−5772
twin-T admittance bridge, for 10 kHz-200 MHz range 86−38519
twin-wave laser interferometer for remote meas., accuracy increasing methods 87−3506
twisted pair cables, errors in characteristic impedance meas. 88−21906
uncertainties detection and representation *(German)* 85−14569
uncertainties in electrical measurements, estimation on DVM *(Spanish)* 88−60525
uncertainties treatment in precision meas., w.r.t. West German standard 88−15881
uncertainties treatment standardisation, German activities 85−37389
uncertainty of B class *(Chinese)* 86−60090
uncertainty of expt. results calc., error combination approaches 85−37390
uncertainty of measurement results, problems with expression *(Polish)* 87−8494
units and uncertainties of measurement *(French)* 88−41939
unpatterned wafers, particulate detect., error counting 87−60250
US attenuation sensitivity, reflection coeff. variation 85−54560
US flaw detection, random error determ. in industrial environment 88−6541
US flaw detector, measuring errors of pulse parameters with different specimens 87−16731
US flow detection, beam injection angle, meas, errors 85−49642
US inspection, meas. error estimation 86−52563
US NDT, scattering amplitudes absolute meas., diffr. corrections applic. 85−6084
Us rangefinders with various types of cct., error estimation of standard channel 87−34664
US thickness measurement, standardless, of objects having variable sound vel. with depth 87−31596
USSR state high frequency voltage standard 86−24628
vacuum optical-pyrometer temperature measurement 85−47980
validation of data by balancing equilibrium *(French)* 87−56446
variable pressure meas., errors due to vibratory acceleration reduction 87−3794
vascular pressure measurement with disposable dome transducer system, accuracy 86−50475
vehicle-mounted DF systems, bearing errors, theoretical predictions 87−20637
vertical-channel errors in oscilloscopes, guidelines for minimization 86−24566
VHF-UHF radar systems, the Moon as a calibration target 88−41742
VHF/UHF antenna radiation patterns helicopter meas. errors, computer simulation 86−29570
vibration transducers, error correction by test method *(Russian)* 87−14295
vibratory accelerations determ., amplitude and phase errors 86−55836
vibrocontact meas. device for increased meas. force stability in linear or angular meas. 86−18146
Vickers and Brinell indentations meas., errors, standards and specifications 88−12112
VLBI, correction coeffs. for signal/noise ratio in radiointerferometer 85−42682
VLSI ATE, timing accuracy 87−49470
VLSI delay meas. errors due to transmission line effects, anal. and correction 88−33291
VLSI device characterization for accurate delay measurements under transmission line effects 87−67495
VLSI linewidth meas., SEM metrology, improved accuracy 88−16496
VLSI ohmic contact resistivity meas., lateral diffusion contributions to contact mismatch in Kelvin resistor structures 87−74106
VLSI test systems, fundamental limits to timing accuracy 87−41352
VLSI test systems, systematic timing errors determ. 88−13537
voltage divider, AC, verification, precision setup 87−35128
voltage fluctuations range measurement devices, dynamic errors anal. *(Russian)* 85−8919
voltage meas., switches with low leakage currents for multichannelcommutator 86−60298
voltage measurement, response errors of impulse test circuits 85−20681
voltage-current characteristics meas. in superconducting materials *(Slovak)* 86−31556
Volterra integral equation, adaptive regularisation and accuracy estimate 86−31108
voltmeter with D/A converter for binary codes, zero-adjustment error, automatic compensation *(Czech)* 88−60784
water meter, weighted mean error components analysis and standardisation 87−35239
water treatment, residual Cl_2 meas. using PtI_2 electrode *(Polish)* 88−4682
watthour meters, induction-type, single-phase, harmonic content effect on accuracy *(Japanese)* 85−26357
watthour meters, low-noise type, prototype research *(Japanese)* 85−58763
wattmeters, time division, systematic error under voltage and/or current distortion 88−16396
wattmeters based on time division multiplication, systematic errors evaluation 87−14381
waveform recorder dynamic performance meas. 86−38310
waveforms analysis, square and triangular, using least-squared-error algorithm 87−65401
waveguide below cutoff attenuation standard calibration, using repeatable attenuation step 87−14508
waveguide noise generators, temp. distrib. meas. 86−38595

measurement errors continued
weighing, decimal weight series for submultiples of mass standards, adsorption error limitation 86−70229
weighing, Earth angular velocity effects 85−48112
weight-space dispenser, errors determ. and reduction, using intracyclic algorithms 88−36249
welded joints, US inspection, defect echo signal correl. analysis 86−52551
wideband backscattering meas. technique, computer controlled and error corrected 85−13109
wideband sampling wattmeter, microprocessor controlled, design and operation 85−14863
Winchester drives with intelligent interfaces testing 88−64925
wind measurement, appl. of errors in sodar-estimated second moments to field meas. 87−63948
wind measurement, errors in second moments estimated from monostatic Doppler sodar winds 87−63947
wind velocities for aircraft landing, permissible meas. errors *(Russian)* 88−16838
X-ray dose determination in patient examination, permissible error *(Russian)* 85−38255
X-ray residual stress meas. method evaluation 86−18150
XX, error minimisation in time-constant meas. 87−49616
zenith angle transducers in deviation recorders, accuracy *(Russian)* 87−21760
CO_2 laser differential absorption system, errors due to optical interference effects 86−18588
H_2O ground-based DIAL meas. errors, Doppler-broadened Rayleigh backscattering 86−18562
Hg column US interferometric manometer, sound speed meas. 88−22554
Pd-Cr-Os/Cu-Fe thermocouple, magnetic field effect on thermo EMF 87−77241
Pt resistance thermometer, AC and DC insulation leakage determ. 86−24504
Pt resistance thermometer accuracy determ., under working conditions without demounting 85−47953
Pt resistance thermometer, calibration and uncertainties 86−5272
Pt resistance thermometer interpolation below 273.15 K, using Ga triple point 88−29683
Pt resistance thermometers, design induced error sources 88−29369
Si pressure sensors, signal errors induced by packaging strains 87−14317
Si single crystal, standard orientation specimens 85−45499
Si solar cell, minority carrier lifetime meas. from photoinduced open-cct. voltage decay, error reduction *(Chinese)* 86−13044
Si solar cell spectral response meas. for space qualification 87−78948
Si solar cells, polycryst., reference cell method for calibration, spectral response shift under illum. *(Japanese)* 85−44181

measurement standards

1 MHz regulated DC-DC convertor as EMI source 87−31704
$2e/h$ and h/e^2 determ. from volt and quantised Hall resist. meas. in SI units 87−28898
10 GHz band power standard, dry type calorimeter *(Japanese)* 87−41596
10 mA LF AC current standard using single-junction type thermal AC-DC transfer convertors *(Japanese)* 87−8700
20 MN hydraulic force standard machine 86−11740
50 kA current transformer intercomparison between China and West Germany 87−14429
360 kN force standard machine, compound lever type 86−11738
absolute calibration of small gas amounts 87−77449
absolute intensity measurements in the vacuum ultraviolet 87−14580
absolute nuclear orientation thermometer using ^{160}Tb in ferromagnetic Tb (single crystal) 88−29678
absolute voltage standard, CSIRO project 85−64218
AC conductivity standards for the calibration of eddy-current conductivity meters 87−28894
AC current, NBS primary AC-DC transfer standards, using multijunction thermal convertors 88−16392
AC field magnetic induction standard, 20-1000 Hz, 77 to 300 K 88−29601
AC Josephson effect voltage standard, Australian development 87−14406
AC power meas. at frequencies 50 to 60 Hz, international comparison 86−24642
AC power supply rating comparison 85−61098
AC voltage, standard meas. scheme 85−58788
AC voltage meas. using differential multijunction thermal convertor 88−16381
AC voltage standard for digital voltmeter calibration, 10 Hz to 1 MHz range 88−60850
AC voltages, volt balance realisation at ETF in Zagreb 88−16370
AC waveforms digitisation, improved methods for timing 88−16249
AC-DC conversion standards, group standard assessment using computerised statistical anal. *(Polish)* 88−22400
AC-DC difference meas. system establishment at NPL, Israel, using multijunction thermal convertors 87−14416
AC-DC difference measurements on thermal voltage converters at NRC 88−16382
AC-DC difference measurements on thermal voltage converters at NRC 87−14420
AC-DC thermal standard convertors, comparator using computer-aided measurement *(Japanese)* 88−22715
AC-DC transfer difference in 10 Hz to 100 kHz range, using PTB multijunction thermal convertor 88−16380
AC-DC transfer differences of thermal convertors determ., LCIE methods 88−16383
AC-DC transfer standards, 1985 status and future directions 85−58645
AC/DC difference meas., multi-range standard 86−60307
AC/DC thermal transfer standard, automated 87−14431
AC/DC transfer meas., RF interference detection and mitigation 87−12743
AC/DC transfer standard for AC quantities 88−22509
AC/DC transfer standard using multijunction thermal convertor, automated design 88−16378
accelerometers calibration using PTs3M standard centrifuge 88−74598
accreditation of instrument laboratories in Australia 88−35766
accuracy estimation for automated computer-measurementprocesses 86−44107
acoustic noise measuring instruments and procedures, survey *(German)* 86−31747
acoustic vibration testing, standards for test signal, chambers and meas. equipment *(Slovenian)* 88−63009
adjustable error current transformer for laboratoryassessment 86−1420

measurement standards continued
admissible radiation doses, standards *(French)* 88−61485
admittance meas., coaxial twin-T-admittance meas. device appl., 1 MHz to 300 MHz *(German)* 85−14982
admittance of measuring cell with a dielectric sample 88−4590
adsorbed dose calorimeter measuring assembly 86−32193
ADZ-2C electronic source of standard voltage for DC voltage meas. *(Polish)* 86−18054
AE codes and standards, an overview 88−18794
air stream velocity unity standard, theory and operating principles *(Russian)* 88−16509
aircraft inertial systems integration 86−70464
alkali gas cell atomic freq. standards, comparison 88−22726
alkali metal atoms, mag. hyperfine struct. reson., freq. standards 86−5457
American national standard metric practice 86−49907
analog voice frequency circuits, transmission charact. meas., IEEE standard methods and equipment 85−52115
analogue DC voltage reference with decimal voltagedivider *(German)* 85−49727
angle meas., NPL role in standardisation and calibration 87−14538
angle meas. using light interferometer 88−16487
angular units reproduction, laser goniometry development in USSR 85−48106
anisotropic electrical steel sheet standard specimens for specific magnetic losses 85−20706
antenna aperture, standard measure for field distribution for decimeter wavelength range 85−48035
ASTM shielding effectiveness standard 86−29498
ASTM standard for EMI/RFI protection 85−62808
ASTM testing for EMI/RFI shielding 85−46594
ATE, conf., Anaheim, CA, USA (Jan. 1988) 88−70013
ATE, intelligence and standards challenge the test-and-measurement community 87−41338
ATE calibration, via performance verification at system interface 86−38255
atomic beam freq. standards employing a Ramsey cavity, effects of servo loop modulation 88−22723
atomic clock, frequency and phase control by external reference, estimation and loop design 87−63209
atomic clock, frequency shifting distributed cavity phase difference meas. 86−24798
atomic frequency standard, laser cooled 85−37704
atomic frequency standard using superconducting cavity stabilised oscillator, electrical tuning method 88−56920
atomic frequency standards *(French)* 87−8500
atomic frequency standards, design, performance in specific appls. 85−8968
atomic frequency standards, international comparison via VLF radio signals and Loran-C navigation systems 85−14579
atomic frequency standards, using optical-microwave pumping device 86−24659
atomic oscillators, review and comparison with quartz cryst. oscillators 87−63208
atomic time and frequency standards, at Shanghai Observatory 85−58913
atomic time scales, algorithms props. analysis 88−29662
atomic time scales, international synchronous time measurement 86−38578
Atomichron, atomic clock from concept to commercial product 85−63934
attenuation, Asia Pacific intercomparison 86−44378
attenuation, automatic reference setup for certification in 0.1 to 100 MHz range 87−34933
attenuation standard, PA-4 programmable dual-freq. equipment using laser interferometer 85−26162
audio calibration tapes, magnetic flux meas. studies 88−60512
audit organisation, criteria and procedures 87−8497
Australia, metrology, standards and quality assurance comparison with international system 85−22273
Australian Broadcasting Commission TV network use for precise time comparisons 87−34904
automated radio and microwave frequency power measurementfacilities 86−38486
automatic calibration systems *(Italian)* 87−41330
automatic pulse calibration system 88−60588
automatic standard cell comparisons 85−58784
automatic target recognizer performance evaluation 88−22212
avionics, EM transient test standards 87−15010
Avogadro constant determ., Si molar volume determ. 88−15896
balances with upper scale limits up to 10 kg 87−29318
bathymetric sidescan sonar system performance simulation 88−53383
beam-reversal phase-shift meas., cavity phase difference behaviour in NBS-6 87−63478
beta radiation unit of absorbed dose rate to tissue, PTB National Primary Standard 87−14952
BIPM tasks and achievements concerning meter, kilogram, and ampere 88−15879
black-body cavity for total radiation thermometry 87−29338
blackbody, fixed point, large aperture, trial manuf. *(Japanese)* 85−8977
blackbody meas. system charact. 88−74617
bolometric mounts on 75Ω coaxial lines 85−58707
boundary-scan framework for structured design-for-test, Joint Test Action Group activities 88−18462
brightness stability of capillary flash lamps 88−18204
British calibration service measurement audit schemes including audit via traceability 85−31290
broad-banded coaxial thermal noise standard, for 100 MHz to 10 GHz range 88−16469
broadband electric-field probe using resist. tapered dipoles 87−8729
BSI standards for coordinate measuring machines 86−24262
bus programmable autobalancing AC/DC thermaltransfer standard 86−65095
calibration and traceability at mm-wave frequency, 1985 status 86−44411
calibrator specifications, managerial confidence and traceability criteria 87−77066
calorimeter, tray type, for 15-300 K temp. range 87−49986
calorimeter coaxial, and its use as reference standard in automated microwave power calibration system 87−29328
calorimetric transducers certification, time marker for a printer 87−63307
CAMAC standard automatic measuring systems *(Rumanian)* 86−24306
Canadian National Research Council new candela realisation 88−22815
candela standard in USSR, based on radiometer/black body combination 88−4661
capacitance, HV compressed gas capacitors appl. 87−14470
capacitance, Zerodur standard capacitors, fabrication *(Korean)* 88−7086

measurement standards continued
capacitance meas. of HV compressed-gas capacitors 88−16422
cathode temperature measurement, optical pyrometry, in-house primary standard blackbodies 86−14780
cavity emissivities greater than one 85−52782
cells intercomparison, using calculator-controlled galvanometer 85−20463
ceramic capacitor as MF band capacitance standard *(Japanese)* 86−67533
ceramic capacitors, high Q, characts. 87−66597
certification of an infralow-frequency vibrator for seismic vibrations meas. 87−4114
certification of reference means of measuring deformations 88−53887
certified reference materials in metrology 88−41943
chemical meas., standard reference materials, handbook 86−40374
Chinese development 85−63935
Chinese power supply network bus voltage quality evaluation *(Chinese)* 86−39258
chromaticity standard, three-dimens., progress report 85−48115
chronometry, conference, Besancon, France, (Oct. 1984) 86−13248
chronometry, history *(French)* 86−55857
cinematography, SNR of 8 mm type S, 16 and 35 mm variable area photographic sound records, meas. 88−41922
classification and aggregation in metrology, USSR approach 87−3366
clocks comparison through optical communication channels 85−4123
coal fly has resistivity, laboratory meas. and reporting, report on IEEE standard criteria and guidelines 85−52844
coaxial bolometer mounts calibration against primary standard mounts, microwave power meas. 86−49908
colour parameters stability of standard light sources determ., colour CRT testing appl. 86−53306
colour standards, using gray light-scattering glasses 86−55862
COMECON standards for temp. meas. facilities 88−4671
commercial GPS receiver for time and frequency equipmentapplications 86−44440
common instruments, locally centralised metrological support 88−16405
compact resonator for frequency standards 87−56822
composition meas. unification 86−44458
compositional analysis using self-validating in-situ nondispersive infrared analyzer 86−44323
computer-controlled standards laboratory meas., Universal Measuring Machine appl. 88−16479
computer-controlled standards laboratory meas., using universal meas. machine 87−70347
computerised calibration infrastructure build-up, John Fluke Mfg. Co. (USA) 87−3365
conference on frequency control, Philadelphia, PA, USA (May 1985) 86−33920
conference on instrumentation and meas. technology, Boston, MA, USA (Apr. 1987) 87−68858
contact profile meters, sensor tips control, gauge marks fabrication *(Slovak)* 87−70797
continuum measurement scales 87−70346
conversion to SI and resultant errors *(Russian)* 86−38184
coordinate meas. machines, precision test *(German)* 86−24778
coordinated Universal Time *(Japanese)* 87−63207
cosmological expansion and measurements of physicalquantities 86−44437
critical current meas. of composite superconductors, using superconducting transformer 88−45027
cryogenic electrical metrology, NPL progress 87−56801
cryogenic radiometer for absolute radiometricmeasurements 86−4937
cryogenic radiometer for the realisation of anabsolute radiometric scale 86−24807
cryogenic voltage standards, using series array of Josephson tunnel functions 85−20680
crystal oscillator with high short-term stability 86−31450
CS02 test method, RF signals susceptibility, modification for meaningful results 86−29481
CS1 primary clock standard, development and performance 86−38566
current transformer, two-stage, expt. and theoretical errors difference 88−42243
current transformer calibrations, compensated current comparator, as reference standard 85−8923
CW power meas., techniques explanation 86−60331
cylindro-inner cones, freezing point, radiant emission characts. 87−35219
Czechoslovak system of standards, rel. to international standards *(Slovak)* 85−52627
data acquisition systems, elec. and optical systems, pulsed power appls. 87−20979
DC meas. means, initial checking apparatus 86−55613
DC reference sources, conf., London, England (Jan. 1985) 85−27963
DC voltage and current source, technology, construction, and appls. *(French)* 85−58488
DC voltage calibration system, using Zener diode references, microprocessor controlled system 85−31553
DC voltage meas., automated system 85−58787
DC voltage references, noise level determ. 86−31561
DC voltage solid-state standard round-robin test 86−60308
DC voltage standard based calibration facility for electronic instruments *(German)* 86−38186
DC voltage standard based on Josephson phenomenon *(German)* 86−38473
DC voltage standard calibrations, solid-state 88−67983
DC voltage standards, solid-state-type, market survey 85−43039
DC voltage standards using superconducting MMICs with Josephson tunnel junctions *(German)* 87−17391
DCF 77 VLF time and frequency standard transmission 85−8298
deadweight force standard machines, parasitic load components meas. using six-component dynamometer 86−11741
decibel measurement scale, origin, significance and usage *(Italian)* 85−20441
decision framework for ambient air quality standards, FAST program user manual 86−25435
deformation meas. using wire and foil strain gauges, error evaluation standards 88−53642
density, water density and thermal dilatation determ. 85−64309
density meas., H_2O density change due to aeration 87−56864
density measurements, high accuracy, and density standards *(Japanese)* 87−63539
density monitoring of moist air, by laser refractometry 88−68045
density of water determ., precision meas. on solid artifacts 85−64310
determ. improvement, Mendeleyev Research Institute of Metrology activities 85−63937
measurement standards continued
development of units and standards, book contrib. 86−4938
dielectric loss meas., bridge control design using dissipation factor standards *(Polish)* 88−22750
diffused wide-angle calibration source for remote sensors 87−14584
digital automated AC/DC transfer standard, using differential multijunction thermal convertors 87−14417
digital sampling AC wattmeter, NPL Mk I and II *(Japanese)* 87−63448
direct-loading electrotensometric comparator systems, certification 86−18145
dispersion distortion removal from pulsar radio signals 87−49965
dose equivalent measurement equipment, international standards 86−18401
dosimetry, absorbed photon and electron radiation doses determ., radiotherapy appl. 88−54607
dual RF bridge for admittance standardisation 86−24678
dual six-port automatic network analyser, online accuracy assessment 88−16461
dual six-port automatic network analyser, systematic errors analysis 88−16463
dye laser, wavelength calibration study 86−5454
dynamic parameters of measurement channels containing computing elements, standardising 87−34996
EBU real samples set for camera colour-rendering measurement 88−53422
ECG, quantitative, common standards 85−64592
eddy current inspection, penetration, standard depth calcs. 86−13887
eddy current testing, standardisation in Germany *(German)* 88−493
eddy current testing of tubes, reference samples standardisation *(German)* 86−20145
electric current standard, using supercond. junction array, design 88−22721
electric fields meas. near AC and DC power lines 88−53811
electric power meas. concept based on mass meas. 86−70189
electric variables meas., European national standards laboratories contributions 88−15890
electric variables meas., German Calibration Service (DKD) activities 86−24610
electric variables meas., German Calibration Service, experience based on practical work 85−58778
electric variables meas., standards, calibration methods, precise instrumentation for elec. engineering appls. *(Polish)* 88−22713
electric-unit depend. fundamental consts. expts. 85−63936
electrical, history 86−24259
electrical, impact of new techniques, review 85−42830
electrical instrumentation standards and control, suggested educational programme improvements *(Polish)* 88−22413
electrical metrology laboratories and calibration services in Saudi Arabia 86−24611
electrical pulse waveform meas. standards, pulse duration comparison using comb generator 87−49441
electrical units derivation and realisation, AC current, voltage, power and energy determ. 86−4935
electricity meters using magnetic tape pulse recorders, American national standard 86−56509
electrolytic conductivity meas. 86−60319
electron micrographs, standards for three-dimens. mensuration 88−7273
electronic equipment ESD sensitivity, IEC 801-2 meas. standard *(French)* 87−49442
electronic voltage standards construction, reference diode appl. *(Polish)* 88−22717
electronic voltage standards in statutory meas. *(German)* 88−36167
electronic weighing systems, metrology aspects *(Spanish)* 85−15053
EM field meas., NBS standards 86−17730
EM field meas. for bioelectromagnetics 88−53810
EM field meas. methodology 86−24723
EM field measurement standards 86−38544
EM meas., conf., Teddington, Middlesex, England (Oct. 1985) 86−26512
EM metrology, availability and compatibility *(Italian)* 86−55796
EM precision meas., conf., Gaithersburg, MD, USA (June 1986) 87−10028
embedding network characterisation, low-loss meas. appl. 87−14454
EMC, cables, peripherals, and computing equipment progress towards a standard 87−26844
EMC issues relative to 1 MHz DC-DC convertor 87−33460
EMC measurement, international regulations and test facility *(German)* 88−45714
EMC system control, ANSI recommended practice on procedures 85−51462
EMC the military environment [EMI measurements] 88−20943
EMF, Australian standard transfer using commercial solid-state reference 86−65241
EMF standards, installation *(Spanish)* 88−36170
EMI control *(German)* 87−14073
EMI measurement at open-field test site, note 86−29492
EMI receiver measurements near the noise floor 87−26819
EMI sources, meas. techniques/equipment and standards *(Italian)* 88−45718
EMI standards for products and services 87−12729
EMI/EMC test laboratories, standards and requirements 87−75472
enclosed laser calibration standard for laser rangefinder 85−52628
energy luminance spectral density meas., unit reproduction, effect of azimuthal nonuniformity of magnetic field 86−44488
environmental, stress screening of electronic hardware 86−66610
environmental noise measurements 86−50252
environmental test programs, cost-impact of MIL-STD-810D standard 87−31282
error components significance evaluation for individually calibrated sensors 88−67622
ESD simulator spark acceleration by charge injection capacitor 88−2477
ESI range of standard fixed and decade resistors *(Italian)* 86−67518
European Communities' photovoltaic pilot projects, inspections and performance meas. 86−45273
far UV detector standard photodiodes 88−29411
fibre lightguides damage site detection, instruments certification and meas. errors 85−63651
fibre lightguides damping meas. devices, complex and elemental certification 88−1981
fibre optic power meas. standards accuracy and pitfalls 86−2800
fibre optic temperature sensor using spectrum-modulating SiC etalon 88−42136
fibre optic test instrument calibration 88−33702
fibre optics test standards, effect on production efficiency 86−15468

measurement standards continued
field strength meters calibration using loop antenna, conductive objects effect determ. 87−14407
fission track dating of zircon geostandard *(Chinese)* 86−11883
fission-fragment sources containing ^{252}Cf and ^{244}Cm 88−74691
Fizeau interferometer certification, working wavelength standard for pulsed lasers 87−68561
flow meas., conf., London, UK (May 1988) 88−55842
flow meas., NBS research tools and opportunities 86−5596
flow rate meas., ISO 5167 international standard 85−9000
flow test stand construction and evaluation 86−5594
flowmeter, variable pressure, limiting nominal pressure calc. 88−74634
flowmeters for air and slurry, US National Bureau of Standards calibration facilities 87−41439
flowmeters selection and application criteria, draft British Standard 88−60719
Fluke 5440A calibrator, standardisation of output voltage *(French)* 85−14575
Fluke automatic direct volts stability system 86−18056
foil resistors parameters checking, w.r.t. Soviet standard 87−63481
force, standard machines of National Institutes of Metrology 86−11730
force balance liquid densimeter 86−11750
force calibration, interlaboratory comparison by ASTM method E74-74 86−31116
force comparator/load cell apparatus for force measurement standard, design 87−49443
force meas., standard machines comparison 85−8683
force meas., transfer standards design, 1.65 and 4.95 MN 86−11742
force meas. NBS developments report 86−11731
force meas. standards, PTB and VIT differences 86−11733
force meas. up to 1 MN, international comparison 86−11732
force secondary standard, square-ring load cell, strain gauge positioning effects analysis 86−11580
force standard for 2×10^3 to 10^5 N range 88−36245
force standard machines, comparison meas. technique 88−67768
force standard machines with compound lever system 86−11737
force-balance linear standard accelerometer, low-frequency 87−29305
four-terminal AC standards, correct use 86−38479
France Inter radio program for frequency standard and time code signal emission *(French)* 87−8174
free fall cond.-temp.-depth instrument calibration using H_2O triple point and Ga melting point standards 88−42670
frequency, automated set-up for wavelength and frequency stability meas. 86−24660
frequency, based on GPS common view data weighting and smoothing 88−16399
frequency, based on Mg atomic beam fine structure transition 86−24652
frequency, Doppler-free two-photon laser spectroscopy of HgII 86−38501
frequency, double-mode He-Ne laser appl. 86−22473
frequency, GPS equipment calibration, time and freq. laboratories in USA and Europe 88−29661
frequency, HeNe/methane laser absolute frequency meas. at 88 THz 87−14448
frequency, interferometric laser frequency division and stabilization 87−12653
frequency, one-way velocity of light meas., relative variations determ. 85−64298
frequency, perturbing I_2 hyperfine structure components at reference frequencies of He-Ne laser 86−22331
frequency, phase-lock of CO_2 laser 86−24662
frequency, using I_2 stabilised He-Ne laser 86−22332
frequency, using I_2 stabilised lasers, absorption cells impurities influence obs. 86−22329
frequency, using I_2 stabilized He-Ne lasers 86−22333
frequency, using ion traps 86−60312
frequency, using laser cooled atomic beams 86−60313
frequency, using laser diode optically pumped Cs beam 85−58815
frequency, using methane stabilised He-Ne laser, 1985 international comparison 88−47655
frequency, using methane stabilised He-Ne laser, 1986 LPTF absolute meas. results 88−47656
frequency, using optically pumped Ag atomic beam 87−14450
frequency, using passive H maser 86−24658
frequency and time reproduction standards, automatic 87−29231
frequency and time signals broadcasting characts. analysis 85−4124
frequency bridge, radiooptical, metrological certification 87−34898
frequency control, conf., Philadelphia, PA, USA (May 1986) 87−31135
frequency control symposium, Philadelphia, PA, USA (May 1987) 88−18316
frequency deviation unit for FM oscillations, working standard 87−29229
frequency meas. of methane hyperfine line 87−14449
frequency offsetter for near-equal frequencies comparison 88−36088
frequency stability characterization, modified Allan variance analysis 85−20688
frequency standard, based on H maser discriminator 85−48048
frequency standard, ultra-miniature design 86−38498
frequency standard using Cs atomic beam progress at NRLM 85−58804
frequency standard using precision oscillator, calibration of meas. instruments 86−11674
frequency standards, 0-1695A/U, retrofit or replacement 85−58817
frequency standards, appl. of trapped ion clocks with laser cooling 85−20736
frequency standards, stability characterisation criteria *(German)* 85−8679
frequency standards based on stored ions 86−38490
frequency standards based on stored ions 87−14442
frequency standards for measurement of time and of frequency *(French)* 87−41302
from 4.2 K to 77 K in six months−superconductive electronics in Europe 88−13723
fundamental constants and precision meas., conf. Gaithersburg, USA (June 1981) 86−56
fundamental constants in physics and metrology, conf., Braunschweig, Germany (Oct. 1985) 86−57074
fundamental physical constants and standards development 87−56456
galvanic cells, SO_x sensor using Ag^+-β-alumina solid electrolyte 87−3579
gas analysis instrumentation, calibration *(Spanish)* 87−35231
gas cell at. freq. standard, three-dimensional model 88−22407
gas flowmeter calibration, electronic device requirements and standard *(German)* 88−36288
gas flowmeter calibration, low-flow rate, NBS accuracy 86−60378

measurement standards continued
gas lasers, two-mode, for nonlinear spectroscopy and optical freq. standards 85−18871
gauge block testing setup, computer-assisted 86−24304
geomagnetic field meas., metrological support system 85−21007
geophysical surveys based on time and frequency service means 88−5112
glass-covered surfaces, luminance factor matrix, contrast standards 85−48114
GPS for time and frequency reference 88−47394
GPS for time and frequency standards distribution 88−60526
GPS time comparisons, impact on international atomic time TAI 86−24795
GPS time-transfer receiver and time comparison results 86−44439
GPS user equipment, relativity correction 87−41085
gravimeters for absolute determ. of gravity 85−48464
gravimetric primary standard gas mixtures, calcs. by computer program 86−11767
ground system impedance, earth surface potentials and resistivity meas., IEEE standard 86−56460
group delay standard for the MHz range of frequencies *(German)* 85−14581
group standards accuracy improvement, algorithmic method 85−8675
HALON PTFE white standard *(Hungarian)* 88−16534
Hamon type resistance standards and appl. *(Czech)* 87−35170
hazardous EM fields meas., American national standard 86−50190
HF high-resolution time of arrival meas. (1981-1985) 88−66077
HF meas. techniques, conf., Braunschweig, Germany (June 1983) 85−10336
HF voltage transfer standards, voltage dependency of relative AC-DC transfer difference *(German)* 85−14793
high pressure gauge, secondary standard, using AuCr spin-glass alloy 87−70858
high value resistances meas. at NPL, report 85−48061
high-resolution phase intercomparison 86−24800
horn-type noise standard, noise temp. derivation 86−5565
humidity, NBS developments 87−8781
humidity meas., UK standards development at NPL 87−8780
humidity measurement standard establishment and use 86−38191
HV cable high-potential field testing 86−25596
HV cylindrical capacitors, voltage-capacity coeff. determ. error 86−35133
HV DC divider and resistor calibration using NBS service 86−20860
HV standard based on electron-speed filtering 86−60297
HV standard divider calibration *(Japanese)* 85−31546
hydraulic force standard machine, 5 MN 86−11739
hydraulic force standard machines, comparison 86−24789
hygrometers metrological support, using built-in standard measures 88−74640
hyperconducting inductive measure of magnetic induction 86−44400
hyperfine transition, RF-optical double reson. study 86−5466
IC, static discharge test equipment , MIL-STD-883C test method 88−70103
IEEE standard for electrical meas. transducer, for AC-DC conversion of electrical quantities 88−67628
IEEE standard for tone address signalling systems performance meas., report 87−33955
IEEE standard modular instrumentation and digital interface system (CAMAC) 86−44084
IMECO Interregional training course on ensuring meas. accuracy, conf., Seibersdorf, Austria (Sept. 1984). 86−19742
immittance standardisation, parallel connection using precision 4-port junction 85−58827
immittance standards connection in parallel, precision 4-port junction 86−24679
impedance, transformer ratio bridge for impedance meas. in AF range 86−24695
India's National Measurement Assurance Programme for Electronics (NAMAPEL) 87−14062
inductance, estimation of values of groups of inductance standards 86−24694
inductance, LF models comparison 87−14479
inductance, LF models comparison 88−16426
inductance meas., *L-C* comparison system based on a two-phase generator 86−24693
inductance standard calibration method, using ratio transfer unbalanced bridge 87−14478
inductance standard development for frequencies up to 20 kHz *(Czech)* 87−63490
inductive LV test circuits power factor meas., IEEE standard 86−56510
inductive transducer selection criteria connection *(Swedish)* 86−24482
industrial quality control and precision measurements in Pakistan 85−10530
industrial refractometers classification and standardisation 87−63542
inertial clock based on computer controlled servo-driven corotation system with superconducting suspension 87−14566
installation engineer's test equipment availability 86−26559
installation for mass checks of taximeters 87−63527
instrumentation automation *(French)* 86−60120
instrumentation systems design, standards, calibration, conf., Wroclaw, Poland (Sept. 1987) *(Polish)* 88−18294
insulated magnet wire, meas. of dimensions 86−62876
integrating current balance, coil-permanent magnet system *(Japanese)* 85−48040
intelligent AC-DC source, standard for power meas. 87−3408
intelligent electronic sensors verification and standardisation *(German)* 86−38367
intelligent measurement evolution 88−60554
intelligent voltage standard 86−31562
intelligent voltage standard, Zener diodes intercomparison 88−16377
inter-test intervals determ. , Soviet recommended procedure 88−74228
interference radiation meas. *(Dutch)* 85−48080
interferometric frequency-ratio determination of stabilized 473 THz and 88 THz laser radiations 85−48047
international acceptability of national standards, drawbacks of cross-checking and redundancy 86−60095
International Atomic Time scale, contribution from results using GPS receiver *(Japanese)* 88−16521
international fluence-rate intercomparison for 144 and 565 keV neutrons 87−63626
international intercomparison 75-A12 voltage standingwave ratios in waveguide at 10 GHz 86−5497
international round robin in primary-accelerometer calibration 87−70818

measurement standards continued
international time and frequency comparisons, using Global Positioning System satellites 85−58905
international time and frequency comparisons, via global positioning system satellites in common-view 86−24651
international time comparison and factor anal. in freq. instability, NRLM time scale *(Japanese)* 86−31673
intrusion alarm RF field disturbance sensors, IEEE standard measurement of RF emissions, report 85−49320
ion storage techniques for frequency standards *(German)* 85−48046
ion trap as a frequency standard measurement of Ba^+HFSfrequency fluctuations 85−58808
ion traps as frequency standards 85−58807
ion traps as frequency standards based on Ba^+ hyperfine structure frequency fluctuations 86−24657
ionising radiation, industrial use, dose limits for health and safety, NPL standards 88−16798
ionising radiation meas. and standards, health and safety aspects 87−57251
IR calibration equipment, US Navy requirements overview 88−74414
IR calibration facility for low background environments at NBS 88−74233
IR imaging system, blackbody source effective radiant output, background temp. changes effect 88−53734
IR imaging system performance meas., buildings thermal anomalies determ. 87−14174
IR roof moisture surveys, standard practices, ASTM status 88−14
IR scene simulation, conf., Orlando, FL, USA (Apr. 1988) 88−74232
IR sensing for diagnostics and control appls., conf., Orlando, FL, USA (May 1987) 88−12
IR surveys of electrical distribution systems 88−68930
IR systems calibration, extended blackbody source development 88−74421
IR thermographic standards development, for New Jersey State buildings 87−14598
irradiance scales based on Si photodiode, Au-point blackbody and synchrotron radiation, intercomparison 86−65199
ISDN, UK liberalisation and regulatory standards 87−34013
Japanese sound power meas. standards *(Japanese)* 87−41303
JILA absolute gravimeters 87−15046
Josephson array voltage standard, NBS efforts 87−14409
Josephson array voltage standard at 10 V 88−4571
Josephson array voltage standards, meas. of resistive slope 86−44370
Josephson effect voltage standard, for US Army 86−24612
Josephson effect voltage standard eval. 86−18055
Josephson junction voltage standard developments *(Hungarian)* 88−74231
Josephson junctions, Bloch oscills., fundamental standard of DC current and other appl. 85−56212
Josephson series arrays development, for high-precision voltage standards 87−14408
Josephson tunnel junction series arrays, MM-wave induced const. voltage steps, appl. to voltage standard 85−46073
Josephson voltage standard, computer controlled 87−14410
Josephson voltage standard, computer controlled, electrochemical cells calibration appl. 88−60847
Josephson voltage standard at 1 V level 86−31112
Josephson voltage standard at NPL 87−56780
Josephson voltage standard with tunnel-junction series array 86−60296
Josephson voltage standards, current distrib. with microwave induced const. voltage steps, model 88−13738
Josephson voltage standards, series-array 88−15893
Josephson voltage standards, using near-zero bias arrays 85−58779
Josephson voltage standards using high-temp. supercond., state-of-the-art and possibilities in microwave technol. *(German)* 88−58022
junction-to-case thermal resistance meas., MIL-STD-883C, meas. conditions 88−53918
K-3 VLBI system, time and freq. standards control *(Japanese)* 86−43926
K-3 VLBI system, time and frequency standard 86−31115
Laboratoire Primaire du Temps et des Frequences, metrological activities in 1986 *(French)* 87−8499
laboratory accreditation in the UK 87−8496
large-area solar cell calibration, absolute indoor differential spectra responsivity method 87−78949
laser appl. to length and frequency meas., laboratory and industrial appl. 85−37758
laser average emission power meas., calibration testing apparatus 88−2341
laser Doppler flowmeter output obs. using calibration standard 88−68367
laser energy meas. using specialised digital meter, metrological charact. analysis 86−42613
laser frequency measurement techniques and standards operation *(French)* 87−21194
laser frequency stabilisation techniques for optical freq. standards *(Chinese)* 88−20730
laser frequency stability analysis by heterodyne meas. 86−48314
laser frequency standard accuracy improvement, based on saturation absorption method 87−14447
laser frequency standards tabulation, 10 THz to 580 THz 86−70190
laser optics, surface quality specification standard 86−22455
laser power and energy measurements and the NBS lasermeasurement assurance program (MAP) 86−15759
laser power meas. standards comparison, C-series calorimeter and quantum-efficient photodiode 88−14253
laser power meas. standards scales intercomparison 87−12545
laser radiation power meas., working standard for 0.48 and 10.6 μm 87−68580
laser radiation power units, comparison standard 85−46447
laser radiative cooling techniques for atoms and ions, freq. standards 85−8970
laser wavelength meas. using 0.63 μm transition 87−2225
leak detection of hermetically sealed devices 85−60752
least squares estimates of standards, for unequal accuracy meas. 85−37407
Leeds & Northrup Maxical instrument for calibration *(Spanish)* 87−56453
length, He-Ne laser comparator appl. 87−63516
length determ., laser wavelength meas. and standards 86−5537
length meas. in μm range, using SEM 87−3756
length standards development in Czechoslovakia *(Slovak)* 86−11705
light modulator for motion picture camera, field standard facilities and requirements *(Czech)* 87−68239
light source colorimetry, Japanese Industrial Standard Z8724 revision (1986) *(Japanese)* 87−43631
light sources colour meas., metrological support 86−38187
lighting standards, international comparison, luminous flux and intensity, spectral responsivity 88−16532
measurement standards continued
line scales international comparison, 1976-84 88−29641
linear expansion coeff. meas. at 90-1800 K, metrological support 87−70796
liquid dielectric and composite liquid/solid insulating systems, tests, standards and guidelines, reviews 87−49889
load cell mass comparator, large capacity, electronic and mechanical design 86−11748
load cells for large masses meas. 88−47691
load verification of testing machines, performance evaluation of testing machines 86−18149
loop, residual-current circuit-breaker and insulation/continuity tester accuracy requirements 86−31486
low resistance meas. techniques, safety aspects 86−65247
low-temp. thermophysical meas. instrumentation and metrological support 88−22827
luminous flux and luminous intensity meas., national standards comparison 88−29667
machine noise charact. meas., GOST standards 85−9012
machine tools and co-ordinate meas. machines calibration, interferometric and mechanical methods combination 88−60923
machined surfaces waviness evaluation *(Czech)* 86−70218
machinery noise emission meas., Austrian standards and legislation *(German)* 86−31732
machinery noise emission meas., Dutch standards and legislation *(German)* 86−31734
machinery noise emission meas., East German standards and legislation *(German)* 86−31735
machinery noise emission meas., French standards and legislation *(German)* 86−31733
magnetic field meas., NMR intrinsic standard for calibration 88−53837
magnetic flux unit reproduction and transfer, in nonlinear hysteresis media 88−29599
magnetic induction standard using superconducting devices 86−24719
magnetic materials testing, standard specimens appl. 85−44816
magnetic standard samples certification, under pulsed conditions 88−53832
magnifying power standard for visual magnification aids/devices 88−11790
Manganin gauges, calibrated against Hg melting line, metrological charact. 85−20616
manufactured product testing and certification in USSR government ministry *(Russian)* 88−70109
mass, using air density meas. device, with correction for buoyancy 86−11749
mass concentration unit reproduction, using standard automated apparatus 86−44463
mass meas., correction for buoyancy and gas adsorption 85−64308
mass meas. standards, correction for buoyancy and gas adsorption 85−64308
mass meas. using stainless steel and Ni-Cr alloy, chemical surface props. determ. 86−11746
mass measurement, artifact effects, developments at NBS 86−65281
mass standards calibration, adsorption errors minimisation 86−44442
mass units, primary, secondary and working standards, weighing processes *(German)* 85−15054
material, standard reference, film thickness and refractive index, calibrated by ellipsometry and profilometry 87−70345
material antistatic properties, characterisation and standardisation *(French)* 86−21903
materials testing and certification for radio-technical use, compensation-dynamic method *(Slovak)* 87−21216
mathematical model of meas., quantity standard significance *(Polish)* 88−22395
Measurement Assurance Programs, audit experience 86−65097
mechanical shock transducers calibration 88−29720
metal hardness meas. on Shore scale D, Soviet State Standard 88−6561
metering, American national standard for marking and arrangement of terminals terminals arrangement and marking for phase shifting devices 88−30427
methane 3.39 μm system, twofold critical cavity laser, reproducible freq. standard 85−12899
methanol laser, frequency stabilisation at 469 μm to MM-wave freq. standard 86−36387
metre, Italian version of definition based on path length travelled by light *(Italian)* 85−14571
metric units, meas. standards and test equipment 87−56455
metrological certification of measuring equipment for magnetically soft materials 88−53831
metrological charact. of standard specimens 87−70344
metrological competence of mechanical meas. at Measurement Standards Laboratory 86−60096
metrological facilities for metering electric energy and their perfection 87−70742
metrological traceability chain, calibration instruments survey 88−74516
metrology, law and industrial meas. standards in Spain *(Spanish)* 87−56454
metrology in Spain *(Spanish)* 88−41940
metrology landmarks, conf., Houston, TX, USA (Oct. 1983) 85−5653
metrology services and standardisation of instrument making industry *(Russian)* 88−29199
microcomputer clock-pulse generator linked to DCF 77off-air time-standard 87−829
microelectronics, ionising radiation testing, framework for integrated set of standards 88−24526
microelectronics dimensional metrology in SEM 87−35200
microphone, capacitor-type, upper limit of dynamic range as linearity criterion 85−47743
microprocessor controller for standard cell intercomparison 85−14634
microwave antenna gain standards, calibration 86−36808
microwave coaxial noise standard for the 1 GHz to 12.4 GHz frequency range 85−4104
microwave measurement crisis, historical review 88−10115
microwave network analyser HP 8510 B, performance and appls. 87−77161
microwave network analyzer calibration using offset shorts 88−60628
microwave passive frequency source, 24 GHz, microwave absorption in $^{14}NH_3$ gas, operation *(French)* 85−4098
microwave phase noise influence on Josephson AC voltage steps 86−2641
microwave power meas. accuracy improvement for automatic module testing 88−36198
microwave power meas. at 15 GHz, international comparison 86−65263
microwave power measurement, standards and calibration 85−43083
microwave power standard, using electron beam 87−14433

measurement standards continued
microwave power standard, using electron beam 88−16459
microwave radiation hazard monitors, standards and calibration systems 85−15359
microwave reflectometer, six-port calibration method using five standards 85−26161
microwave reflectometer, six-port calibration method using four standards 87−70782
microwave spectrum side-bands, stored ions energy, experimental determination 85−58813
microwave test fixture de-embedding procedure, propag. const. determ. 88−38723
microwave thermal noise power standard, Watt unit realisation appl. *(German)* 85−14966
microwave wafer probe meas. accuracy improvement 88−74572
microwave wattmeters calibration, mismatch errors elimination 87−70686
microwaves, role of IEEE in standards development 88−10114
MIL-E-6051 EMC system test, circuit safety margins determ. 86−29484
MIL-STD 461 B/C standards for EM emission, susceptibility and EMI control of military equipment 87−61406
MIL-STD 461B/C and 462 standards for EMI meas. and EMP testing of military equipment 87−61408
MIL-STD-461 EMI testing, automated system development 86−29483
MIL-STD-810 environmental test standards, revision C and D comparison 86−26602
military hybrid microcircuits, quality/reliability assurance procedures 88−57214
military radio sets, EMI test standard MIL-STD-462 modifications 87−26820
millisecond pulser PSR 1937+21 meas., time comparisons 88−22403
MM-wave measurement and standards requirements fordefense technology 86−24263
mm-wave standards, needs and capabilities 86−60335
MM-wave standards at National Bureau of Standards 85−8948
MM-wave wafer probes, 0-50 GHz operation, calibration standards, design and appls. 87−52822
MMIC testing using microwave wafer probe, planar calibration standards verification techniques 88−50383
moisture meas., analytical correlation evolution, military appl. 87−56916
moisture meas. in gases, capacitance and optical cooled mirror sensors comparison 86−5607
MOSFET, reference resistance based on the quantum Hall effect 85−47792
motion parameters reproduction, set of standard facilities 85−47902
multidecade inductive voltage divider, standard establishment using generalised injected voltage method 87−49864
multidecade resistor of high discrimination, resistance standards investigation *(Polish)* 88−22743
multimeter, digital, calibration software with enhanced AC precision 88−16243
multiterminal standard meas. bridges using auxiliary balanced bridge diagonals as connecting wires 88−22694
NAMAS role in UK metrology 88−35767
national and international intercomparisons, calc. and results *(German)* 85−14582
national microwave power standard using microcalorimeter 86−38537
national standards for time and freq., primary Cs beam devices 86−38565
NBS 50 kHz phase angle calibration standard 87−14453
NBS absolute ampere experiment 86−24635
NBS AC-DC transfer standards for current and voltage meas. 86−24637
NBS α-particle calibration services 88−68267
NBS ampere in SI units, meas. status 85−64225
NBS calibration of X-ray and gamma-ray instruments 88−74235
NBS Fricke dosimetry service for high-energy electron beams 88−68507
NBS Handbook 130 (1985), uniform laws and regulations 85−39425

optical frequency measurement, standards 86−38587
optical frequency standard based on Ramsey excitation in Ca atomic beam 87−14443
optical frequency standards, progress and appls. 86−5462
optical glasses, optical density, sample certification 85−35381
optical metrology principles and developments 88−4667
optical microscope, dimens. meas., automated, development and analysis 88−9874
optical multimode fibre attenuation meas., interlaboratory comparison in China 87−26029
optical nondestructive evaluation at the National Bureau of Standards 87−16757
optical power meter and rise time, 850 nm wavelength 85−26490
optical radiation, freq. meas. using Cs primary standards 86−5461
optical radiation meas., conf., San Diego, CA, USA (Aug. 1984) 85−49251
optical radiation meas. system calibration standards, 200-600 nm region 85−20442
optical waveguide diameter checking, by comparison with standard 85−12589
particle spectrometer sources, internal conversion coeffs. meas. of gamma transitions in ^{57}Co 86−25106
passive linear two-ports parameter identification, low-loss meas. appl. 88−15994
PC assemblies functional testing using ATE instruments, future development 88−57131
PC based instrumentation systems 87−56511
pH meas. standardisation, NBS practices 88−67631
phase angle calibration standard, for frequencies up to 50 kHz 86−24665
phase angle generator, digital, calibration and meas. standard appls. 87−14357
phase angle standards and calibration methods 86−38506
phase calibration standard for up to 50 kHz 86−18065
phase meas. assurance and reference standards 88−22398
phase meter calibration, phase angle standard 88−67993
phase meters calibration, statistical approach 88−16404
phase noise meas., long term instability, comparison method using personal computer 88−60858
phase shift angle meter, fine setting methods 87−3709
phase shift angle unit, automation, wide-band standards design 87−14455
phase shift angles meas., using program meas.-computing complex, standards certification 88−4578
phase-angle generator, meas. standard appl. 88−16220
photodiode small signal modelling using finite difference/lumped parameter approach 88−22160
photoelectric colorimeters, in-house checking and reproducibility of measurement 86−55860
photoelectric detectors in miniature form, compliance to standards and various appls. *(German)* 88−16106
photon detectors, standard sources for efficiency calibration in energy range 5 to 40 KeV 86−44546
photon-radiation absorbed dose rates meas. by water calorimeter 87−8954
physical standard redefinition, theory and expt. *(Swedish)* 87−70342
Physikalisch-Technische Bundesanstalt (Braunschweig and Berlin) electrical laboratory work and centenary celebrations 88−22716
PI-4 and PI-5 standard primary instrumenttransducers for laser radiation 86−44267
piston test systems checking and volume determ., reliability estimation 88−36208
piston-cylinder systems of pressure balances, elastic distortion calc. 86−70239
portable instruments for electrical installations, colloquium, London, England (Oct 1986) 87−10050
portable instruments for electrical installations, IEE regulations implementation, quality, safety and performance 87−15397
portable instruments for electrical installations, IEE regulations, manufacturer and user considerations 87−15398
portable instruments for electrical installations, implementation of IEE regulations, 15th Edition, overview 87−15396
portable microprocessor-based thermocouple and RTD simulator 87−56885
portable standards, time standards accuracy, unit definitions 87−41299
portable working standard of microwave power in waveguides 86−44407
power, 1 mW at 50 MHz, international comparison GT-RF 78-14 88−60854
power, microprocessor-based wattmeter for 47 Hz to 63 Hz range 86−38484
power and energy: national standards 86−38536
power density meters calibration, at RF and microwave freq. 86−65265
power loss and apparent power meas., of electric machine steel 85−37703
power standard using symmetrical two-resistor power splitter, reflection correction determ. 88−16398
power standards comparison using two-resistor power splitter, reflection determ. 87−14437
Practical Salinity Scale (1978) tests with natural seawaters 88−48358
precise microwave-induced voltage standards from series connection with more than 1000 Josephson tunnel junctions *(German)* 87−56778
precision and adaptive correction, status in USSR *(Russian)* 86−65094

measurement standards continued
precision packaged frequency sources using specialised precision crystals 88−13634
precision time comparison between two atomic clocks, expt. using TV signal via broadcast satellite *(Japanese)* 88−22809
pressure, 0.4-4.0 MPa, international intercomparison between NPL (India) and PTB (FRG) 88−74230
pressure, error estimation of Soviet secondary standard, 10^{-3} to 10^{3} Pa range 85−64328
pressure, international comparison in the pressure range 20-100 MPa 88−47715
pressure and vacuum meas., calibration and performance 87−70857
pressure balances, high-pressure primary standard *(Croatian)* 85−43125
pressure gauge standard using air-piston type dead weight gauge *(Japanese)* 87−29353
pressure meas., secondary standards based on phase transitions 88−36271
pressure meas., standard instruments 87−77455
pressure meas. in 20 to 100 MPa range, international comparison 85−37794
pressure sensors of 'Vozdukh' type for checking biomedical instruments 88−36419
pressure standard up to 500 MPa, using strain gauge 87−56655
pressure standards from HUBER Instruments, microprocessor-based *(Slovak)* 88−36270
pressure standards in vac. region in Japan *(Japanese)* 85−43130
pressure transducers based on fused quartz Bourdon tube, design 88−10165
primary broadbanded coaxial thermal noise standard, watt unit realisation 87−14438
primary humidity sensors for upper-air radio probes, metrological charact. 85−64341
primary radiometric standard intercomparison in visible, near IR, cryogenic radiometer and electron storage ring BESSY 86−65193
primary standard of voltage maintained in solid-state references 88−16385
primary time and frequency standard of the USSR 86−24653
product liability and NDT 88−49911
progress, conf., Gaithersburg, MD, USA (Oct. 1986) 87−43792
pulsar time scale 86−31675
pulsar time scales 85−31600
pulse and time-domain measurements 86−38305
pulse waveform standards for electro-optics 87−29270
pulsed lasers, relative energy distrib. and beam divergence meas., metrological support system 85−56761
pyrometers comparison using blackbody cavities, temp. gradients effect 88−60731
quantised Hall effect as resistance standard, using AlGaAs/GaAs structure and Si MOSFET 85−58831
quantity manifestation comparison procedure by deterministic and stochastic methods *(Polish)* 87−63206
quantized Hall resistance measurement at the National Measurement Laboratory, Australia, using GaAs/GaAlAs heterostructure 87−14460
quantum frequency and time standards, radio and TV broadcasting appl. 87−3269
quantum frequency standards, long-term stability determ. by Kalman filtering 85−26163
quantum Hall effect, electric resistance standard appl. *(Japanese)* 85−31568
quantum Hall effect as a standard to define the laboratory unit of resistance 88−16419
quantum Hall effect device as resistance standard 85−58829
quantum Hall effect device as resistance standards 86−24683
quantum Hall effect explanation and impact on electrical metrology 87−41305
quantum Hall effect meas. at LCIE, farad and ohm absolute determ. 88−16412
quantum Hall resistance determ. using cryogenic current comparator bridge 85−64239
quantum Hall resistance meas., from 4K to 20mK 87−14463
quantum Hall resistance standard, h/e^2 determ. 86−24686
quantum Hall resistance standard realisation at BIPM 87−14467
quantum Hall resistance value determ., using calculable capacitor at ETL 87−14462
quantum resistance standard, NPL development 86−31590
quantum standard of resistance, h/e^2 determ. in terms of SI ohm 85−58832
quantum-mechanical frequency standards, adaptive methods appl. 88−4577
quarter-wave short-cct. impedance standards, evaluation of wall losses 86−22747
quartz resonator measurements, traceability to US standards,NBS workshop report 87−34906
radiated emission test sites, spherical dipole source transfer standard 86−3699
radiation absorbing materials in 1-3 GHz range certification, modulus of reflection coeff. determ. 87−8719
radiation detectors certifying source 87−56869
radiation thermometer, design, construction and performance 87−21271
radiation thermometer calibration, improved black-body furnace design *(Japanese)* 86−24812
radio-meteor systems for time-scale synchronisation, accuracy criteria 87−29312
radiographs, stepped photographic density standards, prep. method 88−31878
radiography, industrial inspection standards and codes 85−54556
radiometer stability, characterisation and meas. by Allan-variance determ. 85−14818
radiometric standard sources for vacuum UV and soft X-ray range 87−56870
radiometric standards comparison cryogenic radiometer vs. electron storage ring BESSY 87−14351
radiophotoluminescent and thermoluminescent, dosimeters, metrological certification in Soviet Union 88−5025
rangefinders, linear meas. in range 24-75000 m 88−36213
redundant circuits as substitutes for check standards, vector network analysers checking appl. 85−58631
redundant circuits as substitutes for check standards, vector network analysers accuracy checking 86−24449
reference standard stability, using Zener diode and Si transistor 85−31552
reflectometer calibration with sliding termination, residual error estimation 88−16458
reflectometers for standardising impedance meas., automated, for 0.01 GHz to 100 GHz range 86−38518
refractory superconducting microbridges, series array, practical voltage standard appl. 85−41072
measurement standards continued
relative humidity meas., errors of a two-pressure moist gas generator 86−55902
relative magnetic permeability, material standards meas. ccts. *(Polish)* 88−22755
REN-2, AC voltage working standards, error analysis 88−16388
REN-2M, AC voltage working standards, error analysis 88−16388
resistance, automated cryogenic current comparator resistance bridge 87−14474
resistance, bridge-comparator construction *(Polish)* 88−22741
resistance, Japanese policy w.r.t. unification 88−15891
resistance, precise comparisons of quantized Hall resistances 87−14465
resistance, quantised Hall effect appl. 85−58833
resistance, ring reference method for accuracy verification ofresistive dividers 86−24681
resistance, theory and design 87−14473
resistance, US legal unit monitoring via quantum Hall effect 87−14464
resistance, using AlGaAs/GaAs heterostructure, quantised Hall effect characters. appl. 86−24685
resistance, using quantum Hall effect 85−64241
resistance bridge for quantum Hall resistance meas., automated 85−55752
resistance laboratory unit determ., using quantum Hall effect 87−14468
resistance meas., quantum Hall standard realisation at BIPM 88−16418
resistance meas. using cryo-resistors with low-temp. coeff., limitations 86−24698
resistance ratio meas., using cryogenic current comparator 86−24697
resistance ratio meas. using cryogenic current comparator 85−58834
resistance standard, designed at Mendeleer Institute of Metrology 86−24672
resistance standard fabrication, stability improvement at Mendeleev Institute 86−24671
resistance standard using quantum Hall effect, GaAs-$Al_xGa_{1-x}As$ heterostructures appl. 85−64240
resistance standard using quantum Hall effect devices 86−24684
resistance standards comparison, using Wheatstone bridge 86−24682
resistance standards control using self-calibration procedure *(Polish)* 88−22740
resistance thermometers, Pt, high temp., evaluation 85−52737
resistance thermometers/thermocouples, modified GDR standards *(German)* 85−31618
resistor and standard cell calibration system *(Polish)* 88−22742
resistors, series and parallel connections accuracy 85−8933
resistors of decade values in range 1Ω to 1 MΩ, uncertainties determ. 86−31589
review *(Italian)* 87−49436
RF, IF and AF attenuation and ratio−national standards 86−38503
RF admittance meas. , twin-T admittance bridge 88−74551
RF and microwave, national standards and standard measurement systems forimpedance and reflection coefficient 86−38532
RF and microwave noise standards, UK developments at RSRE 86−31630
RF and microwave power meas., standards review 86−38485
RF and microwave standards, international comparison 86−38543
RF coaxial thermal transfer standard 87−14418
RF interference/field strength meter *(Japanese)* 86−50124
RF magnetic field from rotating field generator, for radio receiver testing 87−14494
RF meas. technology advancements *(German)* 85−14580
RF measurements, standards and calibration of measuring instruments *(German)* 87−21183
RF phase-shift measurements in a standards laboratoryenvironment 86−38504
RF power meas. using coaxial calorimeters and microcalorimeters 85−20679
RF power standards using a thermocouple, calibration *(Japanese)* 86−65244
RF signals meas., reference and standard instruments development 88−74229
RF voltage standards, international comparison at frequencies up to 1 GHz 85−48033
ring dye laser for probing trapped ions, optical frequency standard appl. 87−12532
roundness measuring instruments filtering charact. verification using calibration standard *(Chinese)* 85−3832
RRL primary Cs beam frequency standard, accuracy evaluation 85−58814
seawater effective salinity determ., conductivity comparator 87−4146
secondary time standards, meteor-linked systems, anal., errors *(Russian)* 85−4128
self-calibration technique for dual six-port network analyzers 85−14732
SEM-based system 87−11867
semiautomated gauge-block calibration and process-controlled system 86−65098
semiconductor laser, frequency control using microcomputer *(Japanese)* 85−12885
semiconductor materials measurements: present abilities and future needs 85−40587
semiconductor X-ray spectrometers, test procedures, IEEE standard 85−52998
sensors and standardisation, state-of-the-art survey *(German)* 86−50047
series array Josephson voltage standards 87−67870
SI, metric conversion arguments 87−28892
SI ohm determ., Australia's contribution 87−14472
SI ohm determ. and NML, Australia 88−16411
single mode fibre measurements and standardization 87−68066
six-port automatic network analyser, error analysis by stimulation 87−14507
six-port equations, exact solution 85−15000
six-port matrix calibration formalism using five standards 88−42262
six-port reflectometer calibration 86−31609
six-port reflectometer calibration, using four standards 88−16466
six-port reflectometers calibration 86−24736
soft X-ray radiometry source and detector standards 88−23019
software verification, effect on meas. accuracy 86−60142
solar cells, calibration, indoor and outdoor methods 87−36131
solar module performance measurement, reference cells 86−45673
solid state references development, impact in standards laboratory 85−31556
SONIX digital secondary pressure standard, using vibrating cylinder transducer 86−5258
SOSGI-M standard specimens for spectrometric multireference gamma sources 88−36399

measurement standards continued
sound level meters and three-level tone test 86−17681
space programs, time-frequency devices, requirements and equipment *(French)* 87−8239
space solar cell calibration using high-altitude balloons 88−37466
specimens for reflectivity of radiowave absorbers 85−20712
spectral irradiance scale establishment, visible and near-IR, using BESSY storage ring 86−44446
spectral radiance calibrations, NBS scale 88−29672
spectral radiant power meas. instrumentation, BESSY as radiometric standard source 86−60540
spectral reflectance instrumentation, standards and techniques 88−29670
spectral reflectance meas. of high reflectance coatings 87−70387
spectrum analyser charact., CEI standard *(French)* 88−9853
spreading resistance probes, calibration, standard reference materials 86−4940
standard cells, long-term EMF stability survey 86−19441
standard cells at Lab. Central des Industries Electriques, meas. automation *(French)* 88−67672
standardised pressure and temp. meas. automation at Electricite de France *(French)* 88−67673
statistical analysis based on classical variance 87−14059
steel, C, residual stress meas. methods comparison using bulk-zero stress standard 86−5544
steel, flaw detection by industrial fluorography, nuclear industry standards 85−17023
steel pipe, resist. welded, high integrity US inspection, standards and equipment 85−54546
strain meas., industrial appls. aspects 86−5273
stripline calibration of automatic network analysers *(German)* 88−4325
submicron dimensional metrology in SEM 88−16497
submicron optical linewidth metrology at NBS 88−13500
superconducting quantum current standard, possibility of attainment 85−42831
superconductivity appl. to instrumentation and meas. 88−60527
superconductor electronics in the USA, review 88−13721
superconductors, measurement standards of critical fields 85−64256
surface resistivity measurement methods and standards 87−35166
surface roughness evaluation standard based on 1/f fluctuation *(Japanese)* 86−38188
surface roughness meas. methods *(Spanish)* 87−49914
surface roughness parameters determ., accuracy and applicability to production testing 87−3762
surface roughness standards, using scanning tunnelling microscope 86−5525
Tacamo aircraft time and frequency reference system, design 85−59393
Tactical Miniature Crystal Oscillator (TMXO) 87−37063
telephone sets, IEEE standard method for transmission performance meas., report 85−57832
temperature, difference between IPTS-68 and thermodynamic temp. determ. in 457°C to 630°C range 85−37786
temperature, water bath blackbody for 5 to 60°C range 88−10160
temperature sensor characteristics and measurement systemdesign 86−5253
temperature sensors development and standardisation *(Japanese)* 86−55615
tensoresistors errors point and interval evaluation, strain meas. results 88−53643
terrestrial flat-plate PV references device calibration, proposed international standard 88−17445
tertiary standard weights, calibration *(Japanese)* 85−14574
test plate of guarded hot plate power consumption determ. 85−4066
thermal conductivity and diffusivity meas. at elevated temp. and pressures 88−10156
thermal conductivity and specific heat meas., Mo standard specimen appl. 85−4142
thermal eval. of insulation for elec. equipment rating, ANSI/IEEE standard 87−28896
thermal noise standards, broadband noise source applications 86−17731
thermal noise standards, definition, realization and comparison 86−38598
thermal noise temperature measurement standards, automation impact 86−38599
thermal-conductivity standards (organic liquids) 87−63548
thermal-mass flowmeters, calibration techniques 85−52748
thermocouple EMF standard, interpolation program in MS-FORTRAN *(Japanese)* 88−42043
thermocouple transducers, GOST 3044-84 state standard and its adoption 88−74348
thermocouples stability estimates 86−24810
thermodynamic temp. determ. of Ne triple point 87−14594
thermodynamic temp. determ. of thermal emitter *(Slovak)* 88−36261
thermodynamic temp. meas. using total radiation thermometer, −130°C to 60°C 88−68058
thermoelectric power comparators, angular error determ. *(Polish)* 87−77355
thermoelectric thermometers checking, standard means of meas. for −200 to 2500°C range 85−3968
thermometry, frequency dependencies of precision resistors 88−35951
thermophysical meas. metrological support in USSR 88−29674
thermoregulated enclosure for standard cells 85−14956
thin film thickness inspection, industrial automatic system for complex shapes 87−49931
throttle devices, gases and liquids amounts determ. 88−10168
thyristor switching current meas. *(Polish)* 88−10091
time, around-the-world relativistic Sagnac expt. 85−47478
time, based on GPS common view data weighting and smoothing 88−16399
time, European time scales comparison, by receive only satellite methods 86−24796
time, GPS equipment calibration, time and freq. laboratories in USA and Europe 88−29661
time, passive TV techniques for time transfer via Indian satellite INSAT-1B 87−14569
time, PTB's primary clock CS2 88−16517
time and freq. distrib. system using state-of-the-art medium terminal 86−44085
time and frequency, Ch1-76 standard using hydrogen quantum discriminator 88−53895
time and frequency, efficiency determ. of meas. information processing algorithms 88−4656
time and frequency, GOES satellite time code dissemination , NBS service 88−74237
time and frequency, primary PTB standards 86−60360
time and frequency, secondary, using passive TV method 86−24799
measurement standards continued
time and frequency, UK standards, dissemination, use and future development 86−38577
time and frequency, using Omega radionavigation system 86−31570
time and frequency meas., fundamentals *(French)* 87−8750
time and frequency meas., relativistic gravity effects 86−44435
time and frequency meas., standard signals transmission using phase modulation 85−4125
time and frequency meas. comparison via OTS-2 86−24797
time and frequency meas. using 30-70 kHz receiver *(Czech)* 88−36247
time and frequency standard research using stored ions 85−8969
time and frequency standard units automatic comparison, software 87−29314
time and frequency standards comparison along radiometeoric channel, instruments design 87−34897
time and frequency standards comparison using long-wave pulse-position radionavigation station signals 87−34901
time and frequency systems and devices, development at APL 85−52836
time and frequency transfer, NBS calibration service based on GPS common view data 87−14565
time comparison expt. for atomic clocks, use of TV signal via broadcasting satellite *(Japanese)* 87−56416
time determination, universal, current accuracy 87−34899
time scale lock-in using signals transmitted by Cuban television 87−34900
time scale stabilities based on time and frequency Kalmanfilters 86−38576
time scales comparison via satellite TV channels 88−16519
time signals transmission via satellite TV channels, prediction error 86−44438
time standard using freq. stabilised laser 86−60359
time synchronisation for K-3 VLBI system operation *(Japanese)* 86−38571
time transfer expt. , two-way, via ECS-1, using MITREX modem 88−74604
time transfer metrology at NPL, New Delhi 86−55514
time transfer via geostationary satellites , high-accuracy, preliminary results 88−74605
time-frequency-length standard development 85−47785
time-scale service in the vicinity of the Earth 87−56862
time-signal and frequency-standard transmitting systems, propagation along transequatorial route 88−74606
timekeeping and frequency control, classical and quantum mechanical standards, history 86−18153
traceability of in situ automatic test systems usingtransfer standards 86−38247
transconductance amplifier for current calibrations 86−31564
transfer standards for energy and peak power for 1.064 μm laser pulses and CW laser power 86−42469
transient waveform recorder standard 86−17902
transportable Josephson voltage standard 85−64220
transverse EM cell for standard E and H-field generation, calibration, errors eval. 88−47509
triple points realization below 90 K, based on closed-cycle ^{4}He refrigerator 88−60941
tubes, eddy current testing, performance standard *(German)* 85−54563
TV derived frequency standard, design 88−36174
TV receiver calibration signal, frequency standard derivation *(German)* 88−4272
twin-T admittance bridge, for 10 kHz-200 MHz range 86−38519
UK Metrology and Standards Requirements Committee role 87−14056
ultrasonics, Indian Third National Symposium, New Delhi, India (25-26 Sept. 1986) 88−31266
uncertainties treatment in precision meas., w.r.t. West German standard 88−15881
uncertainties treatment standardisation, German activities 85−37389
uncertainty methodology 86−4936
unified ampere and volt standard 86−24639
unified standard for RF signal shape and spectrum parameter meas., design 87−29000
units and uncertainties of measurement *(French)* 88−41939
units of metrology, calibration in Spain *(Spanish)* 88−41941
US absolute power transfer standard 85−38369
US National Bureau of Standards, time and freq. distrib. services 86−38568
US velocity standard sample certification laser apparatus 85−21041
USA Federal Communications Commission test procedures, avoidance of problems 87−16361
USA national EMC meas. standard, extension for freqs. below 10 kHz 87−28897
USSR state high frequency voltage standard 86−24628
V-22 OSPREY aircraft application of MIL-STD-2165 testability specification 87−21727
vacuum, international compatibility 88−36276
vacuum and pressure meas., German Calibration Service (DKD) *(German)* 88−36279
vacuum gauges calibration, review 88−42320
vacuum gauges long-term stability, German calibration service 87−77454
vacuum meas. by spinning rotor gauge technique, international comparison 87−77450
vacuum metrology *(German)* 88−36278
vacuum pressure standards and gauges in vacuum *(Japanese)* 88−68076
variance methods appl. to standards metrology 88−15882
vector automatic network analysers, two-port verification standards in 3.5 mm and 7.5 mm 85−14718
vibroacoustic measurements in health and safety at work 85−9013
Vickers and Brinell indentations meas., errors, standards and specifications 88−12112
visible red light, speed, redefinition of meter 87−56451
VLSI test system timing accuracy evaluation 88−15959
voltage, Chinese Josephson standard, 2e/h precision determ. 87−14414
voltage, drift-compensating precision divider technique using circular data patterns 88−60661
voltage, intelligent voltage standard using solid-state references 87−14425
voltage, international comparison of direct voltage 86−24625
voltage, Japanese policy w.r.t. unification 88−15891
voltage, Josephson standard establishment at NPL, India 87−14415
voltage, NBS primary AC-DC transfer standards, using multijunction thermal convertors 88−16392
voltage, near zero bias arrays of Josephson tunnel junctions appl. 86−24618
voltage, programmable DC-100 MHz voltage standard 87−14421
voltage, solid state 10 V standard eight years experience 85−31554
voltage, standard cell intercomparisons automation 85−58785
voltage, standard cells comparisons, using automatic system 86−24623

measurement standards continued
voltage, standard cells intercomparison, using computer controlled system 86−24624
voltage AC/DC transfer standard, automated wide-band design 88−16379
voltage and current, macroscopic quantum mechanical circuits inelectromagnetic measurements 86−31555
voltage and impedance standard upgrading *(Swedish)* 87−70343
voltage and resistance, US legal units 87−28891
voltage Josephson, potentiometric realization 85−64219
voltage meas., automatic direct volts stability system 86−24613
voltage meas. using coaxial calorimeters and microcalorimeters 85−20679
voltage primary standard, using solid state references 87−70737
voltage reference calibration, using sub-PPM automated meas. system 86−24630
voltage references, Zener diodes, breakdown voltage, temp. characts., noise props. 88−44046
voltage standard and size duplicating methods 87−34895
voltage standard based on AC Josephson effect, establishment at NPL, India 88−16374
voltage standard based on Zener diode references, performance assessment 88−16386
voltage standard cells enclosures, air pressure seal design 86−5440
voltage standard using AC Josephson effect adoption in China as national standard 88−16373
voltage standards, 0.1 to 1.3 V, using Josephson tunnel junctions 86−17729
voltage standards improvement based on Josephson effect 87−56777
voltage standards in UK and USSR comparison, using transportable cells 86−24614
voltage standards of high precision, using Josephson series arrays 88−16371
voltage-current standard for equipment calibration, test data processing program *(Japanese)* 86−38189
water, triple point, realisation 85−63933
watt standard in Germany, computer-controlled system *(Japanese)* 86−38190
waveguide attenuation at 15 GHz, international comparison 87−32047
waveguide below cutoff attenuation standard calibration, using repeatable attenuation step 87−14508
waveguide flange joints in 8 mm waveband characts. 88−36194
waveguide-below-cutoff attenuator calibration, using voltage doubler 88−12566
wavelength unit for pulsed laser, working standard 88−2345
wavelength-optical frequency standard, using methane stabilised He-Ne laser 88−16530
wavenumber meas. of D_2 resonance line of Cs, using interferometer 86−44374
weighing, decimal weight series for submultiples of mass standards, adsorption error limitation 86−70229
weighing, international comparison of calibrated values 86−11747
weighing technology and force meas. conf., Kobe, Japan (Sept. 1984) 86−7385
Wheatstone bridge for comparing 1 Ω resistors 85−58828
working standard for sound pressure units in aqueous medium 86−44481
X-band electric noise standard 86−60330
X-ray primary exposure standard 30-150 keV 85−26735
X-ray reference radiations at NPL, ISO narrow spectrum series 88−29938
XUV radiometric standards at NBS 87−14582
Yugoslavia, Measuring System, research project *(Slovenian)* 85−14564
Zener references and traceable standards, performance validation problems 85−31555
Zener references performance assessment 87−65842
zero power-factor reference based on thermal convertors 87−14434
zero-power-factor reference standard based on thermal convertors 88−16238
Ag atomic beam frequency standard, optically pumped, design 88−16402
Ag/AgCl electrodes fabricated with IC-compatible technologies, chemical sensor reference appl. 87−3592
C fibre reinforced epoxy laminates, US inspection 85−39827
CO_2 $R_1(32)$ line freq. meas. rel. to 3.39 μm He-$^{22}Ne/CH_4$ standard 86−3026
CO_2 laser, optogalvanic Lamb dip freq. stabilisation 87−18905
CO_2 pulsed laser-emission at 10.6 μm, operating energy meas. standard 87−75204
CO_2-in-air reference gases use for calibration of nondispersive IR CO_2 analysers 87−71305
Cd standard cells, temp. characts. of cells normalised at 0°C *(Japanese)* 87−41301
Cs alkali gas cell atomic freq. standards 87−29236
Cs atom beam spectrometer for freq. standard appl. *(Polish)* 85−31289
Cs atomic beam, freq., standard, vel. distrib. determ. *(Japanese)* 85−43061
Cs atomic beam freq. standards, distributed phase shift minimization 87−29235
Cs atomic beam frequency reference, metrological analysis 87−29230
Cs atomic beam frequency standard, Majorana transitions expt. 86−38493
Cs atomic beam frequency standard, military appl. in dynamic vibration environment 86−38497
Cs atomic beam frequency standard, optically pumped, fluorescent light shift calc. 86−38496
Cs atomic beam frequency standard, recirculating oven design 86−38494
Cs atomic beam standard, using laser driven optical pumping 86−38495
Cs atomic clock, PTB design, preliminary results 87−14567
Cs atomic clock, velocity distrib. determ. 87−14440
Cs atomic clocks, config., operation and appls. 86−31571
Cs atomic frequency-standards CS2 and CSX, frequency shifts by Rabi pulling 88−29579
Cs beam atomic clock, optical pumping, fluoresc. freq. standard 86−5460
Cs beam atomic freq. standards, Millman effect 85−31288
Cs beam freq. standards, atom transit time effect on stability 87−29234
Cs beam freq. standards, atomic transit and delayed ionization effects 88−22728
Cs beam freq. standards, freq. instabilities causes and cures 88−22409
Cs beam frequency standard, Q-1695A/U modification for retrofit of replacement Cs beam tubes 85−58816
Cs beam frequency standard, design, anal. and performance 85−31561
Cs beam frequency standard, optically pumped, signal-to-noise ratio meas. 88−47657
Cs beam frequency standard, optically pumped, progress 87−29233
Cs beam frequency standard with narrow atomic velocity distrib. ranges, Ramsey patterns 87−14445
Cs beam frequency standard with narrow atomic velocity ranges, Ramsey pattern 88−16401
measurement standards continued
Cs beam frequency standards, Rabi pulling and long-term stability 88−22724
Cs beam frequency standards, effect of atom transit time on freq. stability 88−22722
Cs beam frequency standards, frequency shift due to cavity phase difference meas. 85−58805
Cs beam primary frequency standard, C-field setting, transitions and disturbances 87−14444
Cs beam primary frequency standard, NBS-6 evaluation, beam reversal expt. 86−38492
Cs beam primary frequency standard at RRL 88−16400
Cs beam primary standard long-term performance, USSR national time standard 88−16518
Cs beam standard laser diode optically pumped 86−24655
Cs beam tube atomic standards, characterization 88−22725
Cs beam tube standard, design and performance *(Japanese)* 85−26440
Cs frequency and time standards, shielded four-conductor magnetic field assembly 85−4127
Cs frequency standard, optically pumped, NRLM development 88−74549
Cs frequency standard, simultaneous phase lock of CO_2 lasers 85−7362
Cs frequency standards at NRLM 86−24654
Cs optically pumped freq. standard for military appl. 88−22410
Cs, optically pumped, freq. standards 86−38488
Cs, primary freq. standards, optical pumping, fluoresc. defection 86−5459

Cs, primary time and freq. standards 85−8676
Cs tube design procedure 87−3774
Cs_2 reference for freq. stabilisation of 1.06 μm Nd:YAG laser 87−33284
^{137}Cs soln., activity conc. meas., international comparison 85−31707
^{55}Fe soln. specific activity, international comparison results 88−22397
GaAs substrate microstrip structures, direct calibration and meas. 87−8730
GaAs-AlGaAs heterostructures, reference resistance based on the quantum Hall effect 85−47792
Ge resist. standards fabrication, neutron transmutation doping 86−24264
H maser atomic standard, built at Johns Hopkins University, long term performance 87−14568
H maser freq. standards 86−38489
H maser frequency standard, transportable, design for VLBI field operations *(Japanese)* 85−58803
H maser miniature passive clock, NBS design, characts. and performance 87−14446
H maser standard for Kashima 26 m VLBI antenna *(Japanese)* 86−29655
H maser with auto-tuning utilising cavity Q modulation 88−20527
H masers for radio astronomy 88−20525
H, spin-polarised, maser action 86−68414
H_2 generator freq. standard, state-of-the-art research 85−8677
H_2 maser with new state selector, operation and performance 85−58812
H_2 masers using cavity frequency switching servos, design and performance 85−58811
He melting curve appl., fundamentals constants, pressure, density and mass linkage 85−64332
He-Ne laser, $^{127}I_2$ absorption cell stabilised, props. at λ=612 nm 88−14084
He-Ne laser, I_2 and methane stabilised, wavelength standards 86−3093
He-Ne laser, I_2 stabilised, international intercomparison involving ten laboratories 87−61221
He-Ne laser, I_2 stabilised, metrological props. 86−3092
He-Ne laser, I_2 stabilised operating conditions, wavelength standards 86−3091
He-Ne laser, transportable optical frequency standard and results of its metrological tests 87−74984
He-Ne laser with external Ne absorpt. cell, wavelength reproducibility of 0.63 μm emission 85−56527
He-Ne lasers stabilised to $^{127}I_2$ at 605 nm 88−14254
He-Ne:I_2 laser, freq. reproducibility, ^{127}I absorpt. spectra 87−68368
He-Ne/CH_4 laser frequency stability, comparison with Rb optical time standard 85−20440
He-Ne/I_2 lasers, stabilised, international comparisons 85−2223
He-Ne/methane laser, portable optical freq. standard meas. 87−68383
Hg ion storage freq. standard, operational experience 88−22404
Hg trapped ion freq. standard development 88−22405
^{131}I vapour bulk activity meter checking standard 88−68227
^{85}Kr tagged standard radioactive mixtures for gas radiometer calibration 85−20829
Nb/Al_2O_3/Nb and NbN/MgO/NbN Josephson junction arrays, voltage standards appl. 86−58714
Nb/AlO_x/Nb Josephson array potentiometer at the ETL 88−13740
NbN-NbO_x-Pb Josephson junctions, AC props. 87−67848
Nb_3Sn-Cu SNS microbridge series array, high T_c, as voltage standards 85−56178
NbTi supercond. wire, standard reference material for critical current meas. 85−50865
NbTi superconducting wire standard ref. material, crit. current meas. 85−37406
NbTi wire, standard reference material for crit. current meas. 85−47788
Pb-Pb_xO_y-Pb Josephson tunnel junctions for voltage standard 87−21185
Pt, standards comparison in ^4He cryostat 88−53911
^{226}Ra, for calibrating γ-ray spectrometers for radioactive gaseous samples 85−9113
^{226}Ra mass-unit standard 87−29316
Rb D_1 and D_2 absorption lines, appl. as freq. standard for semicond., laser freq. stabilisation 88−40206
Rb, Rb-3100 atomic oscillator, development 88−10093
Rb alkali gas cell atomic freq. standards 87−29236
Rb atomic clock, optically pumped, highly reduced semiconductor laser appl. 86−38574
Rb atomic frequency standard developed in India, frequency stability evaluation 86−38499
Rb clock model, feedback and atomic system analysis 86−38573
Rb discharge lamps for atomic frequency standards, lifetime and reliability 85−58809
Rb freq. standard development for MILSTAR satellite system 88−22411
Rb frequency standards, short-term stability study 88−29580
Rb frequency standards using TE_{011} TE_{111} TE_{101} modes cavity, performance 85−58810
Rb quantum frequency standard instability meas. 85−20689
^{87}Rb maser atomic frequency standard, expt. results 86−38500
$^{87}Rb/^{85}Rb$ resonance cell for freq. standard, signal intensity vs. temp characts. 88−22727

measurement standards continued

aerodynamic system modelling, software development 86−44737
antenna reflectors, FEM anal. using MSC/NASTRAN package 87−12832
automatic 3-D coordinate meas. machine for workpieces, image processing *(Japanese)* 88−53859
automatic oscillation generation *(Czech)* 87−34916
automobile engine fault anal., expert system, sensor driven approach 87−43586
automobile engines testing, knowledge-based diagnosis system 88−60549
automotive antiskid system, parallel processor controller design 87−31061
biomechanics, gait and energy expenditure analysis of above-knee amputees, Vicon system 88−54487
boilers service life determ., cracks propagation computing *(Czech)* 85−65131
CAD system for mechanical engineering education 88−24476
CAI at Delft University 85−16651
cam design teaching using graphics microcomputer 88−62925
CARS, computer-aided road simulation test rig for trucks 88−63025
cast Al wheels, automated flaw detection using X-ray images 88−31515
ceramic, advanced, photon CT scanning applic. for flaw, crack and density gradients exam. 88−496
combined cam curve automatic assembly algorithm 88−49320
component and equipment reliability prediction technique and model 86−57273
component mode method for modelling the dynamics of turbo-generator sets 88−5650
composite aircraft structures, US inspection, computer controlled scanning and data collection system 85−49660
computer graphics system for stress and strain anal. 85−28273
computer modelling of 60° shear waves 88−10662
coordinate meas., workpieces and components manufacture appl. 86−65273
coordinate meas. methods, deflections of components evaluation 87−3764
cryoturbogenerator, computer modeling of rotor thermal field using difference eqns. 87−35885
cylindrical gear accuracy meas. minicomputer system 87−14082
data acquisition, computerised system for undergraduate laboratory 88−22467
decoupling procedures for fluid-structure interaction problems 88−70262
defect recognition, automated system 88−70155
deflection of circular diaphragms in pressure sensors, bending and tensile forces influence 85−37564
design, computer-aided engineering 87−51834
design engineering, conf. New York, USA (Sept. 1986) 87−10033
diesel engine fuel injection, simulation method 86−19088
drive systems, dynamically loaded, torsional and flexural vibrs., computer simulation 85−21864
dynamic digital memory for holography, moire and ESPI techniques 88−2413
dynamic transient response, comparison of harmonic acceleration method with others for calculation 88−50001
electronic CAD and mechanical package design 88−44008
engine technology and computers, conf., Cambridge, UK (March 1987) 88−62878
engine test rig automation with modular computer system *(German)* 86−49927
EXMAS, knowledge-based system for complex mechanical system maintenance 88−126
expert system for vehicle maintenance *(German)* 86−19797
expert systems, development and appls. in Japanese National Railways 87−58417
failure analysis, finite element method with localisation zones 88−70159
FEA, microcomputer based, integration into undergraduate mechanical engineering curriculum 87−51761
FFT analysis and synthesis appls. *(Czech)* 87−14248
flaw detection, X-ray computing tomographs *(Russian)* 88−35817
four-axle locomotive dynamics, computer-aided evaluation 88−49242
fracture toughness test, J-integral single specimen, computer-interactive 88−497
Francis runner stress analysis, by finite element method 87−72035
friction couple measurement of counter, rel. revolution method *(Chinese)* 86−31665
gas turbine cogeneration plant, thermodynamic performance and partial load operation, computer aided analysis 85−4966
gas-turbine production-testing complex *(Russian)* 86−55538
generic gimbaled antenna structure, design 87−28694
hard disc drive spindles, system identification: an experimental verification 88−18514
heat engines, automatic operational defect diagnosis, using Wigner-Ville representation *(French)* 88−18536

mechanical engineering computing continued
holography applications to factory floor design and testing problems 87−16720
industrial precision meas. of edges, angles, areas and perimeters 87−77415
inspection and lifetime analysis for large steam turbine rotors 85−26198
intelligent test stands for multifunctional use 86−60138
internal combustion engine testing, microprocessor-based fuel-monitoring system *(Italian)* 87−20836
internal combustion engines, digital instrumentation for combustion study and monitoring 88−67688
IXMO car engine diagnosis expert system, concept *(German)* 87−14118
LABTA/MA modal analysis system for multi-shaken testing *(Japanese)* 86−40803
machine design, construction and production preparation, using MINING 1 graphics software system *(Czech)* 85−32489
machine tool supervision, signal processing and decision making algorithms *(Hungarian)* 86−31164
machine tools, computer aided analysis for frequency response evaluation *(German)* 85−8777
machine tools diagnosis by ATE *(Czech)* 87−34915
machined surfaces texture meas. by laser beam scatt., computer identification 85−20725
machinery fixing with finite element anal. 87−43944
machinery problem diagnosis using finite element anal. 87−78704
magneto-mechanical 3-D surface contouring system to be used for generating soft tissue anthropomorphic data 88−54485
materials mechanical testing, automatic, rubber bearing test appl. *(German)* 85−26189
micro-CAE software for mechanical engineering education 87−51762
microcomputer for the dynamics laboratory 86−52872
microcomputers in solid mechanics and stress analysis 88−24470
micropolariscope, microcomputer controlled, for off-shore oil platform models stress meas. 86−11728
modal analysis system for dynamic characts. meas. of structures and materials, using microcomputer 86−4999
moire contouring of CAD generated objects 88−53875
moire strain gauge with high sensitivity 88−53661
monitoring and diagnosis system, development and applications 86−38199
motor coupling alignment program for TI-66 programmable calculator 86−45352
multimass vibrating systems identification, interactive computer-aided testing code 87−3813
multiple I/O structural testing computer workstations 88−24531
multiple input/output structural testing and anal. computer workstation 88−67687
multistage gas turbine blade erosion rate calc. using computer package 87−35827
NASA 70-metre antenna, buckling analysis of quadripod structure using NASTRAN 88−21027
NDT test data interpretation using signal processing and shape recognition techniques *(French)* 88−12106
nonlinear nonautonomous networks and systems, computer-aided determ. and analysis of periodic solns. *(German)* 87−16841
oil-injected screw compressors, new design method appl. 88−17811
online mechanical testing data acquisition and analysis system using ASYST 88−41963
Permalign shaft alignment system *(German)* 87−77084
photomechanical analysis of composite and other materials 88−49919
predictive maintenance by computerised vibration data analysis 88−37913
programmable function generator for dynamic analysis testing 87−49778
publications of Computer and Automation Inst., Hungary 88−25568
radar antenna, rotary motion, simplified anal. *(Polish)* 87−47314
rapidly switched devices in dynamic system simulation models 86−14601
Rapperswil engineering school, computer instruction in using CAD installations in mechanical engineering *(German)* 87−51779
real-time simulation of the Space Station mobile service center 88−68537
rectangular rosette strain-gauge data, computer-assisted reduction 86−18136
road safety with intelligent cars 88−69871
satellite receiving antennas struct. modelling *(Italian)* 88−2746
SCARE postprocessor program to MSC/NASTRAN, ceramic components reliability anal. 87−5296
simulation, real-time, conservation eqn. appl. 87−71769
soft-airfoil wind turbine, 85-foot, computed-aided performance anal. 87−35862
solar panels, spherically curved, stress analysis computer model 86−56956
springs for electronic connectors 86−47211
state estimation procedures using parallel processing 87−31621
steam plant thermodynamics, computer aided modelling for mechanical engineering students 85−38863
steam turbine efficiency computation program, in BASIC *(Portuguese)* 87−64388
steel, cast, discontinuities and flaw monitoring, computerised US method 88−38298
steel specimen crack-tip local strain meas., computer-aided fine-grid method 88−18758
strain gauge; rosette analysis, computer program 86−11439
strain meas. at high temp., errors estimation using FORTRAN program 85−58898
stress/deformation investigation system *(Russian)* 86−55855
stresses components, measuring unit for elongation, force, and acceleration measurement and recording *(German)* 86−17866
structural dynamic testing, multimicroprocessor based system 86−62309
structural failure prevention by AE monitoring computer system 88−70396
surface impact treatment, conf., Bedford, England (Sept. 1986) 88−49371
surface modeller for volume construction in motor vehicle industry *(French)* 88−47725
tightening torque for bolts preloaded up to the plastic range 88−36244
tube, EM bulging *(Japanese)* 87−43696
turbogenerator shaft torsional fatigue life prediction from crack initiation and propagation 86−26005
turbomachines, vibration monitoring and diagnostics using the MSDS 40 system *(German)* 87−72102
tyred wheels, noise investigation, array processor use *(German)* 87−3811
ultrasound rail flaw testing equipment *(Hungarian)* 86−25463
underwater acoustic sound ship mechanical features detection 87−64014
US modelling of normal beam response from notches 88−23218
valve test laboratory data acquisition, personal computer based system 86−24413
mechanical engineering computing continued
vehicle noise and vibration anal. system at Toyota Motor Corp. *(Japanese)* 85−31309
vibration analysis program for rotating machinery 88−47684
welding technology, power station components appl., welding automation and computer control 88−49515
wind turbine, WPS-30, rotor blade fatigue testing 88−48830
wind turbine dynamics anal., symbolic computing 87−9450
mechanical organs *see artificial organs*
mechanical permeability *see permeability*
mechanical properties of solids *see mechanical properties of substances*
mechanical properties of substances

mechanical relaxation *see anelastic relaxation*
mechanical strength
for fatigue strength, see fatigue; for creep strength see creep fracture see also bending strength; compressive strength; fracture toughness; impact strength; notch strength; shear strength; tensile strength; yield strength
alloys for connector, heat generation 88−38266
annular glass-to-metal seals in microelectronic packages, strength estimation, expt. study 85−16797
busbars of different Al alloys, thermal stability *(Russian)* 86−39658
ceramic microstructures, interface and mech. props. 85−61010
composite insulators, mechanical strength, ageing degradation 88−48597
current collector without arch struts, component interaction and mechanical design *(Russian)* 87−4853
dielectrics, brittle, loaded by nondestructive stresses, EM signal pulses generation 85−6042
electric generator HV insulation long-term dielectric strength, mechanical reliability 86−51558
fibre optic sensor, Fabry-Perot, high sensitivity for mechanical force meas. 88−67875
fibre optics hazards in medical appl. environment 88−36456
fibres, quartz glass, mechanical reliability, service life prediction 85−41174
fine ceramic component fast fracture prevention, safety and reliability *(Japanese)* 88−56320
fluoride glass fibre drawing, optimisation with respect to mechanical strength 88−39911
fluoride glass fibres for infrared transmission systems, optical and mech. props. 88−58149
glass fibre lightguides, ageing effects 85−35520
gradient-type light guide with polymer protective cladding, strength characts. calc. *(Russian)* 88−45180
heavy metal fluoride glasses and fibres, review 85−12532
high-conductivity solid electrolyte characteristics, mech. and chem. props. 86−66226
high-strength steel development and use *(Japanese)* 86−13829
HV composite insulators, prop. changes caused by multi-factor ageing 86−68084
HV post insulators, short circuit stresses and strength *(German)* 88−42878
hydraulic turbine spiral casing weld stress calc. and exptl. verification 86−25952
insulators, electric and mechanical breakdown, space environment effects simulation 87−18434
insulators, long rod type, with split attachment points and Portland cement, breaking strength *(German)* 86−32803
interactive safety system for structures, ISAFES *(Japanese)* 86−46012
laminate in-plane strength and stiffness meas., US techniques 87−373
laser materials, high strength, development 87−7311
magnetic tape reel, carrying capacity under vibr. loading 88−1874
magnetic tape reel, vibr. and temp. effect on carrying capacity 88−1875
materials, US strength meas., cableless communication methods 88−487
mechanical reliability, rel. to fabrication technology *(Japanese)* 85−12598
multilayer cemented solenoid windings, mechanical strength obs. 87−2277
network insulators, dry and mechanical cleaning influence on mechanical strength *(German)* 86−65735
optical cable mechanical characteristics, comparison with conventional cables *(French)* 86−65002
optical fibre dynamic strain cables 88−26820
optical fibre fusion splices, loss and mech. strength 85−18687
optical fibre splices, high-strength, strain required in proof test 85−50929
optical fibre strength in layer-type tight structure cable, long-term reliability 87−7131
optical fibre waveguide, strength increase of welded joints 85−35503
optical fibre waveguides low-loss with polymer coatings solidified by UV radiation 85−35502

mechanical strength continued
optical fibres, coated, fatigue and strength in water, 25-90°C 85−18698
optical fibres, hermetically coated, anti-thermal and high strength coating development 87−18621
optical fibres, hermetically coated, recent developments 88−33644
optical fibres, high-strength, long-length, for submarine cables, drawing process 85−35435
optical fibres, mechanical strength, influence of water 85−24324
optical fibres, polymer, anal. of molecular features for telecommunications appl. 88−39912
optical fibres, silicone-coated, influence of pH solns. on strength and dynamic fatigue 87−7084
optical fibres, strength, effect of glass/coating interface, pulsed NMR study *(Japanese)* 86−9490
optical fibres coated at 10 m/s speed, optical and mechanical props. 86−22116
optical single-mode, high-strength long-length synthesised by vapour axial deposition 87−7117
overhead line structural steel core replacement by composite materials 87−64187
overhead transmission line design climatic load calc. improvements *(Russian)* 87−78154
packaging of optoelectronic components, mechanical stress aspects 87−46914
polyimide films, uniaxially-stretched, conductivity and dielec. losses 87−25624
power plant equipment, US inspection of mech. props of metal, reliability 86−26663
radioelectronic apparatus design, vibration overloads and strength margin anal. 88−53127
single point TAB interconnect process, bondability study of inner lead bonding 88−57235
solvent-free polyurethane elastomers for electrical equipment insulation and sealing *(Polish)* 87−74473
steel, 17 Mn V7, grain refined, manufacture and props., for mine supports *(German)* 85−10253
steel components, EM NDT inspection of strength by spectrometric method 85−17028

SiO_2 silica fibre mechanical strength determ. *(French)* 87−7154
TiO_xN_y film sensors for the diagnosis of mechanical defects *(German)* 88−4403
Zr-Nb alloy welds, mech. and corrosion properties study in Cd and Cs 88−55980

mechanical variables control
this heading is restricted to those variables which are not covered by other specific headings. See also, for example, force control; thickness control; velocity control; vibration control
galloping control permits tower head compaction and line upgrading 87−71722
optical fibre cable installation techniques 87−8281
overhead line galloping control using weights and mechanical dampers for multiconductor bundles 86−51046
radial springs for electro generator slot wedge compression control 88−69296
spacecraft activities, engineering and software interfacing for thermal, structural and dynamic control 87−13658
tractor electronic draft control system for ploughing, application of microprocessor 87−51590
Transportation Electronics conf. Warrendale, PA, USA (Oct 1986) 87−43789
truck and bus electronically controlled mechanical automatic transmission 87−51597
vacuum circuit breaker cells, interaction between control mechanism and operation *(French)* 87−30857
vehicle electronic transmission control, present situation and future develop. 87−51587

mechanical variables measurement
see also elastic moduli measurement; force measurement; pressure measurement; shock measurement; strain measurement; stress measurement; torque measurement; vibration measurement
abrasion meas. test stand for weak current contacts *(German)* 87−66619
adhered layers separation work, automated instrument *(Slovak)* 87−70688
aerodynamic drag meas. using suspended body method *(French)* 87−79084
aerospace struct. rods dynamic yield strength determ., using laser interferometer 86−38875
asphaltic membrane deflection measurement for Marchlyn dam of Dinorwic pumped storage system 85−9561
autograph readout errors 85−48015
axle load sensor signal processing, using multivibrator ccts. *(Slovak)* 88−37707
bimetal bending meas. methods and standards 88−50421
brakes wear characts. testing, by temp. meas. of friction surface 88−4677
certification of reference means of measuring deformations 88−53887
coated glass surface friction meas. with vibrated diamond stylus 88−10170
conference, Prague, Czechoslovakia (April 1985) 87−22985
conference, Wroclaw, Poland, Sept. (1986) *(Polish)* 87−36296
cutting tools, threaded, automatic lead-error meas. machine 87−63512
deformation, holographic reconstructive images using incoherent multimode optical fibres 88−34157
deformation and strain, 3D measurement using holographic interferometry 88−8331
deformation meas. using spatial freq. modulation on holographic interferometry *(Japanese)* 88−4653
deformation meas. using strain gauges, data acquisition systems *(Spanish)* 86−55574
deformation response meas. of structure subjected to explosive load 88−22598
drift tube array, computer computer controlled wire tension measurement system used during construction 88−54399
elastic systems with friction, resistance to preliminary displacement meas. 86−24751
fibre-optic sensors for mechanical quantities *(Japanese)* 86−38348
friction coefficient between cable and duct 88−22150
friction coefficient between coated optical fibres and stranded loose-tube, meas. technique 86−44484
Hall sensor, linear and digital, principles and appl. *(German)* 87−3600
instrument for measuring the dynamic properties of rubber *(Spanish)* 86−31462
load cell for vehicle monitoring, using bulk optic Plexiglass 88−60713
load meas. in mine roof bolts, instrumentation 87−77429
loudspeaker driver parameter meas. techniques 86−17688
loudspeaker driver parameter meas. using home computer 86−17689
low-expansion materials for H maser 86−36363
low-power DC motor inertia moment measurement method *(Bulgarian)* 86−44415
machine- and instrument-test equipment *(Russian)* 86−44089
magnetic tape development 86−47957
metrology in mech. engng. including computer controlled measuring systems 87−41307
microcontroller concrete maturity meter 86−5010
microprocessor-orientated sensors for measurement of mechanical quantities *(German)* 87−14271
moment of inertia meas. by falling weight method, using microcomputer *(Slovak)* 88−60982
monitoring equipment, for large diesel engines, market potential 85−14757
monolithically integrated transducer technology 86−55651
nuclear power station operational diagnostics monitoring *(Czech)* 87−15426
oil platforms, structural, geotechnical and wave measurements, and stability monitoring 85−48082
penetrator/target interactions analysis, using flash radiography 88−53948

mechanical variables measurement continued
plastic deformation meas. by acoustic method, at temp. range 4.2 to 300K 86−31742
point impedance meas., bias errors 87−35251
probe based on Si high-Q torsional oscillators 86−15311
Q-factor meas. of bare insulating materials 88−53946
reactor pressure vessel head deformation anal. by holography 88−8330
refractory erosion, continuous monitoring method by heat flow meter *(Japanese)* 86−5606
resistance sensors for mechanical and electric variables meas. *(German)* 85−64127
revolution counter, fast digital *(German)* 87−35195
sensors technological developments book contrib. 86−5250
signal processing problems in the measurement of complex mechanical systems *(Hungarian)* 87−75824
skin surface changes monitoring, by versatile friction meter based on viscometer 85−31782
soil mechanics determ., testing automation *(Slovak)* 85−43460
solder pastes, tackiness meas., standard method 87−5541
statistical description of mechanical meas. system with oscillatory link 88−4652
steel stampability, nondestructive test instrument *(Russian)* 85−26514
strain gauge transducers for nonelectric quantity meas. in electrotechnics and energetics 88−29341
tool image processing for wear sensing and failure detection, unmanned metal-cutting applications 88−22517
transducers, anal. of conversion methods *(Russian)* 86−50068
transducers, classification of resilient elements *(Russian)* 86−50067
transducers for mechanical-meas., current status *(Russian)* 86−11550
transient excitations of mechanical vibrations intesting techniques *(German)* 86−31745
vibration analysis of micromechanical elements 86−44289
wooden pole tester for decayed poles strength determ. 85−21040
As_2S_3 fibres, IR, optical and mechanical props. 88−33643
As_2Se_3 fibres, IR, optical and mechanical props. 88−33643
In-glass vacuum seal, adhesion strength, meas. method 87−31613
TlBr-TlI, KRS-5, fibres, IR, optical and mechanical props. 88−33643

mechanical waves *see elastic waves*

mechanoception
3D structure sensing 86−59357
arm prosthesis for above elbow amputees based on extended physiological proprioception 88−54634
array sensor for robotics and human prostheses, using rubbery skin 86−56189
auditory implants and tactile aids for the profoundly deaf, speech perception data review 85−38218
bioacoustic research methods applic. to acoustic imaging and pattern recognition 88−27944
biomimetic tactile sensor with stress-component discrimination capability 88−42485
biosensors, device physics and peripheral signal processing 86−56085
body stability investigation by sway magnetometry 86−60715
chronic recording system for studying interactions between cat ipsilateral somatosensory cortical areas 85−15317
collar text display for the blind *(Japanese)* 85−26784
conference on sensors and their industrial appls., Detroit, MI, USA (Nov. 1986) 87−51733
contingency transcutaneous stimulator for patients with unilateral tactile and proprioceptive neglect 85−26785
dot matrix characters, perception through skin sensation by elec. stimulation 87−14822
electrocutaneous tracking, software and hardware implementation 88−68331
electrotactile communication, artificial, decoupling intensity variations from freq. variations 86−25272
electrotactile digital vocoder, FFT-based, for artificial hearing 88−68485
electrotactile vocoder for artificial hearing, computer system for quantitative evaluation 88−36510
EM mechanical stimulator for electrophysiological recording in man 85−43395
epidural spinal somatosensory evoked pot., technique for intraoperative recording 85−48309
evoked potential analysis, microprocessor based system, somatosensory appl. 86−56160
evoked potentials: visual, brainstem auditory and somatosensory: clinical uses 85−48275
evoked potentials processing with tactile and thermal stimulation; prototype system *(Spanish)* 87−21570
fighter aircraft, electro-tactile display technology appl. 88−68557
frequency response analysis methods for systems with random length changes 86−50459
hearing aids, tactile identification of preclassified signals 88−74882
magnetoinductive skin for robots 86−60246
multichannel nerve impulses, real-time waveform anal. with a multimicroprocessor system, mechanoreceptor appl. 85−26776
Portapitch II: a multichannel tactile display of voice fundamental frequency 88−54654
position and velocity finding, using sensor array and linear-period-modulated signal *(Japanese)* 87−76875
prosthesis, microcomputer-controlled, position proprioception 87−57233
somatosensory cerebral cortical activity, patterns reconstruction interactive graphics package 86−50575
somatosensory evoked pot. components, enhancement and dynamic time warping, multiple sclerosis appl. 87−63776
somatosensory evoked pots., short-latency, digital zero-phase-shift filtering 86−65430
somatosensory evoked responses, early, struct. analysis using computer implemented digital filtering, scaling and addition 86−50577
somatosensory evoked responses, early, superimposed components, computer generation of templates for parameters eval. 86−50576
somatosensory potential fields, colour imaging 85−48287
somatosensory responses rel. to bit-mapped colour imaging of human evoked pots. 87−50332
tactile array stimulator 88−74781
tactile display terminal for visually handicapped 86−65456
tactile hearing prosthesis, microprocessor-based, implementation 86−70434
tactile hearing prosthesis based on computer speech automatic recognition 88−68487
tactile sensing, industrial appls. 87−56675

mechanoception continued
tactile transducer based speech sound level monitor 87−42013
tactile vision substitution system, stimulation waveform for power consumption minimisation 88−54630
tactile vocoders for the deaf 88−5003
vector stimulator for neurophysiological studies of periodontal mechanosensitive units 88−42486
vestibular system research, EM pump 88−4874
vibrotactile sensation for the blind *(Japanese)* 88−5006
vibrotactile skin stimulation based wearable multi-channel auditory prosthesis *(German, English)* 87−50406
visual-vestibular stimulations using μp-based multiple pattern generator 85−53010

mechanoluminescence *see triboluminescence*

medical administrative data processing
see also medical computing
acute care medicine, communication requirements *(German)* 88−16803
AI appl. at the forefront of medical technology *(Japanese)* 88−68329
archiving radiotherapy information on a video disc 85−43426
cardiology, hospital laboratory tests, report generator package 85−53113
cardiology information LAN, CardioNet 85−42293
clinical medicine teaching using optical communications network 85−58405
clinical simulations, high-fidelity, appl. of natural language and laser videodisc player 85−63878
computer and communications network in geographically remote environment for medical education and health service 85−63372
computer controlled videodiscs for medical education 88−29143
computer networking in the health sector 88−3582
conference, engineering and computing in health care, Los Angeles, CA, USA (Sept. 1984) 85−32910
Corvus Omninet LAN, experience of appl. in hospital environment 85−63373
CoSy computer conferencing system, use at UMAB health sciences library 88−59850
Data Transmission Center packet exchange network appls. *(Japanese)* 87−69482
diabetes, home monitoring through Touch-Tone computer data entry and voice synthesizer response 85−64618
distributed hospital information system 85−25546
distributed processing with mainframe-based hospital information system 88−28433
education, interactive videodisc library 86−49857
effective patent life of pharmaceuticals in New Zealand, simulation 88−55900
electro-medical equipment management, computerised record system 86−25163
Electronic Highway, electronic communications network for medical profession 88−21600
Fujinomiya city hospital facsimile network system *(Japanese)* 87−55658
health care systems proposed by engineering side *(Japanese)* 88−68328
health care use of videotex 85−3119
healthcare, communications, strategic planning 88−8959
high technology revolution in future medicine *(Japanese)* 88−68327
highspeed multimodality digital image management system 85−4269
HORNET, hospital operating room network 88−28437
hospital automation, communication technologies *(Italian)* 87−69651
hospital broadband networking 88−9110
Hospital electronic mail system *(French)* 86−37369
hospital environment, integrated voice and data communication, using ROLM system 86−49308
hospital information system network 88−35185
hospital information system using distributed processing 87−29792
hospital network *(German)* 85−52066
hospital picture archiving and control system, simulation 86−49334
hospital/physician integrated communications networks 88−16805
image processing with digital radiology networks 86−49276
image technology uses and economic effects 86−44726
image transmission in a hospital environment *(French)* 85−4391
informatics access, conf., Dallas, Texas, USA (March 1987) 88−18
information processing system with personal computer access *(Japanese)* 86−37488
integrated clinical result database, role and design within client-server networked hospital information system architecture 88−28435
integrated network for acute patient care 85−63371
integrated on line medical image management systems 88−42595
intensive care microcomputer networks, universal communication infrastruct. 88−10458
interactive videodisc cardiopulmonary resuscitation instruction, evaluation 88−29141
IRADAQ-based physiological recording system for research and clinical hospital use, networked data acquisition 88−36549
Kurzweil AI VoiceEM system, speech technology for emergency room 88−14639
LAN applications, benefits 88−15079
LAN installation in teaching hospital, impact 88−28434
LANs, intrahospital, critical medical care and computer communications 87−48649
LANs, reasons for lack of growth 88−9109
laser card patient record system 88−42594
local area network for patient data management 87−57259
medical ADP, computer network at Johns Hopkins Medical Institutions 88−28432
medical informatics data transmission using computer communications network 88−46630
MEDLINE Update on closed-circuit television 88−22316
microcomputer appl. Conf. London, England (Sept. 1986) 87−23004
microelectronics applications in medicine *(German)* 85−15261
MIRAM, hospital local area network *(French)* 87−13455
MRC clinical research centre, computer facilities 87−55747

3D image using EKG-gated MRI images 87−57123
3D imaging applications to surgical and radiation therapy planning 87−63816
3D medical imaging system requirements 87−57121
3D modelling and interactive graphics for surgical planning and prosthesis, and implant design 88−48133
3D reconstruction of left ventricle of the heart from echocardiogram 87−50240
3D shape measurement of human body features using digital camera 87−35414
16-channel controller for implantable gait stimulation system, design 87−14943
above-knee prosthesis made in composite, CAD 88−48243
above-knee prosthesis with robot technology, optimal control *(Japanese)* 88−68476
adaptive control system for the training of coronary patients 88−42570
adaptive digital signal processing to improve speech communication for normal and hearing-impaired subjects 88−68449
adaptive filtering, heart sound elimination from lung sounds 87−57071
airborne carcinogen emissions, health risk assessment method and program 86−12045
ambulatory arrhythmia monitor, IBM PC/XT based 88−61382
ambulatory ECGs, anal. for patients with dual chamber pacemakers 85−9195
ambulatory ECGs, computerised anal. of ST segment changes 88−10363
ambulatory EEG, pattern recognition system using 2 MC68000 processors 86−56146
ambulatory monitoring device using the fan method as data-compression algorithm 88−74846
ambulatory pH recording, low-term, microcomputer system 87−35384
ambulatory pH recording system with computerised anal., 24 hr recordings 85−9129
anatomical surface replicas using moire topography and computer vision *(Italian)* 85−37987
anesthesia, patient monitoring, data acquisition and display system evaluation 87−21710
anesthesia records, semi-automatic data acquisition, using electronic clipboard 87−71149
angiogram segmentation, expert system 88−48143
angiograms, coronary artery boundaries estimation 85−31792
angiography, digital subtraction, locally distorted image pattern matching 85−36458
antepartum foetal heart rate recording and fast transmission by distributed microprocessor based dedicated system 86−25172
antiarrhythmia surgery, interactive cardiac mapping system 87−57206
arm muscle function adaptability, interaction with computer aided assistive devices 86−70436
arrhythmia CAI system *(Italian)* 86−50585
arrhythmia classification decision rule optimisation based on a fixed parameter set 85−9206
arrhythmia database of BIH/MIT, direction persistency of some virtual leads 85−9210
arrhythmia detector, real-world performance prediction, ECG databases appl. 85−9190
arrhythmia monitoring, cross-correl. beat sorting and anal., preliminary results 85−9208
arrhythmia monitors, intelligent, patient worn 86−50571
arterial pulse wave analyser, microprocessor-based noninvasive 85−53019
arthrograph, microprocessor controlled 85−43327
artificial hearts, adaptive control by microcomputer using blood circulation mathematical model *(Chinese)* 88−30042
artificial intelligence in biomedical and rehabilitation engineering 87−57052
artificial intelligence-based loss of consciousness monitoring system 88−68571
atrial fibrillation, computer detection on surface ECG 88−4973
atrial fibrillation subtype detection by processing of R-R interval time sequences 88−4974
auditory brainstem responses, computer monitoring 87−77665

medical computing continued
auditory evoked potential, modelling and simulation 86−60795
auditory evoked potentials detection in human sleep 86−70420
automated analyzer for a psychophysiological experiment 87−41920
automated temperature scanning for hyperthermia therapy 88−42569
automatic sleep scoring online anal. algorithms 85−48288
automation range of motion meas. in cervical spine using video images 87−14841
autoradiographic film densitometry using video digitising system 86−65410
autoradiography, microcomputer image processing system 85−43385
auxiliary processor for biomedical signals based on a signal processing chip 85−53009
back analysis system, computer-aided, for evaluating muscular deficiencies 88−54594
backward stepping, electromyographic study for development of elec. stimulation patterns 88−61391
battery tester, microprocessor-controlled, for Ni-Cd defibrillator batteries 88−61451
BIDAS, microscope imaging, communications, processing and analysis system for cytopathology 85−31830
bioengineering conf., Philadelphia, PA, USA (March 1987) 88−46
bioengineering conference, Worcester, MA, USA (March, 1985) 86−40381
biomechanics, body segment inertial properties determined with image processing methods 88−54546
biomechanics, tissue support interface pressure evaluator 88−54490
biomedical engineering conf., Fort Worth, TX, USA (Nov. 1986) 87−43814
biomedical image display workstation 88−29950
biomedical signals obtainment immersed in noise using shape recognition and averaging techniques *(Spanish)* 87−4007
biosignal wireless recording using digital memories *(German)* 85−43323
blood cancerous cell detection by digitally capturing TV pictures 85−53039
blood flow, relative resistance, automated computation using a pulsed Doppler flowmeter 88−29960
blood flow and physiological data collection, microcomputer base system 87−77604
blood pH, pCO_2 and pO_2, online monitoring system using 2-way cyclic pumping of lactate Ringer 87−35382
blood pH monitoring system, microprocessor-controlled, performance in vivo 87−35383
blood pressure, closed-loop control in critically ill patients 86−44680
blood pressure control during haemodialysis, use of microprocessor-based interface 85−64547
blood pressure management, microcomputer manipulation of patient generated blood pressure data 86−50615
blood vessel projections reconstructed from planar magnetic resonance images 88−48135
blood-rate detector, one-chip VLSI implementation using PPL 87−14836
body contour digitiser, 3D, microcomputer controlled, radiotherapy appl. 85−43381
body surface heart pot. distrib. dynamical representation by parallel processing computer system 85−43406
body surface pot. mapping, recursive computation of LF baseline drifts 87−21607
body surface potential mapping: a modular infrastructure 88−10380
body surface potential mapping based on cylindrical regression 85−48282
body surface potentials, 3D mapping 87−71143
brain bioelectrical activity, methods for computer anal. 86−18350
brain potentials, sequential colour mapping system 85−53047
brain radiosurgery, fast algorithm for 3D dose distribs. calc. 85−38211
brainstem auditory evoked pot., statistical pattern classification 88−23077
brainstem auditory evoked potential processing and pattern recognition 85−48313
brainstem auditory evoked pots., design of a flexible syntactic pattern recognition system 88−54562
branch orientated videotext interfaces *(Dutch)* 87−40325
breath sounds anal. and detect. of upper airway obstruction 86−29940
breathing rate variability in premature infants, meas. by microprocessor-based instrument 85−64546
broadband cable network in 1100 bed hospital 86−32406
Btx for expert medical information *(German)* 87−48537
CAD for customized femoral prosthesis 88−48234
calibration of medical instruments, software-supported procedure 87−57054
cancer treatment, radiation therapy planning CAD tool, 3D displays and user interfaces 88−74870
cardiac action potential reconstruction using Hodgkin-Huxley type models, integration methods 85−28185
cardiac action potentials and twitches, real time acquisition and analysis 87−35418
cardiac applications of 3-D display and analysis 87−57066
cardiac arrhythmia detectors, algorithm to reduce false positive alarms using dynamic electrode impedance monitoring 88−10370
cardiac blood pool, three dimensional display 85−38032
cardiac electrical activity recording using multichannel storage and display system 88−74845
cardiac electrophysiology, microcomputer-based cardiac stimulator 88−10368
cardiac image analysis corresponding to physical parameters 85−38120
cardiac mapping, real-time digital system 85−64545
cardiac mapping system, automated, for heart elec. activation sequence study 88−10397
cardiac output for surgical operation patients, microprocessor-based automatic continuous meas. system 88−54580
cardiac pacemaker, microcomputer-based follow-up system *(Chinese)* 87−8950
cardiac pacemaker monitoring, wide-area, second-generation computerised system 85−53099
cardiac pacemakers, transtelephonic monitoring, microcomputer as adjunct 85−64637
cardiac pacer rate control using endocardial electrogram parameters, adaptive controller computer simulation 88−48238
cardiac rhythm and artificial pacemakers simulation using ten element heart model 86−56185
cardiac signals, real-time adaptive sampling with the Fan method 88−68433
cardio-impedance function, data calc. algorithm and microcomputer program *(German)* 86−44671
cardio-pulmonary bypass, automatic flow control system *(Japanese)* 88−36512
cardiographs, HB 4760 series for ECG pictures recording and analysis *(Dutch)* 86−38791
cardiology appl., conf., Washington, DC, USA (Oct. 1986) 88−37
medical computing continued
cardiopulmonary resuscitation, chest movement dynamics and haemodynamics, computerised data acquisition system 88−10405
cardiovascular physiology application of data acquisition and analysis of pulsatile signals 87−77602
cardiovascular physiology data analysis system, BOXER 88−54470
cardiovascular systems, identification techniques applied to signal processing 85−64600
carpal geometry from CT scans without implanted marker 87−57124
catheterisation laboratory with off-line, fully automated anal. of 12-lead ECG and haemodynamic curves 85−59245
CCETS computer code for implantable tissue stimulators telemetry data eval. 88−48145
cerebral blood and tissue oxygenation of newborn infants, meas. system using near-IR transillumination 88−61283
cerebral blood flow, 3D analysis and display 87−57125
cerebral functions anal. by clinical neurophysiological methods 86−18327
chest wall motion meas. during high freq. oscillation, automated noninvasive method 85−64604
childhood disorders teaching, use of laserdisc technology in computerised information systems 88−90
chromosome analysis, parallel processor implementation 87−21525
chromosome classification constrained by expected class size 87−21524
chronotopocardiography: a new method for presentation of orthogonal electrocardiograms and vectorcardiograms 87−63779
clinical engineering, use of CAD/CAM as a decision-making tool in therapy eplacement of hip joints 85−59357
clinical medicine appl. of intelligent meas., analysis and examples 88−61229
cochlear implant, microcomputer-based multi-electrode system 88−68486
cochlear prosthesis, multi-channel, computer-assisted fitting 87−71172
cochlear prosthesis patients, computational model appl. 86−12040
cognitive feedback system, total neural prosthesis 86−12042
collimator design using ray-tracing techniques 85−48230
colonic EMG activity anal. using Epson HX20 microcomputer 86−5943
colour monitor screens use in inform. and data analysis, colour physiology parameters consideration *(German)* 86−60710
communications layers of the medical information bus 88−54691
communications networking needs of medical centers 87−34155
COMPASS comprehensive computer-assisted data collection, treatment planning and interactive surgery system 88−36531

datalink via satellite, use for transatlantic collaboration in medical research 85−52317
DECUS Europe conf. Amsterdam, Netherlands (Sept. 1984) 85−32913
DELTAvision, medical data and image processing system 86−11952
dental imaging and restoration 88−29952
diabetes, home monitoring through Touch-Tone computer data entry and voice synthesizer response 85−64618

medical computing continued
diagnostic electron microscope images, on-line archiving and enhancement 85−31826
dichotic stimulation for central auditory testing, audio tape production, computer programs 87−29699
DICOM-8 digital imaging computer for pseudo-3D imaging 87−29734
digital chest image compression through coding by synthesis 85−9134
digital image data standards 85−30278
digital image interface standard, ACR/NEMA illustrated protocol overview 86−32402
digital image processing techniques for meas. of wear in dental restoration 87−2653
digital image viewing stations: radiologist interests and attitudes 85−4271
digital imaging, X-ray transmission images, possibilities and limitations *(German)* 85−36342
digital imaging and communication standard, ACR/NEMA 86−32401
digital imaging systems, realistic approach to evaluation 85−4267
digital processing methods for analysing vegetative signals 85−38169
digital signal processing instrument, flexible 86−50471
digital signal processor for psychophysical data 85−38168
digital subtraction angiography, blood flow determ., software appl. 85−38051
digital tomosynthesis using a flat image intensifier tube as the detector 85−4282
display system, microcomputer controlled large-character, for intra-partum monitoring 85−31778
distributed clinical information system, use of remote procedure calls 86−55022
distributed data acquisition system for biomechanics research 88−48096
distributed processing, health care computing strategy 86−16903
Doppler US blood flow signals, spectrum-analysed, versatile microcomputer-based system 86−5911
Doppler waveforms identification, real time pattern recognition techniques 88−61330
dose distribution display techniques in radiation therapy 87−57221
ECG, 16-lead ST-segment precordial maps, Z 85−59313
ECG, 68HC11 microcomputer based heart rate transmitter using a real-time QRS detect. algorithm 88−48172
ECG, adaptive real-time compression algorithm with variable threshold 88−68410
ECG, analogue signal, digital quality enhancement 88−10391
ECG, arrhythmia detection in real-time, optimal filter design 85−15336
ECG, arrhythmia detector performance, confidence limits estimation 87−21603
ECG, arrhythmia mapping uncertainties 88−68436
ECG, arrhythmias and ischemic events anal., annotated database for algorithms evaluation 85−9203
ECG, automatic analysis method 88−68418
ECG, automatic cardiac pot. mapping with SATAPEC 87−57167
ECG, body surface mapping system with immediate interactive data processing 85−9218
ECG, body surface pot. maps, data reduction 85−9217
ECG, computer measurement programs, precision evaluation method 88−68412
ECG, continuous vectorcardiography, in acute myocardial infarction 87−21586
ECG, data compression algorithm for computerised signals 87−50367
ECG, data reduction and pattern recognition, significant point extraction algorithm 85−53063
ECG, digital filters for real-time signal processing 88−23076
ECG, foetal, real-time recording method 86−60782
ECG, foetal signal anal. 87−57191
ECG, freq.-domain QRS classification algorithm using an annotated ECG database 87−21593
ECG, heart rate variation assessment using a time-domain system 88−68426
ECG, HF, from Chagasic patients, personal computer-based system for anal. 85−48292
ECG, HF, microcomputer-based analyser 87−29769
ECG, Holter anal., fourth generation computer aided system: Mk4 87−21600
ECG, Holter tape anal., design and evaluation of a computer based system 85−53068
ECG, Holter-tape analyzer employing circuits for calculation of correlation coefficients 88−30014
ECG, long-term data, time-sharing system for rhythm anal. 88−54574
ECG, microprocessor-based QRS detect. algorithm 86−70416
ECG, microprocessor-based signal processing, rel. to design and anal. of quantised coeff. digital filters 87−35423
ECG, P wave recognition, CSE database in the development of a new algorithm 87−21609
ECG, physiological and technical influences 85−59298
ECG, power line interference estimation and removal 87−35416
ECG, premature ventricular contraction detect. in microprocessor-based bedside monitor, real-time feature extraction method 88−68434
ECG, prognostic value of quantitative anal. 85−9197
ECG, PVC detection algorithm for microprocessor-based bedside monitoring systems 86−56154
ECG, QRS averaging algorithm 85−59296
ECG, QRS detect., hybrid approach using general-purpose attribute grammar interpreter 88−68437
ECG, QRS detection algorithms evaluation using IBM PC 86−56151
ECG, QRS detection by template matching using real-time correl. on a microcomputer 85−38155
ECG, QRS morphology classification and ST changes detect., algorithms performance evaluation 85−53077
ECG, QRS onsets/offsets evaluation, European CSE project, Italian experiences 85−9213
ECG, quantitative, common standards 85−64592
ECG, quantitative investigation of QRS detect. rules using MIT/BIH arrhythmia database 87−29771
ECG, real-time signal processing using microprocessors, digital filters 86−5942
ECG, RR-intervals during atrial fibrillation, heart rate stratified anal. from ambulatory tape recordings 87−21598
ECG, S-T analysis of Holter tapes 85−53075
ECG, ST segment changes, computerised detect. 85−20929
ECG, ST segment changes in ambulatory recordings, automated anal. 85−9193

medical computing continued
ECG, ST-T measurement in Holter ECGs with the Hannover LKG program 88−4967
ECG, ST-T segment evaluation by discrete cosine and Fouriertransforms 85−53074
ECG, ST-T segment of 24 hr ambulatory recordings, rapid digital anal. 85−20928
ECG, statistical anal. with the Budapest computer ECG system 86−12007
ECG, surface, dual channel P-wave detect. via LMS algorithm 87−50370
ECG, syntactic approach to anal. 88−54572
ECG, system for 32-channel on-line exercise mapping 86−5958
ECG, template waveform recognition, results for CSE database 85−9211
ECG acquisition, anal., storage and retrieval system, microcomputer-based 85−59311
ECG adaptive prediction and location of R-R intervals from Holter tapes 88−54570
ECG ambulatory monitoring, real-time anal. vs. tape scanning systems 85−59294
ECG analysis 86−38785
ECG analysis, long term automated system, low cost microprocessor based implementation 87−21619
ECG analysis, signal averaging and beat to beat estimation 86−32336
ECG analysis, template matching and feature extraction methods comparison 85−53064
ECG analysis and interpretation, microcomputer-based system 86−12001
ECG analysis program, Hewlett-Packard 86−60780
ECG analysis program for MINGOCARE system 85−26770
ECG analysis programs, methods for noise testing 85−9212
ECG automatic detect. of ventricular fibrillation 87−8930
ECG baseline drift, cubic spline, polynomial and rational function approximations 85−28163
ECG baseline wander reduction using linear phase filters 87−14892
ECG classification, data compression technique 86−38787
ECG data reduction algorithm 88−10389
ECG data reduction and pattern recognition technique 85−43408
ECG databases, software interface for arrhythmia detector evaluation 87−21604
ECG forward simulation, computer program 86−50603
ECG interference estimation using digital filtering fast algorithm 88−74844
ECG interpretation online system using Bonner program 87−29778
ECG interval timer with computer interface 88−54556
ECG language, computer linkage to clinical history permitting the use of Bayes' theorem 88−10375
ECG mapping, adaptive online classifier implemented on a small computer 85−59307
ECG measurement programs, reference library for program evaluation 86−11975
ECG P-wave, algorithm for automatic detect. in single or multiple lead signals 87−21583
ECG P-wave, automatic detect. algorithm 86−60797
ECG P-wave detection by adaptive QRS-T cancellation technique 88−4972
ECG processing, ARGUS algorithm development: a decade of progress 85−53069
ECG processing, custom IC 88−10390
ECG program for anal. of 12 simultaneous leads during an exercise test, precision and accuracy 87−21611
ECG program for conventional leads, integration into a mobile ECG recording and evaluating system 85−20920
ECG program noise tests within the CSE project 85−59299
ECG QRS complex classification, pattern recognition techniques appl., review 85−9191
ECG QRS complex detect. with nonlinear digital filter 86−25237
ECG QT interval, correl. to heart rate, computer algorithm using digital filtering 88−4966
ECG QT intervals, algorithm for computer meas. 88−4965
ECG R wave peaks, assembly language program to measure time intervals 86−5935
ECG R-wave detection software for ambulatory monitoring 85−64606
ECG scanning system 88−54573
ECG signal analysis using mixed math. basis functions 86−32337
ECG signal software synthesiser 88−48187
ECG signals, frame-based understanding 85−42914
ECG syntactic recognition for QRS complex detection, attribute grammar approach 86−65446
ECG template matching and alignment in freq. domain, use of geometric best fit algorithm 85−59302
ECG wave boundary recognition by ECG meas. programs, influence of noise 88−23074
ECG wave recognition and meas., evaluation of computer program 86−12002
ECG waveform analysis by significant point extraction, data reduction 88−10354
ECG waveform analysis by significant point extraction, pattern matching 88−10355
ECG waveform characterisation by discrete cosine transform 85−9209
ECG waveform simulation, programmable 85−64607
ECG/VCG variability, computer-based system, graphic representation techniques 85−9186
ECGs, exercise, 8-bit microcomputer for online anal. 85−15338
echocardiograms, three dimensional reconstruction based on orthogonal sections 85−43376
echocardiography, volume estimation method using animal left ventricles 85−38035
echograph range resolution improvement using fast on-line deconvolution 86−32302
educational, interactive case study using video and voice recognition technologies 86−24138
EEG, ambulatory recordings, automatic detect. of spike-and-wave bursts 86−18329
EEG, automated morphological analysis by means of dynamictime-warping 85−59291
EEG, automated sleep scoring: a comparative reliability study of two algorithms 87−57147
EEG, compressed spectral anal., clinical appls. in OR/ICU settings 85−59282
EEG, digitized strip charts, signal anal. during Vasopressin injection 88−42557
EEG, display of prolonged recordings 85−4329
EEG, freq. anal., short-term variability 88−42544
EEG, human, computer method for ocular artefacts removal 86−50596

medical computing continued
EEG, multichannel real-time anal. on a dual microprocessor system 85−38156
EEG, on-line analysis 87−57162
EEG, pattern classification by adaptive segmentation and probability density function classification 86−5938
EEG, processing of compressed signals 85−48305
EEG, realtime processing using a high-speed coprocessor 86−50597
EEG, software simulation 86−11979
EEG analysis, microprocessor based power spectrum estimator 86−27384
EEG and evoked pot. anal. system, low cost, visual and auditory appl. 88−48178
EEG assessment of drugs with convulsant and anticonvulsant props., Apple II+ microcomputer based method 87−41974
EEG asymmetry and language ability, computer analysis 88−4947
EEG data acquisition and power spectral analysis using distributed microcomputer-controlled system 86−65443
EEG electrode-pop artifacts, cct. for automatic online real-time elimination 86−60783
EEG evaluation, rule-based microcomputer system 85−4335
EEG event oriented anal., time dependence and topographic relations 88−61368
EEG feature extraction and clustering during surgical anaesthesia 87−63804
EEG multi-computer based power spectra for the operating room 85−38161
eEG power estimation using Walsh transform: acomparative study 86−31316
EEG signal analyser type EJK-81 86−18351
EEG syntactic pattern recognition, attributed grammar approach 86−65445
EEG time series artifact masking 88−16742
EEG wave analysis histograms 88−74843
EEG waveforms compression and processing, interactive coder workstation 88−16748
EEG-sinus arrhythmia relation in man, computer spotted 87−57180
EKG CHALLENGER−a self teaching EKG computer program 88−36488
EKG tracings, chronic disease detect., computer-aided technique 87−8937
elbow prosthesis design emulator system 88−10432
electrical engng. sessions-Canadian engng. centennial convention conf. Montreal, Canada (May 1987) 88−18342
electro-oculographic system, automated, for retina pot. investigs. 86−18344
electro-oculography, data acquisition and modelling 86−11995
electrocardiac signal processing requirements of electrophysiology lab. 87−57177
electrocardiogram, real time evaluation using personal computer 86−50587
electrocardiogram digital model 86−25250
electrocardiogram reproduction by spline interpolation 85−64599
electrocardiograms, event detection algorithms 86−50566
electrochemical sensor, microcomputer-controlled 85−37568
electrocutaneous tracking, software and hardware implementation 88−68331
electroencephalogram, computer simulation of neuronal circuit models of rhythmic behaviour 88−61350
electroneurography, quantitative, facial nerve palsy assessment 85−38142
electronystagmogram signal analysis using computer 86−18341
electropharmacological signal treatment, operative system 85−9183
electrophysiological documents, digitisation for computerised storage and anal. 86−65432
electrophysiological research system with multichannel D/A conversion and information input to computer 86−18346
electrophysiological signal sensing, AGC module analogue implementation 86−44656
electroretinography and neuro-ophthalmology computerized system 85−64605
electrosurgical electrodes, paediatric dispersive, standard for thermal performance eval. 87−50387
EM field control in biological body by annular phased array systems 88−4931
EMDISP, visual display system with digital and analogue sampling 85−15262
EMG, automatic decomposition: validation and normative data in brachial biceps 86−32314
EMG, automatic signal processing method for decomposition 85−64589
EMG, clinical, basic problems of automatic analysis 87−3992
EMG, computer assisted search for linked potentials 85−53051
EMG, computerised, conf., New York, USA (April 1981) 87−2
EMG, quantitative, diagnostic yield of automated method 87−3997
EMG automatic analysis with ANOPS computer, monopolar electrode use 87−3993
EMG processor based on the amplitude probabilitydistribution 86−38789
EMG prosthesis control with trained computers 86−56190
EMG signal on-line analysis, microcomputer based neurophysiological measurementsystem 87−3994
EMG signal processing, inservice aid 86−11988
EMG surface signals, optimisation of digital processor 86−25232
EMG waveform anal. program DataPass 85−48315
endocardial electrogram time/frequency domain pattern, anal. to distinguish ventricular tachycardia from sinus rhythm 88−4968
endoscopic local hyperthermia with Nd:YAG laser, computer controlled Laserthermia 88−10417
engineering in medicine and biology, conf., Niagara Falls, NY, USA (Sept. 1987) 88−18336
epileptic interseizure pattern detection by spectral techniques 88−61371
evoked potential analysis, microprocessor based system, somatosensory appl. 86−56160
evoked potential processing based on multiple processors 85−38170
exercise ECG anal., evaluation of noise immunity of algorithms 85−53081
exercise ECG anal., versatile computer system 87−21579
exercise ECG system, for phys. working capacity meas. 87−21608
exercise ECGs, data processing 87−41969
exercise ECGs, interpretation rel. to predicted ST-segment depression 85−53082
exercise testing, computer-controlled, noninvasive detect. of anaerobic threshold 86−18283
experiment design process *(Slovak)* 85−43321
expert system on line building of a real time controlunit for a patient in intensive care 86−18371
extremities, functional control, selection of stimuli, computer-controlled system 85−48325
eye, shape and colour quantification of optic nerve head, instrument design 85−4311
medical computing continued
eye movement, electronystagmography test analysis system 87−57179
eye movement signal processing system based on IBM PC/XT 88−61389
factor analysis in Gamma-11 system 85−38167
factor analysis of dynamic structures in nuclear medicine *(Japanese)* 87−8922
feature extraction unit for bioelectric signals 86−56153
fetal QRS detection, weighted periodgram method 87−57155
film analysis systems and medical imaging applications, review 85−4320
filtering medical images with a new class of digital filters 88−28088
flash X-ray apparatus with spectrum control functionsfor medical use and Fuji computed radiography 85−64571
foetal biophysical parameters, event timer for microcomputer anal. 85−37999
foetal biophysical profile: antepartum assessment using a programmed microcomputer 87−21519
foetal continuous electronic monitoring and interpretation by Apple II microcomputer 86−70387
foetal ECG during labour, microprocessor system 88−68419
foetal ECG processing by adaptive noise cancellation 86−56152
foetal ECG waveform during labour, isolation and anal. 88−54585
foetal growth evaluation, and gestation dating, computer assisted 86−50541
foetal monitor, bedside, and obstetrical data system 85−31777
forearm alternate pronation and supination, diadochokinesia test, microcomputer based analysis 86−5880
Frank-lead vectorcardiogram, 24 hr ambulatory, computerised system for anal. of ST-T segment 88−10379
functional neuromuscular stimulation, computer-controlled multichannel stimulation system 85−53094
gait, temporal and spatial parameters meas. using a microcomputer system 87−21518
gait analysis, automated clinical laboratory 85−48219
gait and energy expenditure analysis of above-knee amputees, Vicon system 88−54487
gait correction two-channel orthotic stimulator *(Slovenian)* 87−14930
gamma camera, online distortion corrector 86−60723
gamma-angiography, application of image processing techniques 86−11935
gastric pH, computer-aided technique for long-term monitoring 88−54479
gaze direction meas. and treatment system for *(French)* 86−38781
GGOPT: an unconstrained non-linear optimizer for biomedical appl. 88−56160
glow curve plotter for TLD readers, microcomputer controlled 88−10455
graphic display module for biomedical computingapplications 86−17808
graphics in 3D space, medicine and chemistry 88−44526
hand assessment system, microcomputer controlled used for clinical meas. 86−25171
hand held computers and medical decision making 88−54462
hand rehabilitation instrument 88−48210
hand-assessment system, microcomputer-controlled, clinical applics. 86−32238
handicapped rehabilitation, engineering aspects, implementation and appls. 86−25253
hard copy of medical images, computer based direct digital film recording 85−9138
hardware and software for studying evoked bioelectric activity of brain 87−57137
head injury intensive care, integrated system for serial evoked pots. monitoring 88−48179
health physics instruments, automated testing and calibration using microprocessor-controlled CAMAC system 88−61479
hearing aid, cochlear prosthesis implant, electrical model, analogue simulation *(German)* 85−38236
hearing aid selection program, development 88−23115
hearing aids, automated system for individual selection 87−50412
heart, artificial, mag. actuated, CAD-system 88−54637
heart, digital angiography in freq. domain 85−38121
heart, left ventricle volume, model for accurate calc. based on radiographic images 87−71099
heart, left ventricular boundary detection in multiple gatedequilibrium cardiac blood pool scintigraphy 85−64580
heart, portable artificial, microprocessor-based signal generation 87−42008
heart, programmed stimulation, real time data collection 87−21628
heart potential images, dynamic display with parallel processing 87−41979
heart radiopaque myocardial markers computer recognition, for improved data anal. 85−26752
heart rate and arterial blood press. variability signals, auto-spectral and cross-spectral anal. 87−29764
heart rate recording, long term, with a portable computerised device 86−56147
heart rate variability signal, autoregressive modelling 86−32335
heart replacement systems, math. and mech. circulatory simulators 85−31881
heart signals monitoring technique, orthogonal lead extraction 86−32319
heat rate monitoring system, microprocessor-based 85−48314
HIDRA: hierarchical instrument for distrib. real-time anal. of biological signals 88−23075
high-definition image processor and filer, config. and appls. *(Japanese)* 86−38301
hip prostheses design and manufacture using generalized cylinders method and CT images *(French)* 88−23122
Holter ECG improvements through 16-bit microprocessor architecture 85−43409
Holter ECG processing, distrib. 2-channel system 87−21618
Holter ECG processing, improvement of morphology clustering through directed search techniques 87−21602
Holter ECGs, high-speed single-scan anal. with a microprocessor-based system 85−9202
Holter monitoring real time analysis using digital computer, diagnostics accuracy and clinical feasibility *(German)* 86−18328
hospital automation, radiology appls. *(Italian)* 87−71093
hospital bedroom communication and control system, Z80-based config. *(Spanish)* 85−4390
hospital environment, integrated voice and data communication, using ROLM system 86−49308
HP 4760 cardiograph family, ECG analysis 86−60779
hyperkalemia, use of computer to develop new ECG criteria 85−53078
hyperthermia system, computerised microwave, with two radiometers for thermal control and dosimetry 88−61433
hyperthermia treatment using 27 MHz waveguide applicator, relative heating patterns calc. 87−8945

medical computing continued
ICU monitor based on multiprocessing techniques 87−63798
IEEE proposed standard 1073 for medical information bus 88−54689
image anal. demonstration package tool, MENU, biomedical study appl. 85−15290
image analysis trends 88−54471

image workstation, networked, M/NET system features 86−32400
images and icons, conf., Arlington, USA (July 1984) 85−27935
imaging, 3D, using Pixar Image Computer, Philips Medical Systems 87−63740
imaging, digital sequential, system design implementation 85−31827
imaging equipment digital image transfer interface standard 85−4270
imaging tools for interpreting two and three dimensional medical data 87−57120
impedance cardiography, computer anal. of dZ/dt signals 86−56144
impedance cardiography, computer-automated impedance-derivedcardiac indexes 86−32225
impedance cardiography, real-time elimination of respiratory artifact 87−50365
impedance pneumography, cardiogenic artifact cancellation 86−56156
implantable gait stimulation system, 16-channel microprocessor-based controller, features 87−14942
implantable telemetry systems, computer-aided design tool 86−60770
implanted electronic systems, use of analog signal processing circuitry 87−6918
in vivo sound velocity in reflection, meas. accuracy 88−60992
in-vivo ultrasound tissue differentiation through the acoustic attenuation coefficient 88−61327
infarct size determ. by on line computer anal. of ECG 85−53080
information bus, IEEE P1043, prototype implementation 88−54692
information bus, uses and benefits 88−54690
information processing in medical imaging, conf., Washington DC, USA (June 85) 86−57112
instrumentation, artificial intelligence techniques appl. 87−41912
integer coefficient digital filters, errors anal., ECG appl. 85−43413
integrated and intelligent sensor systems, impact on medical equipment and methods 86−25179
integrated clinical neurophysiology system−Neuronet 88−42471
integrated network for acute patient care 85−63371
integrated on line medical image management systems 88−42595
integrated visualization of measuring information 86−59354
intelligent display system for ECG press. and nuclear medicine data 85−9131
intelligent instructional system for biomedical technologies 88−42472
intelligent MRI systems, signal processing design language 87−57127
intelligent recording system for signal analysis 85−38166
intensive care unit, patient monitoring system *(Japanese)* 86−5968
intensive therapy wards, bedside monitoring units connected to host computer 85−38183
interactive educational system in dynamic ECG 85−53065
interactive multimodality display for M/NET on-line PACS system 85−9135
interactive video, computer-aided, tape conversion to computer-controlled formats for continuing medical education 87−41234
interactive videodisc appl. in medical education 87−43825
interactive videodisc instruction for Navy medical corpsmen 86−49859
internal human conditioning system, multichannel microprocessor-interface chip 86−50031
intracardiac impedance plethysmography, computer modelling 85−38172
intracranial pressure monitoring unit with computerised signal processing, improved design *(Spanish)* 87−21523
intraoperative cardiac activation mapping, integrated system 87−63777
intraoperative cardiac mapping, 128 lead online computer system 87−57207
intravital microscopy using laser and computer assisted data acquisition/anal. 86−70408
involuntary random body movements, quantification by Doppfer radar 86−32306
IR capnometer, sampling, microcomputer-controlled 87−41941
IR thermograph processing system with microcomputer *(Chinese)* 86−5901
ischemic heart disease diagnosis by ECG, multichannel PISA processor development and appls. 86−56161
ISFET modelling using SPICE, for biosensor studies *(Italian)* 88−1618
isochronic epicardial mapping, minicomputer system 85−64601
isodose plotting for pen plotters 86−6010
isometric muscle strength and endurance measurements usingan apple computer 86−25185
JET personnel dosimetry service 88−10457
joint surface congruency and loading investigated 'in vivo' via quantified, interactive, 3-D imaging 87−57126
knowledge based system for decision making in medicalimages understanding 86−30050
LAN management and development in medical library 88−59651
LAN-based radiation oncology computer system 86−65455
laser scanner/printer system for radiological imaging X-ray film digitisation 86−32272
laser surgery, CO_2 beam modelling and integrated computer-based control problem soln. 87−41993
laser system, computer controlled Nd:YAG for interstitial local hyperthermia 88−10421
medical computing continued
Laserthermia: a computer-controlled contact Nd:YAG system for interstitial local hyperthermia 88−30038
learned volitive heartbeat control, computer averaging techniques appl. 87−63774
left ventricular edge detection from M-mode echocardiogram 85−9128
left ventricular ejection fraction, continuous monitoring using a miniature NaI detector and microcomputer 87−21558
left-ventricular pump design, computer simulation 87−50418
light transillumination through heterogeneous tissues, Monte Carlo model 86−32307
linear accelerator, computer-assisted set-up 85−31871
linear accelerator isodose distrib., off-axis energy change effect on TAR/SAR algorithm 85−38268
liver disease, diffuse parenchymal and malignant, diagnostic accuracy of computerised B-scan texture anal. 85−43342
liver echotexture classification using coherent optical-digital computer 86−32300
local hyperthermia direct-contact microwave lens application with microcomputer control 86−60811
locomotor EMG patterns, linear envelopes, automated extraction of activity features 86−65437
lossy dielec. media, 3D finite, boundary and hybrid element solns. of Maxwell eqns. 88−40459
magnetic resonance imaging, computer model to optimize image contrast 87−29714
magnetic resonance imaging strategies 85−43382
magnetic resonance imaging system, intelligent signal processing 87−57128
magneto-mechanical 3-D surface contouring system to be used for generating soft tissue anthropomorphic data 88−54485
mandibular kinesiograph, distorted signal correction based on self-organization method 85−38003
mathematics and computers in biomedical applications, book 86−26488
medical imaging, conf., Newport Beach, USA (Feb. 1987) 88−18300
memory testing unit, spatial arrangement, visuo-spatial memory performance assessment 85−37997
menu-driven user interface for physician's imaging console 86−32403
microcomputer appl. Conf. London, England (Sept. 1986) 87−23004
microcomputer based generator of medical therapy currents *(Croatian)* 87−14914
microcomputer system for routine and research use in cardiac pacing 85−9228
microcomputer-assisted haemodynamic and respiratory monitoring 87−29710
microelectronics, long term aspects, conf. Frankfurt am Main, Germany (Oct. 1984) 85−10314
microprocessor based hemofiltration system for renalinsufficiency 86−27383
microprocessor controller for respiration and anaesthesia 85−15345
microprocessor-based medical instrumentation, software quality assurance 85−64526
microprocessors and communications appl. for pacemaker, developments *(German)* 88−61446
microwave heating system using lens applicator, computer-controlled config. for localized hyperthermia 86−18375
microwave hyperthermia system using spot beam antenna for tumour treatment, robot arm scanning 88−54618
microwave reflectometry, frequency-domain, image reconstruction, parameter identification, simulation tools appl. 87−35179
Morse code computer input using the MOD Keyboard 86−25260
motion analyser for disabled driver assessment 88−54486
motor control performance tracking accuracy quantification system 87−14845
motor unit potentials with varying loads, automatic analysis 87−3996
MRI medical imaging system, configuration and function of computer system *(Japanese)* 86−70402
multi-modality image and communications systems design and architecture considerations 85−4253
multi-plane imaging with Matrox Multibus system 85−43386
multichannel electrogram recording, adaptive data reduction recording 88−68435
multichannel signal processing, programming environment 85−53067
multifunctional cardiac instrument, design case history 87−29698
multifunctional hand prosthesis, kinematic behaviour 88−48241
multimodality image display and image processing system 86−32404
multimodality image viewing station, architecture of prototype 85−4273
multimodality image workstation, functional specifications 85−31815
multiplexer, time-division, 4-channel, inexpensive, hospital appl. 85−26829
muscle contraction tests using BBC microcomputer 85−37988
muscle fatigue, real-time microcomputerized monitor based on median freq. shift in electromyographic signal 88−54593
muscle function anal., microcomputer system 87−21517
muscle strength, endurance and range of motion measurement with computerised system 88−54482
muscle strength testing with FET system, computer aided 88−54488
muscle therapy, quadricep contraction conversion into digital signal for microcomputer system 87−50381
myocardial infarction patients, computer program for serial ECGs anal. 85−9196
myocardial infarction patients, ECG mapping for continuous on-line monitoring 85−53073
myocardial perfusion, 3D reconstruction from multiple-view arteriography 88−4923
myoelectric signal analysis/identification, multimicroprocessor system 86−50586
myoelectric signals of neck and head, speech information 87−19414
neonatal EEG recordings, spectral detect. and elimination test algorithms of ECG and EOG artefacts 87−41976
neonatal phototherapy for hyperbilirubinemia treatment, effective methods and computer model 87−57223
neonates with low birth weight, data acquisition system for monitoring 87−3935
nerve and muscle signals, Smart Trigger for real-time spike classification 87−50362
neural evoked potentials, automated data acquisition and anal. 85−53049
neuroimaging, 3D, using octree encoding 86−50546
neuronal morphology, Golgi-impregnated, interactive microcomputer system for quantitative analysis 86−65404
neurophysiological monitoring in the pharmaceutical industry 85−43411
neurophysiological studies, microcomputer automation 87−57139
NMR imaging, computational techniques 85−43383

medical computing continued
NMR imaging, pulse programming assistant 87−57129
NMR imaging using static polarised linear gradient fields, fast algorithm 85−43384
nuclear medicine, data acquisition using a scintillation detector interfaced to a personal microcomputer 85−43398
nuclear medicine, microcomputer-based image processing 86−32351
nuclear medicine computer systems, hardware 85−64561
nystagmogram, computer anal., development and clinical trial *(German)* 85−48277
online information services, conf., Rotterdam, Netherlands (Oct. 1986) *(Dutch)* 87−40324
operator error reduction, role of computer in medical equipment 86−49938
ophthalmic fluorescein angiography, image acquisition and storage using video camera and disc 85−38119
optical computer with biological and medical appls., principle *(French)* 88−34783
optical videodisc in computer based education 85−63879
orthogonal ECG, computer interpretation of P wave contours by multivariate statistical anal. 85−53079
orthogonal ECG, derivation from limb and chest electrodes of conventional 12-lead system 87−41977
orthosis and computer-controlled movement 86−12043
oxygen mask arterial O_2 saturation monitoring system for pilot protection in fighter aircraft 88−68572
PAC in the Netherlands, digital reading room philosophy and design 88−36563
pacemaker's coil design using numerical model 87−57239
pacemaker control system, microcomputer-based, using blood temperature 85−38220
pacemaker design and artificial intelligence techniques 86−18379
pacemaker evaluation from ECG, use of expert system technology 88−5017
pacemaker evaluation using computer anal. of ECG 88−5018
pacemaker function anal. 85−53098
pacemaker inverse problem: computerised ECG anal. 88−36517
pacemaker modified ECGs, personal-computer-based software system for anal. 88−5016
PACS, American legislation and economic implications, data versus information distrib. 86−32268
PACS, automated, for digital modalities, cost-benefit implications 86−32399
PACS, commercial challenges 85−31832
PACS, integrated system concept development 86−32411
PACS, operational reliability requirements 88−36571
PACS, reliability issues, subsystem failures 86−32266
PACS and hospital information system integration need 88−36560
PACS database requirements and trends 88−36572
PACS design, architectures eval. 86−32267
PACS development, ACR-NEMA imaging and communication standard, compatibility 88−36568
PACS development, ACR-NEMA standard implementation and test facility development 88−36565
PACS development, ARC-NEMA standard simulation and design for fibre optics network image transfer 88−36567
PACS development, neuroradiology service concept evolution at N. Carolina Univ. 88−36566
PACS development at Georgetown Univ. Radiology Dept., USA 86−32410
PACS for medical applications, conf., Newport Beach, USA (Feb. 1985) 86−30030
PACS implementation, tailored approach 88−36558
PACS integration of radiological reporting systems 86−32409
PACS marketing, cost analysis of present image management methods 88−36559
PACS network architecture, layered approach 85−31833
PACS network for metropolitan area interhospital image exchange 86−32397
PACS related psychophysical research in Arizona Univ. Radiology Dept. 88−36555
PACS remote applications in teleradiology, CommView system experience 88−36574
PACS requirements investigation and analysis at Arizona Univ. Health Science Center 88−36556
PACS software tools and structure 86−32398
PACS total information management system for all medical images 86−32408
PACS viewing station, user-interface design 88−36573
paper chart replacement by microcomputer and video recorder, medical appls. 85−37989
paralysed leg muscle stimulation, computer-controlled system for walking simulation *(German)* 85−15348
patient monitoring systems, microcomputer role *(Japanese)* 86−5973
peripheral blood flow, computer-assisted meas. 88−42484
personal computer system for biomedical signal processing 88−54587
pharmaceutical network system for ordering drugs 86−59659
pharmaceutical printed filled capsules, automatic visual inspection method 85−30315
PHEO-ATTENDING, expert system which critiques patient workup: modeling conflicting expertise 85−26745
physician's workstation with real time performance 86−25199
physiological ambulatory data acquisition system 87−29713
physiological signal monitoring and processing using personal computers 88−42558
pictorial archiving and communication system, design considerations 85−31822
picture archiving and communication system, role of an image processing realtime digital disk 85−31820
picture archiving and communication system workstations: image processing and graphics 85−31819
picture archiving and communication systems 86−18296
picture archiving and communication systems, distrib. image processing and anal. 85−31821
picture archiving and communication systems, research trends *(Japanese)* 86−37261
picture archiving and storage, hierarchical storage and imaging display system 85−4268
plethysmography, whole-body, online real-time data processing system 87−3937
poisons information service, use of viewdata 86−16871
polychlorinated biphenyl hazards, transformer/capacitor risk management model 87−50439

medical computing continued
polysomnograph, real-time sleep study anal. with a personal computer 86−44679
post-operative fatigue assessment, microcomputer-based 87−29711
premature infants, micro-based monitoring/data acquisition system 87−14837
programmable cardiac electrostimulator *(Spanish)* 88−61363
prostheses controlled by EMG signals with electrocutaneous stimulation feedback, operator's charact. *(Japanese)* 88−54628
prosthesis, microcomputer-controlled, position proprioception 87−57233
prosthesis, upper limb neural, command channels 88−61464
prosthetic heart valve, sounds time-domain modelling 86−29941
prosthetic heart valve test apparatus, microcomputer-based data acquisition system 87−21664
prosthetic limb, manufacture, shape sensing, CAD approaches 87−71178
prosthetic manufacture using computer graphics and CT image data 87−42009
prosthetics, computer design of custom femoral stem prostheses 87−42010
prosthetics fitting, optical noncontact 3D body measurement 87−21531
Proton Therapy Facility, design and appl., control system 88−61425
pulmonary obstruction diagnosis using computerised pattern-character analysis of flow-volume curve 86−65402
pyroelectric thermal imaging protein system, microcomputer-aided, development and applic. to pain management 86−50532
QRS detection algorithm, real-time 85−48281
QRS detection using multi-lead ECG data, optimisation 88−4975
QRS-complex characterisation and detection with microprocessor 86−11985
quadratic logistic discriminant analysis methods, ECG measurements 85−60845
quantitative CT measurements: the effect of scatteracceptance and filter characteristics on the EMI 7070 86−32264
quantitative densitometry of autoradiographs, semi-automated system 86−32249
R-wave triggered system for hemodynamic measurements in forearm, microcomputer-based 88−61219
radiation therapy, automation and computer control of accelerators 87−63833
radiation therapy, computer use, conf., Toronto, Ont., Canada (July 1984) 85−32908
radiation therapy dose planning, algorithm for using CT data 85−38210
radiation therapy planning using color graphics imaging workstation 86−32356
radiation therapy treatment planning using concurrent programming 88−42572
radiation therapy virtual simulator 87−50400
radiation treatment, intersection of shaped radiation beams with arbitrary image sections 87−57212
radiation treatment planning, computer technology appls. in medicine 85−38209
radio oncology irradiation parameters, monitoring and documenting using Dynbaver systems 85−4348
radiographic heel effect, anode curvature effect, computer modelling 85−59258
radiographic image compression, error-free and irreversible techniques 86−32278
radiography detection improvement of low contrast round objects by contrast detail diagrams, digital processing capabilities evaluation 85−38074
radioisotope laboratory, digital monitoring system, personal computer appl. 85−64643
radiology, computer assisted, conf., Berlin, Germany (June 1985) 86−57096
radiology department, computer technology impact 85−64584
radiotherapy, desk top microprocessor appl. for treatment verification and other tasks 85−38213
radiotherapy, microcomputer use by radiographers 88−30040
radiotherapy apparatus, microprocessor-leased system 88−5000
radiotherapy planning, γ-ray SM-4 computer-assisted programme complex *(Russian)* 85−38190
radiotherapy simulators, microcomputer upgrade 85−43425
RAPID database, dose equivalents to organs from intakes of radionuclides 88−23142
real-time digital image sequence processor 85−4274
real-time digital speech processing system for an auditory prosthesis 88−72858
real-time harmonic profile estimator for clinical paediatrics, analogue processor implementation 86−29939
real-time simulator timing framework for cardiac model 85−26793
realtime tracking and performance analysers for use in drug evaluation 85−43329
reference services via electronic mail 86−37351
rehabilitation of handicapped, technology, conf., Minneapolis, MN, USA (June 1986) 87−16294
reliability and safety aspects of computerised medical devices 87−8887
respirator data acquisition system *(Italian)* 88−30043
respiratory pressure data analysis for detecting breathing circuit faults in ventilated patients 87−29712
respiratory waveforms from ECG traces 87−14891
review of computer technology in hospitals vs. quality and costs of health care 88−48258
ridge regression and its application to medical data 85−60844
robotic aid for the severely disabled, develop. 88−61470
robotron M 2300 clinical dosimeter 85−38256
robust alternatives to traditional analysis of variance for biomed. use 88−56106
running frequency spectra estimation using Kalman filter algorithm 88−66493
saccadic eye movements, anal. with a microcomputer 86−60786
saccadic eye movements, detection using a nonrecursive adaptive digital filter 86−25169
safety analysis, formal and software engineering process in pacemaker industry 88−74887
SAMICOS, sleep analysing microcomputer system using multichannel EEG 87−14898
satellite technology for telecaring in Central America 88−22023
scalp topography mapping of event-related potentials, microcomputer-based 86−70414
scanning, aid of UPS 88−5310
scintillation gamma cameras, spectral-spatial-sensitivity distortion trends and correction method 85−48231

medical computing continued
scoliosis screening, fast digital image processing of moire topographic patterns, electronic aid 85−38132
semi automatic computerised system for producing heart and coronary arteries images 87−3984
semi-automatic medical image processing 86−25202
sensory evoked potentials and EEG spectral analysis for clinical neurophysiology laboratory, multiprocessing computer system 86−25236
serial ECG anal. from myocardial infarction patients, computer program 86−18333
serial section image 3D view by binocular stereo 85−38125
signal period measurement of PC and application to cardiac interval and blood pressure analysis 87−77601
signal preprocessor, near-optimal, for positive cardiac arrhythmia detect. 85−38154
signal processing system, 16-bit microcomputer-based 85−43412
signal processing techniques 87−57072
simulation of surgical procedures with computer graphics 88−48199
singular value decomposition of radiometric integral eqn. 86−32301
skin response to pressure loading by the bent finger technique 88−54489
sleep recordings, polygraphic, online scoring, Bayesian recursive filter 86−32332
sleep scoring system, online analysis based on Bayes decision theory 85−38171
sleep stage scoring, online automatic anal. with microprocessor 86−32331
sleep states, real-time identification 85−48303
slow vertex response electric response audiometry, medical consulting system 87−57178
software architecture of real-time medical instruments 86−60707
software driven medical laser system for tissue fusion at 1.32 μm 88−10420
software tools for medical instrumentation 86−60708
solid state portable monitoring system for ambulatory patient, ECG, EEG or EMG signal processing 88−48189
somatosensory evoked responses, early, struct. analysis using computer implemented digital filtering, scaling and addition 86−50577
somatosensory evoked responses, early, superimposed components, computer generation of templates for parameters eval. 86−50576
Southcon '86, conf., Orlando, FL, USA (March 1986) 87−5141
SPEECHEX, C-based software talking aid for the blind and handicapped 86−50608
sperm motion analysis using automatic video image digitization 86−30982
spherocardiogram: new information displayed by computerdata explication from Frank ECG 86−32338
spinal cord injured patients, online ASYST data collection system for spasticity evaluation 87−57068
spinal cord integrity monitoring, microprocessor based online system 85−48278
spinal somatosensory evoked pots. monitoring during surgery, microprocessor-based system 87−14901
stepwise maximum likelihood estimation of smoothing factors of kernel functions, medical decision application 85−28110
stereotactic computer-aided neurosurgery: CO_2 laser resection of CNS tumours 86−56181
stress-test medical system, automatic, microprocessor-based 88−48101
structure transfer between sets of three dimensionalmedical imaging data 86−32357
sudden infant death syndrome, computerized acoustic detection of obstructive apnea 86−32251
sudden infant death syndrome, microprocessor-based home monitor 87−3936
surface ECG, P-wave detection via LMS algorithm 88−4971
surgical simulation in 3D, interactive graphics editor 87−14884
syntactic ECG processing, review 86−65447
syntactic pattern recognition of intermittent EEG activity 85−43400
tachyarrhythmias surgery, programmable stimulator: data acquisition, processing and display system 87−21629
tactile hearing prosthesis based on computer speech automatic recognition 88−68487
telephone management boards for man/microcomputer telephone communication, medical appls. 86−64807
three-dimensional display of radiation therapy planning 88−4998
thrombogenesis real-time visualisation and analysis 86−56109
time-resolved muscle expts., data acquisition system 85−43351
time-variant data compression and retrieval, ECG appl. 86−56162
time-varying image sequence processing, artificial intelligence 86−5919
tissue blood perfusion, computer-based system for continuous on-line meas. using a thermal method 87−21516
TLD reader system, microprocessor-controlled 88−74901
TMS320-20 programmable master hearing aid with adaptive noise reduction 88−74884
tomography cassette, simultaneous improved, linear tomography use *(German)* 85−38079
topographic EEG analysis, computerised, multi-channel amplifier system design 88−10360
treatment planning, past shortfalls and future needs 85−38208
tridimensional form acquisition apparatus, orthopaedic shoes design appl. 87−49597
TV image processing technology, industrial and medical appls. *(Japanese)* 85−36360
ultrasonic digital image segmentation, statistical approach 86−70390
ultrasonic imaging, introduction and effect of computers on image quality 88−4909
ultrasonography, B-scan image anal., power spectrum approach 85−38114
ultrasound parameters meas. in clinical practice, electronic analogue digital pulse analyser 87−57132
upper limb electrostimulation: programmed hand function 87−57198
urinary sediments classification procedure *(Japanese)* 85−41982
urodynamic data-acquisition and anal. system, microcomputer-aided 87−3931
US, attenuation coeff. of soft tissue determ. time-domain method 86−70411
US B-mode images displacement distrib. meas. in biological tissues *(Japanese)* 88−61321
US imaging techniques, transmission tomography for biomedical appls. *(Dutch)* 86−56110
US tissue assessment for cancer therapy using computer simulation 86−32361
usage trends, problems, and safety technology in computerised medical devices 86−50466
users society, conf. Cannes, France (Sept. 1985) 86−26500

medical computing continued
VCG/ECG database consisting of 30 mins.-long X, Y and Z tracings 85−9198
ventilated neonates, online meas. of mech. parameters with rejection of unrepresentative cycles 86−50472
ventilatory parameters of neonates on assisted ventilation, computer analysis 85−31861
ventricular arrhythmias, detect. by fast Fourier transform anal. 85−53066
ventricular arrhythmias, portable microprocessor-based system for electrophysiological study 85−20925
ventricular depolarisation and repolarisation, 3D computer simulation *(Japanese)* 88−4957
ventricular fibrillation detect. using bedside monitoring system, fast real-time algorithm 88−10392
ventricular tachyarrhythmia detect. from intracardiac electrogram, integrative algorithm 88−4969
vest cardiopulmonary resuscitation, computer controller 88−54626
video discs, development and use for medical education 86−24150
videodisc technology, medical image information appl. using artificial intelligence programming 86−50477
VIPER, hardware for real-time calc. of inner prods. for biomedical signal processing, ECG appl. 85−26779
virtual leads for ambulatory ECG monitoring, arrhythmias computer detection 85−31838
visual communication system for severely impaired aphasics 87−14922
visual display, programmable, for diagnosing, assessing and rehabilitating unilateral neglect 87−35385
visual evoked responses, automatic classification 85−53048
visual perception testing, computerised, efficiency limit determ. *(Polish)* 86−44113
visual simulation by computer of contrast sensitivity deficits induced by laser and chem. antidote exposure 86−65463
visual-vestibular stimulations using μp-based multiple pattern generator 85−53010
vocal fold vibration and speech signal, simultaneous high speed digital recording 87−29707
vocal prosthesis, hand-controlled computer-based system, development and testing 86−5996
voice-based telephone-linked computer system 88−73500
VOLNA real-time system for studying excitation wave processes in myocardium 87−57140
volume rendering algorithms for the presentation of 3D medical data 87−57065

PACS IMAGIS project, image network simulation 87−57258
PACS implications of peak data rates for image generation 88−36550
PACS module for Coronary Care Unit, digital remote viewing station 88−36537
PACS module for paediatric radiology, CRIS image database structure 88−36535
PACS module for paediatric radiology, CRIS image display stations 88−36536
PACS module for paediatric radiology, image acquisition 88−36533
PACS module for paediatric radiology, image communication 88−36534
PACS module for pediatric radiology, current status 88−36532
PACS prototype totally digital radiology department, conception and initiation 88−36552
PACS radiologic workstation user interface design, model 88−36554
PACS radiology console, single-screen, prototype development using human computer interaction techniques 88−36545
PACS radiology image review console, psychophysics use as system design aid, comparison with film-screen 88−36544
PACS radiology workstation, evaluation, protocol development 88−36542
PACS radiology workstation, high-resolution, diagnostic efficacy eval. 88−36548
PACS system, ACR-NEMA compatible, compressed medical images and enhanced fault detection 88−21087
PACS system, ACR-NEMA digital imaging and communications standard 87−21702
PACS system, ACR-NEMA interface standards, practical and strategic implications 87−21704
PACS system, ACR-NEMA standard data dictionary, radiologist's perspective 87−21703
PACS system, ACT-NEMA exchange media standards, progress and future directions 88−23146
PACS system, algorithm for activation of images in multilayered storage system 87−29839
PACS system, architecture for image filing and indexing system 87−29843
PACS system, data compression scheme design, adaptive predictive coding and applic. to radiographs 87−21538
PACS system, digital workload in large radiology dept. 87−14958
PACS system, general purpose opt. disc system with radiological imaging applic. 87−14953
PACS system, interactive surface display system of three-dimens. object 87−77648
PACS system, metropolitan area med. imaging broadband network experience, leased CATV bandwidth use 87−20244
PACS system, modular architecture and objectives, product evolution 87−29837
PACS system, phased implementation at Duke Univ. Med. Centre (USA) 87−21707
PACS system, project experience with image storage on opt. disc 87−21706
PACS system, prototype storage system experience at Univ. N. Carolina (USA) 87−29838
PACS system, prototype system implementation at Univ. N. Carolina (USA) 87−21708
PACS system, radiological workload information, simulation model 87−14959
PACS system, radiology operations system requirements 87−14954
PACS system, signal detection theory applics. in medical imaging 87−14964
PACS system, simulation in hospital environment 87−14962
PACS system, software development issues for network node equipment 87−28116
PACS system, videodisc recorder use in radiology dept., educational strategies development 87−14963
PACS system automated linkage with radiology information system 87−29835
PACS system design, human factors considerations 87−21709
PACS system design, information flow analysis 87−14955
PACs system design, radiological information flow between depts. and outclinics at Utrecht Univ. Hosp., Netherlands 87−14956

medical diagnostic computing continued
PACS system development, patterns of usage of radiographic studies 87−14957
PACS system development at Univ. Hospital Brussels (Belgium) 87−29840
PACS system interfacing to radiology information systems, functional requirements 87−29836
PACS system planning, digital image file storage requirements eval. 87−14960
PACS system prototype at Univ. Hospital of Nantes (France), DIMI project developments 87−29842
PACS system with fibre optic network, physician-friendly digital image display console development 87−20531
PACS systems and radiation therapy planning, data and workstation requirements 87−29841
PACS systems for digital image management, design considerations for networking, display and archiving 87−21701
PACS with on-line communication between image workstation and CT scanners, pilot project 88−36557
paediatric computerised ECG program, 8 yrs. experience in development 85−9200
paediatric vectorcardiograms, computer interpretation by multivariate statistical classification techniques 85−9199
panting manoeuvre signals generated in whole-body plethysmography, electronic simulator 86−50473
pathology workstation, high performance, using an automated multispectral microscope 87−77619
pattern recognition, conf., St. Andrews, Scotland (Sept. 1985) 87−16240
perinatal monitoring and diagnosis with contraction stress test, automatic unit 88−74791
peripheral artery acoustical imaging and processing using 20 MHz US system *(Japanese)* 88−16708
PET, high resolution and high speed data acquisition 86−50502
PET, real-time digital coincidence processor 86−50514
phonocardiogram, digital signal processing 88−54535
picture archiving and communication systems, implications for the practice of radiology 87−29739
PISA system, minicomputer in diagnosis of cardiac disorders 86−56163
pneumoconiosis opacities in chest X-rays, computer recognition method 87−50295
portable continuous blood pressure monitor utilizing an M68705 microcomputer 87−21576
portable diagnostic radiometer, microwave, battery-operated with on-board microprocessor and LCD display 87−50285
portable microprocessor-based cardiac monitor with RAM for QRS complex storage 87−57157
portal image digital restoration using inverse filter 88−68379
positron emission tomograph simulation, high spatial resolution, based on multiwire proportional chambers, imaging capabilities 87−77645
preprocessing in EEG anal. system, rejection of artefacts 88−54591
pseudocolour encoder for medical imaging, using microcomputer 88−10341
PULMA-01 microprocessor system for testing respiration 88−36423
pyroelectric thermal imaging protein system, microcomputer-aided, development and applic. to pain management 86−50532
QRS detector algorithm for real time applics. with low S/N ratios 88−68416
quantitative autoradiography, compute-based, calibration procedure, model for nonlinear response of film/camera 88−42509
radiograph digitising system optimisation, software method 88−68381
radiographic film digitisation and texture analysis for digital classification of pulmonary opacities *(German)* 88−61315
radiographic image enhancement, flexible real-time, with high-resolution analog opt. system 88−36448
radiographic image sequence coding using adaptive vector quantisation 88−23147
radiographs, digital, image processing, autoranging and renormalisation vs. histogram modifications 88−29969
radiography, digital, uniform perceptual quantisation effects 88−36453
radiography, digital image display format effect on perceived image quality 88−36543
radiography, filmless, digital data cards 88−36570
radiography system TCR 201 87−8913
radiography system using an imaging plate as an X-ray sensor, TCR-201 87−21552
radiologic automated diagnosis (RAD) of neuroimages interpretation 87−35410
radiological diagnostic reporting system with touch activated display 88−74905
radiological image compression system, expandable modular approach 88−23148
radiological image transfers over local area networks 88−48256
radiological images computing, digital imaging network project at Georgetown University Hospital 88−29980
radiological reporting, automatic system using speech recognition 88−16709
radiology, computer assisted, conf., Berlin, Germany (June 1985) 86−57096
radiology, use of digital visual communications and image storage *(German)* 85−38077
radiology image quality evaluation chain setup 88−36561
radiology image quality evaluation on CommView System 88−36562
radionuclide cardiography, first-pass, forward stroke volume evaluation 88−61245
RADPLANET−a functional radiology PACS and much much more 87−62696
rapid angiographic technique to measure relative coronary blood flow 87−50220
real-time analysis of intracardiac electrograms, automatic arrhythmia diagnosis and electrical stimulation therapy 88−4959
real-time blood flow imaging system using Doppler ultrasound *(Japanese)* 88−4920
real-time multitasking multiuser nuclear system for clinical applics. 87−63742
real-time spectral analyser using ZX Spectrum computer, for medical appls. *(Polish)* 88−16745
retina automatic diagnosis, image processing system 88−74824
retinal function tests including ERG and EOG, microcomputer anal. 88−68429
retinal laser Doppler velocimetry, appl. to computer-assisted clinical use 88−48104
rheoencephalography diagnostic system, automated, for cerebrovascular function eval. 87−50346
rule-based decision system for sensory evokedpotentials 86−56139

medical diagnostic computing continued
scanning system, two-mirror rapid frame rate galvanometer scanning, reson. scanner/dynamic focusing mechanism 88−35910
SHIMaDZU intelligent medical imaging system *(Japanese)* 87−7843
Shimadzu magnetic resonance imaging system, SMT-50 *(Japanese)* 87−7845
signal processing, user friendly programmable filter module 88−44284
single exposure dual-energy digital radiography 88−29992
sinogram Fourier decomposition props., emission CT appl. 87−75886
skin diagnostics by shadow moire topography, visibility calc. using Sinclair Spectrum computer *(Czech)* 87−8908
sleep polygraphic traces, automated anal. and conception of diagnostic aid system *(French)* 85−43401
sleep stage scoring by patient monitoring and expert system 86−65439
soft tissue segmentation and three-dimens. display from CT and mag. reson. imaging 88−36449
somatosensory cerebral cortical activity, patterns reconstruction interactive graphics package 86−50575
somatosensory responses rel. to bit-mapped colour imaging of human evoked pots. 87−50332
sounding thermometer, identification by Prony's method 87−50219
source separation by adaptive singular valuedecomposition, foetal ECG appl. 86−64291
speckle reduction in pulse echo images via phase domain 88−28055
speckle reduction processing of US images 88−28056
SPECT cone beam collimators, noise charcts., comparison with parallel hole collimator 88−61306
SPECT determination of organ volume 88−29972
SPECT system assessment w.r.t. aerosol lung imaging 86−60727
SQUID magnetometer, RF, for biomag. field detection, digital control unit 87−41458
STEM, diagnostic, image compression and enhancement system 85−64582
STEM image digitization, computer archiving and image enhancement 85−64581
stereoscopic display, computer produced, radiology, patient diagnosis 88−48130
stomach cancer cytology, image processing 85−20910
stomachs, abnormal, computer-based discrimination using radiograms 85−53018
storage phosphor system for computed radiography: destructive scanning 87−14864
storage phosphor system for computed radiography: screen optics 87−14865
stroke patients, microcomputer-based assessment and treatment-planning 87−71140
structural anal. in medical imaging 87−57116
surface electromyographic signals, computerised statistical classification and diagnosis *(French)* 88−23092
surface EMG signal adaptive modelling and classification 87−50355
surface EMG with appl. to fatigue, autoregressive modelling 87−50350
surface manipulation, interactive, for intrathoracic determinants of cardiac geometry, investigation 88−48134
surface reconstruction from cross-sectional contours 88−48107
tachycardias, automated recognition from electrograms, decision rules for diagnosis 85−9194
Tc 99-m gated blood pool studies, automatic diagnosis evaluation, artificial intelligence and image understanding 85−31831
teleradiology, system for radiograph digitisation, display and archiving 86−11954
TEM autofocusing using parallax 88−19646
thermographic images anal. for early breast cancer detection, Karhunen-Loeve transform 88−74834
thermography system 88−48137
three-dimensional angiography with digital flashing tomosynthesis 88−29984
three-dimensional computer graphics/vision workstation for biomed. information modelling and display 88−36538
three-dimensional image reconstruction, computer tomography appl. *(Czech)* 86−43343
three-dimensional reconstruction algorithm for diverging X-ray beams 87−63754
tissue classification and tumour detect. from ultrasound images 88−61249
tomographic image construction, Hankel transforms series computation algorithm 85−4305
tomographic image reconstruction using Hankel transform technique 85−4304
tomographic images and transforms in Radon space, recognition probabilities 88−14755
tomography image reconstruction using convolution backprojection method, simulation study *(Chinese)* 85−26751
tomosynthesis using a digital radiographic system 87−14866
Toshiba computed radiography system, database development for parameter identification and performance improvement 88−29971
trends in medical diagnostic imaging systems *(Japanese)* 86−5922
TWODIMSY, digital signal processing for US research, medical appl. 87−57112
ultrasonic medical diagnosis, microprocessor appls. *(Russian)* 86−38988
ultrasonics, digital diagnostic workstation development 87−50292
ultrasound, signal processing for spatial averaging 88−4934
ultrasound Doppler velocimeter signals anal. using personal computers 87−29723
US, high speed imaging with linear phase arrays, parallel processing technique 86−11949
US and NMR digital picture processing in medicine *(German)* 88−36431
US image processing 88−16686
US image processing, Doppler echocardiography appl. 87−3980
US images, microcomputer-based image processor eval. 88−54512
US images, noise reduction by digital filtering 87−50238
US imaging, digital beam-former using uncorrelated pulses 88−30205
US imaging, Hewlett Packard 77020 A computerised system, config. and appls. *(French)* 85−26765
US imaging, microprocessor controlled interface for acquisition for polar coordinate data 87−21559
US imaging resolution enhancement by time-varying filter 88−29975
US nonlinear parameter CT using nonlinear interaction of sound waves 88−23066
US tomography, resolution improvement using adaptive filtering *(Japanese)* 87−21553
uterine activity, elec. and mech., computer analysis, algorithms 86−60789
uterine cervix dilation force measurement system 88−61218
vascular and urethral parameters meas., microprocessor-based signal processing system 87−29718
vector cardiogram based cardiopathy computer system 87−50356
vectorcardiogram computerised interpretation and visual ECG anal., impact of clinical information 88−10376
vectorcardiographic diagnosis and statistical anal. system 86−18356
ventricular fibrillation detect. by sequential hypothesis testing 88−54576
ventricular motion analysis automation 87−3934
virtual image processor, UNIX-based prototype 88−36530
visual functions evaluation, computer aided system 87−57077
voice technology tool in healthcare 87−63708
white blood cells kinetics monitoring 87−71088
whole body X-ray CT scanner SCT-2500T *(Japanese)* 87−8917
whole-body CT scanner, Toshiba Model TCT-70A, design and features 85−38112
Wolff-Parkinson-White anomaly, computerised ECG diagnosis 87−21585
X-ray cineangiograms, computer processing algorithm for automatic extraction of left ventricular boundaries 85−53045
X-ray CT, vel. velocity modulated scanning technique for ring artifacts elimination 87−77646
X-ray CT image reconstruction using direct 2D Fourier transform method, interpolation technique 86−44651
X-ray image anal. system with high resolution CRT display and MC68000 microcomputer *(Japanese)* 86−38769
X-ray image enhancement in presence of noise, algorithmic process 88−29974
X-ray image processing in small office environment 85−63120
X-ray radiography, fluoroscopy and tomography applications of computers 85−31797
X-ray tomography, real-time electro-optical reconstruction using image intensifier and TV system *(Dutch)* 85−64576
^{201}Tl, developments towards quantitative anal. 87−48054

mercury arc rectifiers
ignitron discharger, high-power pulse modulator appl. 86−40962
ignitron voltage holdoff improvement by wall heating 87−43273
orientation independent ignitron, repetition rate extension, ignitor and trigger circuit study 85−5256

mercury lamps *see mercury vapour lamps*

mercury vapour lamps
AC arc model *(Korean)* 88−18205
afterglow maintained by RF field in Hg arc, persistence 87−66806
compact lamp with two interior fluorescent tubes 85−65601
discharge lamps, metal vapour including high-pressure Hg vapour *(German)* 87−31064
discharge radiators, intensity behaviour during starting phase *(German)* 85−21928
fluorescent lamps, light sources overview 87−72568
high intensity discharge lamp restrike breakdown voltage rel. to preheated cathode temp. 85−65596
high intensity discharge lamps, operation and dimming control using PWM choppers 88−69912
high pressure, lag type operating circuit harmonics anal. *(Japanese)* 85−5489
high pressure Hg vapour lamps, progression to halogen metal vapour lamps *(German)* 87−36236
high-pressure, lead type operating circuit impedance constancy *(Japanese)* 86−52029
high-pressure, particle number and press. determ. 87−5076
horticulture, artificial light and lamp types *(German)* 85−22035
L-43 and L-50 phosphors, comparison of performance for chromaticity correction *(Russian)* 85−16397
physical model and electric cct. *(French)* 88−62747
Poisson equation, axial symmetrical case soln. for potential distrib. in mercury vapour lamp *(German)* 87−54465
production line, high speed fully automatic *(Japanese)* 87−16147
resonance lamp with controlled 254 nm line profiles, transient temp. meas. appl. 88−22832
self-ballasted, high efficacy, operating circuits *(Japanese)* 85−5493
simulation using state variable equations *(Japanese)* 88−11476
spectral modification effects in Hg discharge lamps caused by FeI_2, CoI_2, MnI_2 SbI_3 87−16152
testing techniques for conformance to federal regulations 86−45808
theatre and TV studio light sources 87−43621
thermal balance study for 85−5487
Hg-Tl high press. lamp arcs, partial press. determ. 87−22881
Hg-rare gas positive column discharge model, appl. to compact fluorescent lamps 85−65602

mercury vapour rectifiers *see mercury arc rectifiers*

merged-transistor logic *see integrated injection logic*

merging

meson detection and measurement
CDF, EM calorimeter, small angle regions 88−47984
Cherenkov hodoscopic Pb-glass EM calorimeter characts. 88−61155
Cherenkov total absorption spectrometers for π^0 and η detection 86−65363
cylindrical drift chamber for $K \rightarrow \pi\nu\nu$ decay meas. 88−68225
Freon 13 threshold Cherenkov counter at at. press. 85−48169
gas sampled hadron calorimeter, Monte Carlo simulation 88−29902
hadron calorimeters, e/h ratio, energy resolution 88−22957
hadron sampling calorimetry, physics puzzles 88−22958

meson detection and measurement continued
hadronic calorimeter response meas. in pion and proton beams of 1-10 GeV/c momenta 85−43160
high rate calorimetry with missing energy trigger 88−22959
ion-optical design for 2 GeV K beam line 85−26546
liquid argon calorimetry at HERA, the H1 calorimeter 88−22952
liquid Cherenkov counter to measure muon proportion in 300-460 MeV/c pion beams 85−20814
MARS-2 current sensitive liq. Ar calorimeter 85−20813
pion muon identification in the ALEPH detector using the discriminant analysis 88−22950
SCG1-C scintillation glass detector, response to 4-14 GeV/c pions 85−64465
streamer tube calorimeter test using 1-100 GeV electrons and pions 88−48024
ZEUS expt., hadron test calorimeter performance 88−22955
K^- reemission from light emulsion nuclei 87−29611
η detection using Pb-glass 88−10290
π^0, two-dimensional spectrum reconstruction from γ-spectrum 86−70321
$Bi_4Ge_3O_{12}$ calorimeter with photodiode photomultiplier readouts, performance at energies up to 10 GeV 85−48166
H_2-CO, gas mixture, probability for pion capture 88−10248
H_2-N_2, gas mixture, probability for pion capture 88−10248
NaI detectors, use in pion^0 electromag. form factor meas. 87−41864
NaI π^0 and η^0 detector, energy resolutions by Monte Carlo simulations 87−29506
Pb scintillation calorimeter for electron and pion detection, radiation damage props. 87−14723
Pb-Cu liquid Ar calorimeter 88−29874
Pb-glass hadron calorimeter for shower detection by Cherenkov radiation, particle characteristics 88−54407
Si detectors in EM and hadronic calorimetry 88−22954
Si microstrip counter with VLSI readout for DELPHI microvertex detector 87−41861
U calorimeter with proportional chamber readout, Monte Carlo simulation study 87−41865
U liq. Ar calorimeter, hadron/electron response from 10 to 150 GeV 88−61122
U liq. Ar calorimeter performance 88−22953

meson effects
cancer therapy, three-dimensional scanning system for clinical pi-meson beam 86−38808

voltage controlled tunable IR detectors using MIM structures 87−41509
W-Ni point contact diodes as harmonic mixers in mid-IR, props, and bias depend. 85−51240
AL-Al_2O_3-Al(Ag) MOM tunnel junctions, surface plasmon polariton enhanced photoconductivity 85−35579
Ag/Al_2O_3/Ag tunnel MIMS for visualisation of HF electronic signals 86−41621
Ag-SiO_x-Ag MIM struct., electroformed, in-situ attenuation length measurements in emitting electrodes 88−32961
Al/Al_2O_3:Cu^{2+}/Pb junctions, Cu^{2+} ion electronic transitions, inelastic tunnelling spectroscopy 85−55601
Al/Al_2O_3/Al MIM structures, spatial charge distrib. *(French)* 85−23599
Al/Al_2O_3/Al structures, capacitance and conductivity *(French)* 86−53486
Al/Al_2O_3/Au thin film struct., dielec. props. meas. and equivalent circuit anal. 87−6495
Al/Al_2O_3/Au tunnel junction, electromagnetic modes anal. 87−11490
Al/Al_2O_3/Au tunnel junctions, energetic electron emission 85−6770
Al/AlO_x/Bi, electron tunnelling into Bi under press. 86−21289
Al/Dy_2O_3/Al thin film capacitors, time domain response and AC characts. 88−32962
Al/SiC/Al MIM struct., complex impedance-freq. anal. 88−64356
Al/SiO_{2-y}/Al thin film structure, AC cond. 85−45481
Al/SiO_2/Al(Ni) struct., noise meas. and space-charge limited conduction 85−23598
Al/SiO_x-Bi_2O_3/Al, MIM sandwiches, voltage-current characts. 86−1851
Al/Yb_2O_3/Al thin film capacitors, dielec. and elec. props. 85−28739
Al/poly(ethylene terephthalate)/Al junction, internal elec. fields, space charge mapping 86−67774
Al-Al_2O_3-Ag MIM structs. biased near breakdown voltage, optical emission 87−24982
Al-Al_2O_3-Ag, switching effects and negative resistance 87−67029
Al-Al_2O_3-Ag tunnel junctions, surface plasmons, optical detection 87−53314
Al-Al_2O_3-Al, thin film trilayer structs., capacitance, interface contribution 88−7399
Al-Al_2O_3-Al/Ag(Cu), upper bilayer electrode, differential negative resist. 86−28072
Al-Al_2O_3-Al(Ag), planar tunnel junction photodetectors, electromag. resonance enhanced photoabsorption 87−41510
Al-Al_2O_3-Au MIM structs. biased near breakdown voltage, optical emission 87−24982
Al-Al_2O_3-Au sandwich struct., forming process in high elec. field *(Japanese)* 87−11492
Al-Al_2O_3-Au sandwich structures, forming process 87−67027
Al-Al_2O_3-Au thin film struct., voltage-controlled negative resist. *(Japanese)* 86−28073
Al-Al_2O_3-Au/Ag(Cu), upper bilayer electrode, differential negative resist. 86−28072
Al-AlO_x-Ag tunnel junctions, surface plasmon enhanced photoconductivity 86−67776
Al-AlO_x-Cu, memory phenomena in reactively evap. films, sandwich struct. obs. 88−26009
Al-AlO_x-Pb tunnel diode, $NiCl_2.6H_2O$ soln. phase adsorpt., inelastic electron tunnelling spectra 87−6494
Al-CeO_2/SnO_2-Al MIM struct., co-evaporation prepared dielectric, elec. conduction study 88−39170
Al-CeO_2-Al structs., evaporated insulator films, AC elec. props 88−7400
Al-CeO_2-Al thin film capacitor structures, elec. props. 85−1424
Al-CeO_2-Al thin film, capacitors, AC breakdown, optical micrographs 85−1077
Al-Cu/SiO-Al MIM sandwich structs. I/V characts. rel. to series resistance 86−21288
Al-Dy_2O_3-Al thin-film sandwiches, dielec. polarisation props. 87−24981
Al-GeO_x-Cu, memory phenomena in reactively evap. films, sandwich struct. obs. 88−26009
Al-GeO-Al, switching effects and negative resistance 87−67029
Al-Si_xN_yO-Al thin film form., insulator composition, thermodynamic anal. 86−21292
Al-SiO_x-Pt structures, conduction model 85−45480
Al-Ta_2O_5-Si_3N_4-Pt dual dielec. MIM capacitors, reliability determ. from ramped voltage breakdown expts. 85−6771
Al-V_2O_5-Al, thin film devices, negative capacitance 87−74139
Al-oxide-Ag(Au) MOM diodes, light emission, role of junction plasmons 85−55608
Al-oxide-AgAu(AuAg) MOM diodes, light emission, role of junction plasmons 85−55608
Al-perylene-Al MIM struct., elec. props., aging and annealing effects 88−71374
Al-stearic acid-Al/Au thin-film capacitors, dielec. memory switching 85−40555
Au/AlO/Al tunnel junction, optical consts. of Au film, light emission studies 85−18188
Au/ZnO/ZnSe/In struct., insulating and semiconducting ZnO layer, tunnelling studies 86−67772
Au-NaCl-NaBr-Au epitaxially fabricated capacitor, dielectric props. nonlinearity, harmonic distortion 87−74138
Au-SiO_x-Au MIM struct., electroformed, in-situ attenuation length measurements in emitting electrodes 88−32961
(Ba,Sr)TiO_3 film metal-dielec.-metal system, polarisation switching 87−24979
(Ba, Sr)TiO_3 film, planar MOM structure contact characts. 87−46275
C films, plasma deposited, effect of prep. conditions on elec. props. in MIM and MSM systems 88−44607

metal-semiconductor-metal structures
cooling thermoelements, influence of size effects 87−78965
fluoroaluminium phthalocyanine, photovoltaic solar cells 85−27635
heat flux effect on I-V charact. *(German)* 85−40557
LB films of *N*-(4-*n*-dodecyloxyphenyl) and *N*-(1-pyrenyl) carbamates of 2-bromo-5-(2′-hydroxyethoxy)-TCNQ, towards organic rectifiers 87−60212
LCD panel using nonlinear Te-$AsSe_x$-ITO pixels *(Japanese)* 87−56763
light emission from cylindrically structured tunneljunctions 86−36351
linear conductance of short semiconductor structures 85−12059
metal-$Bi_{12}GeO_{20}$-metal struct., photocurrent growth kinetics 85−12060
metal-$Bi_{12}SiO_{20}(Bi_{12}GeO_{20})$-metal struct., illumination effect on voltage-current charact. 85−45482
metal-phthalocyanine-metal thin-film interdigital gas sensor elec. charact. 88−22567
monolithic four-channel photoreceiver integrated on GaAs substrate using MSM photodiodes and FETs 86−29017
photodetectors, high sensitive and fast, transparency at 820 nm 88−74405
potential gradient and carrier density *(German)* 85−1426
quasi-Fermi levels, distance depend. 85−18187
$Al/C/SiO_x/Si/Al$ structures, elec. conduction 86−53485
Al/CdS/M (M=Ag,Cu,Au), CdS as solid electrolyte for thin film galvanic cell 86−47433
Al/GaSe/Al thin film struct., photostimulated polarisation and depolarisation 85−12061

metal-semiconductor-metal structures continued
Al/n-Si/Ni Schottky barrier diodes pulsed laser irrad. effects *(Russian)* 85−12241
Al-Chl-Cu system, photovoltaic properties. 86−53484
Al-Si-Al, switching effects and negative resistance 87−67029
Al-ZnS-Al, Schottky barrier, electroreflectance study of elec. field distrib. *(French)* 86−21291
Al-amorphous GaAs-Al sandwich structures, semicond. density of states, SCLC, resist. meas. 86−21144
$a\text{-}As_2Se_2Te$ diodes with $Al/a\text{-}As_2Se_2Te/Sb$ struct. 85−61791
Au/ZnO/ZnSe/In struct., insulating and semiconducting ZnO layer, tunnelling studies 86−67772
$Au\text{-}Bi_{12}GeO_{20}\text{-}Au$, short-wave light illuminated, photocurrent kinetics 87−11491
$Au\text{-}CdIn_2S_2Se_2\text{-}In$ Schottky diodes, I-V charact. 87−17747
$Au\text{-}Sb_2S_3\text{-}Au$, space-charge limited cond., dark cond. temp. depend., trap density 87−66932
Au-ZnO-Au-fused quartz structure, I-V characteristics and breakdown voltage 85−55605
Bi-GaS(GaSe)-Bi junction, inelastic electron tunnelling spectra investig. 86−53488
C film devices with Ag electrodes, O_2 press. effect on VCNR and electron emission 85−29066
C films, plasma deposited, effect of prep. conditions on elec. props. in MIM and MSM systems 88−44607
$Cd_{1-x}Mn_xTe$, Fowler-Nordheim tunnelling mag. field depend. in metal-semicond.-metal struct. 86−14971
CdTe thin film solar cells fabricated by evaporation *(Japanese)* 87−22758
$Cr/a\text{-}Si:H/Au$, Schottky diodes, RF sputtered, elec. props., annealing effects 88−13064
GaAs IMSM photodetectors, MESFET compatible 87−49122
GaAs four-channel optoelectronic integrated circuits 87−46727
GaAs, integrated photoreceivers using ion implanted IC technology, on-chip charactn. 88−20522
GaAs metal-semiconductor-metal photodiodes, low dark current using WSi_x contacts 86−68396
GaAs monolithic four-channel photodiode/amplifier receiver array 87−18867
GaAs, monolithic integration of MSM photodiode and preamplifier 85−18819
GaAs, photoreceiver, high-speed, monolithic integration using metal-semiconductor-metal photodiodes 86−15588
GaAs-Au metal-semiconductor-metal photodetector, photocurrent enhancement due to ultrasmall Au islands 88−42089
GaInAs interdigitated MSM 1.3 μm photodetector, MBE growth on GaAs substrate 88−42100
Ge_xTe_{1-x} based sandwich struct., fast switching 87−53312
In/GaAs:Cu/In struct., I-V charact., carrier recomb. and generation, impurity thermionic field ionisation effects *(Russian)* 87−11493
In-GaAs:Cu(Cr)-In high voltage avalanche S-diodes, pulse radiation study during switching *(Russian)* 87−12323
InGaAs based high performance lateral PIN photodetector 85−26327
InP based high performance lateral PIN photodetector 85−26327
Nb-InAs-Nb junction, inversion layer proximity effect, superconducting transistor appls. 88−33572
Ni-lead phthalocyanine-Au barrier structures, capacitance-voltage charact., influence of series resistance 85−61790
Pb/Si/Pb step edge supercond.-semicond.-supercond. Josephson junctions, fabrication and props. 85−46060
Pb-GaS(GaSe)-Bi junctions, inelastic electron tunnelling spectra investig. 86−53488
$Pt\text{-}CdInGaS_4\text{-}In$ surface-barrier structs., photovoltaic effect and SCL currents 87−26175
$Pt\text{-}SnO_2\text{-}Ti$ photoanodes, stability, performance charact. 86−71033
Si, circular wafer, edge effects on bulk resistance 87−32232
Te/Se/Au(Cd) structures, photocond. study 85−55607
$Ti\text{-}WO_3\text{-}Ir$ thin film sandwich device struct., I-V charact., nonlinear and hysteresis effects 86−21290

Ni-Si bilayered films, chem., elec., and struct. charges upon annealing 87−11432
NiCoFe multilayer films, magnetoresistivity, effect of annealing, device appl. 88−71897
NiCr resistive films, high stability, production, plasmatron sputtering 85−16987
NiCr:Si stable thin film resistors, structural and elec. props. studies 87−73802
$NiSi_2$/Si interface Schottky barrier height and metallic layer elec. transport props. meas. 86−53461
$NiSi_2$-Si, interfacial at. struct., Schottky barrier height meas. 86−58324
Pb, UV-laser, photodeposition for repair of X-ray lithography masks 85−35047
Pb-In-Au fine-grained films for Josephson IC, microstructure 86−26887
Pd films on Si (111) surface, EELS study, film resist. 85−11902
Pd, metallisation using decomposition of palladium acetate films with microfocused ion beam 87−25155
Pd, on Si, epitaxial silicide form., initial nucleation processes and effects 87−10459
Pd/Sn/Au-n-GaAs ohmic contacts, electroless deposition and elec. characts. 86−464
Pd_2Si, rapid thermal annealing 85−45500
Pt, reactive sputtering in O_2 atm. using cylindrical magnetron, struct., optical and elec. props. 85−10804
Pt thin films, adsorption-induced conductance changes 88−9932
Pt-Si reactively sputtered films, struct. and elec. charact. 86−21446
Pt/Pd/TiO_2 gas sensors, adsorption-induced conductance changes 88−9932
PtSi contact metallurgy by different formation processes 87−11709
S/Si, thin film on anisotropic substrate, rapid nondestructive thickness meas. 86−24753
Sb-Se-Bi film, erasable optical disc media 87−38726
Si solar cell welds, Ag foil interconnector low-cycle fatigue tests 87−78937
Sm mixed valence overlayers on Si (111) and GaAs (110), semiconductor oxidation enhancement 87−38148
Ta film on Si, $TaSi_2$ formation, effect of N and O impurities 85−34639
Ta films, maskless ion beam assisted deposition 87−23718
Ta sputtered film on Si-SiO_2 and Si-SiO_2-poly Si substrates, fabrication and props. obs. *(Slovak)* 86−26880
Ta/Si multilayers, rapid-thermal-annealing, $TaSi_2$ form., TEM and X-ray diffr. studies 85−50277
Ta-Si films, ion bombardment induced mixing, temp. sensor appls. 86−60215
Ta_xCu_{1-x} amorphous thin-film diffusion barriers on GaAs, thermal and structural stabilities 87−24921
$TaSi_2$ film characterization, prep, by sputtering from compound targets 85−44788
$TaSi_2$ films, plasma enhanced CVD, resist. rel. to annealing 85−10815
Tb-Co thin films preparation for erasable optical memory disk *(Japanese)* 87−5510
Te, optical recording, ablative writing process, hole formation mechanism 85−35368
Te targets in heavy ion beams 85−59135
Te-Ge-Sn-Au phase change recording film for optical disk 87−38724
$Te_{87}Ge_8Sn_5$ films, reversibility and stability for optical data storage appl. 85−41100
Ti film charactn. for $LiNbO_3$ integrated optic devices 87−32999
Ti film on Si, $TiSi_2$ formation by electron beam annealing 85−34638
Ti films, magnetron sputtered, $TiSi_2$ and TiN formation during N_2 annealing 86−21401
Ti high purity sputter target for VLSIs 88−13522
Ti, on Si, epitaxial silicide form., initial nucleation processes and effects 87−10459
Ti sputtered coatings, on Si, silicide form. by halogen lamp annealing, Rutherford backscatt., X-ray diffr. and sheet resist. meas. 85−50272
Ti stress temp. depend. 86−28452
Ti/Co/Si thin film ternary systems, nucleated products 86−40752
Ti-Pd-Au films for TaN thin film resistors, high density packed resistor module 88−50541
Ti-Si interface, laser irradiated, silicide formation 87−24937
Ti-Si thin film interaction, RBS and X-ray diffr. study *(Chinese)* 88−7366
Ti-V amorphous alloy films, UHV deposition system 87−65559
TiFe amorphous alloy thin films, heat treatment effects 87−52210
TiS_2, CVD thin film form. and characterisation *(French)* 85−44774
$TiSi_2$ films, laser-induced CVD 86−20087
$TiSi_2$ formation on Si by rapid thermal annealing 87−11707
$TiSi_2$ formation on Si:As 87−6614
$TiSi_2$, rapid thermal annealing 85−45500
$TiSi_2$ thin films, fast radiatively processed, elec. characts. 86−21248
Ti_xW_{1-x} films, diffusion barriers against Al-Si interdiffusion 87−60358
V film as diffusion barrier between PtSi and Al 87−11435
W, CVD and etch back process, rel. to adhesion and contact props. to $TiSi_2$ 87−60380
W CVD films, VLSI metallisation appls. 87−5497
W CVD films, adhesion to SiO_2 87−59002
W CVD films, nucleation on insulators and surface reaction with Si 87−5489
W CVD films, plasma etching for VLSI appls. 87−60349
W, CVD, high aspect ratio hole filling for multi-level interconnection 87−32450
W, CVD nucleation and growth for VLSI metallisation appls. 88−26096
W, CVD, reaction kinetics of H_2 reduction of WF_6 88−49874
W LPCVD blanket deposition using TiN and Al as glue layers 87−59003
W, LPCVD deposition on Si, film thickness depend. on native oxide thickness 86−67815
W LPCVD film struct., IC appls. 87−31567
W LPCVD films by WF_6/Si reduction method, influence of deposition variables 87−5491
metallic thin films continued

metallurgical topics in silicon device interconnections: stresses 88−13174
MIC metallised substrate with high-reliability, development and failure rate anal. *(Japanese)* 88−7051
microcircuit modification using focused ion beams 88−64682
microelectronic materials, characterisation by SIMS, book contrib. 87−24738
microelectronic materials, surface and thin film anal. 88−57756
microelectronics, conf., Anaheim, CA, USA (Nov. 1985) 86−52131
microstrip interconnections in Si integrated logic circuits, freq. and time domain anal. 85−7057
microstrip lines with finite metallisation thickness, appl. of projection method to mode-matching soln. 88−20968
microwave power transistor with stepped electrode struct. and TiN diffusion barrier 86−41325
microwave thick-film metallization technology 87−73701
microwave thin film ICs, metallization effects on microstrip loss *(Hungarian)* 85−61450
mineral fibre reinforced polyamide, surface pretreatment and electroplating *(German)* 85−6026
MIS structs., negative bias temp. instability, effects of processing conditions 88−44704
MLC, process for forming conductor patterns on ceramicsubstrates 86−35242
Mo/TiW contact for VLSI applications 85−50464
Mo/WSi_x double layer gate electrodes, profile controlled etching 86−35618
MODFET ohmic contacts, Al redistribution 86−28356
monitor devices and procedure to identify process sourcesof high contact resistance in lift-off metallization 86−2080
MOS capacitors, AlSi gate, postmetallisation annealing 86−2079
MOS devices, submicron, self-aligned Ti silicidation by rapid lamp annealing 85−50463
MOS IC, gate metallisation, book contrib. 88−57816
MOS IC, ohmic contact metallisation, book contrib. 88−57514
MOS LSI, dual silicides for gate channel definition 86−35867
MOS LSI, highly reliable Mo gate and interconnection technology 86−21865
MOS memories, plastic encapsulated, epoxy degradation induced Au-Al intermetallic void form. 85−7102
MOS submicron device fabrication by self-aligned nitridation of silicide 86−47840
MOS VLSI, nonlinear nonuniform RC transmission lines monotone sensitivity 85−23959
MOS VLSI, refractory metals and silicides for gate metal and interconnect appls. 85−35197
MOS VLSI dual layer metal process manufacturability 86−28525
MOS VLSI self-aligned silicide technology using $TiSi_2$ material 86−28526

metallisation continued
MOS VLSI silicide interconnection topology *(Slovenian)* 86−2370
MOS/VLSI, silicide technology for interconnects and gates, expt. study *(Spanish)* 85−29340
MOSFET characts. degradation caused by hot carriers, influence of internal stresses in W-gate electrodes 87−45947
MOSFETs, high-performance, realisation using 1 μm CMOS technology 85−7101
multi-level metallisation, method for adjusting conductive stud surfaces to same level 86−9204
multichip/wafer scale interconnects, modelling 87−67160
multilayer ceramic process for high density interconnections in LSI chips 86−2336
multilayer CMOS device fabrication technologies 86−41979
multilayer IC conductor structure, technique for elec. shorting minimisation between adjacent metal layers 85−29285
multilayer interconnection system for submicron VLSI using multilayered dielecs. of SiO and polyimide 87−25170
multilayer metallisation, photoactive polyimide development characts. 87−53587
multilevel interconnect fabrication, processing requirements 87−1687
multilevel interconnect processes charactn. using comprehensive test chip 87−67158
multilevel interconnect technology, developments 88−39261
multilevel interconnection, minimal current crowding and local heating, stud and via struct. optimisation 87−67159
multilevel interconnection form., SiO_2 planarization by two-step RF bias-sputtering 85−50414
multilevel interconnection lines, pulse propag. characts., anal. and modelling 87−38364
multilevel interconnection system for submicron VLSI using multilayered dielecs. of plasma SiO and polyamide 87−45820
multilevel interconnection technology for bipolar and MOS VLSI 85−50462
multilevel interconnection technology for VLSI 88−71458
multilevel interconnection with studs and vias, current density and temp. distribs. 88−1569
multilevel interconnections for wafer scale integration 87−25420
multilevel metallisation, electron beam three-mark registration for vertical wiring processes 85−1534
multilevel metallisation, planarisation process using AZ protective coating as sacrificial layer 87−67165
multilevel metallisation, spin-applied polysiloxane dielectric 88−57504
multilevel metallisation process using dual dielectrics for interlayer, bipolar LSI appls. 85−6873
multilevel metallisation using doublecoat planar polyimide process 85−6858
multilevel metallization schemes, book contrib. 88−57515
multilevel metallization with pillar interconnects and planarization 88−71448
multilevel VLSI parallel metallisation parasitic capacitances, finite difference soln. 86−21436
multiple chip module packaging on Si substrate 88−18500
multiple metal systems, test stripes, electromigration evaluation, accelerated testing 85−6871
n^+-p junction solar cells, elec. behaviour, effect of nonohmic metal-semicond. contact 88−75948
nanometer molecular lithography for deposition of metal films 86−35612
nanometre scale metal wire fabrication, SEM, electron-beam lithography 86−21454
new ASIC array profit from old ones 88−38448
NOR logic PMOS gate array, educational introductory microelectronic lab. project 87−58596
novel multilevel metallization technique for advancedCMOS and bipolar integrated circuits 87−1788
ohmic contacts preparation on CdTe specimens, Au and Cu films deposition 86−15074
ohmic contacts to modulation-doped structs. by halogen lamp annealing 86−53444
on-chip picosecond time-domain measurements for VLSI and interconnect testing using photoconductors 85−40812
optical fibres, resin coated, electroless Cu plating, bending strength 85−24328
optimal interconnection circuits for VLSI minimising propag. delays 85−40656
optimized planarization process for a multilayerinterconnect 87−1723
organic electrophotographic film, hole defects *(Russian)* 86−28970
organogold films, focused ion beam induced fine patterns 88−13175
packages with thin photopatterned dielec. and Cu metallisation 87−65213
packaging, conference, Orlando, FL, USA (Oct. 1985) 86−45937
packaging, thin films and metallo-organic deposition 88−37987
palladium acetate thin films, laser direct-write metallisation 87−32442
parasitic capacitance calculations for VLSI multilevel interconnection systems 85−40860
parasitic capacitance of wires and junctions, computation 85−40859
parasitic capacitances of multilevel skewedmetallization lines 86−28233
pattern form. in IC by electron beam exposure of organometallic film 87−10503
patterning and etching methods, book contrib. 88−57513
PC metallisation technique using liquid polymer ink *(French)* 85−11779
PCB etchback and desmearing processes and permanganate process trends 88−64105
PCB fabrication, electroless Cu alternatives 87−17503
PCB galvanic metallisation, production quality improvement *(Russian)* 86−35213
PCB hole coating by laser-electrical method *(Russian)* 86−14686
PGSG films planarisation process for 2 μm metal interconnect process over severe topography 85−40661
photo-initiated deposition and etching of materials relevant to semiconductor devices 88−447
photo-patterning and RIE of Al and Al-alloy for VLSI CMOS 86−21869
photoprocesses and thermoprocesses in laser induced chemical reactions at semiconductor surfaces 88−40302
Photovoltaic Specialists Conf., Kissimmee, USA (May 1984) 85−60662
pillars−the way to two micron pitch multilevel metallisation 85−40660
planar devices, ohmic contact judgement, circular transmission line model extrapolation *(Chinese)* 87−32321
planar hybrid interconnection technology 87−60031
planar hybrid interconnection technology for high density packaging 88−1257
planar vias by ion implantation 87−67150

metallisation continued
planarisation and via etching for step coverage in 5 μm pitch CMOS multilevel metallization 85−40851
planarisation of multilevel metallisation processes, review 88−13182
planarisation of single- and multi-layer structs., materials issues 88−1575
planarisation process using spin-on-glass 87−67147
planarised CMOS double metal structures, statistical anal. 87−1789
planarised oxide with sacrificial photoresist, etch rate sensitivity to pattern density 87−67138
planarising spacer technique for double levelmetallisation 87−1786
planarization process for double metal CMOSusing spin-on-glass as a sacrificial layer 87−1787
plasma enhanced CVD oxide for CMOS double level metal processing 88−7743
plasma etch process for VLSI using statistical exptl. design 87−25147
plasma generator for metal deposition, with semi-self-maintained vacuum discharge 88−31854
plasma planarization with a non-planar sacrificial layer for VLSI multilayer metallisation 85−40850
plastic article metallisation by vacuum evaporation *(French)* 87−321
plastic electronic housings, high vacuum Al metallising for EMI/RFI shielding 87−10184
plastic encapsulation for Al triple track chips, temp.-humidity-bias tests at 130°C and 85% RH 87−51872
plastic-moulded semiconductor devices, Al metallisation, stress-induced deformation 86−15078
platable Ag metallisation for SMT 88−1182
plating uniformity improvement for magnetic bubble devices 85−7164
PMMA resist exposed with scanning tunnelling microscope, lift-off metallisation 88−39255
polyimide, via hole plasma etching optimisation for overlay interconnections 87−38139
polyimide films for isolation in multilevel metallisation, physical characts. comparison 87−335
polyimide lift-off for submicron metallisation patterns 86−21455
polyimide multilevel interconnect LSIs, improved moisture resist. using Al-Si metallisation 86−15091
polyimide-Cr films, intrinsic adhesion, XPS and TEM study 85−12221
polyimide-isolated three-layer metallisation system for bipolar gate arrays 86−28475
polysilicon interconnects, cond. enhancement with self-aligned metal 86−53569
polysilicon interconnects, stochastic geometry effects 87−6615
polysilicon-$CoSi_2$-Si sandwich structs. for contact metallisation appls., stability, 600 to 950°C 88−13004
polyvinyl butyral in solar cells, discoloration in real and simulated solar environments 85−5385
polyvinylidene fluoride, piezoelectric and conductivity when doped 85−22558
power MESFETs with Ti/W/Au metallisation, failure mode anal. 86−41803
protective coatings, reactive magnetron sputtering, microelectronics appl. 87−16656
pulsed current sources for electromigration research in metallisation 87−16943
PVD metallization of high aspect microstructures with amultiple cycle evaporation/sputter etching process 87−1458
PWB fully additive fabrication process 87−1085
rapid thermal annealing, transient reflow of PSG and BPSG 87−1795
rapid thermal sintering process, free-carrier absorption effects 87−38013
recessed metal schemes, reverse pillar and maskless contact 88−71457
refractory metal deposition, ultra-high vacuum compatible electron source 86−7832
refractory metal silicide films by planar magnetron cosputtering 88−24791
refractory metal silicide ohmic contacts and shallow junctions, form. by ion-beam mixing and rapid thermal annealing 86−21459
refractory metal silicides, interconnects and metallurgical contacts in semicond. devices 85−23714
refractory metal silicides, sputter deposition from cold-pressed vacuum-sintered targets 86−62263
refractory metal silicides for VLSI, Auger analysis 85−50681
refractory metal silicides for VLSI, conf., San Juan Bantista, CA, USA (May 1984) 85−23575
refractory metal sputtered films, diffusion barrier props. 87−60379
refractory metals and silicides, multilayer interconnection appls. in VLSI 86−58498
refractory metals and silicides, sputtering targets develop. 87−59008
refractory metals and silicides for VLSI, conf., San Juan Bautista, CA, USA (May 1986) 87−22959
reliability physics, conf., Monterey, CA, USA (April 1988) 88−55822
reliability physics, Conf., Orlando, FL, USA (March 1985) 86−13299
reliability physics, conf., San Diego, CA, USA (April 1987) 88−43
relieving the effects of stressed thin films 85−45617
removal of metallisation stripes from processed wafers, technique 85−40657
resistance of interconnections, mixed mode calc. method *(Spanish)* 88−64686
RF-DC coupled mode bias sputtering for ULSI metallization 88−71720
RLA 160 linear array using thin film resistors and double-layer metallisation 87−45459
scaled PECVD oxide interlayer dielectric for CMOS double-level-metal processing 87−1783
Schottky diode, distributed, high-current I-V charact. 85−6886
Schottky diodes, barrier height enhancement, high temp. annealing 88−44733
self-aligned metallization for MBE grown bipolartechnology 86−53565
self-aligned nitride-polyimide double step via hole 85−29168
self-aligned passivation process for non-self-passivatingconductors 87−6582
self-aligned refractory silicides or refractory metals for VLSI appls. 87−25160
self-aligned silicides for VLSI appls., alternatives for metals, review 87−18290
semiconductor, metal step coverage, failure characteris. techniques 85−55741
semiconductor, UV laser induced metal deposition from electroplating solns. 88−39272
semiconductor devices, corrosion evaluation of metal films patterned byreactive ion etching 86−21461
semiconductor devices, LPCVD metallisation, review 85−45621
semiconductor lift-off steps, surfactant/cosolvent additives to N-methyl-2-pyrrolidinone 85−1535
semiconductor manufacturing, photolithography, CVD, etching, ion implantation and metallization 88−71376
semiconductor packaging, wafer back metallisation 88−19854
semiconductor substrate contact, trench-isolated, techniques 86−35613
semiconductors, metallisation by photochem. deposition, surface science 86−53568
shallow junction technology, metal contacts process 86−15073
shallow semiconductor region contact, stability 85−1539
sheet resistance modifications underneath contact, effect on contact resist., appl. to cross Kelvin resistor 88−39132
shielded coplanar waveguide with thick metal coating, quasistatic and hybrid-mode anal. 87−61422
shielded microstrip lines with finite metallisation thickness, anal. using point matching method 88−66144
short and open ccts. programming in IC by current pulse appl., expt. study 87−53618
Si contacts formed from spun-on metallo-organic solutions 85−34888
sidewall tapering of plasma etched metal interconnects 87−1693
silicide contacts, appl. of thin alloy films 85−23562
silicide formation, phase separation and nucleation, RBS, AES and SIMS studies 86−14939
silicide metallisation technology advances 86−9061
silicide oxidation, thermodynamics and kinetics 87−11679
silicide process with multilayer formation 85−40916
silicide technology for VLSI interconnect 86−2083
silicide-Si bilayered structs., dopant redistrib. 88−26044
silicides, advanced interconnect technology 88−39252
silicides, co-deposition in VLSI, elec. resist. 86−63213
silicides, rapid thermal annealing 87−11711
silicides as contacts and gates in LSI technology 86−2085
silicides for VLSI technology, material props. 87−38168
silver metallo-organic thick metallisation for Si solar cells 86−53225
single level conducting films in double level metal process, defects anal. 87−11700
single-chip NMOS AGC amplifiers for Gb/s lightwave systems *(German)* 87−59213
SiO_2 interlayer dielectric, in situ planarised PECVD layer 87−1705
sloped via formation in polyimide by RIE 85−40645
SMD, bond failure wire crater 88−57776
solar cell, interconnect welding by Cw CO_2 laser beam, heat transfer mode 86−13028
solar cell metallisation grids, optimum transparency factor determ. 87−36148
solar cell production improvement by using cryopumps in metallisation vac. chambers 86−26296
solar cells, thick-film metallization 86−33683
solid-state devices and materials, conf., Tokyo, Japan (Aug. 1986) 87−22999
solid-state devices and materials, conf. Tokyo, Japan (Aug. 1987) 88−18337
SOS ICs metallisation, TiN (TiO_xN_y) metallisation 88−20158
specific contact resist. meas. using vertical Kelvin test struct. 86−50195
specific contact resistivity determ. from contact end resistance meas. 85−45619
SPIDER−a CAD system for modeling VLSI metallization patterns 88−13479
spin-on-glass dielectric planarization for double metalCMOS technology 87−1794
spin-on-glass etchback planarisation, process window calcs. 87−67136
spin-on-glass planarisation technology, defects 87−67139
sputter clean process, equipment modifications 86−41698
sputter deposited coatings, microstructure, IC appls. 87−23713
sputter deposition technology for VLSI device fabrication, book contrib. 86−7844
sputtered films, contact step coverage, 2D and 3D simulations 87−60360
stability, microscopic control 87−74222
stacked thick film package for hybrid microcircuits appl. 85−33189
stress relief of high stress barrier metallurgy by using composite glass cap 86−35615
strip heater for ohmic contacts to semiconductors, microprocessor-controlled 86−21456
submarine optical repeater ICs using high reliability process technology 85−37037
Submicron Bipolar Technology II project 88−71752
submicron CMOS, developments in advanced process technology, review 87−25574
submicron CMOS devices, process technologies advancement 86−58603
submicron CMOS double level interconnection system 88−71806
submicron contacts, technology and modelling 88−7525
submicron contacts, technology and modelling 87−67162
submicron devices, self-aligned contact schemes for source-drains 88−39264
submicron gap planarization with photo CVD and spin-on-glass multi-layers for multi-level interconnections 88−7523
submicron MOS devices by self-aligned nitridation of silicide 87−25561
submicron MOSFET, W gate, with 10 nm gate oxide 88−7615
submicron optical lithography utilizing a negative deepUV resist MRS 86−2081
submicron VLSI production, equipment requirements 85−7027
submicron wiring technology with W and planarisation 88−71454
super integration using CMOS technology and CAD software 86−2421
superconducting interconnect effect on IC performance 88−39566
surface mounted component metallisation, soldering considerations 87−51863
surfaces, excimer laser in situ treatment, W metallisation, Schottky diode charcts. 88−7514
synchrotron radiation mirror, lacquer-coated, irrad. with undulator light, surface heating 87−26119
TAB, transferred bump, film-carrier-assembly technology *(Japanese)* 86−1602
TAB die, metal corrosion study 86−14765
tape bonding appls. for high lead count devices 85−55939
thermosonic wire bonding on single-layer polymer hybrid integrated circuits (POLYHICs) 87−45472
thick film hybrid microelectronics, solderability aspects *(German)* 87−73942
thick film lift-off technique for HF interconnection in wafer scale integration 86−28449
thick film metallisation bondability, geometrical and morphological influences, expt. study 86−53234

metallisation continued
thin film interconnects, electromigration kinetics, TRACE and MTF studies 88−26101
thin film metallisations, indentation techniques for mech. props. evaluation 86−15079
thin film metallisations, phase equilibria 85−23718
thin film metallisations, thermodynamics, use of equilib. phase diagrams 86−28241
thin film microwave cct. fabrication using selective plate-up process 87−24463
thin films, plasma-enhanced CVD for metallisation appls. 87−5487
thin films, whisker growth during electromigration 87−60381
thin metal film adhesion to substrate, enhancement 87−32439
thin-film interconnections, electromigration detection, LF noise meas. 86−21435
